1	THURSDAY, SEPTEMBER 24, 2015, 9:00 A.M.
2	CLOVIS, CALIFORNIA
3	
4	PROCEEDINGS
5	
6	JUDGE CLIFTON: We're on record now on
7	September 24, 2015. It's Thursday. It's 9:00 in the
8	morning. We're in Clovis, California.
9	My name is Jill Clifton, and I'm the United
10	States Administrative Law Judge who's assigned to hear
11	this administrative hearing, and my role is to take in
12	evidence, that is testimony and exhibits.
13	Normally I would go through a routine that I
14	like to do introducing people and identifying
15	preliminary matters, but in view of the fact that
16	Ms. Hancock must leave early today and is particularly
17	interested in Mr. Wise's testimony, I want to go
18	straight to that, and then we'll interrupt his testimony
19	and go back to what we would normally do to begin each
20	day.
21	So the only preliminary part that I want to
22	address before Mr. Wise is called as a witness is that
23	this is the third day of the hearing, and I'd like the
24	transcript to have numbers in sequence to those of
25	yesterday so that for the entire proceeding there will

1 be only one page 1 and so on throughout the entire 2 proceeding. 3 Mr. Wise, would you come forward, please, to the witness stand. And please be seated and make 4 yourself comfortable. I'll be swearing you in in a 5 6 seated position. Would you raise your right hand, 7 please? 8 Do you solemnly swear or affirm under penalty 9 of perjury that the evidence you will present will be 10 the truth? 11 THE WITNESS: I do. 12 JUDGE CLIFTON: Thank you. Please scoot as close as you can to that table, I think that would be 13 14 good. Excellent. 15 Please state and spell your name. THE WITNESS: William, W-I-L-L-I-A-M. 16 17 W-I-S-E. JUDGE CLIFTON: And what is your job? 18 THE WITNESS: I am the Milk Market 19 Administrator for the Arizona and Pacific Northwest 20 21 Federal Milk Orders. 22 JUDGE CLIFTON: Thank you. 23 Mr. Hill, you may proceed. 24 /// 25 ///

Court Reporters

1 DIRECT EXAMINATION 2 BY MR. HILL: 3 O. Good morning, Mr. Wise. 4 Α. Good morning. 5 So you were -- you were called to -- you are Q. 6 requested to provide basic explanation to some topics; 7 is that true? That's my understanding, yes. Α. 9 And those topics are producer-handler issues Ο. 10 and payments by a handler operating a partially 11 regulated distributing plant --12 Α. That's my ---- is that correct? 13 Ο. 14 Yes, that's my understanding. Α. Did you prepare any testimony for this case? 15 Q. 16 No. Not any written testimony. Α. 17 Just wanted to make that clear after Ο. 18 yesterday. 19 I'm going to release this witness. He does not have any testimony. He's here to answer questions. 20 21 JUDGE CLIFTON: All right. By not having any 22 testimony, you just mean he didn't bring a written 23 statement. 24 MR. HILL: No written statement, correct.

JUDGE CLIFTON: All right. Very fine.

	I d like to ask some preliminary questions.
2	How long have you been an administrator of a milk
3	marketing area?
4	THE WITNESS: I was appointed Market
5	Administrator in February 2011.
6	JUDGE CLIFTON: And what did you do before
7	that?
8	THE WITNESS: I was the Assistant Market
9	Administrator from 1995 to 2011, and from 1981 to
10	1980 1995 I hold a held, excuse me, various
11	positions in the Market Administrator's Office.
12	JUDGE CLIFTON: And where are you physically
13	located for most of your work?
14	THE WITNESS: Most of the time I I go back
15	and forth between the office in Phoenix, Arizona, and
16	Balta, Washington, but most predominantly in Phoenix.
17	JUDGE CLIFTON: All right. And how much of
18	your time in administration of a milk marketing order
19	has it concerned Arizona and the Pacific Northwest?
20	THE WITNESS: That's my primary function is
21	the administration of those two orders.
22	JUDGE CLIFTON: All right. And have they been
23	in existence, those orders, since say 1995?
24	THE WITNESS: Oh, yes, yes. The Arizona order
25	in some some fashion since the early '50's, and I

- believe the Pacific Northwest with the county's
- 2 predecessor orders since around '50's.
- JUDGE CLIFTON: Ah, okay, good. What is the
- 4 number of the area?
- THE WITNESS: Pacific Northwest is 124.
- 6 Arizona is 131.
- 7 JUDGE CLIFTON: All right. Thank you very
- 8 much.
- 9 Is there anything you'd like to add to that
- 10 before I open the floor to questions from anyone?
- 11 THE WITNESS: I have nothing else on that
- 12 line.
- JUDGE CLIFTON: Thank you.
- Who would like to begin?
- 15 CROSS-EXAMINATION
- 16 BY MS. HANCOCK:
- 17 Q. Nicole Hancock representing the
- 18 producer-handlers and Ponderosa Dairy.
- 19 Good morning, Mr. Wise.
- 20 A. Good morning.
- Q. I'd like to first by -- starting -- start off
- 22 by thanking everyone today for being so accommodating.
- 23 I know the judge has commented on how kind and gracious
- 24 everyone is, but I do believe that she's -- she's very
- 25 accurately describing this group, and you've all been

- 1 very welcoming to me, and I appreciate that.
- So, Mr. Wise, if you -- I see you have a --
- 3 you have a regulation book in front of you?
- 4 A. You know, we know in general, we may not know
- 5 it by heart verbatim.
- Q. Sure. Well, that's good to know because I
- 7 kind of feel like you guys all know it by heart.
- 8 Sir, I'd like if you could turn to page 158,
- 9 and we're in Title 7 CFR, and I'm having you turn to
- 10 Section 1124.10, which is the definition of
- 11 producer-handler.
- 12 A. Okay. Forward 124. Yeah, producer-handler
- 13 definition, 124. Okay.
- Q. And this is the order that you administer; is
- 15 that correct?
- A. 124 and 131, that is correct.
- 17 O. Okay. So one -- one of them?
- 18 A. This is one of them, yes.
- 19 O. Just one of them?
- 20 A. Yes, it is.
- 21 Q. Okay. And are they -- are they similar in the
- 22 provisions?
- A. Yes, they are very similar.
- Q. That address producer-handlers?
- 25 A. Yes.

- Q. Okay. So I'm just using this one as the example, but I just want to understand a little bit better how it works in your order system, and then that will help me put it into context for my client and -- and the positions that's we're taking.
- A. Okay.

- Q. So full disclosure, that's my end game here.
- A. Okay.
 - Q. Okay. So can you -- would you mind -- if we start with 1124.10, tell me what -- what this provision is and how it's organized.
 - A. This provision applies to -- if I can just read the preamble, I think that sets the table very well for what this provision applies to. So a producer-handler means a person -- a person under the Act is defined as an individual, partnership, corporation, or other business united -- so a person who operates a dairy farm and a distributing plant from which there is route disposition in the marketing area from which total route disposition, excuse me, disposition and packaged sales of fluid milk products to other plants during a month does not exceed three million, three million pounds, and who the Market Administrator has designated a producer-handler after

determining that all the requirements of this section

1 are met.

So that means if you are a -- if you have route disposition and packaged sales in excess of three million, you're not eligible to be a producer-handler. So this only applies to people under three million.

And then as you move forward, these are the requirements that really lay out the fact that it has to be the sole risk and enterprise of the same person for both the farm and plant.

- Q. Okay. And that three million pounds, that's based on the volume of -- of milk that's processed; is that right?
- A. Class I, right. It says three million pounds, again, fluid milk products, packaged sales, route disposition and packaged sales of fluid milk products, so it's Class I.
- Q. And -- and then the USDA conducts a determination to decide if a producer-handler meets this criteria, and once it receives -- once the producer-handler receives the USDA's blessing, then they have that designation provided they continue to meet that criteria?
- A. Exactly. In Order 124, right, the -- this person would have to, you know, show us, show the Market Administrator to our satisfaction that they, number one,

- are under three million pounds and meet the rest of the qualification requirements.
- Q. And once they meet that qualification
 requirement, all of the milk -- they -- then they're
 fully exempt at that point?
- A. That's correct. For anything under -- as long as they stay under three million, they're fully exempt, that's correct.
- 9 Q. And if they go to three --
- 10 A. As long as they don't violate any other provisions.
- Q. And -- and if they go to three million and one pounds, then they're lost the exemption for the entirety of their -- of the milk; is that right?
- 15 A. That is correct. They may not necessarily be 16 fully regulated, but they can't be a producer-handler.
- Q. They've lost the ability to designate themselves as a producer-handler?
- 19 A. That's correct.
- Q. So I describe this as an all-or-nothing approach; is that fair?
- A. I -- I would say to the extent that it's
 all -- if you're under three million, it's all exempt
 pricing. Over three million, you are subject to the
 regulatory provisions.

- Q. And does it operate the same way in Order 30?
- A. I don't know about 30.
 - O. 31, excuse me.

- A. 31 is -- the preamble that -- this preamble is

 I believe identical in every order, it's what follows

 that varies. What -- what -- as far as Order 131, I

 think there's maybe one variation in the rest of the

 language from 124, otherwise they're identical, and

 that's not a real material difference.
 - Q. And have you read the Cooperative's Proposal?
 - A. I'm fairly familiar that it's -- I believe the Cooperative's Proposal -- I don't have it in front of me so I guess I'm uncomfortable speaking to it, but -- so I don't -- I don't -- off the top of my head, I don't know exactly what it says. I mean, I have an idea.
 - Q. Is your -- is it your understanding that the Cooperative's Proposal would have a similar --
 - A. It's three million -- the three-million-pound designation I understand is in the Cooperative Proposal.
 - Q. Okay. All right. So walk me through the rest of this and help me understand how this works, how the sections are structured and what the impact is.
 - A. So we go through to the start, we have a requirement for designation. So designation of any person as a producer-handler by the Market Administrator

1 shall be contingent on the following provisions. 2 first one --3 THE COURT REPORTER: Excuse me. 4 THE WITNESS: I'm sorry, start slowing. 5 THE COURT REPORTER: When you're reading, can 6 you read a little slower? 7 THE WITNESS: I apologize. THE COURT REPORTER: 8 Thank you. 9 THE WITNESS: I tend to talk fast. 10 apologize. 11 BY MS. HANCOCK: 12 He's trying to help me get out of here on Ο. time. 13 14 So, in essence, if you look at -- it would be Α. 15 look at (a)(1), so the care and management of the dairy 16 animals and other resources designated in paragraph 17 (b)(1). So in essence, if I can keep it fairly general without getting too technical, everything that has to do 18 19 with the farm has to be under the sole control, 20 ownership, and risk of this person. Also, any -- the fluid milk, the distributing plant, that operation has 21 to be at the sole risk and enterprise of the same person 22 23 that owns the farm, that operates the farm. 24 And there's a provision, you can have a little

bit of extra milk, up to 150,000 pounds, as long as that

- milk is priced under some other Federal order, either 1 2 this -- either the order that you're in or some other 3 Federal -- so you can have a little bit of extra milk 4 received, but other -- if you get any more than that, you lose your producer-handler designation.
 - Also, you can't take nonfluid milk receipts and reconstitute them for classified use.
 - What does that mean? Ο.

6

7

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

- That means you buy powder or -- or Α. concentrated milk, you add water to it, you make fluid milk, it's reconstitution, so you can't do that.
- So basically the goal here is to make sure Ο. that you don't have people trying to work the system and have a separate owner of -- separate farm providing milk to a separate processing plant?
- Prevent -- you're trying to prevent shared risk. It has to be the sole risk and enterprise of one entity.
- Are there any restrictions on the transfer of those -- of the ownership of those entities?
- The -- for us, you know, if -- once they're Α. designated, whether they're a partnership or an individual proprietorship, whatever, if there's any change in that structure from what was originally designated, then we need to look at it again to make

- 1 sure that that change, in fact, if he -- if this
- 2 individual or partner or whatever was sold, then that
- 3 new entity has to be structured under these provisions.
- So as far as -- you're inquiring, I think, in
- 5 terms of any type -- any change in ownership would
- 6 require us to look at it again to see if it met the
- 7 requirements.
- 8 Q. But as long as it continued to meet the
- 9 requirements, it would continue to receive the same
- 10 designation?
- 11 A. That's correct.
- 12 Q. Okay. So there's no restriction or
- 13 limitation, you don't lose the exemption if you transfer
- 14 it to a separate entity?
- 15 A. Well, it would be an entire new entity, so it
- 16 would be two -- I mean, the entity we designate, any
- 17 change to that, then we start over again.
- 18 Q. Okay. Is there any financial investment
- 19 requirement to obtain this designation?
- 20 A. No, no.
- 21 Q. So they --
- 22 A. No.
- Q. -- don't have to pay to play?
- 24 A. No.
- Q. Okay. Okay. Let's move on down, see what it

1 says. 2 So, again, so this -- this one, in essence 3 you're talking about the farm, and then in (2), so we're at -- excuse me, I'll talk slower -- (a)(2), the plant 4 operation again is in which the producer-handler 5 packages and processes milk, is under the complete and 6 7 exclusive control and ownership and management of the 8 producer-handler, and is --9 THE COURT REPORTER: Excuse me. 10 THE WITNESS: Sorry. 11 THE COURT REPORTER: I'm sorry. 12 THE WITNESS: Okay. 13 THE COURT REPORTER: You're reading way too fast. 14 15 THE WITNESS: Okay. I apologize. 16 Complete and exclusive control, ownership, and 17 management of the producer-handler and is operated as producer-handler's own risk -- excuse me, own enterprise 18 19 and its own risk. So, again, just setting the table, the farm 20 21 and the plant have to be owned/operated by the same 22 entity. 23 And then as far as we talk about receipts, so 24 the producer-handler neither receives at its designated 25 milk production resources and facilities nor receives,

- 1 handles, processes, or distributes at or through any of
- 2 its designated milk handling, processing, and
- 3 distributing -- distributing resources and facilities
- 4 other source milk products for reconstitution into fluid
- 5 milk products. That's what we were talking about, they
- 6 can't take powder, concentrated milk and add water to
- 7 make a fluid milk product.
- 8 Okay.
- 9 BY MS. HANCOCK:
- 10 Q. Again, designed to protect the integrity of
- 11 the system so that you know that exactly what you're
- 12 producing and processing is what --
- 13 A. Yeah.
- 14 Q. -- you're calculating?
- 15 A. And -- and, you know, it has to move with
- 16 reserve supply and other source receipts, so it has to
- 17 be from your own herd up to the 150,000.
- So, again, so other -- so other than -- right,
- 19 it's designated milk so you can only get milk from at
- 20 the plant, you can only receive milk from its designated
- 21 milk production resources and facilities, own farm
- 22 production.
- 23 Pool handlers and plants regulated under any
- 24 Federal milk order within the limitation specified in
- 25 (c)(2), and that's at 150,000. Nonfat dry milk --

- excuse me. Nonfat milk solids which are used to fortify
 fluid milk products. So you can do that. You can
 fortify, you can't reconstitute.
- The producer-handlers neither directly nor 4 indirectly associated with the business control or 5 management of, nor has the financial interest in, 6 7 another handler's plant operation -- in other words, 8 that any other handler so associated with 9 producer-handler's operation. Again, we're talking about sole risk and enterprise. And that's basically 10 11 all this language goes on, it just talks -- talks about 12 that. Make sure there's no -- nothing else, no other entities involved other than that -- that entity that's 13 been designated as the producer-handler. 14
 - Q. And that's to protect, again, the integrity of the system to make sure that you just don't just name your other plant a different name --
 - A. Right.

16

17

18

19

20

23

24

- Q. -- and try and carve out, stay under the three-million-pound exemption?
- A. It keeps -- it keeps -- it keeps it as that sole person's operation, right.
 - So then the -- the next para -- the next section (b) talks about what resources and facilities can be designated. So if we go to (b)(1), Milk

production resource and facilities shall include all resources and facilities, the milking herd, buildings in housing such herds, the land on which such buildings are located, used for the production of milk which are solely owned, operated, and which the producer-handler is designated as a source of milk supply for the producer-handler's plant operation. However, for purposes of this paragraph, any such milk production resources and facilities which do not constitute an actual or potential source of milk supply for the producer-handler's operation shall not be considered a part of the producer-handler's milk production operation.

In essence, okay, if you're a producer-handler in -- in the Seattle area, and somehow you have some interest in, or whatever, a farm in Virginia, that's probably not a -- you know, a reasonable source of supply, so that's -- probably would not, you know, qualify you to be -- lose your designation.

The milk handling, processing, and distribution resources and facilities shall include all resources and facilities, including store outlets, used for the handling, processing, and distributing fluid milk products which are solely owned by, and directly operated or controlled by the producer-handler or in

which the producer-handler in any way has an interest, including any contractural arrangement or over which the producer-handler directly or indirectly exercises any degree of management control.

Again, you can't have any interest in anything except your own operation, so it's your own sole risk and enterprise, there's no question that anybody else is in any way sharing any of the risk involved in your operation.

And then the designations remain in effect until they're canceled. And then we -- basically they're canceled if you violate anything that we've talked about.

And then -- so -- so, again, it goes on cancellation as a producer-handler status shall be effective on the first day of the month following the month in which the requirements are not met.

So if some time during January you violate it, you lose your designation February 1. That's in the bottom of -- towards -- towards the end there of (c) where it says "Cancellation."

Q. What -- what is your look -- when you make the determination of how -- what the -- whether they met their volume threshold or not, what's your look-back period? Is it just the preceding month?

1	A. Well, we have you know, we don't visit
2	every handler every month, but we make an effort to
3	visit handlers on a regular basis, so when we we go
4	in and operate the producer-handler, if we find out
5	that say we're doing a four-month audit, and in month
6	one they you know, they did something that lost their
7	designation, well, we're going to go back and pool them
8	on audit in month two, three, and four until they came
9	back on as to in that designation.

Q. And for the month that they fell out of designation, would they then pay into the pool for that and have price adjustment?

- A. Whether they pay in or out would determine on what calculation they would be subject. Again, they may or may not be fully regulated, they may be partially regulated, I mean, they would not -- in essence, they could lose the producer-handler designation, what would happen after that would depend on what their sales pattern is, what they are.
- Q. Okay. So you can qualify one month, not qualify another month, and then qualify again the -- the third month?
- A. You -- you could -- you can lose your qualification in month A, during month -- month B, you would be pooled, but if during month B you corrected

- that problem to the satisfaction of the Market

 Administrator, in month C you can gain your designation.
 - Q. All right. And then when -- I didn't mean to take you off track so we're --
 - A. Yeah, yeah.

- Q. -- walking through the cancellation.
- A. So, yeah, right. So then -- so -- so we're at (c)(1), milk from the production resources and facilities of the producer-handler designated (b)(1) in this section is delivered to name -- in the name of another person as producer milk to another handler.

So, again, you've got this production, it's not sole risk again.

The producer-handler handles fluid milk products derived from other sources -- excuse me, derived from sources other than the milk production and resources at the facilities -- excuse me, facilities and resources designated in paragraph (b)(1) of this section. Okay, this is 150 -- 150,000. Except that it may receive at its plant or acquire for route disposition fluid milk products from fully regulated plants and handlers under any Federal order if such receipts do not exceed 150,000. And this limitation shall not apply if the producer-handler's own farm production is less than 150,000, which basically makes

it an exempt plant.

The next one, milk in -- milk from the milk production resources and facilities of the producer-handler is subject to inclusion and participation in a marketwide equalization pool under a milk classification and pricing plan operated under the authority of a State government. So you couldn't have a farm that was subject to some state milk pricing plants and have that part of your producer-handler operation.

And then we make a public announcement and so publicly announce name, plant location of person designated as a producer-handler, names those persons whose designations have been canceled and the effective date.

And then the -- the last part here is just the burden of establishing and maintaining the status risk of the handler.

So again, you know, to -- to keep it in a more simple basic understanding, you know, with some of the language that's been used in the past is grass to glass, you know, farm to customer. It -- that has to be under the same exclusive, complete control of one entity, but no other possibility of any other shared risk or involvement.

Q. Okay. Do any of the orders that you operate

- 1 under have any type of quota system similar to that
- 2 in -- in California?
- 3 A. No.
- Q. So you don't have any -- well, I want to move
- 5 on, then, to -- to the payments as well, how we
- 6 calculate these payments. Where do you take your
- 7 guidance from on how you calculate payments to -- under
- 8 your pool plants?
- 9 A. For pool plants, not -- okay. It's -- the
- 10 handler's obligation is in Section 60 of every order, so
- 11 it would be 124.60.
- 12 Q. So just for the record, in -- in the book that
- 13 I'm in, it's on page 174. I guess for reference for the
- 14 rest of you.
- 15 A. 164?
- 16 Q. Oh, I changed orders.
- 17 A. If we're still on 124.
- 18 Q. 164, that's right.
- 19 Section 1124.60. Okay. Walk me through what
- 20 this section guides you to do and how it works and in --
- 21 in -- in the orders that you operate.
- 22 A. I could -- we'll go -- how about if I just
- 23 give you sort of the broad view, and if you want to get
- 24 more specific on -- on questions. In essence, you know,
- 25 | we're pricing the -- we want to get to the value of the

produced milk received, and the plant has a lot of

utilization and a lot of different receipts normally, so

the other section of the order tells us how to allocate

those receipts to utilizations to try to net out what

the producer milk -- what the end -- how the produced

milk is used.

And then in essence, then, we just take those produced milk pounds by the class they were allocated to by the applicable class prices, and that's the handler's value of produced milk. There may be some other values in there if -- there may be inventory adjustments, there may be overage, but for that -- you know, pretty much all of the value of a handler's obligation is based on the value of how they used milk from farms qualified to be producers under the order.

- Q. And then who manages the payments to the producers?
- A. Well, the -- the -- the handlers pay -- the handlers' cost of milk is always the class prices.

 Producers always get the blend price. So if a handler's cost of the milk is -- they pay the producer the blend, so if their cost of milk is over the blend price, pay producers the blend, they pay that difference into the producer settlement fund.

The opposite sometimes is true when the

handler's cost of milk is less than the blend price, then you pay the producers the blend price, that milk is drawn out -- excuse me, those dollars from the producer

settlement fund, so the handlers pay the producers.

- Q. Okay. And so it's a -- it's a reporting and accounting mechanism that's settled up between -- under your offices and with your handlers; is that essentially how that works?
- A. I would not argue with that, yeah, it's a -it's a financial transaction between handlers,
 producers, and us.
 - Q. Okay. And is there -- there's one blend price, you don't separate out variations on the blend price for different calculations to pay producers?
 - A. Well -- well, there's one blend price announced at the base zone for the order. That blend price can be adjusted based on location of the plant the milk was received at. So there's a slight variation in the blend price, but there is one blend price adjusted for location.
 - Q. And if a -- if -- if a -- if a producer is exempt or a producer-handler is exempt, then they are outside of that calculation entirely; is that correct?
 - A. Right. If you're a producer-handler, you're exempt from the pricing and pooling provisions of the

order.

- Q. You still get reporting from them --
- A. Oh, yeah.
- Q. -- just so you can calculate and quantify it, but they don't report in the pool?
- A. They report each month, and we audit those reports, but as long as they meet the qualifications, there's no financial obligation.
- 9 Q. How does it work with a partially regulated -10 with partial regulated -- regulated producers?
- 11 A. That would be in Section 1076. Do you want to 12 turn there?
- 13 O. Yeah.
- 14 Okay. That is on page 44. Now, there are --Α. 15 there are four subsections to 76, and I want to be 16 upfront, full disclosure with you, that the last one, 17 which is 76(d), I have no familiarity with, I have never administered that, I have no -- so I really don't --18 can't really speak to 76(d) other than it doesn't really 19 fall into the traditional category of a compensatory 20 21 payment, so --
- Q. Tell -- tell me what your understanding of what subsection (d) covers.
- A. As I recall, section (d) came out of a -- what we call the National Decision from 1990, and it involved

- 1 reconstituting milk, and that if a plant in a Federal
- 2 order produced powder and that powder went to some other
- 3 | plant and that plant reconstituted it and it sold it in
- 4 some marketing area that the -- the plant that made that
- 5 powder, there was some method to move the money back
- 6 there. That's a very general, and I really don't want
- 7 to speak to it any more because I've never had to do it,
- 8 and I'm not familiar with it.
- O. You're not --
- 10 A. I know it's in there, it's just something I've
- 11 never dealt with.
- 12 Q. You're not aware of anyone using that
- 13 provision?
- 14 A. I -- I can only speak for myself. I've never
- 15 administered it, never have. There may be other orders
- 16 | that have, I don't know, but I have not.
- Q. Okay. Let's -- let's talk about (a) through
- 18 (c) then.
- 19 A. Okay. Okay.
- 20 O. Tell me what about your understanding is about
- 21 what 1000.76 -- what it controls and then how it works.
- 22 A. Okay, (a) through (c). Well, I've got to go a
- 23 convoluted way, I think it's the easiest way to explain
- 24 this. We'll go (c), we'll go (a), we'll go (b).
- Q. (c), (a), (b).

- 1 A. We'll take a cab.
- Q. All right.
- 3 A. Section (c).
 - Q. Pay for it.

14

15

16

17

18

19

20

21

22

23

24

- 5 Section (c) applies only, and I can read the Α. preamble here, if you look at the preamble of 76. 6 7 before the 25th day after the end of the month, except 8 as provided in 1090, which is the calendar day adjustment, the operator of a partially regulated 9 10 distributing plant, here's -- here's the key, here's the 11 (c), other than a plant that is subject to marketwide 12 pooling of producer returns under a State government's milk classification and pricing program. 13
 - So I'll read that again. Other than a plant that is subject to marketwide pooling on producer returns under a State government's milk classification and pricing program. That's 76(c).
 - So if you are this -- this entity that's subject, the only payment obligation that you're subject to is 76(c).
 - Q. So if you fall outside of an order --
 - A. If you're -- if you are -- if you are located in a -- in a -- in a state that has classified pricing and marketwide pooling and you have packaged milk sales route dispositions into a Federal order that does not

- result in full regulation, so you don't meet the 1 2 threshold of full regulation, then you're partially 3 regulated, and you're subjected to a compensatory payment calculation only under (c), and (c) -- what (c) 4 does, it -- it looks at the applicable Class I price 5 under the Federal order you're selling the milk into, 6 7 compares that to the applicable state price for that 8 The Federal order is more, you pay that 9 difference into the producer settlement fund. If the If the Federal order 10 state price is more -- excuse me. 11 is more, state price is less, you pay that difference 12 into the producer settlement fund in the order you're selling the milk into. If the state price is greater, 13 14 you have no compensatory obligation. You don't get 15 credit, you have no obligation.
- Ο. So it's -- and it's only for the portion of milk that -- that you've distributed into that order 18 system?

17

19

20

21

22

23

24

- Α. That's correct. Partial regulation is dealing only with the amount of packaged route sales in the particular Federal order.
- So in my lay terms, I -- it's kind of the Ο. fairness factor, right? If you go into their system, you pay the increased amount if -- if you need to in order to true it up, and if you are under, you don't get

the benefit of that, but you also receive the benefit of being able to deliver into the order?

A. Partial regulation is designed to protect the regulatory scheme, keep handler equity at least comparable, but that's correct. If you have cheap milk coming in from outside, it won't work.

So (c), then, is only available to plants that are in a state order that has marketwide pricing, has an announced price. And, again, if the state price is higher, there's no obligation. If it's less than the Federal order, that difference then is -- is paid.

76(a) is the difference between I and blend. So any packaged route sales into a Federal order, and again, without -- I'll just say it one more time. When we talk about partial regulation, we talk about plants that have not met the threshold of full regulation, so -- so there's clearly not -- not subject to full regulation.

So under 76(a), a plant reports their route sales into the order, and then pay the difference between the announced Federal order Class I price at that plant and the blend price at that price, so it's the difference between I and blend on sales in the area. As far as the regulatory burden to that plant, they just -- normally they send us in one sheet, has their

sales in the area. You know, we -- we -- we look at the price difference between Class I and blend, and then when we go there and audit, we obviously audit their sales, so it's -- for a regulator -- from a regulatory standpoint for that plant, it's 33 versus 37.

