USDA/TAP REVIEWER
COMMENT FORM

Use this page or an equivalent to write down comments and summarize your evaluation regarding the data presented in the file of this potential National List material. Attach additional sheets if you wish.

This file is due back to us within 30 days of: Due MAR 01 1995

Name of Material: Aquatic Plant Extracts

Reviewer Name: James Johnson

Is this substance Natural or Synthetic? Explain (if appropriate)

Natural - this product should be accepted/approved as natural if unadulterated.

Please comment on the accuracy of the information in the file:

File complete except "manufacture" & status section

This material should be added to the National List as:

_____ Synthetic Allowed  _____ Prohibited Natural

or, _____ This material does not belong on the National List because:

Are there any restrictions or limitations that should be placed on this material by use or application on the National List?

None

Any additional comments or references?

Products such as Gcémair from Agrimar are "cryo-crushed" at very low temperature. Don't know if this product has anything added. Heavy metals all seem below EPA standards. Green color.

Signature James Johnson   Date 3/8/95

ORGANIC FOOD PRODUCTION ACT/NATIONAL LIST SECTIONS
NOSB Materials Database

Identification

**Common Name**: Aquatic Plant Extracts

**Other Names**: Seaweed Spray, FoliaGro Plant Food, Vitalize 3-2-2 Fish and Kelp, maxicrop

**Chemical Name**: Seaweed Spray, FoliaGro Plant Food, Vitalize 3-2-2 Fish and Kelp, maxicrop

**Code #**: Other

**N. L. Category**: unknown

Chemistry

**Composition**: Proteins, Lipids, Glucides, Amino Acids, Vitamins

**Properties**: brownish/black powder with a mild marine odor

**Family**: Organic Fertilizer

**How Made**: Seaweed is dehydrated after harvest by sun drying, then ground into a meal. Seaweed Extract is produced from fresh, live plants which are processed into a soluble powder or liquid. May be fortified or stabilized with synthetic acids and ingredients.

Use/Action

**Type of Use**: Crops

**Use(s)**: - Foliar Fertilizer: May be used on all crops.
- Soil Conditioner: Mix into the first two inches of soil

**Action**: Absorbed into plant: acts as growth promoter (see biology)

**Combinations**: Apply as foliar/soil feed, transplant solution and seed treatment.

Status

OFPA

**N. L. Restriction**: N/A

**EPA, FDA, etc**: N/A

Registration

**Directions**: N/A

**Safety Guidelines**: N/A

**State Differences**: N/A

**Historical status**: Allowed by a wide majority of certification groups (seaweed)

**International status**: OCIA: kelp extracts acceptable; ground sea weed acceptable. CODEX and EU ok
NOSB Materials Database

OFPA Criteria

2119(m1): chem. inter.  
- Non flammable  
- 100% solubilization in water  
- Product becomes sticky when exposed to water.  
- Small amounts of SULFURIC ACID are given off during processing.

2119(m2): toxicity

2119(m3): manufacture  
Concern may arise from over harvest of kelp fields.

2119(m4): humans  
Inhalation of powder can cause lung irritation (ie. coughing).

Commonly eaten by humans and used as a livestock feed supplement (BS).

2119(m5): biology  
- Source of micronutrients, plant growth promoters and potash.  
- Rooting solution for transplants and cuttings  
- Phytotoxic if applied at high concentration to foliage of sensitive plants resulting in burn. (BS disagrees with phytotoxic statement, no reason given).  
- Cold hardiness in tomato plants, citrus fruits, cabbage  
- Pest damage reduced (nematode in tomato & okra; mites in strawberries, peaches, apples

2119(m6): alternatives  
Good soil management including green manures, rotation etc.  
Fish compost.

2119(m7): compatible  
Yes.

**ORGANIC ANALYSIS (% DM):**

- **Proteins**: 0.95 %
- **Lipids**: 0.69 %
- **Glucides**  
  (equivalent glucose): 2.7 %
AMINO ACIDS:

- Aspartic acid  - Lysine  - Valine
- Alanine  - Cystine  - Leucine
- Aspartic acid  - Threonine  - Isoleucine
- Methionine  - Serine  - Arginine
- Glycine  - XRT 81.8  - XRT 7.0
- XRT 3.9  - Proline  - XRT 27.3
- Ethanolamine  - Phenylalanine  - Tyrosine

VITAMINS:

- Carotene  - Pantotenic acid  - D3
- Fucoxanthin  - Niacin  - E
- B1 (thiamine)  - B12  - K
- B2 (riboflavin)  - C

Action = physiological action, nutrition, protection of chlorophyll

PHYTOHORMONES:

- Cytokinins in reserve in the form of glycosyl - cytokinines
- Auxins and gibberellines in reserve in the associated form

Action = regulation of formation of plant and their functions

POLYSACCHARIDES:

- Alginates
- Fucoolane
- Ascophyllane
- Laminarane

Action = stickers

BETAINAS:

- Acid - aminobutyric
- Alanine betaine

Action = cytokinin, osmotic control, maintenance of chlorophyll
Concern

Vitalize 3-2-2 Fish & Kelp

Description: Concern Vitalize 3-2-2 is an all-natural liquid plant food.

