Direct Hay Weighted Average Report for week ending 9/25/2020

	Volume		
	This Week	Last Reported (9/14/2020)	Last Year
<b>Tons:</b>			
Hay	725	725	0
Total	725	725	0

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last week: Alfalfa and grass hay steady. Moderate demand currently for all types of hay. Dairies are starting to show some resistance to the price of alfalfa, which is resulting in few trades currently. Feedlots that buy grass hay to start calves on feed haven't really entered the market yet which is keeping the grass hay market rather slow. Dry, drought conditions remain which has allowed some very high quality hay to be made yet, especially on fourth cutting alfalfa. Soybean harvest in full swing this week along with the starting of dry corn harvest as well.