Now, that leaves us --

- Q. And that's evaluated on a monthly basis?
- A. That's correct, yes, everything is month to month. So we've got (a), we've got (d), we don't want to talk about (d). Excuse me. We've got (a) -- we've got (c), we got (a), that leaves us with (b). (b) is known -- many times known as the Wichita Option, and I believe that's because as a result of a hearing that was held, I believe in 1955, sometime in the early '30's, in Wichita. So -- so in Wichita obligation we're --
 - Q. Sometimes early '30's?
 - A. '55 I think, I think it's '55, but I'm not sure. Anyway that's -- when people say the Wichita Option, they're talking about 76(b). And so if we talk about 76(b), we say, again, the payment under this paragraph shall be the amount resulting from the following computations: Determine the value that would have been computed pursuant to Section 60. Again, the handler's obligation on the order is the same designation, Section 60 in every order. Determine the

1 value that would have been computed pursuant to Section 2 60 of the order for the partially regulated distributing 3 plant if the plant had been a pool plant, and then 4 there's some slight modifications that we can certainly go through, but in essence what these modifications do 5 6 is try to ensure that the same milk is not priced twice. 7 So if you -- if a partially regulated plant 8 receives milk that's priced as Class I from some pool plant but they also have sales in the Federal orders of 9 10 Class I, we offset that so we would -- we would reduce 11 the sales in the Federal orders by the amount of Class I 12 they bought. So these qualifying paragraphs here 13 basically try to restrict any type of double pricing. 14 So we compute this value of 60 as if the 15 handler -- as if the plant had been fully regulated, 16 which in essence is the -- is their -- again, the 17 handler's cost is this class price, this is what they 18 owe in total, not what they're paying producers, what 19 they owe in total. So then if you go to big C, so the value 20 21 pursuant to 60, the unregulated supply plant, and that 22 was -- well, I'm sorry, if we go to (2) --23 JUDGE CLIFTON: I'm sorry. 24 THE WITNESS: I'm sorry. 25 JUDGE CLIFTON: I didn't hear that.

	THE WITNESS: I apologize. I I jumped in
2	on again, this is what I was reading, I wanted to go
3	next down there to (2), but I the the under
4	76(b) you can claim some other sources of supply, but
5	you'll have you also have to compute a value for them
6	as if they were fully regulated. That and I have no
7	experience doing that. Our plants have never used these
8	other sections where a a supply plant is claimed as
9	part of its milk supply and used as part of the
10	obligations of 60. I have no experience with that.
11	JUDGE CLIFTON: Have you noticed this is
12	Judge Clifton when he talks to me, he talks slowly,
13	so
14	THE WITNESS: I guess when I'm not, I'm
15	talking to myself, I don't know. I apologize.
16	JUDGE CLIFTON: Even though you're you're
17	looking at Ms. Hancock and responding to what she asks
18	you, pretend like you're talking to me.
19	THE WITNESS: You know, my my employees
20	would tell you I have a saying that most people don't
21	change after third grade, and I apologize. This is how
22	I've always been. I'll make a conscious effort. I do
23	seriously apologize.
24	So if we look at below that big (C), we got a
25	(2) from the partially regulated distributing plant's

- 1 value of milk computed apparent -- computed -- computed
- 2 pursuant to paragraph (b)(1) of this section, which as
- 3 we say we compute a value pursuant to 60, subtract the
- 4 gross payments that were made for milk that would have
- 5 been producer milk had the plant been fully regulated.
- 6 So we're looking at, okay, you would incur a
- 7 compensatory payment if your cost of milk, your gross
- 8 cost of milk if you had been fully regulated, if that
- 9 exceeds the gross payment that you pay for your milk
- 10 supply that would have qualified as producer milk,
- 11 there's a positive difference there, then that is an
- 12 obligation to the settlement fund.
- If the reverse is true, if you're paying more
- 14 for your milk supply than your cost of milk would have
- 15 been had you been fully regulated, there is no
- 16 compensatory payment.
- And that's 76(b), we're looking at what your
- 18 cost had you been fully regulated, what you paid
- 19 producer's milk.
- 20 BY MS. HANCOCK:
- 21 Q. And in your order, how many handlers do you
- 22 have that participate as partially regulated under
- 23 subsection (b)?
- 24 A. You know, as far as -- I don't have my -- off
- 25 the top of my head, I don't know how many partially

- regulated. I would not be able to designate to you
 whether the claim (a), (b). (c) would be obviously
 because their plant location would tell you they have to
 be a (c). But whether they take (a) or (b), that would
- Q. And is that -- is -- is it by their election,
 do they have to opt in and -- and ask for that
 calculation?

be proprietary.

A. Should a handler so -- right. But we -- we would not -- if -- if they claim (b), we're also going to look at (a), okay, and if (a) is less than (b), then we would charge them (a). We're not going to charge a delivery charge, the lesser of (a) or (b).

But to do (b) -- again, you know, getting back to (a), they -- you know, what the handler supplies to us is basically usually just one sheet that shows their sales in the area. If they choose (b), they're just like a fully regulated handler. They have to give us a complete handler report and that is subject to audit, so they have to fill out the entire, what we call Report of Receipts and Utilization, and all the required documents for that, and then when we audit them, we do an audit just like we would on a fully regulated plant.

But that's in a nutshell. And it's gross payments that were made for milk that would have been

- produced milk had the plant been fully regulated.
- Q. And does that operate the same under both your orders that you -- that you operate?
- A. Because this is in Section 1000, it's this way for every Federal order.
- Q. That's right. Okay. I'm just double-checking. Sorry.

12

13

14

15

16

17

20

21

22

Is there anything else that I haven't asked you about that you think would be important for me to know? That's a genius question, I just want you guys to know.

- A. I would say this, for someone that -- that as by own admission is not intimately familiar with the regulations, I think you hit all the high points. So -- so I don't have anything to add.
- Q. That's validation for me to go to the airport.

 I'm finished at this paint. Thank you.
- Again, thank you all for letting me kind of change the schedule a little.
 - JUDGE CLIFTON: Would all of you like to continue with this witness until he's done before we do our little preliminary matters? I'm getting yeses.
- MR. ENGLISH: I'm flexible, either way.
- 24 Whatever is best for the witness.
- MS. TAYLOR: Is that okay with you?

1 JUDGE CLIFTON: The witness looks ready to --2 to continue. Good. 3 Then who will next ask Mr. Wise questions. 4 CROSS-EXAMINATION BY MR. BESHORE: 5 6 O. Good morning, Mr. Wise. Good morning, Mr. Beshore. 7 Α. Marvin Beshore. Just a -- just a few 8 Ο. 9 questions, I think. 10 With respect to Section 76, partially 11 regulated distributing plant provisions, was all of your testimony about how that section operates based on the 12 language of part 1000.76? 13 14 Α. Yes. 15 Even though you were pointed to a particular Ο. page in one of your orders, it's all part of 1000 --16 17 it's -- it's the same in all orders I think you testified, it's in part 1000.76? 18 That's correct. And the fact the 1000 19 references 60, which is the same connotation in every 20 21 order, that's correct. 22 Okay. So when the hearing notice provides in Ο. 23 Proposal 1, which is the proposal of the Cooperatives, 24 which I represent, indicates that we are proposing that 25 new section, 1051.76, payments by a handler operating a

- 1 partially regulated distributing plant, (b) see 1000.76,
- 2 all of your answers would operate as -- as if that
- 3 were -- were part of the promulgated order?
- A. I guess I just hesitate on a "what if." I can
- 5 say that this -- everything that I've spoke to is
- 6 currently contained in 1000 that applies to all Federal
- 7 orders.
- Q. Okay. 1000.76?
- 9 A. That's correct.
- 10 Q. Yeah, okay. That's fine.
- Now, let's talk about part (c). You're
- 12 familiar -- you've testified you're familiar with the
- operation of part 76(c), and that's because you have
- 14 plants that are in California regulated under the Cal --
- 15 present California state order system, which are
- 16 partially regulated in the orders which you administer,
- 17 correct?
- 18 A. That's correct.
- 19 Q. Okay. And do you publish on your -- on your
- 20 website and otherwise in both orders a list of those
- 21 plants on a monthly or other periodic basis?
- 22 A. Yes, we public publish the plant name and
- 23 location.
- Q. Okay. Do you do that monthly or annually or
- 25 how?

A. We should be updating that monthly, certainly annually, but I believe it should be updated monthly.

Sometimes there's a little bit of lag.

- Q. Okay. But with respect to -- to both orders, the Pacific Northwest and Arizona?
- A. The effort is made to keep those as currently as possible for both orders, yes.
- Q. Okay. Do you -- now, you've testified that there's a calculation made with respect to the -- to those plants under Section 76(c). Can you just tell us what that calculation is again?
- A. Yes. Yes. We look at the applicable Federal order Class I price at the location of that partially regulated plant.
 - Q. Okay. And how do you determine that?
- A. Well, that's -- that's based on the -- you know -- well, no, there's location for every county in the country, so it's based on plants -- milk at -- for plants is priced at where the plant is located, not where they sell the milk. So if they were in Los Angeles County or whatever county in California, we have a Class I differential for this county, and that would establish the effective Class I Federal order price for that.
 - Q. And that Class I differential is also in part

- of 1000 of the regulations?
- A. That's for -- for California, yes, it is.
- Q. Okay. And that, then, is incorporated by reference, in essence, into your orders?
- 5 A. Yes.
- Q. Okay. So -- so you look at part 1000, so
- 7 you -- you have the location of the plant, you look at
- 8 part 1000, is that Section, what, 52, 54?
- 9 A. I believe class -- location adjustments are
- 10 52.

- 11 Q. Okay. If you find the county in 52, and that
- 12 tells you then what the Federal order price is at
- 13 that -- applicable to that plant, correct?
- A. Gives you the differential that you would add
- 15 to the movement, right.
- Q. Oh, so you add the -- that tells you how to
- 17 calculate --
- 18 A. That's correct.
- 19 Q. -- the applicable price?
- 20 A. Right.
- 21 Q. So now -- how do you -- to what do you compare
- 22 that price?
- A. To the -- what the -- the applicable state
- 24 price for that product under the state program.
- 25 Q. Okay. And what's your source for that

information?

1

10

11

12

13

14

17

18

19

20

21

22

23

24

- A. We go to the state itself, the state regulations.
- Q. Okay. Now, do you -- do you publish on your on your -- on your website, a, or do you have, you know, in your orders information which would show us, which would tell for each location in California the published Federal price and the published state price for any given -- at any given time?
 - A. No. I believe when we -- on our plant list that lists the name and location, we might -- sorry, because I don't do that myself, but we might put the location differential on there, I'm not sure.
 - Q. The Federal -- Federal --
- 15 A. Federal record. We're not going to publish
 16 anything in regard to the state.
 - Q. Okay. So when you -- when you, however you do calculate with respect to those plants, a -- an obligation to the Federal Order Pool if the Federal price is higher than the state price?
 - A. They -- they -- we calculate, obviously, see what it is, correct, we calculate -- you know, if it's a positive, it's an obligation, if it's a negative, then it's not. So, yes, we calculate the -- take their price, our price, and compare it.

- Q. Okay. And can you testify are those generally positive obligations from the California plants to -- to the Orders?
- A. Well, obviously the price variances would -would, you know, would vary, but in most cases the

 Federal order price -- it would depend month to month.

 I guess without having the data in front of me, I would
 hesitate to say if it's more, what they pay.
- Q. Okay. But they have -- they have paid in?
- 10 A. Oh, yes.

- 11 Q. Over the years?
- 12 A. Yes, yes.
 - Q. The -- there was an exhibit placed into evidence yesterday by -- through the Chief of Market Information Branch, Ms. Warren, which is Table 21 of Exhibit 9, which showed the number of partially regulated plants in the Federal order system that had that status under Section 76(c), and the number for most months was ten. Does that sound about right in terms of the number of plants that --
- A. I'd say as -- oh, thank you. Thank you, Mr. Hill.
 - And so I'm looking at Number Table 21, it's not marked, but whatever exhibit this is. Number of partially regulated distributing plants using 76(a),

- 1 (b), or (c), all orders. So I see, so they -- so by
- 2 year, (a), (b), (c), so this is for all the orders,
- 3 through, right, not just for 124 and 131; is that
- 4 correct?

15

16

17

18

19

20

21

22

23

24

25

- Q. I think so.
- A. Okay. That appears to be ten, nine, ten, nine, 11. So I guess the data speaks for itself, you
- 8 know, since it's aggregated.
- 9 Q. And the information on your website would -10 for the Orders 124 and 131, we could -- we could look at
 11 that information, identifying the partially regulated
 12 plants, and count them up, and -- and compare them to
 13 that data to see whether basically all those plants are

from California that are qualifying under (c)?

- A. Again, knowing -- everybody knowing that the California has classified pricing order, that's the only other option they have, our plant -- our list shows they're located in California, that's correct.
- Q. Do -- in our orders, do you have partially regulated distributing plants that are not -- yeah, other partial -- partially regulated distributing plants from states other than California that aren't fully regulated under another Federal order or any order?
- A. Yes, we have partially regulated distributing plants that are not located in a state that has

- 1 classified pricing market orders, and they would be
- 2 partially regulated because they weren't subject to full
- 3 regulation anywhere else.
- Q. Okay. And they'd be on that same list, I
- 5 guess?
- 6 A. That's correct.
- 7 MR. BESHORE: Okay. We had requested -- this
- 8 is a question for Mr. Hill or Mr. Frances, I'm not sure.
- 9 We had requested a witness to speak to the operations of
- 10 the MREA, and is Mr. Wise that witness?
- THE WITNESS: I'll do the best I can.
- MR. BESHORE: Okay. Thank you.
- 13 JUDGE CLIFTON: You're not limited to one
- 14 witness so that you may begin with this witness, and you
- 15 may also ask another witness.
- 16 MR. BESHORE: Well, I know it's not a
- 17 Lunchable, but I'll start with him.
- 18 BY MR. BESHORE:
- 19 O. Okay. So I used the -- the abbreviation MREA.
- 20 What -- what does that stand for, to your knowledge?
- 21 A. Milk Regulatory Equity Act.
- 22 O. And so how does that act -- is that a Federal
- 23 act, Federal law?
- 24 A. Yes, it became part of the Agriculture Market
- 25 Agreement Act.

- Q. How does it affect the -- how does it apply in the administration of -- of your orders?
 - A. If I could turn to --
 - Q. Absolutely.
- 5 A. Okay.

- Q. Whatever you need.
- A. So it's -- it may be a different paragraph in each order, but it's contained in the pool plant definition of each order, so I will take -- we'll go to 124. And we'll look at the pool plant, which is 247.
- JUDGE CLIFTON: Now, just so that the
 transcript will help people who are reading the
 transcript find the right Federal regulation, are you
 saying Section 1024.7?
- THE WITNESS: I apologize. 1124.7. In the copy of the CFR that I have it begins on page 156.
- JUDGE CLIFTON: Thank you. And which of your orders is this?
- THE WITNESS: Yes. 124. 1-2-4 is the Pacific Northwest order.
- JUDGE CLIFTON: Thank you.
- THE WITNESS: So in this particular order,

 Section (e) would be as a result of the MREA, and this,

 again, we're defining what pool plants are. Any

 distributing plant, located within the marketing area as

described on May 1, 2006, from which there is route disposition and/or transfers of packaged fluid milk products in any non-federally regulated marketing area, or areas, located within one or more states that require handlers to pay minimum prices for raw milk -- so we're talking about sales into a state that requires payments for minimum prices for raw milk -- provided that 25 percent or more of the total quantity of fluid milk products physically received at such plant. And there's a parenthetical phrase that excludes concentrated milk for another -- from another plant by agreement for other than I. So, again, skipping over that parenthetical phrase, which I don't -- in our case, I don't think is going to hurt our discussion. Received to such plant -so we've got 25 percent or more of the total quantity of fluid milk products physically received at such plant is disposed of as route disposition and/or as transferred in the form of packaged fluid milk products to other plants. So, again, the first demarcation line is -- is at least 25 percent of the receipts of this plant using Class I. At least 25 percent of such routes disposition and/or transfers in aggregate or in any non-federally regulated market area, or areas, located within one or more states that require handlers to pay minimum prices for raw milk.

14

15

16

17

18

19

20

21

22

23

24

1	And then there's some exclusions there,			
2	they're subject if the order if this plant is			
3	already subject to some state-operated order, that this			
4	doesn't apply. If they're a producer-handler, it			
5	doesn't apply. And if they're fully regulated under			
6	some so that's the exclusions.			
7	So, in essence, that that's the 25/25 rule			
8	that is in many Federal orders to qualify pool			
9	distributing plants, is your operation at least			
10	25 percent Class I, and of that Class I, is at least			
11	25 percent, in this case in the designated state.			
12	Q. So does that does that the MREA			
13	presently operate in your order to impact the regulation			
14	of plants located in one of your orders by selling more			
15	than 25 percent into the State of California?			
16	A. If if we had a plant that did, it would.			
17	Q. Right. And we'll just keep it hypothetical.			
18	A. Right.			
19	Q. Now, in California, if a state if a Federal			
20	marketing order for the State of California were issued			
21	as a result of this hearing, how would that change?			
22	A. That would be a Federal order so that if			
23	that if a plant that currently is a pool plant in one			

25

of my two orders --

Yes.

Q.

- A. -- as a result of a paragraph we just went through --
 - Q. Yes.

- A. -- if California were a Federal order, well, then that goes away because then they don't qual -- if it's not sales into a state that has -- it's different so it doesn't apply.
- Q. Okay. And if hypothetically that plant had a preponderance -- a plurality of its distributions in the California -- State of California Federal Milk Marketing Area as opposed to the area where it was physically located, it would be regulated under the California order?
- A. Like -- like any plant in any -- if they have sales in the Federal order, that qualifies them under multiple Federal orders, they're going to be pooled where they have the most.
 - Q. Okay. So would that apply to plants located in, you know, in Arizona, for instance? Is that a yes?
 - A. Yes, yes. Oh, I'm sorry.
- Q. Thank you.
- 22 And Nevada?
- A. Oregon, Washington, any states that I administer, yes.
- 25 Q. Okay. Let me just ask a question or two on

- 1 producer-handlers. Are the -- first of all, do you have
- 2 access to the -- the hearing notice? A copy of the
- 3 hearing notice as opposed to the CFR?
- 4 A. Thank you. Assuming we're looking for
- 5 Proposal 1?
- 6 Q. This is Exhibit -- yeah, Proposal 1 of Exhibit
- 7 1, it's, you know, Section 10 on producer-handlers.
- 8 A. Right.
- 9 Q. Which is page 47212 of the Federal Register.
- 10 Can you just --
- 11 A. Yes, I have it. Thanks. Sorry.
- 12 Q. Okay. Do you see the proposed
- 13 producer-handler provisions there?
- 14 A. Yes, I do.
- Q. All right. Now, are they similar or different
- 16 than those that you described to Ms. Hancock which are
- 17 in Order 124 presently?
- 18 A. Yes, they -- they are very similar. They use
- 19 more broader language but imply what 124 and 131 make
- 20 more specific.
- Q. Okay. They do not have, for instance, the
- 22 detailed cancellation and reapplication language that's
- 23 in 124; is that correct?
- 24 A. I don't see it.
- Q. Okay. But otherwise, to the best of your

- 1 knowledge, it would operate in essentially the same
- 2 fashion?
- 3 A. Again, I -- you know, I just have to read it.
- 4 | Since it's not order language, not something I'm -- you
- 5 know, had to administer, I hesitate to put a value
- 6 judgment. I'm not trying to be uncooperative.
- 7 Q. Are you familiar at all with the language in
- 8 all -- in the other orders in the Federal order system,
- 9 producer-handler language?
- 10 A. In a -- in a -- in a broad sense, yes, I am.
- 11 Q. Okay. And generally are you -- would -- would
- 12 it be your understanding that the language in Proposal 1
- 13 tracks that language?
- 14 A. I would say that that's -- if -- well, again,
- 15 I'd have to read it and look at all the language. I
- 16 would say this, that to my knowledge, other than Order
- 17 | 124 and 131, I think the rest of the producer-handler
- 18 definitions in the rest of the orders are fairly
- 19 similar, I -- I believe.
- 20 O. Yeah. Okay. How long has the current
- 21 language on producer-handlers been in -- in the orders
- 22 that -- 124 and 131 which you administer?
- A. I think 2004. It should have a designation in
- 24 here.
- 25 | O. Well --

- 1 A. I believe 2004.
- Q. Roughly?
- A. Around 2004, as I recall.
- 4 Q. And were they -- was that a --
- 5 A. Or 2006, maybe.
- Q. Okay. What were the provisions,
- 7 producer-handler provisions prior to that time?
 8 A. I believe in the Pacific Northwest, they were
- 9 pretty much the same. They -- I don't think there was
- 10 much change at all between what they were under the
- 11 Pacific Northwest prior, except for the three-million
- 12 pound. The preamble is what -- I'm sorry if I
- 13 misunderstood. Yeah. The preamble of the
- 14 three million pounds, that is a significant change.
- Q. In other words, there was no limit prior to --
- 16 A. That's correct.
- Q. -- on the -- on the volume of sales that --
- 18 that producer-handlers could have prior to those
- 19 amendments, correct?
- 20 A. That is correct.
- 21 Q. Okay. And were there in fact
- 22 | producer-handlers that had sales route dispositions
- 23 substantially in excess or in excess of
- 24 three million pounds at the time, at the time the
- 25 regulations were changed?

- A. I, again, not trying to be uncooperative, but there is any -- a hearing record for that that I'm sure would be noticed that would answer all that.
- Q. Well, let me ask it this way since you were involved in administration of the order: Were -- did the status of -- of a number of entities under the Pacific Northwest order, the regulatory status change after the producer-handler regulation was adopted with the three-million-pound cap?
- 10 A. Yes.

2

3

4

5

6

7

8

9

11

12

13

- Q. Okay. Are there -- are there any of those producer-handlers that participated in that hearing in opposition to the changes that have remained producer-handler in the Pacific Northwest?
- 15 A. You know, I -- again, I mean, you think -
 16 it's not that long ago, but I'd have to go back and look

 17 at who actually testified.
- 18 Q. Okay.
- A. So I -- off the top of my head, I couldn't hypothesis an answer.
- Q. Is the producer-handler list in -- in your two orders published on your website?
- 23 A. Yes, sir.
- 24 Q. Okay.
- 25 A. Yes, you would go back and look, you could

- look at producer-handlers prior to the change in the order, afterwards, yes. And, I'm sorry, off the top of
- 3 my head I'm not -- I would hate to say somebody's name
- 4 that didn't.
- Q. Right. Okay. The -- the producer-handler --
- 6 here's what I want to get at: California requires
- 7 | fortification, has solids standards in its fluid milk
- 8 products which are higher than other states. You're
- 9 familiar with that generally?
- 10 A. Yes.
- 11 Q. Okay. So if we have an order covering the
- 12 State of California and a producer-handler with
- 13 operations under -- with route sales under
- 14 three million, a qualified producer-handler, uses --
- 15 brings in condensed milk or uses powdered milk to
- 16 fortify its Class 1 products in order to meet the
- 17 California standards, under the language as it's
- 18 presently constituted in the Federal orders as you
- 19 understand it, would -- would its exempt status be
- 20 affected or impaired?
- 21 A. No, I believe we went through that earlier in
- 22 the testimony that it cannot reconstitute; however, you
- 23 can add, increase the solids level.
- Q. So if you bring in condensed to, you know, to
- 25 increase the solids, does that amount to reconstituting?

1 A. No.

- Q. If we use nonfat dry milk to add solids, does that amount to reconstituting?
 - A. No. If you're adding water to nonfat dry milk, that's reconstituting. If you're just adding solids to milk, you're just increasing the solids level.
 - Q. Okay. Would there be -- under the present language, would there be any -- you know, any limit to the poundage of solids in either condensed or nonfat that would impact the qualification as producer-handlers if it was just being used for fortification?
 - A. In 124 and 131, there is no -- the order has no language alluding to any type of limit on the amount of fortification.
 - Q. So if they qualified in every other way and were fortified to meet the standards, their status would not be impacted?
 - A. I wouldn't want to say the standards. Any type of fortification does not disqualify them for whatever reason they're doing that.
 - Q. Thank you, Mr. Wise. I don't think I have any other questions at this time.
 - I would like to request official notice be taken of the handler lists for Orders 124 and 131, partially regulated handler lists, in fact, all handler

about this for a minute. I don't love taking official notice of websites because they change. In the past what I've required is a hard copy to be made part of the record so that we all know what it was that we took official notice of. That's sometimes problematic. So I want you gentlemen to think about how to handle my concerns that in the hearing clerk record there be a hard copy of any anything we took official notice of.

We can take official notice in general of various websites that provides statistical information, and the problem is they're not static.

MR. BESHORE: I appreciate that, Your Honor's concern very much, and I have no problem with, I mean, with providing for the record the copied hard copies of lists that I can currently access. Whether the historical lists are -- are available, any historical lists that might -- we might be interested in are available presently, I'm not sure.

MR. ENGLISH: Chip English.

I have sort of a suggestion to maybe make things easier as we go forward, and I'd suggest that if each of us keep a list, running list of things that we

- 1 have or are going to ask official notice, that rather
- 2 than putting things in seriatim -- two today, one
- 3 tomorrow, six next week -- that we put in a package of
- 4 official notice documents, maybe at the very end of the
- 5 hearing, just as a thought of how we do it.
- 6 JUDGE CLIFTON: Now, I -- I like that
- 7 Mr. Beshore brought it up the minute he thought of it.
- 8 I think you should continue to do that, and a listing at
- 9 the end would be extremely helpful.
- 10 MR. BESHORE: Fine.
- MR. ENGLISH: Doesn't prevent somebody from
- 12 doing it in seriatim, but it strikes me is that for my
- 13 convenience purposes putting it into one booklet of all
- 14 documents that we've taken official notice of would make
- 15 sense.
- 16 MR. BESHORE: Yeah, and while Mr. Wise is
- 17 still here, if there are any -- if we can't access and
- 18 get -- find hard copies ourselves of things we list from
- 19 your office that we want to make notices of, would you
- 20 be prepared to --
- 21 THE WITNESS: Oh, sure.
- 22 MR. BESHORE: -- provide them.
- THE WITNESS: Sure. We'll do the best we can.
- MR. BESHORE: Thank you.
- JUDGE CLIFTON: Mr. Wise, do you need a little

	break or are you ready for the next questioner:			
2	THE WITNESS: Well, I guess I would say yes			
3	and yes. I'm I'm ready to keep going, unless			
4	everybody else wants a break, I want to keep going. I			
5	leave it to the discretion of some of the other people.			
6	JUDGE CLIFTON: You know, if if we did take			
7	a short break, it would allow you and me, Mr. Wise, to			
8	work with the court reporter on some of these citations.			
9	For example, I know those of you who use these numbers			
10	all the time take shortcuts, so when you say, for			
11	example, 1076, that could be written 1000.76.			
12	THE WITNESS: Which would be the correct way			
13	to do it.			
14	JUDGE CLIFTON: But it wouldn't have sounded			
15	like that			
16	THE WITNESS: That's correct.			
17	JUDGE CLIFTON: when you said it. And so			
18	why don't we take a break, you and I will work with the			
19	court reporter on those technical things.			
20	THE WITNESS: Okay.			
21	JUDGE CLIFTON: And and then you'll still			
22	get a break before we start.			
23	THE WITNESS: As long as I don't get left out,			
24	I'm in.			
25	JUDGE CLIFTON: All right. So let's see. Why			

don't we come back and ready to go at 10:25.

(Whereupon a break was taken.)

I spent a little bit of time with Mr. Wise and the court reporter, and I just wanted to make a record. The court reporter was able to capture the sound of his voice, even though he spoke very quickly on some phrases and some section numbers, but for the purpose of those people who want to find these various sections of the Federal regulations that were cited, I wanted to talk about how they're designated so that it might be easier for you if you are, for example, using a search engine such as Google and you just want to put in the section number.