For Use On: Flowers, vegetables, lawns, trees and shrubs.

How To Use: Dilute concentrate (3 tablespoons per gallon of water) and water in, spray onto foliage or run through an irrigation system. Apply every 2-4 weeks for best results.

Formulation: With a 3-2-2 analysis, it is a liquid blend of kelp and fish.

Ingredients: Fish & kelp.

Packaging: Easy-pour sturdy plastic jug is made from recyclable plastic. The mix-with-water concentrate makes 16 gallons.

Retail Price: 24 fl. oz. concentrate $4.99

Distribution: Garden centers, hardware stores and fine catalogs nationwide.

This product meets the standards for production of organic foods based on the published guidelines of the Organic Foods Production Association of North American (OFPANA).

Necessary Organics, Inc. • One Nature's Way • New Castle, Virginia 24127-0305 • PHONE 703/884-5103 • FAX 703/884-5188
Concern

Vitalize 7-5-5 Granular

Description: Concern Vitalize 7-5-5 is a granular plant food that gives a quick boost of nutrients needed for early growth plus controlled-release nutrients and organic humus to create an ideal growing environment.

For Use On: Flowers, vegetables, lawns, trees and shrubs.

How To Use: Broadcast onto the soil surface or mix into top two inches. It can be applied to new plantings and won't burn seeds and seedlings when used as directed.

Formulation: With a 7-5-5 analysis, it is a blend of the finest natural ingredients, including compost, kelp, microorganisms, blood and bone meal.

Ingredients: Feathermeal, blood meal, bone meal, sunflower fly ash, composted poultry litter, kelp.

Packaging: The 3.6 lb. recycled cardboard box with scoop covers approximately 125 sq. ft., 75 transplants, or 1 cup per 20 sq. ft. of soil.

Retail Price: 3.6 lb. box $4.99

Distribution: Garden centers, hardware stores and fine catalogs nationwide.

This product meets the standards for production of organic foods based on the published guidelines of the Organic Foods Production Association of North America (OFPANA).
1. COMPONENTS:
FoliaGro Plant Food is a wettable powder extracted from kelp.

2. PHYSICAL PROPERTIES:
FoliaGro Plant Food is a brownish/black powder with a mild marine odor. It is non-flammable, stable and not subject to hazardous polymerization. It is 100% soluble in water.

The components of FoliaGro Plant Food pose no known health hazards.

Stability Specific Hazard

DOT HAZARD CLASS: None.
EPA HAZARD WASTE CLASS: Does not apply.

4. SAFE USAGE DATA:
PROTECTIVE EQUIPMENT: Not normally necessary. Dust masks only when handling customized grinds of less than 100 mesh.
VENTILATION:
General Mechanical: Special ventilation not normally necessary.
Local Exhaust: Not normally necessary.
PRECAUTIONS:
Handling & Storage: Avoid loose product on floor in damp areas as product becomes very slippery when wet.
Other: Product becomes sticky when exposed to moisture.

5. EMERGENCY RESPONSE:
FIRE:
Extinguishing Media: Non-flammable solid, use proper media for primary cause of fire. Chars in the presence of flames.
Special Procedures: Those appropriate for primary cause of fire.
Unusual Hazards: Beware of slippery floors if spillage occurs. Small amounts of sulfuric acid are given off when product is burning.
EXPOSURE:
First-Aid Measures: Remove from exposure, wash with water.
SPILLS & WASTE DISPOSAL METHOD:
Handle spillage and waste disposal in the same manner as with any dry vegetable product. Spills are easily cleaned by removing as much solid product as possible and then washing the remaining spill with water. FoliaGro Plant Food is bio-degradable.

6. HEALTH HAZARD INFORMATION:
EFFECTS OF OVER-EXPOSURE: No known adverse effects.
EMERGENCY TREATMENT: Does not apply.

FoliaFish Fertilizer

1. COMPONENTS:
FoliaFish Fertilizer is a powder derived from enzyme-digested ocean fish solubilized by a special hydrolysis process.

2. PHYSICAL PROPERTIES:
FoliaFish Fertilizer is a light tan powder with a strong marine and fish odor. It is non-flammable, stable and not subject to hazardous polymerization. It is 83% soluble in neutral pH water.

The components of FoliaFish Fertilizer pose no known health hazards.

SeaMix Liquid Fertilizer

1. COMPONENTS:
SeaMix Liquid Fertilizer is a mixture derived from kelp extract and fish solubles.

2. PHYSICAL PROPERTIES:
SeaMix Liquid Fertilizer is a brown liquid with a marine and fish odor. It is non-flammable, stable and not subject to hazardous polymerization. It is 100% soluble in water and will boil at 220 °F.

The components of SeaMix Liquid Fertilizer pose no known health hazards.
