* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of December 15
- Calcium Chloride (CBe): Discuss 2018 sunset questions
- Ash from Manure Burning (CBe): Discuss petition
- Calcium Chloride annotation change (CBe): Petition sufficiency, need for TR?
- Contamination Issues in Farm Inputs (CBo/FT) - Discuss project
- Squid and Squid Byproducts (CBe) - Discuss TR if available
- Copper sulfate (ZS) - Discuss 2018 sunset questions
- Other items
- Adjourn

Discussion

- **Crops Subcommittee notes of December 15** approved with a change to the text regarding hypochlorous acid.
- **Calcium Chloride 208 sunset (CBe)**. The lead summarized the material, its uses, and previous reviews. The lead researched information from two Material Review Organizations (MROs) and noted that there are ~30 registered products containing calcium chloride. The draft review will be updated with some potential questions and will be finalized for posting for the April 2015 meeting.
- **Calcium Chloride annotation change (CBe)**. The group discussed the 2015 petition with respect to the 2005 petition, which was rejected by a previous Board because it failed to meet the OFPA criteria. Members discussed the difference(s) between the two petitions and whether or not there was any new information. The CS will revisit this on the next call.
- **Ash from Manure Burning (CBe)**: The lead summarized the changes made since the previous discussion, and the CS moved to a vote on this material.

Motion to annotate ash from manure burning (§205.602, nonsynthetic substances prohibited for use in organic crop production) with the following annotation: “except where the combustion reaction does not involve the use of synthetic additives and is controlled to separate and preserve nutrients.”

Motion by: CBe

Seconded by: CBo

Additional Discussion: none

Yes: 0 No: 5 Abstain: 0 Absent: 0 Recuse: 0

The motion failed, thus the Subcommittee supports retaining the existing prohibition of manure ash in organic crop production.

- **Contamination Issues in Farm Inputs (CBo/FT).** The CS discussed this project in light of the public comment from the last meeting, and the path forward. The lead feels there are emerging issues with regard to this and the CS should continue to work on this issue. A member noted that commenters mentioned contamination issues related to irrigation water, but pointed out that water is not restricted by the regulations as are other inputs, so although the NOSB could address this elsewhere, it is not germane to this document. The lead reviewer will co-lead this with one of the new NOSB members and will present this to the CS in March.
- **Squid and Squid Byproducts (CBe).** Deferred to Feb 2 call. Awaiting TR.
- **Copper sulfate - 2018 sunset (ZS).** The lead noted that this listing pertains to rice and control of tadpole shrimp and algae, and that it is used in a very specific and narrow range of conditions. She added that sodium carbonate peroxyhydrate was suggested as an alternative, but research found it was not successful. The CS will add a couple of questions for posting, hoping to glean comments from rice growers. The lead asked the NOP to add the link to the review of copper from last meeting.
- **Other items** - none.
- **The meeting was adjourned**

[Previous CS Notes](#)

Future Call Schedule (1st and 3rd Tuesdays 2:00 ET)

December 15, 2015

Ozone gas (FT): Discuss 2018 sunset questions

Calcium Chloride (CBe): Discuss 2018 sunset questions

Ash from Manure Burning (CBe): Discuss petition

Hypochlorous Acid (HA): TR sufficiency

Calcium Chloride annotation change (CBe): Petition sufficiency, need for TR

1-methylcyclopropene (1-MCP): Assign lead

January 5, 2016

Calcium Chloride (CBe): Discuss 2018 sunset questions

Ash from Manure Burning (CBe): Discuss petition

Calcium Chloride annotation change (CBe): Petition sufficiency, need for TR?

Discuss Contamination Issues in Farm Inputs (CBo/FT)

Squid and Squid Byproducts (CBe): Discuss TR if available

Copper sulfate (ZS): Discuss 2018 sunset questions

January 19, 2016. (CBe & ZS may miss call due to conflict with hydroponics task force).

Squid and Squid Byproducts (CBe): Discuss TR if available

Calcium Chloride annotation change (CBe): Petition sufficiency, need for TR.

