Grain and Feedstuffs Market Trend

Compared to two weeks ago: Trade activity and demand on organic feed grade corn and soybeans moderate to good. Forward contract activity for new crop is limited compared to two weeks ago. Feed grade corn traded 1.16 lower. No trend available on feed grade soybeans or wheat. Soybean meal and oil activity light on moderate demand. Soybean meal traded 13.42 lower. Bids on feed grade organic corn and wheat increasing as supplies tighten. Trade activity on all other organic grains too limited to trend. According to NASS's National Crop Progress report for week ending April 8, 2018, Corn Planted 2%, Sorghum Planted 17%, Oats Planted 27%, Oats Emerged 25%, Winter Wheat Headed 3%, Spring Wheat Planted 2%, and Barley Planted 4%.

Current National Drought Summary (April 3, 2018)

With a blocking ridge of high pressure anchored over the Southwest, a series of cold fronts tracked across the eastern two-thirds of the Nation. The fronts, however, slowed their southeastward advance across the South and Southeast, and after picking up Gulf moisture, produced numerous and widespread showers and thunderstorms with heavy precipitation (more than 2 inches) from the southern Great Plains northeastward into the northern Appalachians. This was similar to the weather pattern back in mid- to late February when the lower Mississippi, Tennessee, and Ohio Valleys were deluged. Lighter precipitation also occurred across the northern halves of the Rockies and Plains, the upper Midwest, Great Lakes region, western New England, the central Gulf Coast States, and along the Pacific Northwest Coast. Little or no precipitation fell on the remainder of the Far West, Southwest, southern halves of the Rockies and High Plains, western Corn Belt, along the eastern Gulf and Atlantic Coasts, and most of Alaska. Weekly temperatures averaged below normal in the northern Rockies, northern and central Plains, Midwest, mid-Atlantic, and Carolinas, and above-normal in the Far West, Southwest, southern Plains, along the Gulf Coast, and in northern New England. In Alaska, readings were much-above normal in western and northern sections and near to below normal in southern and eastern portions. Most of Hawaii and Puerto Rico observed showery weather.