Any and all of these things are in the Title 7 of the Code of Federal Regulation. But, for example, when Mr. Beshore began asking Mr. Wise some questions, and he referred, for example, to 76. How you would look for that is 1000.76, and that's because that Section 76 is applicable to all Federal orders, so it's in the 1-0-0-0 portion.

But then when Mr. Beshore was talking about Section 60, that's found in the individual orders rather than in the portion of the regulations that apply to all, and so you would -- you would look for that, for

example, in Section 1124.60 or 1131.60. 1 2 Now, I wrote down something that I'm going to 3 need Mr. Beshore's help to find what I meant. erroneously wrote down something that doesn't exist in 4 my notes. I wrote down 1051.76, so I got it wrong, but 5 I don't know what I should have written. 6 MR. BESHORE: 1151. 8 JUDGE CLIFTON: I did write 1051. Is -- is 9 there one? MR. BESHORE: It's the -- it's the proposed 10 11 order in the notice of hearing. 12 JUDGE CLIFTON: Oh, oh, oh, oh. Of course. Of course. 13 Thank you so much. So -- all right. 14 glad that what I wrote was correct, I just didn't know where to find it. So because it is not a Federal 15 16 regulation but it is a proposed Federal regulation, you 17 probably need instead the Federal Register citation. So for the Federal Register citation, you could look for 18 19 Federal Register, Volume 80, Number 151, or you could look Federal Register, August 6, 2015. You could look 20 Federal Register 7 CFR Part 1051. Those would be the 21 places you would find it if you do not have a copy of 22 Exhibit 1. All right. Well, that solves my problem. 23 24 Earlier before Mr. Beshore began to ask 25 questions, there was a reference to Section 1076, which

1 really is, as I think I already indicated before we took 2 the break, 1000.76. 3 And where you find the county which tells you how to make a calculation, you're looking in 1000.52. 4 And I think -- I think that's got it. 5 6 The -- the indication that you would look for 7 page 47212 of the Federal Regulations is correct. That 8 particular notice in the Federal Register actually begins with 47210. So sometimes when you're trying to 9 10 find a proposed rule in the Federal Register, having the 11 first page number helps you find it more quickly, 47210. 12 So, counsel, as we continue to question these witnesses, if you'll be mindful there's some people on 13 audio feed and there will be some people reviewing the 14 15 record months from now who may not know precisely where 16 to look, so please help us lead a road map. 17 All right. Back to Mr. Wise. Would the next questioner come forward. 18 19 CROSS-EXAMINATION BY MR. ENGLISH: 20 21 Good morning. Chip English. Q. 22 Good morning, Mr. English. Α. 23 And actually as I begin, Your Honor, I think Ο. this is more of a clarification than anything else, but 24 25 let's -- you're right that there is a 1000.76, but it

- only applies to an individual order such as 1124. If
 you look at Section 1124.76, there really is a 1124.76,
 but it points back to, it says "see Section 1000.76,"
 and incorporates it by reference. Part 1000 was adopted
 as part of the Federal Order Reform as sort of an
 administrative convenience so we didn't have all these
 books that we used to have, four or five books, and now
 - Although I would point out we've lost part 900, you see it in the front, and it was very useful, so -- so we all have to go buy part 900 even though it's only a couple of pages, but -- so I just want to be clear there actually is a Section 1124.76, and there's a Section 1131.76.
 - So, Mr. Wise, we're going to have to be very careful because we both have a tendency to speak too quickly, and you now have a --
 - A. I have two.

we have one thinner book.

Q. So another thing I'd like to do at the moment, Your Honor, is start where Mr. Beshore ended, and that is as to his official notice request going back to plant lists for Order 124 and Order 131, which is 1124 and 1131, I'd actually like that to go back to 2005 because it takes us before 2006 changes, and therefore we'll be able to look at what happened, and we'll have to argue

- about what that meant, but I think that one can look at
 the months before the implementation of the MREA and
 then the regulation thereafter, or actually the
- 4 regulation first, and then the MREA, correct, Mr. Wise?
 - A. Yes.

6

7

8

9

15

16

17

18

19

20

21

22

23

24

- Q. They follow close on each other, correct?
- A. You would be able to -- there would be continuous trail of the listing of the plants.
- Q. Thank you.
- 10 A. And some may have appeared before or after they made any changes.
- Q. So let me start with .76, sorry, 1000.76, or 1124.76, 1131.76, and your discussion that you had with 14 Mr. Beshore with respect to paragraph (c).
 - As a result of how paragraph (c) is written, the -- as opposed to what you do for a plant located in a -- a non -- a partially regulated plant not located in California or location like California that has minimum price regulations and marketwide pooling, if there are any others, for those entities outside of California, you actually for purposes of paragraph (b), the Wichita Option, will look at what is actually paid for the milk, correct?
 - A. Yes. The -- the Order requires us to look at the gross payments that were made for milk that would

- have been producer milk had the plant been fully regulated.
- Q. And unlike that provision with respect to plants that are located in California and perhaps elsewhere that qualify under paragraph (c), if they become partially regulated under paragraph (c), you don't look at the actual payment, you literally look at California Department of Food and Agriculture regulated price, correct?
- 10 A. Yes.

- Q. So the actual price paid if there were premiums paid for a plant in California partially regulated are not considered in paragraph (c), correct?
- A. Yes, correct, we look at the applicable state price versus Federal order Class I price.
 - Q. So if a plant has been obligated to make a payment into, say, Order 1131 for a particular month under paragraph (c), that doesn't mean that its price that it paid for the milk was less than the order value, you just don't know?
 - A. It's not germane.
- Q. So I want to move away from paragraph 1000.76,

 1124.76, 1131.76, and turn instead to 1124.10 and 11 -
 I'm sorry, 1131.10, which are the producer-handler

 provisions for your orders, correct?

1 A. Yes.

9

10

11

12

13

15

16

17

18

19

20

21

- Q. And you had some discussion with Mr. Beshore
 about what the Cooperative Proposal looked at -- like.

 Are you at least familiar with the Dairy Institute of
 California's Proposal? Have you looked at that
 proposal, which appears I believe on page 47221 of
 Exhibit 1?
 - A. I have -- I'm, you know, not over -- overly familiar with it. I will say clearly it contains more paragraphs than the Cooperative Proposal.
 - Q. Whether you looked at it word for word, it looks more similar to your orders than, say, the other orders, correct?
- 14 A. It appears to.
 - Q. Now, leaving aside the three-million-pound issue that we've discussed, or that you've discussed with Mr. Beshore, those other provisions that exist in Orders 1121 and 1131 regarding, you know, proof of ownership and the cancellation and all of that, those came about as a result of a series of hearings in the past based upon facts that were put into evidence like this hearing, correct?
- A. That's how all -- all order language comes, that's correct.
- 25 Q. And you've been around since 1985, correct?

7	7	101
1	Α.	'81

- Q. '81. And as to at least the Arizona Order where you've had that involvement, these provisions were adopted because over time there was a perceived issue with respect to how facilities out West, at least, might move milk around, and going back to Ms. Hancock's sort of comment, sort of try to evade the requirements; is that correct?
- A. They were the result of a hearing as you said earlier. I'm not trying to be evasive.
- Q. But you are aware that there were issues within those orders that were raised with respect to how milk was being dealt with by producer-handlers that resulted in those changes?
- A. Yes, and those -- and those issues would have been detailed in the -- in the decision and the record, hearing record.
- Q. So I can go take official notice of that if I want to.

Within these provisions in Orders 124 and 131, are there any limitations on producer-handler status with respect to an entity that is vertically integrated that includes some form of retail operation where the retail operation can then receive a supply from another entity?

- 1 124 and 131 would prohibit that. Or do Α. 2 prohibit that. 3 0. Do prohibit that. And I was trying to follow, but maybe I missed 4 it with Mr. Beshore, and maybe I'm just going to ask the 5 question a different way. We know that there were 6 7 producer-handlers under your Orders 1131 and 1124 prior 8 to the spring of 2006 that -- that qualified for the 9 exemption of producer-handler, and that if we go look at 10 the list, they didn't qualify for the exemption after 11 that, correct? 12 Α. There are -- our -- our handler plant list 13 monthly would show any appropriate changes in handlers' 14 regulatory status. 15 JUDGE CLIFTON: Mr. English, the -- the 16 numbers that you just said, you just meant the two 17 orders with which this witness is familiar because he administers them? 18 19 MR. ENGLISH: That's -- that's correct. JUDGE CLIFTON: All right. 20 MR. ENGLISH: Yes. And -- and -- and also 21 22 because the changes that occurred in 2006 only occurred 23 in those orders.
- 24 BY MR. ENGLISH:

Q. Are there, either in the Pacific Northwest or

- the Arizona Order, the Orders that you deal with, pool distributing plants, fully regulated pool distributing plants for which a portion of their milk is treated as either partially regulated or is not regulated?
 - A. Well, certainly not partially regulated, I mean, if you're a fully regulated pool distributing plant, but they -- there could be, obviously, milk from a farm that they receive from farms that don't qualify as producers, you know, so to that extent, there's milk that may not be priced because it doesn't qualify to be producer milk, if I understand your question correctly.
 - Q. I think you understood my question correctly, but if -- let's just now get down to the weeds. If -- if such a plant receives milk that is not producer milk, would that be allocated differently --
 - A. Yes.

- Q. -- for purposes -- it would -- it would basically be treated as other source milk?
 - A. That's correct.
- 20 O. And how is other source milk treated?
- A. It's down allocated. Down allocated means it is allocated to the lowest use first, Class IV, and then Class III, then Class II, then Class I.
 - Q. Would the plant nonetheless have to account to the pool for the total value of milk, whatever it paid

1	that producer that is not a producer in the Federal
2	order?
3	A. Under a plant's Report of Receipts and
4	Utilization, they report all the milk that they're
5	responsible for and how they used it, regardless of its
6	status.
7	Q. And so that would nonetheless impact the
8	regulated price it has to pay, correct?
9	A. It would it would impact the allocation
10	process, which would result in their obligation.
11	Q. So it's not that they have no obligation on
12	that milk, it's you don't trace back to what they paid
13	for that milk to that that producer?
14	A. That's correct.
15	Q. I have no further questions. And thank you
16	very much.
17	JUDGE CLIFTON: Who would ask next?
18	CROSS-EXAMINATION
19	BY MR. VETNE:
20	Q. John Vetne appearing as a representative of
21	Hilmar Cheese Company.
22	For convenience, I'll just follow up on the
23	last question asked. You used the term down allocated
24	and you described that as allocated first to Class IV,
25	then to III, then to II, then I. Is it correct that in

that process, the Market Administrators impute to that receipt of milk the lowest possible value under their classification system before accounting for producer milk?

- A. The purpose of the allocation process in regard to other source milk is to not give it a higher value priority.
- Q. Right. So when it's allocated to Class IV, it imputes a lower value to that -- that milk, which would the result be that the producer milk gets slightly higher plant blend than otherwise would be the case?
- A. The more other source milk that's allocated to lower classes, then yes, there's no producer milk available to be allocated to those lower classes, so therefore it is allocated to the higher classes.
- Q. And -- and by allocating producer milk to the higher classes, the obligation for which the handler must account to the pool is higher?
- A. Depending on the price relationships. I mean, there's been rare occasions when a class --
- Q. In ordinary circumstances it would be higher, correct?
 - A. That's correct.
- Q. And so if -- if -- if a handler receives other source milk from a farm, farm milk that's allo --

that's -- qualifies as other source and pays, say, a

Class I or a blend price for it, your system would not

follow the price paid but would -- would rather credit

that handler with a value that it might -- might be

lower than actually paid for that milk?

- A. We would -- yeah, the -- the regulatory language would not concern itself with what handlers pay for milk that does not qualify as producer milk. And as we said earlier, it would be allocated to whatever use the allocation process came, so whatever it would work out, allocation process worked out.
- Q. Just in the general scheme of things, is it correct that there are two places in your audit and pool obligation determination process in which you look at total payments to producers by a handler? One is a fully regulated plant that has an obligation to account for milk, you look at the total amount paid to make sure that it's at least blend price, correct?
 - A. Yes.

Q. And the other instance is when you have a partially regulated plant qualifying under Section (b), the Wichita Plan, and you look at -- similar and identically look at the total obligations paid to producers to make sure that it's at least -- at least the minimum -- well, minimum plant blend, the aggregate

of class price obligations had it been fully regulated?

- A. I'm -- your first example, in the regulated environment, we're just guaranteeing that the minimum price was paid. Anything over and above that, we're not concerned with. And, again, 1000.76 we're looking at the gross payments that would have been -- excuse me, that were made for milk that would have been producer milk had the plant been fully regulated.
- Q. I wanted to go back to some terms used and protocols used by your office for those terms on -- for the Section 10 discussion on producer-handlers milk.

 One of the terms you used was "route distribution." In general, route distribution of a producer-handler can't exceed three million pounds. Route disposition is a word used under Section 7(a) and 7(b) for qualifying pool plants also. It's -- it's a term --

Let me ask you this: Does route disposition mean the same thing wherever it's used in the -- in the set of Federal Regulations?

A. Route disposition is also defined in 1000.3, and that reads, "Route disposition means a delivery to a retail or wholesale outlet," parenthetical phrase, "except a plant, either" -- end of parenthetical phrase, "either directly or through any distribution facility," parenthetical phrase, "including disposition from a

- plant store, vendor, or vending machine, and that of a fluid milk product in consumer-type packages or
- 3 dispenser units classified as Class I."

5

6

7

16

- So that would be how route disposition is defined in every Federal order, so any section of any Federal order that refers to route disposition, that's what it's talking about.
- Q. It incorporates that, okay.
- In determining what is route disposition, if
 milk is delivered to a store, has a leak, is bad for
 some reason, is returned to the seller, how is that
 treated?
- 13 A. Route dispositions are sales less returns.
- Q. Okay. A sale in June, a return in July is treated as -- how is that allocated?
 - A. No, it -- the sale less returns would have to be in the current month.
- Q. So -- okay. So if I have June sales, I -- a

 client gets to subtract the returns of route disposition

 for May if they happen to come back to the plant in

 June?
- A. No. No, if -- if you -- on June 1, you

 package milk through June 30, and in between that time

 of 1 through 30, if milk was returned to the plant, you

 know, and -- and -- and so usually it's dumped when it's

- returned to the plant, then route disposition would be sales net returns, but we get to June, June 1. What comes back in June that was bottled in May is -- is a receipt, it's not -- it would not be -- it would not influence -- we would not go back and reduce May's for milk received in June, and we would not reduce June's for milk that was packaged in May. But assuming we're not -- we're not talking about inventory.
 - Q. No, we're just talking about returns.
 - A. Right.

- Q. So is there a return that's -- I'm confused. Is a return that slips through the crack, if -- if packaged milk is delivered on May 30 but returned to the plant on June 5, is that ineligible to be deducted from either May or June's route disposition?
- A. You know, it's not something that I deal with every day. I would say no, but I probably would have to look at our internal audit guidelines. But, again, each month stands on its own, so I don't see how a return from June for milk that was processed in May could have effect on June's route disposition.
- Q. You referred to internal audit guidelines.

 Is -- is that a document that directs you for uniform policy in how the order is administered, for example, route disposition so it means the same?

- A. Not -- not uniform policy. We all have our

 own -- my understanding, you know, we have our

 procedures that we want to follow, so it's an internal

 document outlining our own internal procedures.
 - Q. Created -- created by those -- the Regional Market Administrator's Office?
 - A. It's an internal document.
 - Q. But is it created by your office or created by Dairy Programs in Washington?
 - A. No. My office.

- Q. Is there a similar guideline created by the Dairy Programs in Washington?
- 13 A. I don't know. Not that I'm aware of.
 - Q. Okay. So, again, to determine eligibility focusing on producer-handler, if the producer-handler packages products, 301 million pounds of fluid milk products in a month and leaves one million in -- in its plant on the shelves as inventory for the next month, that's not counted in a way so as to disqualify the plant for the current month; is that correct?
 - A. For 124 and -- and 131, again, the -- the introductory paragraph, from which there is route disposition in the marketing area and -- excuse me, no "and" -- from which total route disposition and packaged sales of fluid milk products to other plants during the

month does not exceed three million.

Q. Okay. So I get it. The answer to the question, if it doesn't meet the definition of route disposition.

Is there any -- for -- for fully regulated plants, there's a audited and regulated shrinkage if a fluid milk processing plant has actual shrinkage, loss, pipes, whatever, of a half percent, they -- they get to allocate that volume to a lower class, it's not charged as Class I. If they exceed two percent they only get to allocate two percent to that lower class; is that correct?

- A. Yes.
- Q. Is there a similar rule of thumb that your office applies to producer-handlers?
 - A. No.

Α.

Q. For that -- that three-million-pound limit, assume with me that a producer-handler manages to produce exactly three million pounds and -- and processes, packages, and distributes that three million pounds, but adds to it condensed milk to meet California standards so that the packaged volume exceeds three million pounds even though the farm production did not, would that plant be disqualified?

I would tell you this, that I've never had

- that situation occur that I've had to administer, so I'd
 have to deal with that when it came up, I've never had
 to deal with that.
 - Q. Nevertheless, you'd look at volume distributed, it's the volume in the package that you're looking at, not volume that comes from the farm?
 - A. It's volume weight conversion factors based on the packaged products.
 - Q. One of the important criteria to maintain producer-handler status is that no portion of the milk produced on the producer-handler's farm would qualify as producer milk if sent elsewhere; is that correct?
 - A. You cannot be a producer and a producer-handler from the same farm.
 - Q. So if -- if -- if the producer-handler's plant couldn't process all the milk and takes it from the farm and it sends it to a distributing plant, bingo, that -- that's it, that producer qualifies as a -- that qualifies as a producer receiver at that distributing plant?
 - A. No, if the producer-handler qualifies as a producer-handler --
- 23 O. Yes.

A. -- and if he -- if there's milk that that producer-handler delivers to a fully regulated pool

- distributing plant, that is other source milk that is now allocated.
 - Q. I see. Is there limits on how much of that other source milk may be sent to a fully regulated plant?
 - A. Not as long as all the requirements to maintain producer-handler status are being met.
 - Q. Okay. So a producer may balance his milk supplied by sending milk directly from the farm to any plant, pool plant or nonpool plant, and that does not cause a loss of exemption?
 - A. That in and of itself, no.
- Q. Section 76(c), state -- state pricing in pooling system plants. Are there any or have there been any plants that have been fallen -- that have fallen under that section because of association with a Montana milk pool?
- 18 A. Are you asking me if Montana has a --
- 19 O. Yes.

4

5

6

7

8

9

10

11

- 20 A. -- state classification?
- 21 Q. Yes.
- 22 A. Yes, they do.
- Q. Okay. And they have state pooling?
- A. Yes. California, Montana, to my knowledge,
- 25 are the -- the only two states in an order.

- Q. You're not aware of one in Western New York?
- A. No, I'm not.
 - Q. Okay.

3

4

5

18

19

20

21

22

23

24

25

- A. I'm not aware of much west of the Mississippi.
 - Q. That's a long way. It's close to me.

6 Have any plants fallen under this 76(c)

- 7 section because of association with Montana versus
- 8 California?

for Montana?

- 9 A. If the -- the Section 76(c) is not specific by
 10 state, so any state that meets the criteria enumerated
 11 in 76 would -- this is the only option those plants
 12 would have.
- Q. I think -- I think we had earlier discussion that if on the partially regulated list you see a plant located in California, we can assume it's a 76(c) plant. Have there been instances where there are plants on the 76(c) list from which we may make a similar assumption
 - A. Again, since we in our question -- Q and A here determined that Montana does have a system that qualifies pursuant to 76.
 - Q. In discussion with Mr. Beshore, you had some dialogue on Market Administrators', that's S apostrophe, application of pooling preclusions to a plant that has different regions and multiple markets and plurality in

- one. Do you recall that?
- 2 A. Yes.

- Q. And I -- I have written here with my own quotes around it, like any Federal order, they would be pooled where they have the most sales. Do you recall that --
 - A. Yes.
- Q. -- question and answer?
- 9 It's true, though, is it not, that there are
 10 some plants to which that does not apply, plants
 11 regardless of where they have the most sales that are
 12 for some reason locked into the market in which they're
 13 located?
- 14 A. That is correct.
- Q. Okay. And that would be Section 7(b) plants, extended shelf life plants as one example, there may be others?
- 18 A. You -- you are correct.
- Q. And for that matter, in the -- in the orders
 in which -- that you administer, that's -- that's
 uniform language for 76(a) and 76(b), it's fairly
 consistent from order to order?
- A. Yes, that's my understanding.
- Q. And -- and such a locked-in plant actually can be locked into an order in which it has the least amount

of its sales?

1

4

5

6

- A. Yeah, as you point out right, it is regulated in the order it is geographically located in.
 - Q. And that's only if -- so if you look at the geographic boundaries of a marketing area, not order in which it's located, it's an area in which it's located; is that correct?
 - A. It's the marketing area --
- 9 Q. Right.
- 10 A. -- as is defined under the order.
- Q. Okay. So if -- if an ESL plant, say, is
 located in the donut hole in Mississippi, that's not
 part of the Central Marketing Order, that -- that plant
 isn't captured under that marketing provision?
- 15 A. Again, if it's not located in the marketing 16 area as defined in the order, it's not subject to that 17 provision.
- Q. And then it could qualify as the partially regulated plant under 76(b) anyway?
 - A. It would be subject to any other applicable definition, yes.
- Q. That's it. Thank you.
- JUDGE CLIFTON: Who now has questions for Mr.
- 24 Wise?

20

21

Mr. Beshore.

CROSS-EXAMINATION

2 BY MR. BESHORE	2
------------------	---

Q. Marvin Beshore.

One point I forgot to pick up on with respect to Section 1000.76. In -- in that section under part (b) -- I'm sorry, part (a), (a)(2) in particular, there's reference to use of the producer price differential in determining a handler's obligation, partially regulated handler's operation, you see that? Okay. Can you just for foundation purposes tell us how that -- how that works and what goes into the equation there?

A. They are both, (2) and (3), as you -- as -- well, some of our orders price milk based on just skim and fat, and some price on components, nonfat -- excuse me, other solids, protein, and butterfat, so -- and that's known as Multiple Component Pricing. So for orders with Multiple Component Pricing, compute a Class I differential price by subtracting Class III price from the current month's Class I price. Multiply the remaining pounds -- excuse me, multiply the pounds remaining after the computation in paragraph (a)(1)(i), which is where they narrow down exactly what it is, how many pounds we are pricing of this section, by the amount by which the Class I differential price exceeds

- the producer price differential. And that if you go on to III, we talk about doing -- how the Class I price exceeds the uniform price, and so what we're doing under (2) under Multiple Component Orders is getting the same playing field of diff -- in essence, the difference
 - Q. Okay. Now, the use of the producer price differential in -- in part (a)(2) of Section 76 requires you to have a -- a value from the order to use; is that fair?
- 11 A. The producer price differential is calculated, 12 that's right.
 - Q. Okay. So here's my question. In our -- in our proposed order, that is Proposal 1, the Cooperatives' proposed order, we calculate the regulations proposed there, the producer price differential value to be calculated, but -- and -- and announced, but not actually used in paying producers because we have a different formula for allocating that value to the milk components. Okay?
 - A. Okay.

between I and blend.

6

7

8

9

10

13

14

15

16

17

18

19

20

21

Q. So if the language of an order provides for
the calculation for producer price differential
regardless of whether it's actually used in the
obligation to producers, would that allow you -- would

- that language if it's in the order allow you to administer part 1000.76 as written?
- A. I don't know because it's not written to
 handle that. It was written for the world that we're
 living in now, that the producer price differential is
 calculated under the orders as now, so I really don't
 know.
 - Q. Okay. Well, assuming -- but it -- it requires a value, and it doesn't -- the language as you've described it I think requires that -- that you use a value there?
 - A. Yes.

2

9

10

11

12

13

14

15

16

17

18

19

20

21

22

- Q. Okay. So presumably if there was a value stated in the order, you could apply it in that way?
 - A. You're -- again, you're trying to get, you know, a handler's cost of milk versus what their obligation to the pool is, and -- you know, and so however that would work out would be how -- I'm not -- again, I'm trying not to be evasive, but I can't really answer that specifically, I can only address what this is written to do --
 - Q. Okay.
- A. -- which is trying to equate a difference between I and blend that we do in skim weight.
 - Q. And the producer price differential is the

1 proxy for that? 2 Α. Yes. 3 Q. Okay. Thank you. 4 JUDGE CLIFTON: Mr. Wise, you're -- you're an extraordinary witness and extraordinarily helpful. 5 6 You've used the phrase "difference between I 7 and blend" a couple times, and in the transcript that's how it will look, "the difference between I and blend." 8 By "I," do you mean Class I milk prices? 9 10 THE WITNESS: Yes, and I apologize. When I 11 say "I and blend," the I is the Class I price applicable 12 to that calculation. And when I say "blend," that means 13 the uniform price. 14 JUDGE CLIFTON: Thank you. That part I did 15 understand. 16 Who will next question Mr. Wise? 17 Mr. Wise, how many days do you expect to be here? 18 I'm leaving tomorrow. 19 THE WITNESS: 20 JUDGE CLIFTON: You're leaving tomorrow? 21 THE WITNESS: Certainly if -- if my boss tells me to be available any other time, I will do -- she says 22 jump, I says how high, so in all seriousness, if I'm 23 24 required to be here again, I'll be here again. 25 JUDGE CLIFTON: Thank you so much. For now

- 1 you may step down.
- THE WITNESS: Thank you. Thank you.
- JUDGE CLIFTON: I -- I really hate to let him
- 4 step down now that we've got him trained to speak
- 5 slowly.
- I think this would be a good time to do those
- 7 things that I like to do at the beginning of each day,
- 8 beginning with having the various participants introduce
- 9 themselves. I'd like to start with those people who are
- 10 USDA employees, beginning first with those from the
- 11 Agricultural Marketing Service followed by those from
- 12 the Office of the General Counsel. As I've indicated,
- 13 I'm a USDA employee, and now I'd like to have the rest
- 14 of you identify yourselves, please.
- 15 I realize that some of you who were here
- 16 | earlier aren't in the room right now. That's -- that's
- 17 fine. We'll just go forward with whoever is in the room
- 18 right now.
- 19 MS. TAYLOR: My name is Erin Taylor. E-R-I-N.
- 20 T-A-Y-L-O-R. Agricultural Marketing Service Dairy
- 21 Program.
- 22 MS. WARREN: Lorie, L-O-R-I-E. Warren,
- 23 W-A-R-E-N. Chief of the Market Information Branch for
- 24 AMS, USDA AMS Dairy Program.
- 25 MR. POLLOCK: William, W-I-L-I-A-M.

- 1 Pollock, P-O-L-L-O-C-K. Agricultural Economist Federal
- 2 Order 33 on detail for Dairy Program.
- 3 MS. ELLIOTT: Pamela Elliott. P-A-M-E-L-A.
- 4 E-L-L-I-O-T-T. Product Marketing Specialist USDA AMS
- 5 Dairy Program.
- 6 MS. MAY: Laurel May. L-A-U-R-E-L. M-A-Y.
- 7 I'm a Senior Marketing Specialist Rule Writer with the
- 8 Order Formulation Division in AMS Dairy Program.
- 9 MR. HUNTER: Cary Hunter. C-A-R-Y.
- 10 H-U-N-T-E-R. Southwest Milk Market Administrator Order
- 11 | 126. I'm here for support staff.
- 12 MR. CARMAN: Clifford Carman. C-A-R-M-A-N.
- 13 I'm Assistant to the Deputy Administrator for Dairy
- 14 Programs.
- MS. RAGHUNATHAN: Uthra Raghunathan.
- 16 U-T-H-R-A. R-A-G-H-U-N-A-T-H-A-N. Agricultural
- 17 Economist for USDA AMS Dairy Program.
- MS. FRISIUS: Meredith, M-E-R-E-D-I-T-H.
- 19 Frisius, F-R-I-S-I-U-S. Dairy Product Marketing
- 20 | Specialist for Dairy Programs.
- MR. MYKRANTZ: John Mykrantz. J-O-H-N.
- 22 M-Y-K-R-A-N-T-Z. I'm an Agricultural Economist with the
- 23 Pacific Northeast and Arizona Order -- Orders on detail
- 24 with Dairy Programs.
- MR. SCHAEFER: Henry Schaefer. H-E-N-R-Y.