Soy Wax (FT): Discuss proposal

Paracetic Acid (HA): Discuss 2018 sunset questions & TR if available

Hypochlorous Acid - discuss proposal

February 2, 2016

EPA List 3 - Inerts of Unknown Toxicity (ZS) - Discuss 2018 sunset questions & TR if available
Biodegradable Biobased Mulch. Review public comment/memo/original
Squid and Squid Byproducts (CBe)
1-methylcyclopropene (1-MCP) (ZS/HA)

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of January 5
- Soy Wax (FT): Discuss proposal
- Peracetic Acid (HA): Discuss 2018 sunset questions & TR if available
- Hypochlorous Acid (HA): Discuss proposal
- Other items
- Adjourn

Discussion

- **Crops Subcommittee notes of January 5** were approved with no changes.
- **Soy Wax (FT)**. The CS discussed the draft proposal that was circulated to the members prior to the call. The members discussed the possible inclusion of an annotation: "must be made from non-GMO soybeans." The lead noted that the petitioner has already addressed this in the petition i.e. that the soy wax is made with soy that was not genetically modified. Additionally, this restriction is implied in the organic regulations. Members discussed the need to add the language for emphasis, and chose to do so.

Motion to classify Soy Wax as petitioned as synthetic

Motion by: FT

Seconded by: CBo

Additional Discussion: none

Yes: 4 No: 0 Abstain: 0 Absent: 1 Recuse: 0

Motion to add Soy Wax as petitioned at §205.601(o). As production aids. Soy wax (CAS # 8016-70-4) - for use in log grown mushroom production. Must be made from non-GMO soybeans.

Motion by: FT

Seconded by: CBo

Additional Discussion: none

Yes: 4 No: 0 Abstain: 0 Absent: 1 Recuse: 0

- **Peracetic Acid (HA).** The group discussed the 2018 draft review while waiting for the TR, which is in development. The lead asked about a discrepancy in concentration amounts of peracetic acid (5% vs 6%) between the previous NOSB review and the final rule. The NOP indicated that it was a result of comments received during the proposed rule stage. The CS will revisit this topic on the next call, at which time the Technical Report should be back.
- **Hypochlorous Acid (HA):** The lead presented the material, its uses, and a brief summary of the previous public comment. Hypochlorous Acid (electrolyzed water) is used as an anti-microbial and is an alternative to several sanitizers, including chlorine. This material was petitioned for use for handling, crops and livestock, and all three Subcommittees are reviewing it. The lead noted that the Handling Subcommittee voted to add it to the National List. Additionally, the NOP issued a memo asking the NOSB to review this material and the process by which it is manufactured. The members discussed the sources and manufacturing process and are supportive of hypochlorous acid, as it reduces any potential human health and environmental concerns. The group discussed adding an annotation limiting production of hypochlorous acid to on-site only. The CS will postpone the vote until members can review the petition further, and align its proposal with that of the Handling and Livestock Subcommittees. The NOP added that if the NOSB intends to allow hypochlorous acid for plant disease control that the CS should keep in mind that the National List includes separate paragraphs for plant disease materials (§205.601(i)) and algicides/disinfectants/sanitizers (§205.601(a)). The NOP will consider the following before the next call and let the CS know: The need for an annotation; if an annotation is included could the CS then remove it at the Spring meeting without it being a substantive change; and the alignment of all 3 Subcommittee proposals.
- **Other items**

The meeting was adjourned

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of January 19
- Welcome to our new members, brief introductions
- Discuss potential April 19 webinar/Subcommittee meeting rescheduling
- Sunset 2018 first postings
 - Peracetic Acid (HA) - Discuss 2018 sunset questions & TR if available
 - EPA List 3 - Inerts of Unknown Toxicity (ZS) - attached
- Hypochlorous Acid (HA) - Discuss proposal and vote
- Nonyl Phenol Ethoxylates (NPEs). Discussion document for spring meeting.
- Biodegradable Biobased Mulch (ZS) - Review history and proposal, vote will be Feb.23.
- Calcium Chloride annotation change (CBe) - Petition sufficiency, need for TR.
- Squid and Squid Byproducts (CBe) - TR sufficiency
- 1-methylcyclopropene (1-MCP) (ZS/HA) - Petition sufficiency, need for TR (no document, just discussion)
- Update from Livestock subcommittee on status of Aluminum sulfate petition
- Marine Algae TR questions
- Other items
- Adjourn

Discussion

- **Crops Subcommittee notes of January 19** were approved with a minor clarification to the language under the discussion of soy wax. Regarding the availability of non-GMO soy wax. HB will research availability further.

