For the week, light precipitation accumulations (<2 inches) were observed across areas of Missouri, southern Illinois, southern Indiana, Ohio, and Michigan. On the map, some degradations were made in areas of Iowa, Minnesota, Wisconsin, and Illinois where both short- and long-term precipitation deficits persist. According to the latest USDA Weekly Weather and Crop Progress Bulletin (8/29), the percentage of topsoil rated short to very short is as follows: Iowa 68%, Minnesota 60%, Wisconsin 48%, and Illinois 43%. Furthermore, the latest USDA Iowa Crop Progress and Condition report (8/28) noted that the persistent dry conditions have put stress on crops, especially soybeans, with numerous reports of disease entering fields. Average temperatures for the week were well above normal (2 to 10+ degrees F) across much of the region with the greatest anomalies observed across areas of southern Minnesota, Iowa, Missouri, southern Illinois, and southwestern Wisconsin.