- 1 S-C-H-A-E-F-E-R. Economist for the Upper Midwest Milk
- 2 Marketing Order, Federal Order Number 30, on detail with
- 3 AMS Dairy Programs.
- 4 MR. CRYAN: Good morning. My name is Roger
- 5 Cryan. R-O-G-E-R. C-R-Y-A-N. I'm a Supervisor
- 6 Agricultural Economist in Washington, and I'm here to
- 7 | support the data and Economic Impact Analysis.
- MS. COALE: Dana Coale. D-A-N-A. Coale,
- 9 C-O-A-L-E. Deputy Administrator USDA AMS Dairy Program.
- MS. BECKER: Lauren Becker. L-A-U-R-E-N.
- 11 B-E-C-K-E-R. Office of the General Counsel.
- 12 MR. HILL: Brian Hill. B-R-I-A-N. H-I-L-L.
- 13 Also attorney with the Office of General Counsel.
- JUDGE CLIFTON: Thank you.
- 15 And now I'd like also those participants
- 16 beginning with those who submitted written proposals to
- 17 the USDA for this hearing. Please you and your team.
- 18 MR. BESHORE: Marvin Beshore. M-A-R-V-I-N.
- 19 B-E-S-H-O-R-E. Representing the proponents of Proposal
- 20 1, California Diaries, Inc., Land O'Lakes, Inc., and
- 21 Dairy Farmers of America, Inc.
- 22 MR. VLAHOS: John Vlahos. J-O-H-N.
- 23 V-L-A-H-O-S. Of Hanson Bridgett. H-A-N-S-O-N.
- 24 B-R-I-D-G-E-T-T. San Francisco. Co-counsel for the
- 25 proponents of Proposal Number One.

- 1 MS. THOMPSON: Good morning. I'm Megan Oliver
- 2 Thompson. Megan is M-E-G-A-N. I'm also an attorney
- 3 with the Law Firm of Hanson Bridgett in San Francisco
- 4 and co-counsel for the proponents of Proposal Number
- 5 One.
- 6 MR. WEGNER: I'm Thomas Wegner. T-H-O-M-A-S.
- 7 Wegner, W-E-G-N-E-R. I'm a Dairy Economist with Land
- 8 0'Lakes.
- 9 MR. ERBA: My name is Eric Erba. E-R-I-C.
- 10 E-R-B-A. I'm a Senior Vice-President and Chief Strategy
- 11 Officer of California Dairies, Inc.
- 12 MR. HOLLON: Elvin Hollon. E-L-V-I-N.
- 13 H-O-L-L-O-N. Director Fluid Marketing and Economic
- 14 Analysis for Dairy Farmers of America.
- 15 MR. ENGLISH: Good morning, Your Honor. My
- 16 name is Chip English. C-H-I-P. E-N-G-L-I-S-H. With
- 17 the Law Firm of Davis Wright Tremaine in Washington, DC,
- 18 and I'm here on behalf of the Dairy Institute of
- 19 California.
- 20 MS. VULIN: Good morning. Ashley Vulin.
- 21 A-S-H-L-E-Y. V, as in Victor, U-L-I-N. I'm also an
- 22 attorney on behalf of Dairy Institute of California.
- 23 Thank you.
- 24 MR. SCHIEK: Good morning. I'm William
- 25 Schiek. That's W-I-L-I-A-M. Schiek is S-C-H-I-E-K.

- 1 I'm an Economist with the Dairy Institute of California.
- 2 MS. KALDOR: Good morning. I'm Rachel Kaldor.
- 3 R-A-C-H-E-L. K-A-L-D-O-R. I'm Executive Director of
- 4 Dairy Institute of California.
- 5 MR. LEMMON: Good morning. My name is John
- 6 Lemmon. L-E-M-M-O-N. Counsel for Dairy Institute of
- 7 California.
- MS. TAYLOR: Sue Taylor, standard spelling,
- 9 Vice-President Dairy Policy and Procurement for Leprino
- 10 Foods. L-E-P-R-I-N-O.
- MR. DRYER: Good morning. Greg Dryer.
- 12 G-R-E-G. D-R-Y-E-R. Senior Vice-President Industry and
- 13 Government Relations for Saputo Cheese, USA, and a
- 14 member of the Dairy Institute of California.
- MR. BLAUFUSS: Good morning. Rob Blaufuss.
- 16 Blaufuss is B-L-A-U-F-U-S-S. I'm the Senior Manager of
- 17 Dairy Risk Management and Economics at the Dean Foods
- 18 Company.
- MR. VETNE: My name again is John Vetne,
- 20 V-E-T-N-E, appearing as a representative for Hilmar
- 21 Cheese Company. Also appearing with me but not in the
- 22 room at the moment are Alan Zolin. A-L-A-N. Z-O-L-I-N.
- 23 And James Dejong. James. D-E, no space, J-O-N-G.
- 24 Who -- who is management at Hilmar Cheese Company.
- 25 Thank you.

- MR. VU: Good morning. I'm Bao Vu. B, as in
- 2 boy, A-O. Last is Vu. V, as in Victor, U. And I'm
- 3 | with the law firm Stoel Rives. With me here earlier
- 4 today was also Nicole Hancock, and together we represent
- 5 the California Producer Handlers Association, as well as
- 6 Ponderosa Dairy. Thank you.
- 7 JUDGE CLIFTON: And now I'd like those other
- 8 participants that I'd like to have identify themselves,
- 9 and this is whether or not you submitted a written
- 10 proposal.
- MR. SMITH: Daniel Smith, S-M-I-T-H,
- 12 representing the Maine Dairy Industry Association, the
- 13 Kentucky Dairy Development Council, Georgia Milk
- 14 Producers, Inc., and the Tennessee Dairy Farmers, Inc.
- 15 Thank you.
- 16 MS. REED: Good morning. Kristine Reed.
- 17 K-R-I-S-T-I-N-E. R-E-E-D. Law firm is Miltner Law
- 18 Firm, and we are counsel for Select Milk Producers.
- 19 MR. MILTNER: Good morning. Ryan Miltner with
- 20 Miltner Law Firm. It's M-I-L-T-N-E-R.
- MS. ACMOODY: Good morning. Andy AcMoody, A-C
- 22 capital M-O-O-D-Y, and I'm the economist with Western
- 23 United Dairymen.
- 24 JUDGE CLIFTON: Is there anyone else who would
- 25 like to introduce themself at this time?

Are there any dairy farmers here who would 1 2 like to be heard from today? 3 I'd like now to move to preliminary matters. I'd like first to call on a representative of the 4 Agricultural Marketing Service to give the general 5 quidelines and introductions that we have done each of 6 the two days already, and I'd like to have it done again 7 8 today. 9 Good morning. Laurel May. MS. MAY: 10 As you know, we're here to talk about a 11 proposal for a Federal Milk Marketing Order in 12 California. We welcome witnesses from the audience to speak, and if you would like to speak, you need to see 13 Meredith Frisius, who will stand, and she will put you 14 15 on the list and let the judge know that you would like 16 to speak. 17 As audience members, you may also ask questions of any of the witnesses, and if you would like 18 19 to do so, you can approach the microphone when Judge 20 Clifton indicates that that would be appropriate. 21 As you know, we have a live audio feed, and it is not being recorded, but you can listen in to it if 22 you're not here in the room at 23 24 tinyurl.com/camilkhearing, all one word. 25 Transcripts and exhibits will be available

approximately two weeks after the end of each week's 1 2 hearing sessions, and you can access those on our AMS 3 Dairy website, which is www.AMS.USDA.GOV/caorder. We are also providing a file of the exhibits 4 that have been introduced, and they're -- the exhibits 5 are filed by number, and it should be over on the side 6 7 of the room, you can find those if you need them. 8 And finally we have refreshments available, 9 and so please help yourselves. 10 JUDGE CLIFTON: I'd like to say again that the 11 transcript should be headed with the two lines, United 12 States Department of Agriculture Before the Secretary of 13 Agriculture. The case caption is In Re: Milk in California. The docket number should be shown as two 14 15 lines. The top line is capital A capital O in brackets. 16 AO stands for Agreements and Orders. And the docket 17 number is next on the next line, Docket Number 15 hyphen 0071. 18 19 People have been very good about taking their separate conversations out of the hearing of those of us 20 in the room so as not to disturb the witnesses and those 21 listening to the witnesses. That's worked out very 22 23 well. 24 This public hearing is being held to consider

512

and take evidence on the proposed establishment of a

Federal Milk Marketing Order to regulate the handling of milk in California. The proposed marketing area would incorporate the entire State of California.

USDA received four proposals from interested parties, some that include certain milk pricing and pooling provisions not found in the current Federal Milk Orders. The proposals incorporate the same dairy product classification system used throughout the Federal Milk Marketing Order System. Additional features would recognize California quota premium and fluid milk fortification values.

This hearing will consider the four proposals as contained in the Federal Register hearing notice published on August 6th, 2015. And as I indicated yesterday, there's also under consideration additional information from Mr. English because some of the language he proposed was rejected, and I will review that and determine that after I've had an opportunity to hear his argument and those of others.

All right. I am delighted that Dana Coale is here. I would like her to come forward at this time and identify herself with her title and responsibilities, and she has some information that's of interest to all of us.

And I'm -- I'm pleased to know that she

listened in on the audio feed even though she wasn't here for the previous days.

MS. COALE: Good morning. I'm Dana, D-A-N-A, Coale, C-O-A-L-E, Deputy Administrator with USDA Dairy Programs.

There have been many questions with regards to how the proceeding will continue in the event that there is a lapse in funding for the federal government, and I'm here today to provide you a minimal amount of information, the most that I -- I am approved and allowed to share. I cannot comment with regards to whether or not I believe there will be a bill passed in Congress to fund the government, but what I will share with you is what will happen in the event that there is a lapse in funding.

If on September 30th at the conclusion of the day there has not been any appropriated funding passed and approved by Congress, the judge will adjourn the hearing with a statement that indicates that you will be adjourned until October 1st the next morning at 9:00 a.m. as you typically do. She will then provide a caveat that if there is no funding or there is a lapse in funding, the hearing will be adjourned until a further point in time.

All USDA personnel who are associated with

this hearing will be required under law to return back to their duty stations as we are not exempted or excepted employees allowed to continue to operate. We will be departing on October 1st. The hearing will be adjourned.

Part 900, 7 CFR Part 900.6(b)(2) allows the Administrative Law Judge to adjourn a hearing. The hearing will be adjourned until further notification.

In order to find out if the government has been funded, we will provide a number on September 30th that you all are welcome to call to determine if a budget has been passed and if we will be holding the hearing on the 1st.

In the event that we depart on the 1st, the hearing will be adjourned until further notification. 7 CFR Part 900.8(a) requires that we provide notification for when that hearing will be reconvened according to part 900.4(b) Giving Notification. We will publish in the Federal Register the notice to reconvene the hearing, and we will be able to do that as quickly as we can.

I would anticipate that you could plan tentatively for the hearing to reconvene somewhere in the neighborhood of five to seven days following the funding of the government. What those days are, I don't

1 know. 2 Are there any questions? Yes, Chip. 3 MR. ENGLISH: I said give me a minute, I'm 4 trying to read the sections. 5 MS. COALE: 900.6(b)(2). 900.8(a). And 6 900.4(b). And these references are all to the Rules of 7 Practice. 8 MR. ENGLISH: Might I --9 JUDGE CLIFTON: Mr. English, please. MR. ENGLISH: Push her aside. 10 11 This is Chip English. 12 It's not an entire surprise that this issue is coming up today. I don't think counsel had the 13 14 sections, and that's not to say we couldn't try to find them, but we're doing other things. 15 I might suggest that maybe take, like, a five-, ten-minute break, and 16 17 let counsel confer, and then ask questions if we still have questions at that time. Does that make sense? 18 Ι 19 would urge us to do that so that we're not just all 20 sitting here while we're reading the language and trying 21 to figure this out. JUDGE CLIFTON: Yeah, I love breaks. 22 I don't 23 think five minutes is adequate. 24 MR. ENGLISH: 15. 25 JUDGE CLIFTON: Why don't we take a 15-minute

1 All right. So please be back and ready to go at break? 2 11:55. 3 (Whereupon a break was taken.) JUDGE CLIFTON: We're back on record now. 4 It's 11:55. 5 Who -- who would like to address -- okay. 6 7 Both of you want to go first. This is the first time. 8 Oh, you support Mr. English? All right. 9 MR. BESHORE: Well, I think I do --10 MR. ENGLISH: We're on the same side again. 11 UNIDENTIFIED VOICE: Temporarily. 12 MR. ENGLISH: Chip English. 13 Thank you very much for the break, Your Honor. 14 It gave us an opportunity to have some conversations 15 among ourselves, the participants, with general counsel, and with Ms. Coale. 16 17 I have two questions. The first is when you said five to seven days, I believe is what you said with 18 19 respect to a return after the end of a lapse in funding, which I know is a wonderful phrase, and I know you can't 20 21 use the other phrase. So is that calendar days or 22 business days or do you know? 23 MS. COALE: Unfortunately I can't provide any 24 specific information with regards to it being calendar 25 days or business days. What would happen is we would

need to have a document delivered -- cleared through the
Department and delivered to the office of the Federal
Register. We would have that ready to go on the day

With regards to publication of that Notice to Reconvene in the Federal Register, I can't give you any indication as to how long that would take them because I'm certain, you know, they would have to be restarting up and may have a backlog of documents as well, but we would certainly try to make it a priority.

MR. ENGLISH: Thank you.

that the government is back up and running.

So then the second is more of a -- in the form of a request, and this comes from a number of people.

Frankly, Ms. Vulin had the initial idea and we kind of modified it, but could you take back to the Department the idea of drafting and trying to clear -- yes, I know that's fun -- a notice that could be published prior to October 1st that says in the event of a lapse of funding, or whatever phrasing you need to use, that this hearing will reconvene here on X days, three days maybe, I understand travel schedules being what it is, X days after the lapse of funding X. Subject to that if that is, God forbid, October 23rd or whatever day that was that we were meeting somewhere else that we make sure we fix the location so we don't screw that up.

	I'm just going to ask that that request
2	that's our request because maybe that would speed this
3	whole process up. And I understand that may be
4	impossible, but people may not be willing to do a
5	contingent plan for lapse of funding, but I'd at least
6	ask, and I think that the rest of the participants
7	concur with me that we would like to try to do that. So
8	that's our request.
9	MS. COALE: So based on your request, yes, we
10	will take that back to the Department for consideration,
11	but I can give you no indication as to what may or may
12	not happen.
13	MR. BESHORE: Okay. So Marvin Beshore I
14	have just two tiny clarifying questions hopefully. One
15	is is there a a time required between the publication
16	of the Notice to Reconvene and when it can happen? Is
17	there does that have to be three days, five days, or
18	anything like that?
19	MS. COALE: No. If you look very
20	specifically, and I have with me in front of me Section
21	CFR Part 900, and if you look in Section 8, paragraph
22	(a), Time and Place, and this is under the conduct of a
23	hearing, part way through there it indicates well,
24	let me read it just to clarify.
25	"The hearing shall be held at the time and

place fixed in the Notice of Hearing unless the judge
shall have changed the time or place, in which event the
judge shall file with the hearing clerk a notice of such
change, which notice shall be given in the same manner
as provided in Section 900.4, paren, relating to the
giving of notice of hearing, paren."

If you refer back to Section 900.4, paragraph (a) deals with the filing and contents of the Notice of Hearing. Paragraph (b) very specifically talks about giving Notice of Hearing and supplemental publicity, and it is in paragraph (b) that notification is required in the Federal Register, but there is no designation as to the number of days required for that notification.

MR. BESHORE: So if I understand correctly, then, that -- the time for reconvening could be set and be provided to public by means other than the Federal Register prior to the time it's -- it's published so that conceivably we could reconvene the same day it was published. Is that fair?

MS. COALE: We will certainly give everyone involved and everyone interested in this proceeding the maximum amount of notification we can as to when the hearing will reconvene, but the hearing officially cannot reconvene until it is published in the hearing notice. So we will do our best to provide notification

1 with regards to that. 2 MR. BESHORE: One other -- one other question. 3 That notice for reconvening, would I assume contain no other content with respect to the subject matter of the 4 hearing or anything else, it would just be time and 5 place and not any modifications of proposals or the 6 7 like? MS. COALE: For clarification purposes, the 8 9 intent and the specifics of this reconvening of Notice 10 of Hearing will only pertain to when the hearing will be 11 readjourned by the -- reconvened by the judge to begin. 12 There will be no additional information included in that 13 notice. Thank you. 14 MR. BESHORE: 15 MR. VETNE: John Vetne for Hilmar Cheese. 16 I -- 40 years I've never -- in 40 years 17 we've -- we haven't had to rely on this, except maybe once, I think, there was a reopening, not a reconvening, 18 19 but I just want to make sure I understand correctly. 20 Maybe the judge or Deputy Administrator can answer this. The order -- the -- the hearing can be 21 22 reconvened as directed by the judge assigned to the 23 hearing which gives notice to everybody. So at least pro forma, it would come from the judge, although the 24

judge would confer with AMS as to its content, but as I

1	understand what was read there, and like some of the
2	other counsel, I I'm reading it for the first time,
3	the judge could order that a notice be published next
4	week, "If we lack funding, parties are put on notice
5	that the hearing would reconvene as posted on the AMS
6	Dairy Programs website so pay attention." Am I correct?
7	JUDGE CLIFTON: I I would reject that. I
8	think we need a date certain in the Federal Register,
9	but the date certain could be first working day I
10	would need some help with the language, but for example,
11	suppose that it said that we would reconvene on the
12	third working day after government after
13	appropriations have provided for funding of the
14	government, something like that. So I said a date
15	certain; that's not a date certain but it's a way of
16	determining the date.
17	I do think I do think it has to be evident
18	from the face of the Federal Register without reference
19	to some website.
20	MR. VETNE: So date calculable.
21	JUDGE CLIFTON: There. So I love the idea
22	Ms. Vulin, would you stand, please? I love the idea

funding. We now do the notice that if there is a lapse

of funding, and we get that thing in to the hearing

that we don't wait to see if there is a lapse of

23

24

clerk and off to the Federal Register before there's a queue at the Federal Register for other unfinished business. That's brilliant. Thank you.

MS. COALE: I do want to provide for the record a clarification, Mr. Vetne. In past proceedings where we have adjourned a hearing and not have continued it consecutively, we have published in the Federal Register by note of proceeding a notice to reconvene the hearing and have been very specific on when, when that will reconvene. So it has been utilized in the past. That's okay.

JUDGE CLIFTON: I would add at this point that we have asked to be excepted. You know, there used to be a classification when there's a lapse of funding between those who are essential and non-essential federal employees, and that phraseology has gone out of favor. I think the taxpayers wondered why they were paying for non-essential employees at all ever, so that's not how it's phrased any more. But you can understand that there would be certain kinds of federal employees who would have to work, keeping airplanes in the air and that sort of thing. We've asked to be included among them, that's pretty unlikely, but at least we've asked.

What other questions or comments do you have?

How many of you, just by a show of hands, if 1 2 we're interrupted at all want to get back at it just as 3 soon as possible? How many would oppose that and would like a longer gap? Okay. Of those who chose to 4 5 indicate a preference, it was unanimous that we get back 6 to it as soon as possible. 7 I know, particularly for lawyers in private 8 practice, I really appreciate the fact that you made 9 arrangements to devote all your time and attention to this matter for this period of time, and now is when we 10 11 need to be doing this business, so -- and we have this 12 wonderful facility now, we have it now. 13 Thank you. Your Honor. MS. COALE: 14 MR. ENGLISH: Thank you. 15 MR. BESHORE: Thank you. 16 JUDGE CLIFTON: All right. What other 17 preliminary matters would you like to discuss? I'll --I will be working with counsel and the Administrator on 18 19 a document. We'll -- we'll clear it, of course, through the proper authorities, but wouldn't it be lovely if we 20 21 could get that cleared right away. 22 All right. Other preliminary matters?

All right. I guess we're ready for the next

USDA witness. I realize we could go to lunch, but we just had a break, so let's take the next USDA witness,

23

24

- 1 at least for a part of the time.
- MR. HILL: Hold on. Brian Hill. Brian Hill.
- One moment, Your Honor.
- 4 We're going to recall Lorie Warren.
- JUDGE CLIFTON: Ah, good.
- Welcome back.
- 7 THE WITNESS: I just can't stay away. Thank
- 8 you.
- JUDGE CLIFTON: You remain sworn. Would you
- 10 again state and spell your name.
- 11 THE WITNESS: Lorie, L-O-R-I-E. Warren,
- $12 \mid W-A-R-R-E-N$.
- JUDGE CLIFTON: Mr. Hill, you may proceed.
- 14 DIRECT EXAMINATION
- 15 BY MR. HILL:
- 16 O. Good afternoon now.
- 17 A. Good afternoon.
- Q. When last you were here you were asked about
- 19 an additional data request by the Dairy Institute of
- 20 California. Do you remember that?
- 21 A. Yes, I do.
- Q. Can you please tell us what you have found?
- A. Mr. Hill, do you have the number that was in
- 24 the letter?
- 25 O. Number 25.

1 A. 25. Thank you.

2 So this is in reference to the Dairy Institute 3 Request Number 25 on Exhibit 10, the name and location of all milk and dairy product plants located outside of 4 California that received plant or ranch milk of 5 California origin during 2010 through 2015, and the 6 7 aggregate monthly volume and use classification of such exports. We were able to pull that data and determine 8 9 that it would result in restricted confidential 10 information so we cannot provide that.

- Q. So for the record, you denied that request?
- 12 A. Yes.

11

17

18

19

20

21

22

23

24

- JUDGE CLIFTON: Mr. English.
- 14 RECROSS-EXAMINATION
- 15 BY MR. ENGLISH:
- 16 O. Chip English.

Just -- just to clarify because the request was read the way it was written, and yesterday I modified it to say, okay, I understand names and locations are going to be a problem, and we asked instead if you could provide the volume information regardless of where it ended up. And I take what you're saying is even when you do that, you can't do it?

- A. Yes, I -- that is correct.
- 25 Q. I thank you for the effort. Disappointed, but

- 1 I thank you for the effort.
- MR. HILL: I have no further questions, Your
- 3 Honor.
- 4 JUDGE CLIFTON: I'm trying to wrap my head
- 5 around this. So -- so, Ms. Warren, using those criteria
- 6 that you showed us before, there have to be at least
- 7 three and one of them cannot have -- have supplied the
- 8 majority, using those criteria you're not able to
- 9 identify aggregate monthly volume and use classification
- 10 during 2010 through 2015?
- 11 THE WITNESS: That is correct.
- 12 BY MR. ENGLISH:
- Q. Was that effort made on a monthly basis, then,
- 14 was that -- I guess the question is if we made it
- 15 annual?
- 16 A. I still believe it would be restricted.
- 17 Q. If you could go back and just look, and you
- 18 don't have to get back on if you conclude that it was,
- 19 just, you know, if you could just make one more stab at
- 20 it and see if you do it annually, whether that would --
- 21 A. I -- well, I know, I know it won't pass --
- 22 Q. I appreciate that.
- 23 A. -- the test.
- Q. All right --
- 25 JUDGE CLIFTON: So so long as there is one --

- 1 what shall I say? One -- how shall I classify this?
- 2 One plant that is involved with more than half, you
- 3 can't provide the information?
- THE WITNESS: Right. So, I mean, in a
- 5 hypothetical situation, if there were not enough plants
- 6 in any of those months to meet the criteria, it would
- 7 be -- we could not provide it at any point.
- 8 BY MR. ENGLISH:
- 9 Q. I'm going to try one more time. If we divided
- 10 | it by use -- if we didn't divide it up by use, so it's
- 11 just milk volumes?
- 12 A. It would still be denied.
- JUDGE CLIFTON: Are there any other questions
- 14 of Ms. Warren?
- Ms. Warren, thank you. You may step down.
- 16 MR. HILL: I would like it call Clifford
- 17 Carman.
- JUDGE CLIFTON: Mr. Hill, we've been given a
- 19 document. What number will it be known as?
- 20 MR. HILL: This would be marked as Exhibit
- 21 Number 13, I believe.
- MS. FRISIUS: That is correct.
- 23 (Whereupon Exhibit 13 was marked for
- identification.)
- JUDGE CLIFTON: Mr. Carman, I'll swear you in

in a seated position. 1 2 Would you raise your right hand, please? 3 you solemnly swear or affirm under penalty of perjury that the evidence you will present will be the truth? 4 5 THE WITNESS: I do. JUDGE CLIFTON: Welcome back to the witness 6 7 stand. 8 THE WITNESS: But it's been so long. 9 JUDGE CLIFTON: Mr. Hill, you may proceed. 10 DIRECT EXAMINATION 11 BY MR. HILL: 12 Can you please give us your title and tell us 0. a little bit about yourself and what you do? 13 My name is Clifford Carman, C-A-R-M-A-N. 14 Α. 15 currently Assistant to the Deputy Administrator of Dairy 16 Programs. Previously my status with Dairy Programs was 17 a Western Area Marketing Specialist. Then I was Chief of Water Formulation and Enforcement. And in 2006, I 18 19 took the position as Assistant to the Deputy 20 Administrator. Prior to that I worked in a dairy 21 industry for dairymen, Dairylea in the Northeast, and AgWay, which was a large import supply cooperative. 22 also did economic research of USDA in which I wrote the 23 24 Dairy Outlook and Situation Report.

Thank you very much.

25

O.

- JUDGE CLIFTON: Would you spell the name of the businesses for which you worked?
- THE WITNESS: Dairylea is D-A-I-R-Y-L-E-A,
- 4 headquartered in Syracuse, New York, at that time, and
- 5 they have since merged with Dairy Farmers of America.
- 6 Prior to that, it was with Agway, A-G-W-A-Y, a Fortune
- 7 | 100 cooperative at its time -- at the time I worked for
- 8 them.
- 9 BY MR. HILL:
- 10 Q. Now, there was a -- do you have Exhibit Number
- 11 | 13, marked Exhibit Number 13 in front of you?
- 12 A. Yes, I do.
- Q. Okay. As part of a data request from
- 14 Mr. Smith, Amanda Steeneck was asked to put together
- 15 something. Is this the document that she was asked to
- 16 put together, to your knowledge?
- 17 A. Yes, it is.
- Q. Okay. And Ms. Steeneck is not here so you're
- 19 going to be testifying as to these numbers?
- 20 A. Yes. My understanding is Amanda is sick.
- Q. Thank you.
- 22 Could you, please, look at the document and
- 23 give us your assessment?
- A. The document is entitled The Northeast and
- 25 | Southeast Class Utilization Charges Under the Dairy

1	Institute Proposal. There are two sub tables under that
2	document, one for the Northeast Class Utilization and
3	one for the Southeast Class Utilization. Those are, in
4	both cases, in millions of pounds for the years 2017
5	through 2024.
6	Q. And these are changes from the baseline?
7	A. Correct.
8	MR. HILL: Your Honor, I don't have any
9	further I do not have any further questions.
10	I would like to enter this into evidence as
11	Exhibit Number 13 if there are no objections.
12	JUDGE CLIFTON: First let me see if anyone
13	would like to question this witness about the exhibit
14	before determining whether there are objections. No
15	one.
16	Are there any objections to the admission into
17	evidence of Exhibit 13? There are none.
18	Exhibit 13 is admitted into evidence.
19	(Whereupon Exhibit 13 was admitted
20	<pre>into evidence.)</pre>
21	JUDGE CLIFTON: Who would like to ask
22	questions?
23	Mr. Smith was here to introduce himself. I
24	knew he had to leave; I didn't know exactly when. I
25	don't know whether someone can e-mail him a copy of this

if he's already gone so that he doesn't have to wait two 1 2 weeks to see it on the website. 3 THE WITNESS: Your Honor, we will make sure 4 that he gets a copy of the table. 5 JUDGE CLIFTON: Excellent. Thank you. 6 Do you think he's coming back? Oh, he's just 7 missing right now? 8 THE WITNESS: Yes. 9 JUDGE CLIFTON: You're pointing as if he left 10 things in his chair. 11 UNIDENTIFIED VOICE: Computer and printer. 12 JUDGE CLIFTON: Oh, computer's still there, 13 good. All right. 14 So I know, Mr. Carman, you'll be in the room, 15 so would it be all right if we call you at a later time 16 so we can see if Mr. Smith has questions? 17 THE WITNESS: No. No, I will be here, Your 18 Honor. 19 JUDGE CLIFTON: Very good. 20 Mr. English. 21 MR. ENGLISH: I certainly understand he's on 22 the stand with respect to this issue. I had a very

Mr. Francis this morning about with all the examination

yesterday, we went back and worked on things, and we had

brief procedural conversation with Mr. Hill and

23

24

some inquiries going back to some issues that were raised yesterday, frankly by Mr. Smith, and then some other questions. And I know Ms. Steeneck is -- is ill today, and it may very well be that Mr. Carman couldn't answer, but I did have a plan, and I don't know if now is the appropriate time or if you want to wait, but it's up to you, but we were -- we were going to ask for Ms. -- Ms. Steeneck if she were available, or Mr. Carman in her absence, to be recalled to discuss the questions we had about talking -- Mr. Smith has shown up. Not unintended filibuster.