- **Introductions and welcome to new members.**
- **Discuss potential April 19 webinar/Subcommittee meeting rescheduling.** The group decided the best approach would be to leave the conference calls on Tuesday, April 19 and to hold the public comment webinar on either Monday or Wednesday, April 18 or 20. The NOP will schedule the webinar accordingly.
- **Marine algae and Marine materials (marine algae and extracts).** The lead author indicated that there are nine materials on the National List that fall into this category. The Subcommittee is seeking clarification on the substances, and will include specific questions in the TR request. The HS will also focus on the broader areas of conservation and sustainability. The lead asked that members send comment to her and the HS chair by Friday, February 3.
- **Sunset 2018 first postings**
 - **Peracetic Acid (HA).** The lead summarized the review, and based on the conversation in Subcommittee, will make suggested edits and recirculate the document.
 - **EPA List 3 - Inerts of Unknown Toxicity (ZS).** The lead author presented the draft document for the members and discussed several specific materials on the list, including pheromones. The CS Chair asked that the NOP add the citation for the Oct 2015 recommendation.
- **Hypochlorous Acid (HA).** Hypochlorous acid is a petitioned material also being reviewed by the LS and HS, and the lead authors have worked together to align the proposals. The lead summarized the manufacture and use of the material and noted that the end product is found to be safer than some alternatives, and there are no by-products. The group discussed the possible inclusion of language regarding pH but after some discussion decided that it was not necessary. They also discussed an annotation regarding the on-site manufacture of hypochlorous acid, which the lead will revise and add. The CS held the vote to classify hypochlorous acid and will defer the motion to add until the next call.

Motion to classify hypochlorous acid as petitioned as synthetic

Motion by: HA

Seconded by: FT

Additional discussion: none

Yes: 7 No: 0 Abstain: 0 Absent: 0 Recuse: 0

- **Nonyl Phenol Ethoxylates (NPEs).** The lead summarized the history and previous review of these substances and discussed information from the TR regarding safety, for the benefit of the new members. The NOSB is collaborating with the EPA Safer Choice Program (SCP) on the List 4 Inerts and will proceed with a discussion document, and eventually a proposal, to remove NPE's from organic products. The CS is putting forth the discussion document to allow manufacturers enough time to reformulate.

Motion to accept the discussion document on NPEs

Motion by: ZS

Seconded by: HA

Additional discussion: The NOP suggested adding Chemical Abstracts Service (CAS) numbers. A member asked for some clarifying language for ease of reading.

Yes: 7 No: 0 Abstain: 0 Absent: 0 Recuse: 0

- **Biodegradable Biobased Mulch (ZS).** The lead author summarized the history of the petition, the subsequent NOSB proposal, and the NOP response to the NOSB recommendation. The NOP response memo (issued in January 2015) effectively rules out any products currently on the market from being used because no products qualify due to insufficient bio-based content. The group discussed several options for moving forward. The lead asked the members to review the documents so they can vote on the February 23 call.

The remainder of the agenda items were deferred to the next call in the interest of time.

- Calcium Chloride annotation change (CBe) - Petition sufficiency, need for TR.
- Squid and Squid Byproducts (CBe) - TR sufficiency
- 1-methylcyclopropene (1-MCP) (ZS/HA) - Petition sufficiency, need for TR (no document, just discussion)
- Update from Livestock Subcommittee on status of aluminum sulfate petition
- Other items
- The meeting was adjourned

[Previous CS Notes](#)

Future Call Schedule (1st and 3rd Tuesdays 2:00 ET)

January 19, 2016. (CBe & ZS may miss call due to conflict with hydroponics task force).

