

REVISION HISTORY for PDP 2006 Public-Domain Database

7/20/2016 Revision: Revised the **2006** public-domain database and data ZIP file to change reported Annotation codes in the Results data table/file for findings that were incorrectly showing as presumptive tolerance violations. In July 2016, while running a multi-year query for presumptive tolerance violations (PTVs), we noticed that the public-domain 2016 database showed 29 positive detections for DDE p,p' (pesticide code 910) in Poultry-Breast (PR) and Poultry-Thigh (PT) samples that were marked as "No Tolerance Exists" PTVs, i.e. with Annotation codes of V and QV. DDE is an environmental contaminant with no registered uses, with an FDA Action Level threshold rather than an EPA tolerance. Those should NOT have been reported as PTVs. The central 2006 PDP Database and published Annual Summary did not show them as PTVs, so there was some mix-up with the 2006 public-domain database not getting updated accordingly. For those 29 Results, changed the Annotate code from QV to Q or from V to null/empty in the 2006 public-domain database.

Actions:

1) Updated value in ANNOTATE column of 06ResultsData table to "Q" where COMMOD IN ("PR","PT") and PESTCODE = "910" and ANNOTATE="QV". Changed 20 rows.

2) Updated value in ANNOTATE column of 06ResultsData table to NULL where COMMOD IN ("PR","PT") and PESTCODE = "910" and ANNOTATE="V". Changed 9 rows.

5/26/2015 Revision: Revised the **1992-2013** data ZIP files to add tolerance tables for the 1992-2013 surveys to each downloadable ZIP file on the PDP Website. Populated a new ToleranceRef table in each PDPyyyy.mdb database file. Added Excel worksheets for the 1992-2013 tolerance tables into the Ref Tables Excel files included in the ZIP file. The new reference/look-up table holds established EPA Tolerance values for each reported pesticide/commodity pair.

12/10/2008 Revision: Revised the **1992-2006** public-domain databases and data ZIP files to incorporate a primary key value (SAMPLE_PK column) to link the Sample & Results data tables, designed to provide quicker searches and smaller databases. Published the ZIP files that contain the revised 1992-2006 databases along with supporting documentation (instructions, data dictionary, and reference table lists) to the PDP Website.