So I don't know whether now is the appropriate time or not at least to getting to the issue and see where it goes. But I'm certainly also willing to yield to Mr. Smith if he wants to ask questions about Exhibit 13. Or however you, Your Honor, and Mr. Hill, and Mr. Carman wish to proceed.

JUDGE CLIFTON: I think you should have -- I think you should go ahead now, Mr. English. Mr. Smith has just arrived back at his chair, and that way if you go forward, it will give him a little time to gather the questions that he has in mind. Let -- let me find out.

MR. ENGLISH: Well, this is -- Your Honor, yesterday you appreciated the conversation that Dr. Schiek had with Ms. Steeneck, and I think this is

1 going to go a lot more efficiently if Ms. Taylor for 2 Leprino has this conversation as opposed to me --3 JUDGE CLIFTON: You do --4 MR. ENGLISH: -- so --5 JUDGE CLIFTON: -- very well, Mr. English, and 6 I'm always appreciative, but I did love the level of 7 understanding between the two economists. 8 Would you state again and spell your 9 name? 10 MS. TAYLOR: Sure. It's Sue Taylor. S-U-E. 11 T-A-Y-L-O-R. From Leprino Foods. L-E-P-R-I-N-O Foods. 12 JUDGE CLIFTON: Your last is spelled how? 13 MS. TAYLOR: T-A-Y-L-O-R. 14 JUDGE CLIFTON: Thank you. You may proceed. 15 MS. TAYLOR: Thank you. 16 CROSS-EXAMINATION 17 BY MS. TAYLOR: Mr. Carman, I have some specific questions 18 Q. 19 related to construction of a California milk price 20 baseline, and they're rooted in my interest in replicating the data that drives Tables 10 and Tables 21 22 58, and it could be that I'm challenged in my 23 spreadsheet, but I've not been able to replicate that 24 data, so I'm interested in understanding the methodology 25 used.

One thing that I'd like to confirm for, first of all, is the solid nonfat composition, that's assumed since the California order currently rolls up to 8.7 percent SNF as opposed to Federal order of the 8.685. Do you know whether this is stated in a common

A. No, I do not.

standard -- solid standard level?

- Q. Okay. Another question would be what commodity prices are used in California part of the baseline.
- A. For the California section, we were attempting to duplicate their pricing formulas as it exists under the baseline, that is the CME prices zoned back to California and the Western nonfat dry -- pardon me, the Western dry whey price and the California survey of nonfat dry milk prices.
- Q. So do you know if their actual commodity prices as published by CDFA were used to drive that baseline?
- A. They were historically what was used to estimate the equations, and it was as -- as I remember it, a relationship built between the AMS announced prices, formerly the NASS announced prices and those price relationships of the CME and -- and the other two.
 - O. And --

A. The CWAP and the Western dry whey price.

- Q. And would you be able to provide what those price wedges were?
- A. If it's not an amount in the documentation, I don't have it.
- Q. Is that something that USDA may be able to provide with a future witness?
- A. I don't know if we would have a future witness that would have those specifications or not.
- Q. There -- there is some interplay between Table 58 and Table 57 that has some repercussions, just trying to understand how the analysis was done. On -- this was the proposal, and so it would be helpful to be able to replicate and understand which aspects of the formula changes are buried in which table, and so I would request that USDA provide that information or simply the baseline commodity data that is used for the California milk prices.
 - A. I'll take that under advisement.
- Q. Another question that I have is how the model addresses premiums.
- A. We did not have premium data for California so

 I don't believe it's recognized in the model. There is

 premium data available up until very recently for all of
 the other areas that are modeled in terms of milk

production.

1

5

6

7

8

9

10

- Q. So is it fair to assume that the change in regulated price formula is directly reflected as a change in producer prices?
 - A. I would make that assumption, yes.
 - Q. And is that consistent with economic theory -well, now I'll take a hypothetical. If you start out
 with a regulated price formula that generates \$20 a
 hundredweight at farm level and you drop the regulated
 price to \$5 a hundredweight, would you expect the farm
 level price to be \$5 a hundredweight?
- 12 A. I would not expect that.
- Q. But your understanding is the model would assume that it's \$5 a hundredweight?
- 15 A. That's my understanding of how we modeled that.
- 17 O. Thank you. Thank you.
- JUDGE CLIFTON: Do you need any clarification,
- 19 Mr. Carman, of what was requested?
- THE WITNESS: No, I don't think so.
- JUDGE CLIFTON: Mr. Smith, have you had an opportunity to look at Exhibit 13?
- 23 MR. SMITH: Yes, Your Honor. I -- first I
 24 apologize. I figured I picked a pretty good time to
 25 step out during the -- I don't want to call it the

1 shutdown, the discussion about the shutdown, but 2 apparently not, and I apologize. 3 JUDGE CLIFTON: We now call that the lapse of 4 funding. 5 All right. Do you have -- identify yourself, 6 please, and then ask any questions you -- you may have 7 of Mr. Carman. MR. SMITH: Daniel Smith, the four producer 8 associations. Actually I -- this is what I requested, 9 10 I -- I don't have any questions, if it's been moved and 11 admitted, so --12 JUDGE CLIFTON: It has, it's admitted into evidence. 13 14 Thank you very much. MR. SMITH: 15 JUDGE CLIFTON: You're welcome. 16 Does anyone else have questions of Mr. Carman? 17 MR. ENGLISH: This is partly a statement or whatever, so since we can't do it off the record it's 18 19 got to be on the record for obvious reasons. 20 I think all the participants are interested in the best data, and we've got great data that's submitted 21 22 and so we're very, very appreciative. Let me be clear 23 about why Ms. Taylor asked those questions, and we could 24 be wrong, but in trying to replicate the data, we're 25 having issues, and we suspect the possibility that the

price formulas that were used are the existing Federal
price orders for Cal -- the Dairy Institute and not the
modified within our proposal. And if we're wrong,
that's fine, but I want to be clear what we were looking
at in trying to replicate.

There's no point -- we're not here to play games with that. We want the best possible data in the record, and, you know, we know USDA has worked very hard on this, we just don't know if the dataset that was used might have inadvertently used the existing formulas.

And, you know, if -- if -- if we're right, that means there will be different numbers, and that may work against our interest in terms of what we're trying to show. That is not the point. The point is get the right numbers in the record. And that's what we're interested in.

And obviously I couldn't say that to Mr. Hill and Ms. Francis off the record.

Do you want to clarify?

MS. TAYLOR: And just to clarify, on Table 57 it appears that the results showing in terms of the impact is the impact on commodity prices under the Dairy Institute Proposal extended by the current Federal order formulas. That may be correct if Table 58 includes an adjustment for the difference in Federal order formulas

between existing and the proposed Dairy Institute proposal. That's why we need to understand all of the pieces that are embedded in Table 58.

MR. ENGLISH: That's why, Mr. Carman, we're trying to make this request. And, you know, the rules of the hearing are excellent rules about not having ex parte communications, so we're not -- you know, we -- we want it very clear what we're trying to do and trying to get, and it's to the benefit of all the parties.

CROSS-EXAMINATION

BY MR. BESHORE:

O. Marvin Beshore.

I have a question or an area of followup to questions from Ms. Taylor. There are in terms of paying produce -- premium payments to producers, there are multiple -- you know, multiple scenarios and -- and inputs in the -- in the model here, including a couple of other ones I think for -- for producer payments such as the all-milk price. I mean, all-milk price reflects, does it not, all payments to producers including anything that would be not -- or considered to be a premium over a minimum regulated price, et cetera?

A. That's correct. The blend prices are the principle driver of that all-milk price, but the premiums are also included in that all-milk price.

- So therefore the -- the models -- the results 1 Ο. 2 of the model in tables that show changes in the all-milk 3 price would have factored into them input-wise somewhere the -- you know, the all milk price which represents 4 5 total receipts by producers at gross receipt? 6 Α. Per -- per 100 pounds. Ο. Per hundredweight? Α. Yes. Okay. That's all. Thank you. 9 Ο. JUDGE CLIFTON: Does anyone else have 10 11 questions for Mr. Carman at this point? I see none. 12 Thank you, Mr. Carman. Oh, I'm sorry, Mr. Hill. 13 14 MR. HILL: Brian Hill. I was just waiting to 15 see if anyone else had any questions. 16 We do have one other issue.
- 17 REDIRECT EXAMINATION
- BY MR. HILL: 18
- 19 Ο. There was a request by Mr. Miltner for additional modeling work. Are you aware of that, 20
- 21 Mr. Carman?
- Yes. I have the request that was given to 22 Α.
- Will by Mr. Mitt -- Mitner, Mitner. Excuse me, Miltner. 23
- 24 Can you speak to that now? Q.
- 25 Α. As we have done with the other proposals in

1	this hearing, those that we got after our call for
2	additional proposals were analyzed using the model
3	result, the modeling. We are not able to run that
4	alternative that that has been requested. We ran the
5	ones that were noticed in the hearing notice, the four
6	proposals, and the model documentation and the
7	preliminary results were posted to the web at that time
8	that the hearing notice was announced.
9	Q. Thank you very much.
10	CROSS-EXAMINATION
11	BY MR. MILTNER:
12	Q. Ryan Miltner with on behalf of Select Milk
13	Producers.
14	Because my request was was given to
15	Mr. Francis, just for the record, what I had requested
16	was a comparison of the existing baseline to the recent
17	changes that California Department of Food and
18	Agriculture made to their price formulas, correct?
19	A. That's correct.
20	Q. Okay. Let me ask when you stated that you
21	you the Department was not going to provide that, you
22	stated that it was because you had modeled existing
23	proposals. So is it is it accurate to say that it
24	would be possible and feasible for that to be done and

the Department is simply declining to do so?

A. Anything is possible given enough time and resources. In this case, we don't have enough time and resources to do this here at this hearing site.

- Q. Do you have -- and I understand that there's a great investment of time and effort to -- to do this, and I appreciate, as everybody else, the work that goes into it. Would it be possible that that information would be something that could be done before

 November 6th when this hearing is at least currently scheduled to terminate?
- A. I don't want to speculate on something that at this point I -- I don't know how much effort would be -- it would take to do that. We're dealing with a model that's got 1200 equations, 8,000 variables in it.

 I'm -- I can't make a speculation of whether we could do that by Nov -- by the end of the hearing or not.
- Q. For the record, let me just state that the request was not made because we wanted that to be considered a proposal, and I don't think that that's what you are saying, but I want the record to be -- to be clear and reflect that. The reason for the request, as I mentioned with -- I think when Ms. Steeneck was on stand is that a comparison to a baseline is -- is of course useful and that because of the interim change that California made to its price formulas, that an

1 accurate comparison to what is, I quess, now a baseline 2 would be useful for interested parties who are looking 3 at information, looking at the preliminary economic 4 analysis, and trying to assess what the impact on other 5 Federal orders might be if any of the proposals were 6 adopted. 7 For example, the tables currently show effects in the neighborhood of \$.12 a hundredweight on other 8 Federal orders compared to the existing baseline in the 9 10 model, and that with California's recent formula 11 changes, it might be that those impacts on the other 12 Federal orders may not be of the magnitude that are in 13 the tables currently presented. And I don't need a 14 response to that, I wanted to make that clear for the 15 record. And if, Mr. Carman, after some evaluation on 16 17 behalf of Dairy Programs that might be something that would be something we could put into the record before 18 19 we -- we adjourn, I would certainly appreciate it, and I think the others might as well. 20 21 That's all I have, Your Honor. Thank you. 22 JUDGE CLIFTON: Thank you, Mr. Miltner. 23 It -- it is somewhat problematic that 24 California acted after we were set and only temporarily. 25 I think all parties of course will comment on that.

- 1 Whether your own economists can project what difference
- 2 that makes, I don't know.
- There's no guarantee that we'll be in this
- 4 hearing until November the 6th or whatever date, I --
- 5 I'm hopeful we'll finish far before then. I'm getting
- 6 looks like, oh, yeah, in your dreams, but --
- 7 All right. Other -- other questions of
- 8 Mr. Carman on any topic?
- 9 THE WITNESS: No, we're not talking about the
- 10 Mid East. The last time I was on the hearing -- hearing
- 11 stand was to present data for a hearing we held in the
- 12 Mid East Order in which Judge Clifton was the
- 13 | Administrative Law Judge.
- JUDGE CLIFTON: I do like to hear him testify.
- 15 But I can't think of anything to ask him right now, so
- 16 --
- 17 All right. Thank you, Mr. Carman. You may
- 18 step down.
- 19 Mr. Hill.
- MR. HILL: Your Honor, I think it's 12:40 now.
- 21 This might be a good time to break for lunch.
- JUDGE CLIFTON: Did an hour and 15 minutes
- 23 | work out well yesterday? Was that enough time? It
- 24 seems that the consensus is yes.
- 25 All right. Then please be back and ready to

1 go at 2:00. 2 MR. BESHORE: Who are we going with? 3 JUDGE CLIFTON: Oh, Mr. Mykrantz is next, 4 right? 5 MS. TAYLOR: Yes. 6 MR. HILL: Thank you. 7 JUDGE CLIFTON: All right. You're welcome. We'll -- we'll be back at 2:00. 8 9 (Whereupon a break was taken.) 10 JUDGE CLIFTON: We're back on record at 11 2:04 p.m. 12 Let's see. Is there anything preliminary to the next USDA witness taking the stand? There being 13 nothing, I invite the witness to be seated in the 14 15 witness chair. 16 I'll swear you in in a seated position. 17 you'll raise your right hand, please. Do you solemnly swear or affirm under penalty 18 19 of perjury that the evidence you will present will be 20 the truth? 21 THE WITNESS: I do. 22 JUDGE CLIFTON: Thank you. Please state and 23 spell your name. 24 THE WITNESS: My name is John Mykrantz. 25 J-O-H-N. Mykrantz is spelled M-Y-K-R-A-N-T-Z.

1	JUDGE CLIFTON: And where do you work within
2	the USDA?
3	THE WITNESS: I'm employed by USDA AMS Dairy
4	Programs as an Agricultural Economist for the Pacific
5	Northwest and Arizona Federal Milk Marketing Orders.
6	The office where I work is in Bothell, Washington.
7	JUDGE CLIFTON: And how is that spelled?
8	THE WITNESS: B-O-T-H-E-L-L.
9	JUDGE CLIFTON: And would you tell me
10	something about your educational background and work
11	background?
12	THE WITNESS: I have a bachelor's degree in
13	history from Washington University in St. Louis, and a
14	master's degree in Agricultural Economics from Michigan
15	State University.
16	JUDGE CLIFTON: And your work experience?
17	THE WITNESS: I've been employed by the Market
18	Administrator's office or a Market Administrator office
19	since 1990.
20	JUDGE CLIFTON: And how long have you worked
21	in the Pacific Northwest Region?
22	THE WITNESS: Since 1994.
23	JUDGE CLIFTON: Thank you very much.
24	Mr. Hill.
25	///

DIRECT EXAMINATION BY MR. HILL: O. Brian Hill. Brian Hill. Good afternoon.

- Now, you were requested to provide some basic information. Is that what your understanding is?
- 6 A. That's correct.
- Q. Those topics, I'm going to read some topics to you, and you tell me if these are the topics that you're prepared to describe. 1000.43, General classification rules?
- 11 A. Correct.

4

- 12 Q. Excuse me. 1000 part -- point 44,
- 13 Classification of producer milk?
- 14 A. Correct.
- Q. 1000.77, Adjustment of accounts?
- 16 A. Correct.
- Q. 1000.78, Charges on overdue accounts?
- 18 A. Correct.
- 19 Q. 1000.85, Assessment for order administration?
- 20 A. Correct.
- Q. And 1000.86, Deduction for marketing services?
- 22 A. Correct.
- Q. And it's my understanding you're prepared to speak about those topics now, and if you want, you may begin.

1	A. I am, thank you.
2	STATEMENT OF MR. MYKRANTZ
3	A. To begin, 1000.43, General classification
4	rules. As a preliminary step to 1000.44, Classification
5	of Producer Milk, calculations are performed to
6	determine allowable shrinkage, excess shrinkage, and/or
7	overage. Calculations are made for skim and butterfat
8	separately.
9	Shrinkage is the loss of butterfat or skim
10	between the accounting of receipts and the accounting of
11	utilizations.
12	Excess shrinkage is that portion of actual
13	shrinkage which is greater than the calculated allowable
14	shrinkage.
15	Allowable shrinkage is assigned to the class
16	of the lowest price.
17	Excess shrinkage is assigned to the highest
18	class of the plant's utilization.
19	An overage occurs when skim or butterfat in
20	receipts is less than the skim or butterfat in
21	utilizations. The classification of an overage is
22	determined at Step 11, Section 1000.44, Classification
23	of Producer Milk.
24	Allowable shrinkage is calculated as
25	two percent of physical receipts of milk at farm weights

and tests plus 1.5 percent of plant weight receipts plus

0.5 percent of the quantity of milk diverted to another

plant on the basis of other than farm weights and tests

minus 1.5 percent of bulk transfers of milk or

concentrated milk except concentrated milk transferred

by agreement for other than Class I use.

A 9(c) cooperative delivering milk to a plant at other than farm weights and tests has an allowable shrinkage of 0.5 percent.

Paragraph (c) of 1000.43 instructs the MA to convert milk products that may have had water and/or components removed to their original volume.

Paragraph (d) of 1000.43 instructs the MA to assign, quote, "receipts of bulk concentrated fluid milk and nonfluid milk products that are reconstituted for fluid use shall be assigned to Class I use up to the reconstituted portion of labeled reconstituted fluid milk products, on a pro rata basis, open parentheses, except for any Class I use of specific concentrated receipts that is established by the handler, close parentheses, prior to any assignments under Section 1000.44. Any remaining skim and butterfat in concentrated receipts shall be assigned to uses under 1000.44 on a pro rata basis, unless a specific use of such receipts is established by the handler," period,

close quote.

1000.44, Classification of producer milk. The classification of producer milk occurs by means of any -- of an allocation process described in 1000.44. The allocation process begins with the gross utilization of milk, milk products, and shrinkage at a plant, and results in producer milk, namely skim and butterfat, by class.

There are currently 11 steps in the allocation process at which what is not producer milk is removed from gross utilization.

The gross utilization of a plant represents what milk products were made at the plant by class, movements from the plant by class, inventory of packaged fluid and bulk milk, and shrinkage and overage.

Allowable shrinkage is assigned to the lowest price class. In the event a plant experiences excess shrinkage, it is assigned to the highest class available at the plant.

The allocation process has two identical parts, (a) and (b). Paragraph (a) applies to skim and butterfat. Strike that. Paragraph (a) applies to skim and (b) applies to butterfat. Paragraph (c) is the sum of paragraphs (a) and (b) for the product pounds by class.

The first step of the classification of 1 2 producer milk removes skim and butterfat in previously 3 priced packaged fluid milk products from Class I. 4 The second step removes bulk concentrated fluid milk products in other source milk used in Class 5 6 II from Class II. 7 The third step removes what is known as other 8 source milk. The first part of the third step removes bulk concentrated fluid milk products not used in Class 9 10 II from producer utilization beginning from Class IV, 11 and then the higher classes, that is IV, III, II, and 12 finally I. The second through sixth part of the third 13 step removes non-Grade A and unidentified milk, milk 14 15 from exempt plants, milk from producer-handlers, milk 16 from what are called dairy farmers for other markets. 17 An example of that is milk of dairy farmers whose milk is not qualified to be pooled on any order. 18 19 The last part of step three removes milk not 20 otherwise allocated in steps one and two. 21 The fourth step removes milk from an 22 unregulated supply plant for which the receiving handler 23 requests a class other than I in sequence, IV, III, II, 24 but not in excess for the milk in these classes.

The fifth step removes milk from an

unregulated supply plant in sequence, IV, III, II, that may remain from step four or is -- was requested Class I which is in excess of a calculation.

The calculation involves multiplying the skim and butterfat pounds remain at this allocation step by 1.25, which is paragraph little (i) and subtracting the skim and butterfat pounds respectively in receipts of producer milk and fluid milk products from other pool plants, paragraph 2 little i. If the result of 2 little i is less than 1 little i, the excess is allocated at step eight. If the result of 2 little ii is greater than 1 little i, skim and butterfat is allocated at step five in sequence, IV, III, II.

The sixth step removes milk from another order which is not requested Class I in sequence IV, III, II.

The seventh step removes beginning inventory in sequence from Class IV, III, II.

The eighth step removes milk not previously subtracted in step five according to a proration to utilization remaining after step seven, that is Class I versus the sum of Class II, III, and IV, and the percentage attributable to Class II, III, IV is allocated IV, III, II.

The ninth step removes milk from another order which is requested Class I. According to a proration

1	based on an estimated utilization of Class I versus II,
2	III, IV, of all handlers or proration to utilization
3	remaining after step eight, open parentheses, Class I
4	versus Class II, III, IV, close parentheses, whichever
5	represents the lower Class I utilization. The
6	percentage attributable to Class II, III, IV is
7	allocated IV, III, II.
8	The tenth step removes milk received from
9	other plants at the request class or as allocated.
10	The eleventh step removes skim and/or
11	butterfats that are in excess of receipts, that is
12	overages.
13	The result of the allocation is producer
14	milk producer skim milk and butterfat by class.
15	Federal orders with component pricing assume that the
16	components in the skim, that is protein and other
17	solids, follow the skim.
18	Section 60 of the order uses information from
19	Section 44 to calculate a handler's value of milk.
20	Section 1000.77, Adjustment of accounts.
21	Monthly reports submitted by the handler are subject to
22	audit by the Market Administrator, MA. Requirements for
23	handlers to provide records and facilities for the audit
24	are described in 1000.27. The MA will conduct audits on
25	handler reports to ungover mathematical and procedural

1	errors. The audited data will be processed in the same
2	manner as the original pool or report. Handler
3	obligation will be calculated using classified prices
4	and announced MA prices, open parentheses, producer
5	price differential or skim and butterfat blends, close
6	parentheses, effective for the month being billed
7	compared to the obligation calculated at pool time.
8	Differences that result in a final obligation
9	or adjustment of accounts may be due from the handler to
10	the MA or due to the handler from the MA. Adjustments
11	may affect the Producer Settlement Fund, the
12	Administrative Fund, and/or the Marketing Service Fund.
13	MA offices may employ a minimum billing
14	standard. Positive or negative values that fall within
15	the standard will not be billed. Findings in audit may
16	result in additional payments to be paid by the handler
17	to producers or cooperative associations. Timely
L8	payments to producers and cooperatives to assure
L9	compliance with 1000.78 will be verified.
20	All payments and due dates required by the
21	order will be enforced and resulting assessments
22	included in the adjustment of accounts.
23	Monthly report may be re-audited when
24	information not available in audit becomes available.
25	Typically, this will be allocations of product on the

handler report classified for final disposition at another plant. The MA will notify the handler of any adjustment of accounts and payment will be due on or before the next payment due date. Adjustments may be included in a statement to the handler that includes obligations determined in the following monthly pool resulting in a net payment. Obligations are due for payment on dates described in Section 71 and 72 of the respective order.

Accounts or previously -- accounts for previous monthly pools will be adjusted for handlers regardless of current regulatory status. The MA will make every effort to complete the audit on all outstanding months for handlers that cease operations within a suitable time frame and possibly complete the audit before the final pool is calculated.

1000.78, Charges for overdue accounts.

Federal order provisions require handlers to make payments to producers and cooperatives no later than date specified in Section 73 of the respective order and to the Market Administrator no later than dates specified in Section 71 of the respective order.

1000.90 modifies payment dates when they fall on a Saturday, Sunday, or national holiday until the next day the MA office is open for public business.

Payments required by the order not made by the 1 2 due date will be assessed a one percent penalty by the 3 MA made payable to the MA Administrative Fund. 4 penalty will be assessed at the same rate on any amounts that continue to be late on the corresponding due date 5 6 each succ -- each succeeding month. Charges for overdue 7 accounts are only charged on the value of required Federal order minimums. A late payment on an invoice 8 9 that includes premiums or other fees will not be assessed on those extra charges. A timely advanced 10 11 payment that exceeds quarter requirements may result in 12 a reduction of the value assessed as a penalty in the 13 subsequent late final payment.

14

15

16

17

18

19

20

21

22

23

24

25

Handlers are notified immediately of any late charges for payments due the MA. The MA will make every effort to contact a handler before close of business on the due date when payments are not received. Payment dates to cooperatives and producers are verified through examination of records available in the office and submitted by the responsible party or during the audit process through records only available at the handler.

Charges for overdue accounts are billed along with other adjustments to accounts described in Section 1000.77.

1000.85. Assessment for order administration.

The Market Administrator assesses each handler on the
market pro rata share of expenses necessary to
administer the order. The rate specified by the MA,
Market Administrator, is known as the administrative
assessment. Fees from the administrative assessment are
included in the administrative fund and reported in the
MA's financial statements.

Regulated handlers are assessed on producer receipts included in the handler's classification of producer milk. Receipts reported by a 9(c) handler diverted to a pool plant are assessed at the receiving plant. Receipts reported by a 9(c) handler shipped to a nonpool or other order plant are assessed to the 9(c) handler.

Partially regulated handlers are assessed the same administrative rate on the volume of Class I route disposition inside of the marketing area. Regulated handlers with product pounds subject to Class I compensatory payments under the order may be subject to administrative assessment. This will include concentrated milk products, nonfluid milk products, and other sorts of receipts allocated to Class I.

Partially regulated plants and regulated handlers subject to compensatory payments that receive the associated products pounds from any regulated

handler subject to administrative assessments will not be assessed. Individual MA's may choose to waive certain months of the assessment to balance the administrative fund to annual expenses incurred by the MA to administer the order.

Section 1000.86, Deduction for marketing services. The Market Administrator assesses handlers making payments to producers who are not members of a cooperative association that's qualified under the order the rate per hundredweight specified by the MA. The rate is known as the Marketing Service Assessment. Fees from the Marketing Service Assessment are included in the Marketing Service Fund and reported in the MA's financial statements.

A handler will typically pass this assessment back to the producer in the form of an authorized deduction to the producer's final payment. The assessment does not apply to a handler's own farm production. The assessment is separate and in addition to the Administrative Assessment. Cooperatives and handlers who do not benefit from the marketing service are not subject to assessment.