Squid and Squid Byproducts (CBe): Discuss TR if available

Calcium Chloride annotation change (CBe): Petition sufficiency, need for TR.

Soy Wax (FT): Discuss proposal

Peracetic Acid (HA): Discuss 2018 sunset questions & TR if available

Hypochlorous Acid (HA) - discuss proposal

February 2, 2016

Peracetic Acid (HA) - Discuss 2018 sunset questions & TR if available

Hypochlorous Acid (HA) - Discuss proposal and vote

EPA List 3 - Inerts of Unknown Toxicity (ZS) - Discuss 2018 sunset questions & TR if available

Biodegradable Biobased Mulch (ZS) - Review public comment/memo/original

Calcium Chloride annotation change (CBe) - Petition sufficiency, need for TR.

Squid and Squid Byproducts (CBe) - TR sufficiency

1-methylcyclopropene (1-MCP) (ZS/HA) - Petition sufficiency, need for TR.

February 16, 2016

Calcium Chloride annotation change (CBe) - Petition sufficiency, need for TR.

Squid and Squid Byproducts (CBe) - TR sufficiency

1-methylcyclopropene (1-MCP) (ZS/HA) - Petition sufficiency, need for TR (no document, just discussion)

Newspaper - annotation change	ZS				TBD
Research Priorities	All	NA	RPs due to MS Aug 2016		Fall 2016

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of February 2
- Hypochlorous acid (HA)
- Squid and Squid Byproducts (CBe) - TR sufficiency review
- Calcium Chloride annotation change (CBe) - Petition sufficiency, need for TR, completion date?
- Biodegradable biobased mulch (ZS) timeline for completion
- 1-methylcyclopropene (1-MCP) (ZS/HA) - Petition sufficiency, need for TR
- Aluminum sulfate petition update
- New Petition: Fatty Alcohols (octanol and decanol).
- Upcoming work agenda items
- Adjourn

Discussion

- **Crops Subcommittee notes of February 2** were approved with no changes
- **Hypochlorous acid (HA)**. The lead reviewed the proposal and noted that the HS removed the annotation from its proposal and re-voted. The CS will do the same so that all three proposals (HS, CS and LS) are aligned. The CS moved to a vote:

Motion to add **Hypochlorous acid** as petitioned at §205.601(c)(a) (2)chlorine materials.....(iv)

Motion by: HA

Seconded by: EO

Additional discussion: none

Yes: 7 No: 0 Abstain: 0 Absent: 0 Recuse: 0

- **Squid and squid byproducts (CBe)**. The TR was found sufficient. The lead summarized the material and its uses from the info in the petition and TR. The Crops subcommittee will proceed to a proposal for full Board consideration at the fall 2016 meeting.
- **Calcium chloride annotation change (CBe)**. The lead reviewer summarized the uses of calcium chloride. The petitioner is requesting removal of the annotation limiting use as a foliar spray for certain disorders. The CS compared the current petition to the previous petition for calcium chloride, and finds no new substantive information, therefore the Subcommittee is rejecting this proposal, and will not proceed with a review.
- **Biodegradable biobased mulch (ZS)**. The lead feels that in order to have the new members participate fully in this conversation, it would be best to defer this discussion and proposal until the fall 2016 meeting. HB will be the lead author. Members discussed the history of the proposal and subsequent NOP memo.
- **New Petition: Fatty Alcohols (octanol and decanol)**. JB volunteered to be the lead reviewer for this material. The first step is to determine petition sufficiency, and then decide whether or not to request a TR before moving to the proposal stage. Petition sufficiency and a request for a TR are due March 28.
- **1-methylcyclopropene (1-MCP) (ZS/HA)**. The CS Chair gave an overview of this substance, which is used to keep apples fresher in storage, and delays ripening after harvest. 1-MCP is synthetic and although the petition included confidential business information (CBI) the petitioners included the patent information.. The patent includes various manufacturing processes, all of which are clearly synthetic. The co-lead author noted that this material is used extensively in conventional apple storage, and that it does prevent rot/waste and extends the availability of stored fruit. The group discussed the appropriate section on the National List for this material, since it is a post-harvest use. The lead noted the lack of appropriate category of allowed synthetics in OFPA for this substance, a plant growth regulator. The members also discussed alpha-cyclodextrin, an additional substance mentioned in the petition and will discuss this further on the next call.
- **Aluminum sulfate - Update from Livestock Subcommittee**. Aluminum Sulfate will be on the agenda for the fall 2016 meeting, and the LS is awaiting a TR for litter amendments.
- **Upcoming work agenda items**. The CS Chair asked that members submit ideas for new work agenda items so they can discuss them during the March 1 call so they can be discussed on the March 11 Exec call.
- **Other items** - none
- **The meeting was adjourned**

