The Shell Egg Demand Indicator for this week is 6.60, down 3.1 points from last week.

This Week:
Demand for shell eggs in the immediate post Thanksgiving demand period has begun to decline as consumers shift their thoughts to the next holiday demand season. Wholesale prices of cartoned eggs continue to decline on increasing offerings, mixed supplies, and lackluster interest. Trading is slow to moderate. Loose egg prices are in decline as offerings are more than adequate for ample supplies. Trading has slowed as marketers sort out their needs over the coming weeks. Prices for breaking stock are moving lower as offerings and supplies are moderate to heavy. Interest is good at reduced pricing and trading is moderate to active. The preliminary survey of retail outlets indicates a declining pace for caged shell eggs and the average ad price rises on the reduced sale activity. All eyes now shift to the December cookie season.

Current U.S. Productive Table Egg Layer Flock -
- U.S. table egg layer flock: 326,907,976
- Percentage flock in molt: 1.2%
- Productive table egg layer flock: 322,985,080