Fees collected by the Marketing Service
Assessment are used by the MA to provide specific
services to the producers who have been assessed. The

1	MA verifies and may establish the weights and tests of
2	the producer's milk necessary to determine the Federal
3	order minimum price the producers are to be paid.
4	Other services provided by the MA include
5	market information. The MA issues a monthly publication
6	containing information on market prices, trends, and
7	other topics in dairy and general agriculture.
8	The MA will upon request caliber bulk milk
9	tanks for producers covered by market service and
10	provide a chart with gallons or pounds of milk based on
11	a stick reading.
12	And that concludes my description of the order
13	language.
14	JUDGE CLIFTON: Thank you, Mr thank you,
15	Mr. Mykrantz. We should have had you go first. You're
16	an excellent model.
17	Do you have further questions of the of the
18	witness, Mr. Hill?
19	MR. HILL: No, I do not, Your Honor.
20	JUDGE CLIFTON: Who would like to ask
21	questions of Mr. Mykrantz?
22	MR. ENGLISH: Your Honor, this is Chip
23	English. Harkening back to yesterday, I thought the
24	idea was that since we had an expedited transcript now
25	for Mr. Schaefer, what we were going to do was

- 1 temporarily excuse Mr. Mykrantz and recall Mr. Schaefer, 2 and he has not yet been subject to cross-examination so 3 we basically go to that point, was my understanding of 4 what we were going to do next. 5 JUDGE CLIFTON: I bet Mr. Mykrantz would agree with that. 6 THE WITNESS: I'm fine with that. JUDGE CLIFTON: I was going to ask about that, 8 so -- so there is a copy of the expedited transcript? 9
- MS. TAYLOR: There's copies over there.
- MR. ENGLISH: There may be copies.
- 12 JUDGE CLIFTON: On the table?
- MR. ENGLISH: Yes.
- JUDGE CLIFTON: All right. So if you want
- one, if you'd like to go to the table and obtain it.
- MR. ENGLISH: And of course it's a rough
- 17 draft.
- 18 JUDGE CLIFTON: Right.
- MR. ENGLISH: The court reporter wants to make sure that gets on the record.
- JUDGE CLIFTON: Thank you, yes. It's a
- 22 miracle is what it is.
- All right, Mr. Mykrantz, you may step down for the time being.
- And, Mr. Schaefer, you may come to the witness

- 1 stand.
- 2 Mr. Schaefer, do you have a copy of that
- 3 expedited transcript?
- 4 THE WITNESS: Yes, I do.
- JUDGE CLIFTON: Okay, good.
- 6 Mr. Schaefer, you remain sworn. Would you
- 7 state and spell your name?
- 8 THE WITNESS: Henry Schaefer. That's
- 9 H-E-N-R-Y. S-C-H-A-E-F-E-R.
- JUDGE CLIFTON: Mr. Hill, do you have any
- 11 questions of Mr. Schaefer preliminary to my opening it
- 12 to others?
- MR. HILL: Your Honor, we do not have any
- 14 questions at this time.
- JUDGE CLIFTON: Thank you.
- 16 Who would like to be the first person to ask
- 17 additional questions of Mr. Schaefer?
- 18 CROSS-EXAMINATION
- 19 BY MR. BESHORE:
- 20 O. Marvin Beshore. I think I just have a few
- 21 questions, Henry.
- 22 When we look at -- these relate to Section 42.
- 23 A. Okay.
- Q. Now, 42 is about transfers and --
- 25 classification of transfers and diversions, I guess it's

called --

1

4

5

6

7

8

9

10

21

22

23

24

25

- 2 A. Correct.
- Q. -- or something like that.

Can you tell us just in concept like what other sections in the order does that importantly interact with? Or what other sections rely on -- on what happens in 42 for something to happen?

- A. Basic -- basically that's kind of a starting point for Section 43 and Section 44 of the allocation process.
- Q. And do the results of those processes affect the handler's obligation to the -- for milk under the order?
- 14 A. Yes, they do.
- Q. And that's in Section 60, 61?
- 16 A. 60.
- Q. 60. So if, for instance, you know, a -- let's

 just talk about a handler receiving a transfer of

 condensed milk to its -- its plants, okay, can you talk

 about how that would be classified?
 - A. It depends on which plant, what type of plant it's coming into or which you're shipping to, because there's transfers into pool plants, into various types of nonpool plants, and there's a difference to a certain extent as to what -- how that's handled going into these

- plants.
- Q. Let's assume it's transferring to a pool
- 3 plant.

- 4 A. Specifically I guess I can't really address
- 5 how a specific load would go, concentrate.
- Q. Okay.
- 7 A. In fluid milk, bulk fluid milk, it would go
- 8 Class I if it went into a pool plant unless the handlers
- 9 agreed for it to be in another class, and then both
- 10 handlers would agree, and then it would be in one of the
- 11 other classes.
- 12 A little clarification on the concentrate, I
- 13 believe that --
- 14 O. That's condensed?
- 15 A. Condensed.
- 16 O. Is that also referred to as --
- 17 A. Condensed. Yeah.
- 18 Q. If you see concentrated milk, that would be --
- 19 in the language, would that include condensed?
- 20 A. I'm going to say yes.
- 21 Q. Okay.
- 22 A. I use it somewhat interchangeably and
- 23 sometimes -- but generally speaking you can't direct
- 24 allocate, when you get into the allocation in IV, it has
- 25 to go through the procedure. But if you're using

- concentrated, condensed, in let's say a Class II product, then it would move at Class II.
 - Q. So if -- is it generally correct to say that condensed milk if it starts out at what, as a Class II product under the orders?
 - A. Correct.

4

5

6

7

8

15

16

18

19

20

21

- Q. But if it is used in another product, how is it then classified?
- A. Generally speaking it follows the

 classification of the product that it's made into. In

 our market, we have very little manufacturing in pool

 plants, and so we don't have milk concentrate moving

 into III or IV in our pool plants because we just don't

 have manufacturing in that -- in that.
 - Q. So in your order, intermediate products like condensed typically are moved to nonpool plants?
- 17 A. Correct.
 - Q. And then how is that classified?
 - A. They would be classified according to the usage at that plant, and so if it went into a cheese plant, for instance, cheese is -- milk going into cheese is considered Class III, and so it would be a Class III.
- Q. And if a plant happened to be an ice cream plant, how would it be classified?
- 25 A. Class II.

- Q. And is that -- is that process of -- of classifying an intermediate product, is that the -- is that in -- do we find that, what you've just described that -- in the language of Section 42?
 - A. No, it's not. It would be in the classes of utilization section where it talks about condensed in Class II.
 - Q. Okay.

6

7

8

9

17

18

19

20

21

22

23

24

- A. I can't remember right off the top of my head.
- 10 O. 43 or 44?
- 11 A. No, it's 40, I believe.
- Q. Okay. So in any event, those various sections of the order that you referred to, including 60, 42, 43, 44, maybe some others, they interrelate and operate together?
- 16 A. That's correct.
 - Let me -- let me back up to one thing. When we talk about classifying an allocation, you can move a product at let's say Class I, but if the plant that you're shipping to has no Class I utilization, it -- the product would not stay as Class I. It's -- you have to have product available there to carry out the allocation process that Mr. Mykrantz discussed. And so if there was no product in that class at that point in the allocation process, it would not stay there, it would

- move to where there was product.
- Q. Okay. Now, can you -- let's talk about the --
- 3 the transfer of condensed, concentrate if you want to
- 4 call it that, milk to a distributing plant, pool
- 5 distributing plant for purposes of -- for using -- use
- 6 in the fluid milk product processing for fortification,
- 7 how -- can you tell us how is that classified? Where
- 8 does it tell us how that works in the order?
- 9 A. Right offhand I don't recall where it's
- 10 | precisely in there.
- 11 Q. Okay. So, I mean, I'm just taking that shot
- 12 because we're 42, which was in your area, is called
- 13 classification of transfers and diversions, and I
- 14 thought it might -- that might be a starting point at
- 15 least.

- 16 A. It -- 42 doesn't specifically talk about
- 17 that --
- 18 Q. Okay.
- 19 A. -- because products moving in for
- 20 fortification are handled somewhat differently.
- Q. Okay. So even though that's a -- what you've
- 22 described at an earlier point in your testimony, I think
- as a physical transfer of milk, that is a load from one
- 24 plant to another? That's a yes? You have to speak --
- 25 A. Oh, yes.

- 1 Q. -- rather than nod. Thank you.
- Okay. That type of transfer is not -- the
- 3 treatment of it under the order is not specifically
- 4 addressed in Section 42?
- 5 A. That is correct.
- Q. Okay. Do you -- and you're not sure offhand
- 7 where -- which section it's addressed in?
- 8 A. I just right offhand can't recall.
- 9 Q. Okay.
- 10 A. I kind of -- I kind of know what -- what we
- 11 do, but I don't remember the section that it's in right
- 12 offhand.
- Q. So whatever section it's in, it wasn't among
- 14 | those that you have testified to?
- 15 A. That is correct.
- 16 Q. Okay.
- JUDGE CLIFTON: Don't -- don't hesitate to ask
- 18 him to find it if you'd like.
- 19 BY MR. BESHORE:
- Q. Yeah, if you can find it.
- JUDGE CLIFTON: Of course he can.
- 22 BY MR. BESHORE:
- Q. Or at the next break or --
- 24 A. Okay, yeah, we'll --
- 25 O. Next break is fine --

- 1 A. Okay.
- Q. -- Your Honor, rather than interrupt the
- 3 hearing.

- Okay. Now, you -- you talked about the Market
 Administrator definition, 25, also.
 - A. Correct.
- Q. Back -- back onto another section now.
- Does that have within it the authorization of
 the Market Administrator to contract for services
 required to administer the order?
- 11 A. I believe it does.
- Q. Okay. And, you know, in your experience, does that sometimes involve contracts with other governmental entities or agencies such as another Market
- 15 | Administrator's Office?
- 16 A. I believe it does.
- Q. I mean, sometimes -- tell me if this is right or wrong, if there's a plant that Order 31 audits but
- 19 it's located in Texas, you might contract with -- he was
- 20 here earlier, Mr. Hunter's office to perform some audit
- 21 services for your benefit down there?
- A. I'm aware of instances in which we've done work together to get the audit taken care of.
- Q. Okay. Are there -- are you aware of any instances where there was an occasion to contract with,

- you know, another arm of the federal or state government for some reason or another for some purpose or another
- 3 in carrying out the order?

10

- A. Yes, there has been.
- Q. Okay. What examples?

new Federal orders at that time.

- A. When we went to order reform, so '98, '99, in that time period, we contracted with the National Ag

 Statistics service, NASS, to do the price surveys for the -- so we could incorporate that information into the
- Q. And some part of that service expenditure was financed through the Market Administrator's Office?
- 13 A. It was not.
- Q. Pardon?
- A. It was not. The Market Administrator -- that was financed out of Washington.
- 17 O. Okay.
- 18 A. The Market Administrators were separated from 19 that transaction.
- Q. Does the -- I guess Mr. Mykrantz -- where do the funds -- funds come from for the Market
- Administrator to carry out all of his responsibilities and obliquations?
- A. The Market Administrator has a -- what's called an Administrative Fund, and that money is charged

- on a rate per hundredweight for all of the milk that is
 pooled in the market, and as Mr. Mykrantz pointed out,
 partially regulated, on the Class I partially regulated
 milk as well. And that in our particular market is \$.03
 currently, and that money is set aside in a separate
 fund for use to pay employees, rent on the office,
 office supplies, and so forth to carry on the
 - Q. So I don't know whether you have this tentative hearing agenda schedule available to you or not, but we haven't really been tying the testimony into these subjects particularly yet, but I just wanted to note that, for instance, the funding of the Market Administrator's Office is in topic nine, agenda topic nine, which you've alluded to presently whereas the actually carrying out responsibilities under agenda topic three, which is part of what you were responsible --
 - A. Correct.
 - Q. -- to testify to?

functioning of the office.

- And you've also testified under agenda topic, what, five regarding classification of transfers and diversions?
- A. Correct.

25 O. And alluded to handler's value of milk in

agenda topic number eight, for instance? 1 2 Α. Correct. 3 O. Okay. Some of these things really get tied together and are pretty hard to unravel as -- as 4 separate, discrete kind of subjects? 5 That's correct. 6 Α. 7 Okay. I think that's all the questions I have 0. 8 subject to you having a chance to retrieve that --9 Α. That references. 10 Ο. -- that reference --11 Α. Okay. 12 -- that we talked about earlier. Thank you. Ο. 13 CROSS-EXAMINATION BY MS. VULIN: 14 Good afternoon. Ashley Vulin for the Dairy 15 Ο. Institute of California. 16 17 Mr. Schaefer, thank you for being with us this afternoon. 18 19 Α. You're welcome. So the federal system uses a lot of similar 20 terms that have been previously used under the 21 California state regulatory system, but I'm not sure 22 that they mean the same thing, so I'd kind of like to do 23

an overview of this in a bit more general terms so that

people who aren't as familiar with the federal system

24

- can fully understand what kind of system they're
 adopting if they choose to adopt an FMMO. So I would
 ask for the John Vetne fourth-grader treatment with the
 caveat being I probably was in fourth grade when all of
- So I'd like to begin with Section 1030.4,
 which is the definition of a plan, I believe that's the
 first section you identified that you'd like to speak
 towards.
- 10 A. Okay.

this was passed.

5

11

12

- Q. So it looks like in Order 30 that references
 Section 1000.4, which is the general provision, correct?
- 13 A. Correct.
- Q. So if I'm new to this system and I'm looking
 at Order 30 and I see that, I know I need to go to the
 general provisions which are in the front of our CFR?
 - A. Correct.
- Q. All right. And actually before we get into the specifics, can I ask you some general questions about Order 33?
- 21 A. Yes.
- 22 O. When was Order 30 created?
- A. The current Order 30 was created January 1st
 of 2000 with order reform. It was a merger of the Upper
 Midwest Order, Order 68, and the Chicago Regional Order,

which was Order 30, and we also have a little bit of the Upper Peninsula of Michigan, which was Order 44.

- Q. So there are a variety of different states included in Order 30?
- A. That is correct, there's a Minnesota,
 Wisconsin, North and South Dakota, parts of North and
 South Dakota, parts of Minnesota -- or parts of Iowa,
 parts of the UP, and parts of Illinois.
- Q. Any reason why all those different states were grouped together under one order?
- A. The detail of why they grouped them that way would be in the final decision for the order reform, but basically I believe their -- what kind of their criteria was, a uniform dairy industry across that region and competition. One of the criteria for a Federal order has traditionally been handlers who have -- compete for milk sales in a particular area should be regulated by the same order, and so that was also part of that.

I don't recall the details of the whole explanation, but that would be part of it.

- Q. Any reason why it was called Order 30? Does the number have any significance?
- A. It was called Order 30 because when they did order reform and merged the orders -- when I talk about order reform, prior to 2000 there were roughly 32

- 1 Federal orders. The 2000 -- the 1996 Farm Bill,
- 2 Congress mandated that Federal orders be combined down
- 3 to ten to 13 orders, and so that process started with
- 4 that Farm Bill. It completed -- and it had to be done
- 5 by 2000, January 1st of 2000.
- And when we did that, when they merged orders
- 7 to get down to the ten to 13 orders, the orders that
- 8 were merged were renumbered based on the lowest number
- 9 in the merged orders. So they just kind of picked the
- 10 criteria and did that rather than having people fight
- 11 over, well, I want this number for my order, and so
- 12 forth and so on, so --
- 13 O. How long have you worked for Order 30?
- 14 A. The old Chicago Regional Order was also Order
- 15 | 30, and so I've been working for Order 30 for 30 years.
- 16 Q. Have you -- have you any -- ever worked for
- 17 any other orders besides the Chicago Order that predated
- 18 now currently Order 30?
- 19 A. Well, I -- about 15 years ago in 1998, I moved
- 20 | from the Chicago Order to the Upper Midwest Order, which
- 21 was Order 68, which was located and headquartered in
- 22 Minneapolis.
- Q. How long did you work for Order 68?
- A. Until we merged back into Order 30 two years
- 25 later.

- 1 O. You missed it too much?
- 2 A. No.

4

5

6

20

21

22

23

24

25

- Q. So why is Order 30 a good comparison for a potential California Federal order?
- A. I think some of the reasons might be is a -they have a similar utilization. An order --
 - Q. Can you -- what does that mean?
- When we talk about utilization in Α. 9 Federal orders, we're usually talking about the 10 percentage of Class I, II, III, and IV milk, so we have 11 a -- we have a range between about 11 percent Class I 12 utilization up to about 15 percent Class I utilization. We have a pool consisting of about three -- when we have 13 total pool in our market, we would have anywhere between 14 15 three billion to three and a half billion pounds of milk. And I think that was some of the thought that 16 17 both markets are fairly large, have a fairly low Class I utilization, we have the lowest Class I utilization of 18 19 any of the Federal orders.

One of the differences might be, though, is we have about 80 percent Class III utilization, and I believe California would have somewhat less than that because they have a larger powder production base than what Order 30 has. We have a very small Class IV utilization, we're down around 10 percent, and so I --

that might be one of the differences, but I think it has 1 2 to do with basically size, with comparable production --3 MS. TAYLOR: Your Honor. 4 THE WITNESS: -- type --5 MS. TAYLOR: This is Erin Taylor. I just want 6 to interject a little bit that Mr. Schaefer here is to 7 talk about current order provisions, not necessarily why 8 Order 30 might or might not be a good comparison to the 9 proposed California order, so I think that that's just 10 not why he's up here on the stand to testify. 11 JUDGE CLIFTON: Do you object to his answering 12 the question or are you just warning --13 MS. TAYLOR: As a non-attorney I'd like to 14 object. 15 JUDGE CLIFTON: Well --16 MS. TAYLOR: USDA, we are part of the team 17 that evaluates the proposals and don't think that him getting into whether or not Order 30 is or is not a good 18 19 comparison to the proposed California is appropriate for 20 his role at this proceedings. JUDGE CLIFTON: Well, I was mistaken when I 21 22 said yesterday that I thought that was a good 23 comparison, because I knew a lot of the milk in Order 30 24 was not Class I, but he's just pointed out that there 25 are other things to look at, which I think is valuable,

- but I appreciate the caveat that you've raised.
- MS. TAYLOR: Okay.
- 3 JUDGE CLIFTON: But I think we should allow
- 4 him to add to our -- I -- I think for those of us who
- 5 are -- who are not even novices, I mean, we're just on
- 6 the outside of this looking in, this is helpful food for
- 7 thought, I believe.
- 8 MS. VULIN: And I'm done with that line of
- 9 questioning.
- JUDGE CLIFTON: Oh, that's helpful, too. All
- 11 right.

- MS. VULIN: We can stop there.
- JUDGE CLIFTON: And -- and your concern is
- 14 noted for the record.
- 15 BY MS. VULIN:
- 16 Q. So you mentioned Federal Order Reform in 2000.
- 17 Can you just give me kind of an overview of what that is
- 18 or what happened?
- 19 A. Basically Congress ruled -- as I said, prior
- 20 to 2000 there were approximately 32 orders, Federal
- 21 orders, I don't remember the exact number, but Congress
- 22 passed a law that mandated that the orders be combined
- 23 down to ten to 13 orders. One of the mandates was also
- 24 that California could come in as a Federal order as one
- 25 of those ten to 13.

And so we went through a process that was a somewhat unique process for us that it was informal rulemaking, where this is a formal rule-making process, and combine the orders down to that -- to -- I believe we had ten at that time.

Q. And the 1000 section was created during Federal Order Reform?

A. The 1000 section had always been there, but not in its current form. The 1000 section at that time -- prior to that was predominantly the provisions of -- dealing with the Market Administrator and so some of those things, so 1000.25, 26, 27 was in there I believe, 28, something like that, but it was a relatively small grouping of things that pertained to the -- all the orders universally.

Part of order reform was to -- or part of the idea when we went to order reform was to make some of the provisions more standard across all of the orders. Orders used to be very independent and had very individual provisions. And as the industry has grown and we've seen cooperatives marketing milk across multiple regions we've seen handlers that have plants and operations across multiple regions, there was a significant discussion to making some standardization of provisions. And so that's where you see the

allocation -- the 1000's, and so those provisions are standard across all the markets, and it was felt that that would help the industry with dealing with Federal orders is to have some consistency on how these

provisions were written and conceivably administered.

Q. Thank you.

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

- So I'll turn back now to Section 1000.4, which is the definition for a plant. Now, if you had to summarize this for a layperson, how would you -- how would you tell -- how would you describe to them what that is under Section 1000.4?
- A. Well, basically I think if you -- if you don't take exactly what's in here and abbreviate it or summarize it, it's basically describing the operation of the plant. It's got to process milk, it has to receive milk, it has to have facilities for those things, those processes.
- Q. And can a plant be one company with different facilities or is each facility a plant?
- A. Each facility is a plant. A hand -- a handler -- well, that's kind of skipping ahead to something else, but a handler would have -- could have multiple plants, but a plant is a -- one plant.
- 24 Q. Okay.
- 25 A. One facility.

- Q. Okay. And each would be regulated differently when the regulations pertain just to plants?
 - A. Each one could be regulated differently, but not necessarily. If a handler had two cheese plants, they would -- and they were in the same Federal order, then they would be regulated in the same fashion, assuming they were both pool plants. There would not be one would be regulated differently than the other.

If you had a distributing plant and a supply plant, then you could conceivably have different regulations because you're dealing with a distributing plant versus a supply plant.

- Q. So turning to Section 1030.5, which is a distributing plant, it again refers to the Section 1000, correct?
 - A. Correct.

- Q. So turning to Section 1000.5, it describes that a distribution plant means a plant that is approved by a duly constituted regulatory agency for the handling of Grade A milk at which fluid -- fluid milk products are processed or packaged and from which there is route disposition or transfers of packaged fluid milk products to other plants. So what is route disposition?
- A. Route disposition, and I'll read the definition here is -- means the delivery to a retail or

- wholesale outlet, either directly or through any
 distribution facility, including disposition from a

 plant store, vendor, or vending machine, of a fluid milk
 product in consumer-type packages or dispenser units
 - Q. So a distributing plant sends out the milk not necessarily to the final consumer?
 - A. Yes.

6

7

9

10

11

12

13

14

15

16

17

18

classified as Class I milk.

- Q. They're -- they're definitionally middleman?
- A. There could be, they could -- they could send it directly to a consumer. For instance, there's a -- some dairies who have their own milk routes to consumers and that -- let me back up.
- When I see route sales, I think -- the way I think about it is that the plant is delivering to -- delivering it, they have a route that they go down and they dispense the milk, either to a consumer, to a retailer, to a wholesaler.
- Q. Can a distributing plant get the milk directly from a dairy farmer?
- 21 A. Can a what now?
- 22 Q. Can a distributing plant --
- 23 A. Yes.
- Q. -- receive the milk directly from a dairy
- 25 farm?

- 1 A. Yes.
- Q. Can they receive it from another distributing plant?
 - A. Yes.

10

11

12

16

17

18

19

20

21

22

- Q. Does it matter if the milk for a distributing plant, just for the definition of distributing plant, does it matter if the milk comes from a dairy farm within the marketing area or without the marketing area?
- A. No, it does not.
 - Q. Now I'll turn to Section 1000.6. Thank you for going through these with me, I'm sure it's very rudimentary for you.
- So Section 1030.6 again references the Section 1000 definition?
- 15 A. Correct.
 - Q. And this is the definition for a supply plant. So a supply plant is a plant that is approved by duly constituted regulatory agency for the handling of Grade A milk that receives milk directly from dairy farmers and transfers or diverts fluid milk products to other plants or manufactures dairy products on its premises.
 - So can you explain to me how a supply plant is different than a distribution plant?
- A. A supply -- a distributing plant distributes packaged fluid milk products on routes or to other

- plants, a supply plant is predominantly distributing bulk milk, and the idea is that the supply plant supplies the distributing plant.
 - Q. But they don't necessarily have to supply a distributing plant, do they?
 - A. No, they do not.
 - Q. So now I'll go to Section 1030.7 with is the definition of pool plant. So previously the definitions for what a type of plant is classified as just had to do with what they did with the milk, not where the milk came from, correct?
 - A. Correct.

5

6

7

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

- Q. But now looking at the definition of a pool plant, that's different when you're discussing what a pool plant is, correct?
- A. When you're discussing def -- the definition or the qualification of pool plant, you're discussing where that milk moves to or from.
- Q. So if you had to describe to a layperson what a pool plant is, how -- how would you describe that?
- A. The -- probably the -- the simplest form is to say either distributing plant or supply plant that meets certain qualifications to be part of the Federal Order Market Pool.
- 25 Q. And these qualifications are where their milk

comes from?

1

2

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

- A. It does not.
- Q. Okay. What -- what are these qualifications then?
 - A. Distributing plants and supply plants both -- let me back up.

Where a producer is located does not necessarily mean that's where the milk is pooled. pooling is determined by where the distributing plants sell their route sales. So a producer does not have to be in the same marketing area as the distributing plant's route sales. Okay. So a distributing plant qualifies by selling a certain -- a percentage of their -- first of all, they produce and make into Class I fluid milk products that are sold on routes a percentage of the milk that is received in the plant. In our market it's 15 percent. And then to determine what Federal order they're located in, they have to sell at least 25 percent of those route sales into the marketing area. And those numbers vary by order. Ours are 15 and 25. I believe Mr. Wise said this morning 25 and 25 was a number that's in a lot of the orders as well, so it does vary by order. And that was -- those numbers are in Exhibit -- I did not bring it with me --9, Exhibit 9.

- And Section G of this same provision allows 1 Ο. 2 the Market Administrator to change these numbers, 3 correct? That is correct. 4 Α. Have they ever been changed in Order 30? 5 Q. The Market Administrator generally will not 6 Α. 7 change the numbers on a distributing plant, that happens 8 very rarely. In fact, I can't think of a time that it 9 has happened. Generally the numbers on the supply plant 10 will be what changes, depending on the utilization of the market and the supply of milk in the market and the 11 12 demand for milk in the market. 13 And you said you didn't think that any Order Ο. 30 changes have been made. Do -- do you know of any to 14 15 any order? 16 We have not had any changes in our shipping percentage or our distributing plant percentages since 17 order reform. 18 19 And these shipping percentages, did they only apply to fluid milk? 20 21 Α. I believe a supply plant can ship condensed and also qualify, get some qualification. 22 23
 - Q. Is there anything else you think a layperson would need to know in order to understand what a pool plant is?

- A. Probably not. That's the -- that's the basics.
 - Q. So now I'll turn to Section 1030.8, which also adopts Section 1000. So Section 1000.8 defines what a nonpool plant is.
 - A. Correct.

- Q. In laymen's terms, can you explain to us what a nonpool plant is?
 - A. It's any plant that's not a pool plant.
 - Q. Which means? What happens with the milk in a nonpool plant?
 - A. Some of the nonpool plants, like for instance there's a number of categories of nonpool plants. In and I think I mentioned yesterday in the testimony that one of the things I find kind of interesting is a pool plant in another order is a nonpool plant to our order, so Order 32 pool distributing plant is a nonpool plant to Order 30, so there's one form of a nonpool plant.

Partially regulated plants I believe are on that list except --

- Q. What is -- what is a partially regulated plant?
- A. A partially regulated plant is a plant that does not meet -- that has sales, route sales into the marketing area but not enough sales to qualify as fully

1	regulated. So, for instance, if we back up to an Order
2	30 plant where we have to have 15 percent of the
3	receipts in packaged fluid milk out on routes and
4	25 percent of those route sales have to be in the
5	marketing area, there could be a plant that has
6	15 percent meets the 15 percent, the first category,
7	and makes it a distributing plant because they have the
8	route sales, but maybe they only sell five percent of
9	their route sales into our market. They would not be
10	fully regulated, they would be a partially regulated
11	plant because they don't need the full definition.
12	Q. And why would a plant choose to be a nonpool

plant as opposed to a pool plant?

13

14

15

16

17

18

19

20

21

22

23

24

25

In some cases they don't have much of a Α. choice, obviously. If they're another order distributing plant -- another order pool plant or they're a partially regulated pool plant, exempt plants, certain categories of plants are laid out as nonpool plants.

Some plants choose to be nonpool plants, and that choice is predominantly in our market made based on the economics of pooling milk in a particular month.

- So the prices would be better if you didn't Ο. pool as opposed to if you pool for that month?
 - Α. Basically it's based on the relationships of

- the prices, which lead to the producer price
 differential and the return that they would get from
 pooling.
 - Q. Can a plant move from being a pool plant to a nonpool plant and vice versa?
 - A. Yes.

