

Egg Markets Overview

A weekly publication of the USDA AMS Livestock and Poultry Program, Livestock, Poultry, and Grain Market News Division

July 04, 2025

Negotiated wholesale prices for graded loose caged eggs are firm on moderate to good demand for light to moderate offerings and mostly moderate supplies. Trading is moderate. Wholesale prices for national trading of trucklot quantities of graded, loose, White Large shell eggs increased \$0.02 to \$2.56 per dozen with a steady undertone. The wholesale price on the New York market for formula trading of Large cartoned shell eggs delivered to retailers held at \$3.05 per dozen with a steady undertone. In the major Midwest production region, wholesale prices for Large, white, shell eggs delivered to warehouses decreased \$0.02 to \$2.94 per dozen with a steady undertone while the price to producers for Large cartoned shell eggs was down to \$2.76 per dozen. The California benchmark for Large shell eggs rose \$0.20 to \$3.75 per dozen with a firm undertone. Delivered prices on the California-compliant wholesale loose egg market increased \$0.15 to \$3.38 per dozen with a firm undertone. Demand is in a full range, mostly moderate to good, for light offerings. Supplies are light to moderate on moderate trading.

Demand for shell eggs rebounded over the past week as consumers responded favorably to retail feature activity over the past week ahead of the July 4th holiday that was very active and at very attractive price levels, certainly when compared to the sticker shock experienced in late winter. Similarly, increased promotional activity is continuing into the current ad cycle, albeit for specialty shell eggs but at price levels with the potential to stimulate additional interest. Demand from egg product manufacturers remains light with many content to work from stocks and owned-production while others are drawing on imports to support some of the most active weekly processing rates in well over a year. Line speeds are varied in anticipation of the holiday disruption.

Feature activity explodes for the Fourth with very active shell egg promotions occurring across the nation for a range of types. Conventional caged egg featuring slows from its recent pace and the average ad price rose \$0.97 to \$3.57 per dozen on limited activity. Featuring of [UEP-certified](#) cage-free shell eggs declines by half but remains at a fairly active level accounting for 20% of all shell egg ads this week with brown-shelled offerings taking center stage. The average ad price increases \$0.12 to \$3.19 per dozen. Features for pastures shell eggs, both organic and non-organic, dominate promotional activity this week with a major national retailer providing celebrants with an attractively-priced deal sure to spark interest.

The overall shell egg inventory drew down 7% while the national inventory of Large class shell eggs saw a 12% decline. Stocks of Large shell eggs in the key Midwest production region decreased 23% as shell eggs cleared into marketing channels to support very active retail promotional campaigns targeting the approaching holiday weekend. The inventory share of Large class shell eggs declined 2.5% to a 47% share of all shell egg stocks on inventory at the start of the week. Stocks of lighter-weight shell eggs continue to hold or increase as the effects of a combination of scheduled flock replacement and oppressive

heat and humidity over large portions of the key production regions. Stocks of cage-free eggs were down 12% as eggs cleared to support very active features for cage-free eggs into this week. Stocks of nutritionally-enhanced eggs declined about 11.5% for similar reasons. The inventory of organic shell eggs gained one percent while stocks of eggs for breaking declined nearly 2.5%. Total estimated table egg production was unchanged from last week but was down a half percent from last year to a year-to-year deficit the equivalent of 10.2 million cases in total.

The average national wholesale price for breaking stock declined \$0.08 to \$1.85 per dozen with a weak undertone. Demand and offerings are light with moderate supplies. Trading is moderate while processing schedules vary as breakers adjust for the holiday break. The volume of eggs processed last week increased 2.5% and the share of weekly table egg production was up one percent to 36%. Cage-free stock accounted for 36% of eggs processed last week, a one percent increase in share. Production of whole egg rose 6.5% while production of egg components declined, whites by nearly 6.5% and yolk by 2%. Dried egg production increased 4.5% and the production of inedible egg was down just over 1.5%. Breaking yields without inedible declined a quarter pound to 41.67 pounds per case broken..

Wholesale prices for certified liquid whole eggs are too few to publish with a weak undertone. Demand is light for light to moderate supplies and light offerings. Trading is slow to moderate. Wholesale prices for whole frozen eggs declined \$0.10 to \$2.30 per pound while prices for frozen yolk are down \$0.15 to \$1.70 per pound. The undertone is weak with light demand for light offerings and light to moderate supplies. Trading is slow to moderate. Prices for dried eggs remain too few to publish with the price of dried whole egg last quoted at \$25.00 per pound, dried yolk at \$21.00 per pound, and dried albumen at \$30.00 per pound. The undertone is steady to weak with light demand. Offerings are light with light to very light supplies and slow to moderate trading.

