Third Quarter 2022 (July, August, September)
Published November 2022

Brazilian Policy Reduces Fuel Prices—Lowering Truck Rates for Brazilian Soybean Exports

Although third quarter 2022 soybean export truck rates declined with falling diesel prices (figs. 1a, 1b, and table 8), they remained high compared to the same time last year. From third quarter 2021 to third quarter 2022 (year to year) (table 8 and fig. 5), the cost of shipping a metric ton (mt) of soybeans 100 miles by truck rose nearly 66 percent—from \$5.16 per mt to \$8.57 per mt. According to the Brazilian Institute of Geography and Statistics (IBGE), fuel prices declined in response to lower state taxes and a reduction in the average price of fuel sold to distributors by the state-run oil firm Petrobras.¹ Ocean freight rates fell because of slow global trade volumes and easing of global supply chain disruptions. In addition, China's slower-than-expected economic growth—partly a result of continued weakness in mainland China's real estate sector and COVID-19 restrictions—also contributed to lower ocean rates (CNBC and Grain Transportation Report (GTR), November 10, 2022). On average, ocean rates from selected Brazilian export routes to Hamburg, Germany, declined 9-31 percent and to Shanghai, China, fell 17-26 percent (tables 1a, 1b, 2a, 2b, and 9).

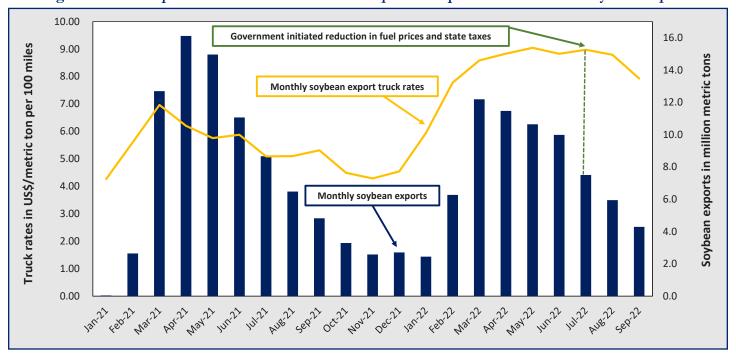

Figure 1a. Third-quarter 2022 truck rates fell from previous quarter for Brazilian soybean exports

Source: Comex Stat, Ministério da Economia, University of São Paulo, Escola Superior de Agricultura "Luiz de Queiroz" (ESALQ/USP), Brazil, and USDA, Agricultural Marketing Service.

¹ In June, the Brazilian Government reduced the tax on "circulation of goods and services" (ICMS) by establishing a cap of 17-18 percent on fuel, electricity, public transportation, and telecommunications (IBEG and Bloomberg).

Figure 1b. Brazil monthly diesel prices, January 2015 to September 2022, reais/gallon

Source: Brazilian National Agency of Petroleum, Natural Gas and Biofuels.

Year to year, Brazil's soybean exports declined from nearly 20 million metric tons (mmt) to 17.7 mmt (Comex Stat, Ministério da Economia).² Over the same period, average Brazilian soybean export prices rose 30 percent, from \$479.79 per mt to \$622.87 per mt. The Brazilian real depreciated against the U.S. dollar, from R\$5.23 per U.S. dollar to R\$5.25 per U.S. dollar (Brazil Central Bank). Because soybeans are priced in U.S. dollars but paid in reais, the real's relative weakness against the U.S. dollar boosted export prices, benefiting Brazilian farmers and exporters. Measured in U.S. dollars, soybean average farm gate prices increased 7 percent year to year—from \$498.87/mt to \$536.19/mt. On average, in reais, third-quarter 2022 farm gate prices increased roughly 8 percent, from R\$2,608.67/mt to R\$2,813.94/mt (CONAB).

In third quarter 2022, Brazil exported 12.2 mmt of soybeans to China, 11 percent less than the third quarter 2021's total of 13.7 mmt. The next highest shares of Brazil's soybean exports (in declining order) went to Iran, Thailand, Spain, and Turkey. In the first 9 months of 2022, the southern ports of Santos, Rio Grande, Paranaguá, and São Francisco do Sul still dominated the soybean trade to China, accounting for 69 percent of Brazil's soybean exports to China. Also, in in the first 9 months of 2022, the northeastern ports of São Luís, Vitória, Salvador, and Barcarena accounted for 31 percent of soybean exports to China. The Amazon River port of Manaus exported a small amount to China. For more information, contact Delmy L. Salin at delmy.salin@usda.gov.

² In this report, the source of Brazilian export data is the Comex Stat, Ministério da Economia.