- Q. Can they do this monthly?
- A. Yes. They have to meet certain regulations to do that. So, for instance, a supply plant in our market has to ship 10 percent of their receipts to a distributing plant to be regulated, so if they decided to be a pool plant, they would have to ship 10 percent in that particular month. If they were -- if they did that and they became a pool plant, let's say in September, and then in October they did not want to be a pool plan, they would not ship, and so they would have no shipments to a distributing plant and be a nonpool plant.

Distributing plants are a little tougher because they are -- have milk going out on routes all the time, but conceivably they could come and go monthly.

Q. So now I'll turn to Section 1030.9, which again references back to Section 1000.9, and this is the definition of a handler. So I see there are three types

of handlers. Can you explain to me each of these types?

A. Well, there's basically -- yeah. The first part of the handler definition is just a -- a -- kind of a generic definition because it says "any person who operates a pool plant or a nonpool plant," and that pretty well picks up a whole lot of folks, but that's a handler.

Section (b) of the handler definition and

Section (c) are kind of what I would call special parts

of Section (a) in that Special (b) is a broker, and this

is somebody who brokers milk products, and they are not

subject to the financial aspects of the Federal order,

and so that would be a special instance of that handler

definition.

The other one, which is a little -- which is really a definition that is used a lot in the Federal orders is (c), and the order -- in the orders, it's referred to as 9(c) handler. And the 9(c) handler is a cooperative -- in fact, a proprietary handler cannot be a 9(c) handler -- it's a cooperative who picks up milk of its members and delivers it to pool or nonpool plants.

And there is some special handling of that milk. One of the things about a 9(c) handler is that with agreement with the pool plants that they ship to,

- that they deliver milk to, is that that handler becomes
 the responsible party for that milk, and that receiving
 handler then has that milk on their report as producer
 milk, they're responsible for paying producers, and it
- that's kind of a -- having a new case of a handler, it's a little different.

is allocated at the plant as producer milk. And so

- The -- and those producers are paid generally in aggregate, so instead of the plant paying each producer that was delivered on a 9(c), they would play -- pay the cooperative the blend value for all the milk from -- that that handler delivered.
- Q. Now I'm looking at Section 1030.11, and it says this section is reserved. What does that mean?
 - A. At one point in time, there was probably a provision there that there isn't any longer when it says reserved, and so instead of renumbering everything, they just plunked "reserved" in.
 - Q. So now I'm at Section 1030.12, and this is the definition of a producer. And it looks like this is one of the first ones where Order 30 has their own definition?
- A. Order 30 does. I believe all the orders have their own definition. All the orders have their own definition for 7 as well, 1000.7, the pool plant.

- Q. Okay. So what is a producer under Order 30?
- A. It's any person who produces milk approved by
 a duly constituted regulatory agency for fluid
 consumption as Grade A milk, and then whose milk is
 received at a pool plant directly from that producer or
 diverted by the plant operator in accordance with
- Q. To be a producer, do you have to sell all of your milk to a pool plant?
- 10 A. No.

7

16

17

18

19

20

21

22

23

24

25

- 11 Q. If you sell some of your milk to a pool plant, 12 is your other milk pooled?
- 13 A. It can be.

Section 1030.13.

MR. BESHORE: Your Honor. I want to -- I want to interpose -- Marvin Beshore.

I want to interpose an objection at this point. I think there's great ambiguity in -- in what we're getting from this testimony of this nature from this witness. He's asked about the provisions of Order 30, which really aren't the subject to this hearing, per se, they may or may not be illustrative, but they're not subject to the hearing. And then, you know, the next question is, well, what happens if a producer doesn't deliver all of his milk. Does that mean under Order 30 or under Part 1000 or under -- it's -- there's --

there's a lot of general testimony being elicited. It's not at all clear whether that applies to all orders or only a particular order or what, and I think we're getting way afield from a witness who is there primarily to testify about Part 1000, which is in every order, and that was my understanding, maybe some other generalities about the qualification, but whether they're specific or generally, it's getting quite mirky.

MS. VULIN: May I respond? This is Ashley
Vulin. I tried to make it very clear on the order when
we're referring to Section 1030 or Section 1000, so it
should be clear in the record when the witness is
speaking towards something that's particular to Order 30
or something in the more general 1000 provisions.

Secondly, we're asking the State of California and all of the farmers in California to adopt a system that is totally different than the one that they've been using, and the ability to understand how the system has worked in other states in more layman's terms as opposed to the complex economics that we've been discussing so far I think is really important for -- for this hearing.

JUDGE CLIFTON: Mr. Beshore, you very articulately have pointed out that when we're talking about something that applies to Order 30, we're talking about something that applies to Order 30. I think that

1 is very helpful and very meaningful. 2 So you may go forward, but that's helpful for 3 us to remember that. So, let's see, we were just talking about --4 would you reask your last question? 5 MS. VULIN: Actually could I ask the court 6 7 reporter to read it back? I've forgotten now. 8 (Whereupon the record was read.) 9 THE WITNESS: In Order 30, it could be. 10 BY MS. VULIN: 11 0. Under Order 30, would you still be a producer 12 if you only sold some of your milk to a pool plant? 13 Depends on the percentage and other factors. Α. 14 Okay. Now, I'm moving to Section 1030.13, Ο. which is coming from Order 30, and this is the 15 definition of producer milk. So when you said if you 16 sell some of your milk you may still be a producer, 17 you're referring to this provision? 18 19 Basically in -- in one of the parts of -- of Section 1030.13, producer milk, is a description of milk 20 21 that may be diverted to a nonpool plant. So now I'm at Section 1000.25, and this is the 22 Ο. definition of a Market Administrator. Now, this 23 24 somewhat more procedural provision is the same 25 throughout all of the orders, correct?

A. That is correct.

1

2

3

15

16

17

18

19

- Q. And can you just describe generally what a Market Administrator does?
- He maintains and invests funds outside of the 4 Α. 5 US Department of Treasury for the purpose of administering the order, makes rules and regulations to 6 7 effectuate the terms and provisions of the order, 8 receive, investigate, and report complaints of 9 violations to the Secretary, recommend amendments. 10 duties include, let's see, "Market Administrator shall 11 perform all the duties necessary to administer the terms 12 and provisions of each order under his or her administration, including but not limited to the 13 following" --14
 - Q. And I'll stop you there, you don't need to read all of it, thank you. But so just generally, the Market Administrator is the person who's in charge of making sure that the order is being implemented as it was written?
 - A. That is correct.
- Q. And we're almost done, we're just getting through the last ones.
- 23 So now I'm in Section 1000.26.
- 24 A. Okay.
- 25 Q. This is continuity and separability of

- provisions, so this is also a more procedural provision that's the same across all orders, correct?
 - A. That is correct.

- Q. And what -- if you can just summarize what does the provision means.
 - A. Basically, it's laying out what would happen if an order was disbanded or voted out or what happens in a liquidation or so forth.
 - Q. Now to Section 1000.27, this is handler responsibility for records and facilities, and this just summarizes that a handler has additional recordkeeping duties if they're a handler under a Federal Milk Marketing Order?
 - A. Basically it lays out the requirements of a handler for maintaining records to meet our requirements to have available those records when we need them.
 - Q. But it doesn't have to do anything to do with what makes someone a handler?
 - A. No, it does not.
- Q. Section 1000.28. This is termination of obligations. Can you just summarize generally what this provision is about?
 - A. Basically what we're talking about in 1028 is timeframes for settling money coming into and going out of the Producer Settlement Fund and the Administrative

- 1 Fund and the Marketing Service Funds of the market, so
- 2 there's deadlines on how soon or how long it would take
- 3 in maximum to receive your funds or that you need to pay
- 4 your funds, so it kind of sets a set of deadlines there.
- 5 Some of those deadlines can be changed if there's court
- 6 proceedings.
- 7 Q. Last one, Section 1000.42. It says
- 8 "Classification of transfers or diversions." What's a
- 9 transfer?
- 10 A. A transfer is when a plant ships milk directly
- 11 to another plant, so they -- it's in their plant, they
- 12 load it on a truck, send it to the other plant.
- 13 O. And what's diversion?
- 14 A. A diversion occurs when a handler or a
- 15 cooperative receives milk or picks up milk from the farm
- 16 and delivers it to a pool or nonpool plant at the
- 17 distribution of that proprietary handler or 9(c)
- 18 handler.
- 19 Q. That's all I have. Thank you for your time,
- 20 Mr. Schaefer. I appreciate it.
- 21 A. You're welcome. Thank you.
- 22 JUDGE CLIFTON: Thank you, Ms. Vulin. I think
- 23 that was very helpful.
- 24 Who next will question Mr. Schaefer?
- 25 Mr. English.

CROSS-EXAMINATION

2 BY MR. ENGLISH:

- Q. Chip English. Good afternoon, Mr. Schaefer.
- 4 So I want to direct a number of my questions to your
- 5 testimony from yesterday, and for ease, I will actually
- 6 tell you what page it's on from the "rough draft only"
- 7 from yesterday.
- JUDGE CLIFTON: Is there another copy of that?
- 9 I don't have one. Is this the last one? I didn't mean
- 10 to take one from a participant.
- MS. VULIN: I got one.
- 12 MR. ENGLISH: She just handed it to me, and I
- 13 was trying to speed it up.
- 14 BY MR. ENGLISH:
- Q. So I'm looking at page 3, lines 21 through 23,
- 16 which reads, "The purpose of the pooling provisions are
- 17 to determine which plants and which producers can
- 18 participate in respect to Federal orders." Why is that
- 19 important?
- 20 A. It determines who really participates in the
- 21 pool and who receives -- or who receives their blend,
- 22 the blend price, who is eligible to receive the blend --
- 23 blend price from a respective order. It -- so it sets
- 24 up basically boundaries or limits or whatever you want
- 25 to call it as to who is going to participate in this

marketplace.

- Q. Turning to page 4, referring to page -- at line 7 and 8. And connecting back a little bit to Ms. Vulin's examination, you say there's a basic difference between distributing plants and supply plants. Why is there a distinction at all?
- A. It -- I believe the distinction really is their service that they perform in the marketplace. The distributing plant is bottling the milk and supplying the Class I marketplace, whereas a supply plant is supplying milk, or traditionally has been supplying milk to that distributing plant. The supply plants historically would have been out in the country gathering milk supplies from the farmers, and then putting that milk on a truck to send to a plant at a urban area for bottling and distribution to consumers.
- Q. Is that another way of saying it's part of deciding who is in the boundaries? Because if you're not a distributing plant, you're not a supply plant, you're not going to be inside the boundary, correct?
- A. Not necessarily. You don't have to be -- a producer or a plant does not necessarily have to be within the boundary of the marketing area.
- Q. And, I'm sorry, I was using the term "boundary" as you used it about three minutes ago about

- the boundaries of the pools.
- A. Oh, okay.

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

- Q. I was not referring to market area, I apologize.
- A. Yeah, basically, it does -- it does kind of have that, if you don't have a supply plant or distributing plant to ship to, then you would not be able to participate.
 - Q. A couple lines down, lines 13 to 15, again on page 4, "The third step is to determine whether each of these plants is a pool plant and therefore can participate in a particular Federal order." So, again, this is going back to that first statement on page 3 with respect to determining who's in and who's out?
 - A. Correct.
 - Q. And in Order 30, by definition, that means there are some plants to which milk is shipped that are out, we call those nonpool plants, correct?
 - A. We have some plants that are nonpool plants in Order 30, that is correct.
 - Q. And -- and by that I mean they're nonpool plants not because they're regulated on another Federal order but because they're just nonpool plants anywhere?
 - A. That is correct.
- 25 Q. Okay. Turning to page 9 of your testimony,

and I'm referring now to lines 16 through 21 with
respect to unregulated supply plants. And in the lines
19 through 21 you say, "They do file a report of
receipts and utilizations for each order, and they may
have an obligation to the settlement fund." Under what
circumstances do they not have an obligation with
respect to the settlement fund?

A. If I recall correctly, and this is going to stretch me a little bit, I believe, and if I see somebody from this side of the room hop up and wave and yell and scream, then I've obviously misstated, but in certain cases there -- what we're really looking for is that milk that is used in Class I gets priced as Class I milk.

In the case of a nonregulated supply plant, you could have an instance where they move milk and the distributing plant or the plant that they move that milk to would pay the Class I, and so they would not -- so the unregulated supply plant would not necessarily have an obligation to the pool. The milk would still get charged -- have a Class I charge on it based on the distributing plant but it would not pass back -- it would be a direct billing to and from the Market Administrator to the unregulated supply plant.

Q. So I'm going to go off script here for a

- moment, and -- and I think I'm at a point where it's
 going to be a little different, but it's sort of in the
 same vein. What enforcement is there of the minimum
 price regulation for Order 30 on pooled milk that is
- A. If the milk is pooled and received in a nonpool plant, we enforce minimum payment. Now, that is true for proprietary handlers. Cooperatives are -- because they're a cooperative are allowed to pay the price that their members have decided is appropriate price for that month.
- Q. But even as to proprietary entities, against whom do you enforce the minimum price on pooled milk that is received by a nonpool plant?
 - A. The handler who pooled it.

received by a nonpool plant?

5

15

16

17

18

19

20

21

22

23

- Q. Do you enforce any price as to the nonpool plant?
- A. If a pool plant has milk of their own producers and it is not pooled, we do not enforce any minimum price.
 - Q. But let me just kind of tie that together. If it's pooled milk, the handler that filed the report, you're going to enforce the minimum price as to that entity, correct?
- 25 A. That is correct.

Q. But to the extent that that transaction carried forward and the nonpool plant received the milk, are you looking to the nonpool plant under their circumstances to enforce the minimum price in any way?

- A. We are not, we are looking at the pool plant who pooled it.
- Q. So going back to your testimony just one more time, page 11, line 13, and you used the term "touch base requirements." Why are touch base requirements important?
- A. Touch base requirements really indicate whether the producer -- the -- the idea of a touch base requirement is to determine if the producer who is part of the pool can deliver Grade A milk to a pool plant for use in the Class I market.
- Q. Does it go back to our idea of helping determine, now not the market area boundary but the boundary of who's in and who's out for pooling purposes?
- A. At times it could be used for that way, could be used that way.
- Q. Okay. You use the term in your testimony "degraded milk." D-E-G-R-A-D-E-D. Degraded milk. What is "degraded milk"?
- A. I've been thinking about that a little bit, that probably wasn't the correct term, but basically

- what I was referring to was a farm that had lost their
 Grade A status and therefore is ineligible to
- 3 participate in the Federal order.
 - Q. Because it can no longer be a producer because it's -- doesn't meet the definition of what's happening from a duly regulated authority, correct?
 - A. Correct.

5

6

8

9

15

16

17

18

20

21

22

23

24

- Q. Now, is -- is that something that can be voluntarily given up by a producer?
- 10 A. That I do not know.
- 11 Q. Okay.
- A. I -- I'm not familiar enough with the -- with
 the State, because the State is who determines whether
 they're Grade A.
 - Q. So you don't know whether under Order 30, for instance, in some states a producer may give up its

 Grade A status and then get it back in a future month to come back onto the pool?
- 19 A. That I do not know.
 - Q. Okay. I -- I have a topic area, but I'm going to mention it, and I'm assuming we're going to have to come back, and that is the treatment of condensed milk and/or nonfat dry milk for fortification purposes, and I think that is the identical or at least close enough to the topic area Mr. Beshore raised that maybe after a

break you'll be able to respond to; is that correct?

A. That's correct.

Q. So, Your Honor, I also want to talk about that subject.

A moment ago we talked about milk going from the country to the city, and we talked a little bit about the PPD, or you did with Mr. Beshore. Is there a difference between a blend price and/or where it matters a PPD for producer and the price announced for the city zone?

JUDGE CLIFTON: For the city what?

MR. ENGLISH: For the city zone.

JUDGE CLIFTON: Zone?

MR. ENGLISH: Zone, Z-O-N-E.

THE WITNESS: In Order 30, our -- our price for our PPD, or -- or blend price, if you want to call it that route, is announced in what's called a dollar 80 zone, which is the county's, including Cook County, which is the Chicago area, and I believe the dollar 80 zone actually goes up to Michigan, Lake Michigan, a ways into Wisconsin, so there are a number of counties that have a dollar 80 zone, and that is what our price is announced at. If the milk is delivered in a county other than that dollar 80 county, there is a reduction in the PPD.

BY MR. ENGLISH:

- Q. So for that producer, the blend price for PPD would be lower than what you announced for the principal zone?
- A. Correct. Now, let me -- I also think it can go up as well. If -- if our -- if we have a milk that would have been delivered into a county in the \$2 zone and got priced in our market, then he would get more money, but our -- our marketing area is all less than a dollar 80.
- Q. So I want to discuss a little bit now the mechanics of pooling, and sometimes we use the word --some of us use the term "depooling," or I guess it's, you know, it's not eligible to be pooled, it's not pooled. And again I'm use pooling, P-O-O-L-I-N-G, and depooling is one word, D-E-P-O-O-L-I-N-G.
- So I just -- I don't want to get in this -I'm not trying to get in the weeds, I just want to talk
 about it generically. And, you know, we've got some
 testimony in the record through the exhibits from the
 Department, and I think some answers to questions of
 Mr. Beshore and Ms. Vulin, you discussed, for instance,
 the fact that a plant could be pooled one month and be a
 nonpool plant another month, correct?
 - A. Correct.

1 And that could impact whether or not the milk Ο. 2 received at that plant is pooled or not, correct? 3 Α. That is correct. 4 Ο. So let's talk about this proposition: 5 makes the decision to pool milk? The handler of --6 Α. 7 MR. BESHORE: Can I -- okay. Now that -- this 8 is exactly where --9 JUDGE CLIFTON: Who are you? 10 MR. BESHORE: Marvin Beshore. 11 This is exactly where I think the record needs 12

This is exactly where I think the record needs specificity and clarification with respect to what's being talked about. Under what Order? I mean, there's not -- you know, is it under -- if it's under Part 1000, then it's who generically decides, but if we're talking about particular orders -- if we're not talking about a generically answerable question, which I don't think that one is, then we need to talk about particular orders or we've got testimony that's not attached to anything.

JUDGE CLIFTON: Thank you.

MR. ENGLISH: I will accept that. It was intended, Mr. Beshore, and certainly I'm asking this witness in this instance about Order 30.

THE WITNESS: In Order 30, it's the handler

- 1 may elect to not pool milk that has been received in a
- 2 nonpool plant. Generally speaking milk that is received
- 3 in a pool plant must be pooled.
- 4 BY MR. ENGLISH:
- 5 Q. So -- so, for instance, a handler who operates
- 6 a 7(a) plant doesn't have the same choice as another
- 7 handler who operates a supply plant?
- 8 A. If a 7(a) plant brings that milk as their
- 9 own -- let's say they have their own producers, and
- 10 brings that milk into the plant so it's physically
- 11 received at the plant, it must be pooled. If he diverts
- 12 that milk to a nonpool plant, then that milk that was
- 13 diverted he may elect to not pool.
- 0. So they have the election even as to that?
- 15 A. Correct.
- 16 Q. As long as it's not physically received within
- 17 the 7(a) plant?
- 18 A. Correct.
- 19 Q. Now, there may a consequence in a future month
- 20 for having made that choice, say, in September, correct?
- 21 A. Correct.
- Q. That if you have made the choice in a
- 23 | particular month, say September, not to pool a certain
- 24 producer's milk, then you will have to qualify it again
- 25 in the future month, correct?

- A. In Order 30, once a producer is qualified, he is basically on the order for life unless he loses his Grade A status for a calendar month or the milk has been pooled on another Federal order.
- Q. So you don't have to even requalify the milk --
 - A. That is correct.

- Q. -- on Order 30?
- A. So if he elects to not pool the milk in the month in September, he -- if the producer was qualified in August, he elects to not pool it in September, he can bring the producer back in in October. Now, that's the qualification portion of it.

Order 30 has another portion in there that deals with how much volume a handler can pool month to month, and so a handler during the period of -- let's see, I've got to get my months right here -- April through February can only bring on or only pool 125 percent of the milk that he pooled in the previous month. In March it's 135 percent. So there is some restriction as to what you can bring on month to month.

Q. But it doesn't apply to the specific producer, it's applied -- it applies to the handler who's made that election to not pool milk, and he might have a limitation which could impact pooling all of his

- 1 producers but -- or all the milk, but it wouldn't affect
- 2 the question as to whether that producer was still
- 3 eligible to be pooled?
- A. That is correct. I think there's an exception
- 5 to that, and that is if he was pooled on another market.
- Q. Okay.
- 7 A. There's some issues.
- Q. So leaving aside the exigencies --
- 9 A. Yeah.
- 10 Q. -- of being pooled in other market -- area
- 11 market kind of provisions or if you've been degraded
- 12 but --
- 13 A. Yeah.
- Q. Now, I want to be very careful because we've
- 15 used the word "boundaries" in Federal milk orders. Can
- 16 milk reside outside the pool but inside the market area?
- MR. BESHORE: In Order 30?
- 18 BY MR. ENGLISH:
- 19 0. In Order 30.
- 20 A. Let me try and rephrase the question --
- 21 Q. Sure.
- 22 A. -- so I understand it. When you are saying
- 23 | "reside outside the pool," you mean not participate in
- 24 the pool?
- O. Exactly.

- 1 A. And still be located in the marketing area?
- Q. Yes.

7

8

9

10

11

- A. There is no restriction on Order 30, and -- I
 better just stop at Order 30, as to where a producer can
 be located and still be a producer on Order 30.
 - Q. The flip side is there's no restriction on where it can be located and not be pooled, correct?
 - A. Correct. If I got that right.
 - Q. Does milk in Order 30 physically produced in the marketing area -- is there milk physically produced in the marketing area that is not pooled on a regular basis?
- 13 A. I guess I would -- I would qualify that a
 14 little bit as to a regular basis.
- 15 Q. Okay.
- A. Depending on price we may have some milk that is not -- that they elect to not pool for a number of months in a row, and so in that case, yes, you've got milk in the marketing area that would not be pooled.

 Now, on a regular basis, if you're talking multiple years in a row, there may be some, but --
- Q. Well, let's strike the word "regular" from my question and you would say yes?
- A. I would say yes.
- 25 Q. Has that undermined your ability to administer

the Order, Order 30?

- A. At this point in time I would say no. At one time it did.
- Q. Was that time prior to me having -- that we had a couple of hearings in the mid-2000 timeframe where we had some issues and we amended the orders?
 - A. That is correct.
- Q. So since -- since Order 30 was amended, not once but twice, post-Federal Order Reform to address some pooling issues, you have not experienced that same issue?
- A. I'm going to say I would agree with that. Not being in the part of the office that looks at the budget every -- every month, I -- they --
- Q. Leaving aside the impacts on the Market Administrator's budget for a moment.
- A. It does -- it does have an impact on the Market Administrator's budget. We would -- we have gone from over three billion pounds pooled this year to we had I believe a month with under two billion pounds pooled. And you take a billion pounds off at three cents a hundredweight, it's a fair amount of money. But it has not had a -- it has not created the problems that it did prior to the current provisions we have in our order.

- MS. TAYLOR: Your Honor, I just want the 1 2 record to be clear that Mr. Schaefer is here to testify 3 on the provisions as they're currently administered. There is a hearing record that dealt with the issue Mr. 4 English has discussed, and they -- parties can make a 5 decision on whether or not it solved -- you know, it 6 solved that issue of milk not being pooled. 8 MR. ENGLISH: I don't believe that was the 9 question, Your Honor. 10 MS. TAYLOR: I don't want -- Mr. Schaefer is 11 not here to offer his opinion whether or not that 12 undermines things. He's here to discuss provisions as
- JUDGE CLIFTON: I think this falls into that category, Ms. Taylor. All right. But your concern is noted, and it will be helpful to have that -- to take into consideration.
- 18 BY MR. ENGLISH:

19

20

21

22

23

24

25

- Q. I -- I do want to clarify one thing because -just so the record is clear. You said it dropped from
 three billion pounds to two billion pounds, and that
 creates financial implication because of assessments. A
 billion pounds didn't just disappear, did it?
 - A. It did not.

they're currently administered.

Q. That would be eligible milk that wasn't

1 pooled, correct? 2 Α. That is correct. 3 O. Turning to 1030.7(h), which is the term pool 4 plant shall not apply to the following plants, and 7, 7 is provision --5 JUDGE CLIFTON: Give me the numbers --6 7 MR. ENGLISH: Okay. 8 JUDGE CLIFTON: -- just so I write it 9 correctly. 10 MR. ENGLISH: 1030, so this is an Order 30 11 provision, to which the witness has testified to, and 12 it's Section 7, so 1030.7(h), and I'm looking at paragraph 7 under (h), and I merely said for (h), this 13 14 is the term pool plant shall not apply to the following 15 plants. BY MR. ENGLISH: 16 17 O. And paragraph (h)(7) reads "that portion of a regulated plant designated as a nonpool plant that is 18 19 physically separate and operated separately from the pool portion of each plant. The definition of a portion 20 21 of a regulated plant as a nonpool plant must be requested in advance and in writing by the handler and 22 23 must be approved by the Market Administrator." 24 You're familiar with that provision, correct?

25

Α.

Yes.

- Q. Is that sometimes known as the split plant provision?

 A. Yes.
- Q. And you've -- split plant provision,

 S-P-L-I-T, split plant provision. And it is sometimes

 known as a split plant provision because a plant

 literally can be both a pool plant and a nonpool plant

 at the same time, correct?
- The physical -- the physical portions cannot 9 Α. 10 be the same, so you cannot have one intake being used --11 one single intake being used for both at the same --12 both. You would have to split your intake in some fashion, split the layout, basically lay out your plant 13 such that you can differentiate to our satisfaction that 14 15 one portion of that plant is dealing with your pool milk 16 and one portion is dealing with your other, we'll say 17 the other plant really.
 - Q. Now, I'm not looking for confidential information, but do you presently have plants utilizing the (h)(7) provision?
 - A. Yes, we do.
- Q. Thank you. I have no further questions.
- JUDGE CLIFTON: Who will next question
- 24 Mr. Schaefer?
- 25 ///

19

20

CROSS-EXAMINATION

1

- Q. John Vetne for Hilmar Cheese Company.
- While it's fresh on my mind, Mr. English asked
- 5 you questions about producers located in the marketing
- 6 area that are not pooled on Order 30, and I think your
- 7 discussion revolved around producers whose milk was
- 8 removed from the pool, not included on the pool report.
- 9 Is that -- am I correct?
- 10 A. That is correct.
- 11 Q. There are additionally -- there is
- 12 additionally milk produced within the geography of the
- 13 Order 30 marketing area that is not pooled within Order
- 14 | 30 but instead pooled by handlers marketing milk to
- 15 other markets such as the Mid East, the Central
- 16 Marketing Area, perhaps elsewhere; is that correct?
- 17 A. That is correct.
- Q. And -- and the milk of those producers like
- 19 the milk of producers whose production is pooled within
- 20 Order 30 might be voluntarily associated with the pool
- 21 or disassociated with the pool in a manner similar to,
- 22 maybe not identical to Order 30?
- A. Not knowing the provisions, being as familiar
- 24 with the provisions in the other orders, I could not say
- 25 for sure.

- Q. Okay. You're familiar with the publication called Federal Milk Order Market Statistics?
- A. Yes.

- Q. And -- and that has published -- reports producer milk, among other things, by market, and frequently there's a footnote in one or more markets alerting the reader to this volume may reflect some milk that was disassociated for economic reasons or price relationship reasons. Are you familiar with that report and that footnote?
- A. Yes.
 - Q. I wanted to go back to -- initially to a discussion of Section 92, which is -- 9(c), rather, which is a common provision in the marketing orders. You discussed that on page ten of the rough draft testimony and you discussed it in dialogue with people that questioned you before.

One of the things that you highlighted there is that milk marketed by a cooperative association may by agreement be included on the -- the report as pool milk on the report of a handler-operated pool plant.

That's -- that was the essence of your -- the thing you highlighted on page ten.