According to NASS, the May monthly volume of frozen eggs in storage increased 2% from April but remains 51% below the prior year. Stocks of whole frozen egg increased 10%, 46% below last year and the share of whole egg stocks gained 3% to a 44% share of total frozen stocks. Stocks of frozen yolk increased 4% and were 40% below the level from last year. Frozen egg whites gained 16% to a level 57% below last year. Stocks of unclassified eggs declined 6% from last month and were down 54% from last year. The share of unclassified frozen stocks declined 4% to a 46% share of total frozen stocks.

As of June 1, 2025, the estimated U.S. non-organic commercial cage-free table egg flock increased one percent to 110.7 million, 38.8% of the current U.S. table egg flock. This represents a 9% increase over the number of non-organic, cage-free table egg layers in June 2024 and a 5.6% increase in the share of the total commercial table egg flock. The USDA certified organic table egg layer flock in June was up slightly from May to 7% of the total layer flock. The ratio of caged to cage-free layers currently stands at 54/46 as compared to 55/45 last month and 60/40 last year.

2025 Commercial Table Egg Flock HPAI Losses as of July 04, 2025

No additional outbreaks of highly pathogenic avian influenza (HPAI) were reported over the past week commercial table egg flocks except for an outbreak in a flock of 342,000 table egg layer replacement pullets in Arizona. In 2025 to date, based on the latest data from APHIS, HPAI in commercial table egg layer flocks have resulted in the depopulation of 36.3 million birds. To date, USDA APHIS has confirmed 44 outbreaks in layer flocks in 10 states (AZ, CA, IA, IN, MO, NC, OH, PA, SD, and WA). The 36.3 million birds lost included 21.6 million (59.4%) in conventional caged systems and 14.8 million (40.6%) in cage-free systems. These losses represent 11.8% of the conventional caged layer flock and 14.6% of the non-organic cage-free flock on January 1, 2025.

Compared to January 1, the caged flock on June 1 was down 15% while the cage-free flock increased 9.7% and the organic table egg flock decreased 2.5%.

Egg Markets Overview

The overall export volume of shell egg and egg products in May increased 6 percent; 43 percent below the year ago level but the overall value for the month declined 21 percent, 6 percent under last year as prices continued to decline. The export volume of table shell eggs increased 7 percent from last month but was 20 percent under last year. The overall value of table egg exports decreased 23 percent for the month and the average price per dozen exported was down 28 percent (from \$3.71 to \$2.65 per dozen). Canada remains the primary U.S. export market for table shell eggs with 84 percent of 2025 shipments to date. The Bahamas remains a distant second with 4.7 percent of exports. The U.S. exported table shell eggs to 18 trade partners in May - 24 for the year to date.

The volume of all egg products exported in May increased 4 percent; 62 percent below year ago levels while the total value of all egg product exports was down 13 percent. Exports of liquid egg products increased 39 percent for the month but with a 24 percent decline in value. The volume of exported liquid whole egg increased 146 percent, driven a sharp increase of shipments to Italy and to the Bahamas that, together, accounted for 52 percent of monthly shipments. The export volume of liquid yolk rose 59 percent for the month as Mexico more than tripled their volume from April levels. Exports of liquid albumen declined 17 percent with nearly all partners receiving less volume.

Exports of dried egg products in May decreased 11 percent for the month and 66 percent from last year. Total value of dried egg product exports increased 23 percent. Exports of whole dried egg were the only type to post a month decrease, down 25 percent as several partners reduced shipments enough to more than offset a doubling of volume to Thailand. Exports of dried yolk increased 60 percent as Japan returned to the market to account for 68 percent of monthly volume. Dried albumen exports rose a bit but remain limited from levels earlier in the year. Canada was the sole source for the month.

Overall imports of shell and egg products rose 12 percent in May but the overall value declined 36 percent as prices moderated. Imports of shell eggs continue to be the primary driver with an 8 percent increase in volume as domestic egg product manufacturers continued efforts to supplement shell and egg products in the domestic market to offset production losses from HPAI losses experienced earlier in the year. The value of shell egg imports of table shell eggs increased 5 percent with the addition of Poland which joined Turkey, Mexico, Brazil, Honduras, and South Korea in shipping shell eggs to the U.S. Imports of liquid egg products were unchanged in volume for the month but with a 3 percent decline in value. Imports of liquid whole egg declined 8 percent as most partners slowed shipments. Imports of liquid yolk nearly quadrupled on imports from Canada and China and returned to monthly volume rates experienced earlier in the year. Imports of liquid albumen rose 28 percent – all to Canada.

Imports of dried egg products increased 31 percent increase over last month's volume, entirely due to an increase in whole egg with a 30 percent rise in value. Imports of whole dried egg were up 252 percent on a significant volume from Lithuania. Imports of dried yolk were unchanged for the month with the same players repeating their April activity. Imports of dried albumen declined 19 percent increase as Lithuania slowed shipments.
