

# COLD CHAIN GRANTS FOR EMERGENCY FOOD ASSISTANCE PROGRAM

## PERFORMANCE MEASURES

The outcomes and indicators below provide a framework that allows grant recipients and subrecipients to track and evaluate progress. Please provide current baselines and expected growth numbers.

### OUTCOME 1: IMPROVED COLD CHAIN CAPACITY FOR STORING, PACKING, AND DISTRIBUTING REAL FOOD

| Indicator | Description                                                                                                                                                                                                                                                                                                                                                                               |
|-----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.1       | Number of <b>cold storage</b> equipment units purchased.<br><i>Examples: All walk-in, stationary cooling unit, refrigerator, chest freezer, reach-in coolers.</i>                                                                                                                                                                                                                         |
| 1.2       | Number of <b>processing/repackaging</b> equipment units purchased or improved.<br><i>Examples: All pieces of a system, such as a bagger, filler, shipped in two or more pieces and installed together, or if an accessory is counted as one piece of equipment. If buying two accessories to an existing bagger filler, this still counts as an improvement to one (1) bagger/filler.</i> |
| 1.3       | Number of <b>cold storage distribution</b> vehicles purchased.<br><i>Examples: refrigerated vehicle, mobile cooling unit, trailers/mobile cooler/freezers and other such items.</i>                                                                                                                                                                                                       |
| 1.4       | <b>Cubic feet</b> of cold storage capacity added. <i>(Required to report on at least one of a, b, or c; ensure selection of all relevant to the subawards).</i>                                                                                                                                                                                                                           |
| 1.4a      | a. Cubic feet of stationary/fixed cold storage capacity added                                                                                                                                                                                                                                                                                                                             |
| 1.4b      | b. Cubic feet of delivery/mobile cold storage capacity added                                                                                                                                                                                                                                                                                                                              |
| 1.4c      | c. Cubic feet of flexible (storage and delivery) capacity added                                                                                                                                                                                                                                                                                                                           |

### OUTCOME 2: IMPROVED ACCESS TO AND UTILIZATION OF REAL FOOD SUPPLY

| Indicator | Description                                                                                                                                                                                                                         |
|-----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2.1       | Number of <b>additional participants</b> receiving fresh, frozen, and minimally processed foods (average individuals per month).                                                                                                    |
| 2.2       | Units <sup>1</sup> of <b>product distributed</b> as a result of additional capacity; includes increased amount/pounds by product type.                                                                                              |
| 2.3       | Number of <b>new sites/locations/access points established</b> for food distribution.<br><i>Examples: Stationary/established sites with new equipment, drive-throughs, mobile distribution and delivery pathways, food lockers.</i> |
| 2.4       | Number of <b>existing sites/locations/access points</b> that have <b>increased food distribution capacity</b> .                                                                                                                     |

<sup>1</sup>This metric will be agreed upon at time of notice of award.