- A. Okay.
- Q. What I'm not sure we're gotten into here is

- 1 actually the default pooling provision in Section 9(c),
- 2 which -- in which a plant operator is not the pooling
- 3 handler at all. Do you understand where I'm going? The
- 4 handler -- the conventional handler of a 9 -- the
- 5 conventional pooling of a 9(c) handler is that the
- 6 cooperative is the handler, pools the milk of member
- 7 producers in its pool report, and accounts to the Market
- 8 Administrator for the classified value of all uses
- 9 in that pool report; isn't that correct?
- 10 A. If a handler -- if a 9(c) handler delivers
- 11 milk to a nonpool plant, that would be correct.
- 12 Q. Okay. Right.
- A. But at least in Order 30, I am not familiar
- 14 with any instances where a 9(c) handler delivering --
- 15 delivering milk to a pool plant is the handler on that
- 16 milk; the receiving handler would be.
- Q. Oh, okay. Section 9(c) refers to agreement
- 18 between the cooperative association and the handler,
- 19 that the -- the plant operator, that the plant operator
- 20 will pool the milk. So in Chicago, the custom is that
- 21 there are such agreements in all cases?
- 22 A. I would say since I've never seen a -- a 9(c)
- 23 shipment to a handler -- to a pool plant where the
- 24 handler of the pool plant did not -- was not the --
- 25 settling with the pool on that milk, I would -- well,

I'm not going to go there I guess.

Q. Okay.

- A. I haven't seen it, I know what you're asking there, but I have not seen it in our market, so I -- I think I'll just leave it at that.
- Q. Okay. And it's not customary in -- it's not customary in your market, then, for a 9(c) cooperative to include in its report of receipts and utilization in its accounting to the pool shipments to a pool distributing plant customer?
- A. The 9(c) report in Order 30 covers both pool plant movements and nonpool plant movements. Prior to Order Reform, there was a -- what was called a 9(b) report as well as the 9(c) report, and the 9(c) report covered cooperative movements to pool plants, and the 9(b) report covered cooperative movements to nonpool plants. That was all merged into one category at order reform, so the 9(c) report can cover both movements to a pool plant as well as movements to a nonpool plant.

In the movements to a pool plant, the handler at the receiving plant becomes -- the handler of the receiving plants becomes the handler on that milk. When the milk goes to a nonpool plant, the cooperative remains the handler on that report and settles with the pool on that.

- Q. All right. Refresh my memory. The -- the current Order 30 does not have a separate Section 7 whatever, C-D-E-F, provision for plant operated by a cooperative association. Did it have one before Federal
 - A. Order 30 did not. I don't recall Order 68 did either.
- Q. But you know -- you know what I'm referring to?
- 10 A. Yes.

Order Reform?

5

6

7

16

17

18

19

20

21

22

23

24

- Q. Okay. The -- the provisions in aggregate in Section 7 and Section 13, primarily, state requirements of performance that determine which producers and what volume of producer milk gets pooled; is that a correct statement?
 - A. Which -- it would really -- it sets the criteria for handlers and producers, the -- it sets the criteria requirements that they need to meet to be part of the Order 30 pool.
 - Q. That's true. And you referred to them as pooling requirements, but they're also referred to as performance requirements?
 - A. Correct.
 - Q. And the purpose for which is determining what milk gets pooled, what dairy farmers and what volume of

- milk produced by dairy farms gets pooled in Order 30?
 - A. If they do not meet the requirements that are in the regula -- in the provisions of the order, they would not be able to be pooled on Order 30.
 - Q. Okay. We use the term "they," and sometimes we've used the term "him" or "his." The -- in most of these provisions the decision-maker whose decisions allow a farmer or a dairy farmer's milk production to be pooled, that decision-maker is a plant operator or a cooperative association?
 - A. That is correct.

- Q. The farmer has -- has the ability perhaps to look at a list of plants or list of handlers that are pooled to make a decision to market milk to one of those handlers and expect to be pooled, but does a farmer beyond that have an active decision-making role in whether or not his or her milk will be pooled?
- A. Most farm -- for most farmers, the decision is made by the pooling handler.
- Q. Okay. And that pooling handler, to go back, would be a distributing -- a handler that operates a distributing plant under Section 7(a)?
 - A. Or (b).
- Q. Or (b). Or -- and/or operating a supply plant or a cooperative association qualified to market and

divert milk?

1

3

4

5

6

7

8

9

10

12

13

14

15

17

18

19

20

- 2 Α. Correct.
 - Ο. There are for plant operators performance requirements in Section 7 that allow the pooling of milk, and for cooperative associations there's nothing in Section 7, but there is a cooperate performance requirement in Section 13 on diversions requiring certain percentage, I think 10 percent in your market, to be marketed to distributing plants or kind of distributing plants; is that correct?
- 11 Α. That's correct.
 - And the converse of that, 90 percent can be Ο. marketed elsewhere including diversions?
 - Α. Correct.
- Okay. And diversion for purposes of milk Q. 16 speak simply means milk that is sold by the diverting handler to somebody other than a pool plant?
 - Not -- not necessarily. Because the milk that Α. a cooperative picks up at the farm and delivers to a pool plant is often termed a diversion.
 - Diverted from? Q.
- The -- basically it's just referred to as a 22 Α. diversion, I didn't say what it was diverted from, but 23 24 just that.
- 25 Ο. Okay. So it was -- it's picked up in the bulk

- tank a farmer's assembled and delivered to a pool
 distributing plant, correct?
- A. Correct.
- Q. And that helps the cooperative qualify under the Section 13(d) cooperative perform requirement, correct?
- A. Correct.

9

10

11

- Q. And then other milk is picked up by 9(c) cooperatives, assembled in bulk, and maybe sent to a nonpool manufacturing plant, and that's called a diversion?
- 12 A. Correct.
- Q. Okay. And that is limited in terms of percentage of total volume to 90 percent?
 - A. Correct.
- Q. Okay. Milk -- milk of a Section 7 supply
 plant may also be picked up by trucks from bulk tanks
 and shipped directly to distributing plants to qualify,
 correct?
- 20 A. Correct.
- 21 Q. Do you call that a diversion, too?
- 22 A. Yes.
- Q. Okay. So it's a qualifying diversion?
- A. You could phrase it that way because they can use that for qualification to meet their 10 percent

shipping requirements.

1

2

- Q. So the 10 percent shipping requirement is a different form of transaction?
- No, all they have to do is a supply plant has 4 Α. to ship 10 percent of its receipts to a distributing 5 plant, and there's a few other types of plants listed in 6 7 the regulation, it's basically to a distributing plant. 8 That milk can either go directly from the farm to the 9 distributing plant or it can go from the supply plant to 10 the distributing plant, either one would meet the --11 help go to meet the 10 percent total.
- Q. And -- and the -- I'm losing --
- JUDGE CLIFTON: Yeah, you may have lost a

 battery. Let's take a break. I think we've been

 sitting a long time. Please be back and ready to go at

 4:20.
- 17 (Whereupon a break was taken.)
- JUDGE CLIFTON: All right. We're back on record now at 4:21.
- 20 Mr. Vetne, you may resume your questioning of 21 Mr. Schaefer.
- 22 BY MR. VETNE:
- Q. Okay. Mr. Schaefer, before our break we were talking about performance requirements under Section 13 and Section 7. The performance requirement for a

- 1 Section 7 pool supply plant, as I understand your order,
- 2 is essentially the same as the performance requirement
- 3 for a cooperative 9(c) handler under Section 13(d)(2),
- 4 | both pooling entities must ship 10 percent of their
- 5 milk, total milk supply receipts to qualifying
- 6 distributing plants.

9

- A. That is correct.
 - Q. And both entities may meet those performance requirements by taking milk directly from farms to their distributing plant customer?
- 11 A. That is correct.
- Q. And in so doing, rather than doing it by transfer, efficiency is achieved, correct?
- A. That -- that is why most of them do it, I believe.
- Q. Okay. The one -- one small difference is that pool supply plant operators may not qualify milk to
- 18 producers located outside of the geography of the Upper
- 19 Midwest and some contiguous states directly from the
- 20 farm and qualify.
- 21 A. Do you want to run that by again, John?
- Q. Yes, I do. I want to.
- "The operator of a supply plant located within
- 24 the states of Illinois" -- I'm reading from Section
- $25 \mid 7(c)(2)$, "supply plant located within states of

- 1 Illinois, Iowa, Minnesota, North Dakota, South Dakota,
- 2 Wisconsin and the Upper Peninsula may include qualifying
- 3 shipments directly from farms or from 9(c) handlers to
- 4 distributing plants. Handler, however, may not use
- 5 shipments pursuant to 9(c) order, Section 13, to qualify
- 6 plants outside the marketing area."
- 7 A. Basically what that's saying is they -- they
- 8 can't use those kind of shipments to qualify a plant.
- 9 It's not the producer.
 - O. Producer can be located outside?
- 11 A. The producer can be located outside.
- 12 Q. All right. So that -- that is equally true
- for supply plant operators that meet the location
- 14 requirement and cooperative associations wherever
- 15 they're located?

- 16 A. Correct.
- 17 O. Let me go back to a discussion a little bit
- 18 earlier on diversion. I want to make sure that every
- 19 meaning of diversion is understood by me on this record
- 20 because the same word is used in proposal marketing
- 21 orders for California. You and I use "diversion" to
- 22 refer to a transaction of pool milk to a nonpool plant,
- 23 correct?
- 24 A. Correct.
- 25 Q. Okay. And the predominant volume is to

- 1 | nonpool manufacturing plants, correct?
- 2 A. Correct.
- Q. And in addition, you used "diversion" -- I
 don't know if it was new to me or I just don't
 remember -- to refer to a transaction of milk sold by a
 cooperative association from its member supply to a pool
 distributing plant?
 - A. Correct.
- 9 Q. And you would not use that same term
 10 "diversion" to refer to a transaction from the pool
 11 supply plant operator from farms to its distributing
 12 plant customers?
- 13 A. Actually we also use it for that.
- Q. Okay. Okay. This does not get less confusing as we go along, which is why we're here.
 - In response to questions by Mr. English, you spoke of the ability of a pool supply or plant operator for economic reasons to take the plant off the pool in one month and qualify again on another month. Do you recall that discussion?
 - A. Yes, I do.

17

18

19

20

- Q. In Order 30, many supply plant operators
 qualify their plants in aggregate with other supply
 plants in a supply plant unit, correct?
- 25 A. That is correct. Actually, let me make a

- little correction there. It's a system, and there's a distributing plant unit.
- Q. Okay.

2

3

8

9

10

11

12

- A. So we -- we -- when we did order reform, and this is just more for your information, they flip-flopped the terms. So now we're a supply plant system and a distributing plant unit.
 - Q. Okay. Used to be supply plant unit and distributing plant something else. Okay.
 - So -- but, nevertheless, supply plants may join together in the aggregate, and you call it a system, and their performance is based on the aggregate system, correct?
- 14 A. Correct.
- Q. And those supply plants must make a decision once a year and stick to it for the year; is that correct?
- 18 A. That is correct.
- Q. What portion of supply plant milk in Order 30 is part of a system?
- A. Currently we only have one supply plant system
 on Order 30, and so the vast majority of the supply
 plants are part of that system.
- Q. The vast majority of plants, the vast majority of milk pooled by such plants?

A. That is correct.

- Q. And those plants may not on a month-to-month basis without breaking the system rules simply disassociate with the pool?
- A. They could drop out of the system if they'd like, and then -- drop and then become a nonpool plant and come and go monthly as -- if they'd like to do that, but they cannot go back into the system. So from the respect of participation in the system to a standalone supply plant, there is some considerations that a plant operator would have to weigh.
- Q. Okay. And there are commitments of the plants within a system to each other?
- 14 A. They have to stay in the system, but once they
 15 drop out, they're out for the --
 - 0. And --
- 17 A. -- rest of the year.
 - Q. Okay. And as long as they're in the system, whether there's a price incentive or not to disassociate with the pool, some milk, in order to have the plant stay in the pool, some milk still has to be associated with that plant in pool?
 - A. Correct.
- Q. Other than -- other than having a plant of some kind in Section 7 for a supply plant operator, are

there any practical differences in performance between supply plant pooling entities and 9(c) cooperative pooling entities in Section 13(d)?

- A. As far as qualification and so forth, I can't think of any. The bigger difference would be -- the big difference really is how that milk is handled with regards to who settles for the pool, on the -- on the pool.
- Q. Okay. And so the difference is -- is having a plant, what kind of physical structure, minimum physical structure would qualify as a plant? Would a -- simply having a reload facility that's used once in a while qualify as a plant?
- A. A reload would not be considered a plant. It has to meet the plant definition, and a reload is not considered a plant.

In addition, a supply plant on Order 30 must wet the tank every month, so you must bring milk in, and we consider wet the tank a load of milk, every month into the pool plant, so it has to be functioning.

- Q. So -- so the primary difference is the one of the physical structure and pool supply plant operator must have physical structure that can receive and store at least one load of milk a month?
- A. Correct.

Okay. I just want to make -- ask a question 1 Ο. 2 from page 4 of your rough draft testimony. To make sure 3 that context is kind of clear, are you looking at the difference between a distributing plant and supply plant 4 in the first full paragraph, "Supply plant receives milk 5 6 from dairy farmers and ships bulk milk to distributing plants." Do you see that? 7 8 Α. Yes. On page 4. And in that description, you did 9 Ο. 10 not mean by "ships bulk milk to distributing plants" to 11 exclude shipments from farms to distributing plants? 12 Α. That is correct, I did not differentiate. Could be from the farm, could be from 13 Ο. transfer -- transfer from the plant? 14 15 Α. That is correct. 16 I don't think I have any more at this point. Q. 17 JUDGE CLIFTON: Mr. Vetne --18 THE WITNESS: Thank you. 19 JUDGE CLIFTON: -- help me with the 20 transcript. In your most recent discussion when you mentioned both Section 7 and you mentioned Section 21 13(d), which subsection of Section 7 did you reference? 22 It sounded to me like 7(4)(a), which I don't think is 23 24 what I should have written down.

631

MS. VULIN: No, it would be subsection 7(c),

```
subpart (4), subpart (a), which I think is the -- the
 1
 2
    section that refers to the kind of distributing plants
 3
    to which shipments must be made in order to qualify it
 4
    as a supply plant or by cross-reference a cooperative
    under Section 13(d).
 5
 6
              JUDGE CLIFTON: So if I had written down
 7
    7(c)(4)(a) I'd have it?
 8
              MR. VETNE: Let's see. 7(c) -- okay.
 9
                            If you -- I think, John, if
              THE WITNESS:
10
    you're --
                          7 -- yeah.
11
              MR. VETNE:
12
              THE WITNESS: Go ahead.
              MR. VETNE: 7(c)(1) and then little i is the
13
    one that refers to the kinds of distributing plants to
14
15
    which supply plants must make shipments in order to
16
    qualify under the 10 percent requirement. And that
17
    subsection in Section 7(c) is cross-referenced as a
    requirement of cooperative associations in Section 13 --
18
19
    make sure I get it right -- Section 13(d)(3) -- no,
20
    13(d)(2), provided not less than 10 percent of such
    receipts are delivered to plants described in Section
21
    1030.7(c)(1) little i. So it's the same -- the same
22
23
    performance reference both for supply plants and
24
    cooperative associations.
25
              JUDGE CLIFTON: Thank you.
```

1 And I'm -- yeah, I may have been, MR. VETNE: 2 like, trying to speak from memory like I actually 3 memorized these things and gotten them wrong, but those are the two correct references because I have them in 4 front of me. 5 JUDGE CLIFTON: Thank you. That's very 6 7 helpful. 8 Who else has questions for Mr. Schaefer? 9 what time is it? Okay, it's 4:37. We have a little 10 more time. 11 CROSS-EXAMINATION 12 BY MR. SMITH: Dan Smith. 13 Ο. 14 Good afternoon, Mr. Schaefer. 15 Α. Good afternoon. 16 Just a few brief questions about pooling. Ο. 17 The -- with regard to the pooling requirements in Order 30, on what basis were the percentages for each plant, 18 19 the -- the threshold requirements, were they established in the 2000 order reform? 20 21 Yes, they were. Α. And on what basis were those, the amounts set? 22 Ο. 23 For the supply plants, we looked at the Α. 24 anticipated volume of milk that would be pooled under 25 the new order, and we looked at what the utilization

- would be on the order based on estimates from the old 1 2 Order 68 and old Order 30 data. And at that time, in 3 Order 30, some of our distributing plants had some of their own producer milk, and so we looked at that 4 consideration. And then we looked at the -- basically 5 6 demand, what we thought the demand for fluid milk would 7 be in each of the -- you know, in 68 and in 30, so the 8 combined orders, and based that shipping percentage on 9 that that would be a reasonable number to supply the 10 Class I market.
 - Q. So that the -- the amounts are calibrated to the utilization in that particular --
 - A. What we estimated the utilization to be at the time we did it, and obviously at -- not obviously, but at that point in time, the utilization we anticipated to be somewhat higher, but there was a fair amount of milk that was pooled by some of the distributing plants themselves, and so that milk we backed off because we anticipated that that milk would continue to be pooled by those handlers, and so there was no sense on making supply plants ship milk that distributing plants already had.
 - Q. Very good. Thank you.
- JUDGE CLIFTON: Other questions for Mr.
- 25 Schaefer?

CROSS-EXAMINATION

2 BY MR. BESHORE:

1

6

21

22

23

- 3 Ο. Marvin Beshore.
- 4 Henry, I want to go to page 4 of the draft --5 rough draft --
 - Α. Okay.
- 7 -- transcript. The paragraph, first full Ο. 8 paragraph at the top, which Mr. Vetne just asked you 9 about, and in particular, the language about supply 10 plants at lines 10 to 12 that he also asked you a 11 question about. And I want to ask -- I want to go into 12 this in this con -- in the context of the concerns I expressed and the objections I made to Ms. Vulin's 13 questions at times, and that is that generalized 14 15 statements about order operations may be absolutely correct in a general sense, but unless taken to 16 17 particular circumstances and -- and applied and -- and inquired into, they can be quite misleading also, so --18 19 JUDGE CLIFTON: Comma, is that correct?
- 20 BY MR. BESHORE:
 - Is that correct? Or do you agree with that? Ο. Well, that's the premise to the question, actually.
 - Α. I would not disagree that a general statement would not apply to all orders.
- 25 Ο. So on lines 10 to 12 you said, this is the

- 1 last clause in the sentences, distinguishing between
- 2 distributing plants and supply plants, "while a supply
- 3 plant receives milk from dairy farmers and ships bulk
- 4 milk to distributing plants." A supply plant receives
- 5 milk from dairy farmers and ships bulk milk to
- 6 distributing plants. Okay?
 - A. Okay.
- 8 Q. Now, that's a general proposition that
- 9 probably many people would agree with generally, but in
- 10 Order 30, just on a monthly basis in a system of plants,
- 11 such as you identified with Mr. Vetne, many of those
- 12 plants do not ship any milk to distributing plants,
- 13 correct?
- 14 A. I would not disagree with that.
- Q. Okay. Because they've got proxy within the
- 16 system that covers their requirements in essence?
- 17 A. That's correct.
- Q. Okay. And some years ago in Order 68, there
- 19 was a provision that defined requirements from supply
- 20 | plants, it's not there any more, in which a species of
- 21 supply plants had absolutely no requirement to ship any
- 22 particular volume at any particular time as a general
- 23 matter?
- 24 A. I believe that's correct.
- Q. Now, that's not in the order now, but that was

in --

- A. No, it's not in the order now. I believe there was a call -- I can't remember what the name was, what the category was, but I believe they -- those supply plants did not have to ship unless the Market Administrator felt that there was a need for additional milk in the market that could be shipped, and those plants were then called on to ship that milk.
- Q. Right. But with respect to those -- the order at that time and the regulation at that time and those supply plants, the general statement that a supply plant receives milk from dairy farmers and ships bulk milk to distributing plants didn't really apply, correct?

 Doesn't really apply.
- A. In that specific type of circumstances I would -- I would agree with you.
 - Q. Okay. And so there could be other circumstances -- other particular definitions -- well, let me back up with that.

Before the hearings that you referred to in testimony with Mr. -- questions from Mr. English, okay, in post-reform in 2002 or 2003 or 2000 -- in that period of time, before the hearings which amended Order 30 to address what was -- address depool -- opportunistic depooling of milk, okay. Before that, there were no

- provisions in any order that restricted the volume or percentage of milk that could be repooled -- pooled one month to the next by handlers, correct?
 - A. Order 30 did not have any restrictions --
- Q. Okay.

- A. -- but I believe some other orders did.
- Q. Some of the other orders were amended prior to Order 30 in that same cycle?
- A. I think -- I believe that -- and I'd have to be corrected on this, I believe Order 1 had a dairy farmer fluid market provision that restricted repooling.
 - Q. But not on a -- not on a percentage volume?
- A. Not on a percentage volume, but they had some restrictions that restricted the -- the ability to repool.
- Q. Okay. But my -- I guess my point is prior to those provisions being crafted by the hearing process, that language did not appear, the percentage repooling language didn't appear anywhere in the system, correct?
 - A. I believe that's correct.
- Q. But it does now because there was a hearing which -- at which marketing conditions were developed, were approved or expanded upon or discussed and which -- upon which year-end record, the Secretary determined that new provisions needed to be crafted relating to

repooling to meet the marketing conditions?

A. That's correct.

- Q. Okay. And that's the process that defines the particular pooling provisions in every order in the Federal Order System, the hearing record, marketing conditions in the order, and the regulation which evolved?
 - A. That's correct.
- Q. And that applies to depooling or repooling or -- and all of the concepts regarding who's a supply plant, who's a producer, all the boundaries of the order to use that word, that you've discussed in generalities here in your testimony?
- A. The fact that it was decided at a -- at a Federal Order Hearing, and yes, that is correct.
- Q. There's a hearing record based on the marketing conditions in that order or orders, and then the regulations -- whether there were any such regulations before in the system, those particular regulations are evolved out of that particular hearing?
 - A. That is correct.
- Q. By the way, another one that's recently -recently came up that was new to the system at the time
 related to how you could use out out-of-area milk to -how you could -- yeah, what out-of-area milk you could

- 1 relate to a supply plant to pool in -- in a distant
- 2 order, such as Order 30 -- Order 33, you know what I'm
- 3 talking about?
- 4 A. Correct.
- Q. Okay. Those provisions didn't exist in the system until that area, correct?
 - A. Correct.
- Q. Okay. So we can't always -- whether a -
 9 whether a provision is in the system doesn't necessarily

 10 tell you anything about whether it ought to be in any

 11 particular marketing situation given conditions in

 12 another order, fair?
- 13 A. That's fair.
- Q. Okay. Do you have the --
- 15 JUDGE CLIFTON: Could you just clarify?
- 16 Out-of-area was so fast it almost sounded like a
- 17 particular brand of milk, but --
- 18 MR. BESHORE: There are no caps there. Out of
- 19 area, three -- three words, sometimes hyphenated in that
- 20 context or that usage.
- 21 BY MR. BESHORE:
- 22 Q. The sections relating to classification,
- 23 treatment of transfers for fortification, have you been
- 24 able to identify that?
- 25 A. We have. There apparently is two.

- Q. Tell us about them. Tell me about them.

 Okay. One is 1000.40(d). (d)(3).
- JUDGE CLIFTON: Now, I'm writing down -- on

 1000, I'm writing 1 and then three zeros and then point
- 5 40, parentheses, small d, close parentheses?
- THE WITNESS: Yes, 1000.40, and then a small
- 7 (d) with parentheses, and then a small (3) with 8 parentheses.
- JUDGE CLIFTON: Thank you.
- 10 THE WITNESS: And this is in the
- 11 classification section where we're -- classes of
- 12 utilization where it tells what particular products are
- 13 in respective classes. And this is under Class IV milk,
- 14 and it says, "In the skim milk equivalent of nonfat milk
- 15 solids used to modify a fluid milk product that has been
- 16 accounted for in Class I." So that's part of that.
- 17 And the other --
- 18 BY MR. BESHORE:
- 19 0. Can you --
- 20 A. Well, I'm going to read the two of them and
- 21 then I'll kind of --
- Q. Thank you.
- 23 A. -- hopefully will be --
- Q. Sorry I interrupted.
- 25 A. -- able to give a full explanation of that.

O. Go ahead.

A. And the one is in 15, 1000.15, which is a fluid milk product definition, and it's in (b)(2) and it talks about "The quantity of skim milk equivalent in any modified product specified in paragraph (a) of this section that is greater than an equal volume of a unmodified product of the same nature and butterfat content." And that (b)(2) or (b) is telling us the term fluid milk product shall not include.

And I -- I think a little bit what we're getting at is -- and this applies to both nonfat dry milk and condensed milk used for fortification in Order 30, that on the receipt side we bring the product in at milk equivalent, and on the utilization side, the portion that was used in fortification is in Class I, and the reminder is -- in the volume increase in Class I, and the reminder is in Class IV. And the -- what we do is take that volume increase and price that at the difference between Class I and Class IV. So that's how it's handled in -- in that allocation of pricing portion.

Now that may be a little farther than where you wanted to go, but that's the --

Q. No, that's -- that's fine.

So the result of that, then, is factored into

- the handler's value of milk as calculated under Section 60? Is it 60?
 - A. I believe that's correct.
- Q. So if we go back to what you described there,
 I think you said, correct me if I'm wrong -- and by the
 way, these are uniform -- these are in -- these are Part
 1000 provisions, correct?
 - A. Yes.

9

10

11

12

13

14

15

16

17

18

19

- Q. Which apply to Order 30 but because Part 1000 is in all of the orders, they apply in all the orders in the same fashion, correct?
- A. Let's see here. Yes. I just wanted to make sure they were in the 1000.
 - Q. Yes, thank you.
 - So when -- if condensed milk comes into a distributing plant and is used to fortify fluid milk products, the additional volume that it contributes to -- the total volume of Class I products going out of that plant is priced at Class I, correct?
- A. Correct.
- Q. Including any incremental volume which the fortification using the condensed solids added?
- A. The additional volume -- let me back up.
- 24 All of the Class I would be basically Class I.
- 25 The additional volume that occurred because of the

- fortification would have a difference between Class I and IV on it.
 - Q. How are the solids priced?

2

3

6

7

22

24

- 4 Α. Well, in Class -- the solids meaning the condensed that wasn't --5
 - Well, the condensed that -- okay. condensed that's not -- what -- yeah, all the condensed?
- Yeah, basically -- basically it -- it's --8 Α. it's kind of a -- a -- it comes in at -- and I don't 9 10 remember all the -- the nitty-gritty gore there, but it 11 comes in at X, and you use some of it, you use it to 12 increase the volume over here, and then that's accounted 13 for in Class I, but everything else that's not accounted 14 for over here in this volume increase goes down to Class 15 IV in the utilization side, and so when you do the 16 allocation, you basically wipe that out so there is 17 nothing on the Class IV, but you have a volume increase which we charge the difference between Class I and Class 18 19 IV on.
- Okay. So -- I'll leave it at that. 20 Ο. 21 you.
- JUDGE CLIFTON: I do not have the citation, 23 but a federal judge in reviewing material such as this commented, "It is rocket science," talking about milk marketing.

1	Let's see how we're doing on time. We have to
2	stop. So we have five minutes to 5:00.
3	Mr. Schaefer, do you intend to be here
4	tomorrow?
5	THE WITNESS: Yes, I do.
6	JUDGE CLIFTON: Very good.
7	So we still have USDA witnesses and their
8	testimony. Then the next order of business would be to
9	talk about Mr. English's extra issue. And then opening
10	statements. And intermixed in all that, any dairy
11	farmers that might come. And any other preliminary
12	matters that we need to discuss.
13	Tomorrow is Friday. You're welcome to come
14	casual, and we will go until 5:00, we'll go until 5:00
15	every Friday.
16	All right. Is there anything else before we
17	adjourn for today?
18	All right. There is nothing else. See you
19	all at you're welcome to come in at 8:00 in the
20	morning, as early as 8:00, but we'll go on record at
21	9:00. And now recess at 4:57.
22	(Whereupon the proceedings recessed
23	at 4:57 p.m.)
24	
25
