Direct Hay Weighted Average Report for week ending 5/20/2022

Volume			
	This Week	Last Reported (5/2/2022)	Last Year
Tons:			
Hay	1912	1440	0
Total	1912	1440	0
Bales:			
Hay	1449	325	0
Total	1449	325	0

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to the last report: Hay continues to sell off the old crop as they try to prepare for the new crop. The much-needed moisture continues to move across the state of Oklahoma which has helped and hurt parts of Oklahoma trying to prepare for their new crop. Moisture has helped crop production in Western Oklahoma but unfortunately has hindered parts of the east by receiving too much rain in a short amount of time. Due to the having so much rain it has slowed down production in the east. Positive note the rain has allowed the parts of central and eastern Oklahoma to be out of the drought conditions. Western Oklahoma is still in much-needed rain to help crops to grow from hay, wheat, and water to fill ponds for cattle. Western Oklahoma continues to be the extreme to exceptional drought conditions.

*** The next report release will be June 3rd. ***

Central						
Hay (Conventional)						
Alfalfa - Premium/Supreme (Trade/Per Ton)						
	<u>Qty</u>	<u>Price Range</u>	<u>Wtd Avg</u>	<u>Freight/Use</u>	<u>Description</u>	<u>Crop Age</u>