Agenda

- Approve Crops Subcommittee notes of February 16
- Squid and Squid Byproducts (CBe). Discuss proposal/vote
- Discuss potential work agenda items
- 1-methylcyclopropene (1-MCP) (ZS/HA). Petition sufficiency, need for TR
- Fatty Alcohols (octanol/decanol mix). Petition sufficiency
- Adjourn

Discussion

- **Approval of Crops Subcommittee notes** of February 16 were deferred to next call due to lack of quorum.
- **Squid and Squid Byproducts (CBe)**. The lead summarized the petition and the uses for this material. Members discussed the proposal via email prior to the call as well as during the call. One member had questions about whether or not squid required a separate listing or could be added to the current listing for liquid fish products. NOP suggested proposing it as a stand-alone item, then NOP will determine the best regulatory placement. A member expressed concerns about overfishing, although the TR indicates that this material is a byproduct and therefore its addition will not incentivize overfishing. The members discussed the fact that the FDA definition lists squid as a "fish product" although squid are actually mollusks. For clarity, the Subcommittee feels squid should be identified separately. The CS opened the vote, and will hold it open until close-of-business Wednesday for email voting by absent members. **ABS Note:** the vote below reflects the votes from the entire Subcommittee, tallied after email voting closed.

Motion to classify squid & squid byproducts as synthetic

Motion by: CBe

Seconded by: ZS

Yes: 6 No: 0 Abstain: 0 Absent: 1 Recuse: 0

Motion to list squid & squid byproducts at §205.601(j) of the National List with the following annotation: Can be pH adjusted with sulfuric, citric or phosphoric acid. The amount of acid used shall not exceed the minimum needed to lower the pH to 3.5.

Motion by: CBe

Seconded by: ZS

Yes: 6 No: 0 Abstain: 0 Absent: 1 Recuse: 0

- **Work agenda items.** The Crops Chair circulated a draft document suggesting a new work agenda topic: Strengthening the Organic Seed Guidance. The CS feels that the NOP guidance regarding commercial availability of organic seed issued in March 2013 needs strengthening. Crops would like to reevaluate the progress from the last 5 years, and will submit a request to the Executive Committee and then to the NOP to add it to its work agenda. The Chair will discuss this topic on the Executive call on March 11.
- **1-methylcyclopropene (1-MCP) (ZS/HA).** Deferred to next call
- **Fatty Alcohols (octanol/decanol mix).** Deferred to next call

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of February 16 and March 1
- 1-methylcyclopropene (1-MCP) (ZS/HA). Petition sufficiency, need for TR
- Fatty Alcohols (octanol/decanol mix) (JB). Petition sufficiency
- Contamination Issues in farm inputs (FT/HB)
- Squid follow up
- Peracetic acid - TR sufficiency
- Adjourn

Discussion

- **Crops Subcommittee notes of February 16** were approved with no changes.
- **Crops Subcommittee notes of March 1** were approved with no changes.
- **1-methylcyclopropene (1-MCP) (ZS/HA)**. The CS discussed 1-MCP previously, and the lead summarized the material and its uses again for the group. 1-MCP is a plant growth regulator that works as an ethylene inhibitor. The petitioned use is post-harvest, where it prolongs storage and firmness. It is complexed with alpha cyclodextrin (claimed to be a natural sugar) for stabilization. The sugar is sourced from a fermentation process, however the patent indicates that it is synthetic but doesn't talk about the fermentation process. The group discussed asking the petitioner for additional information regarding classification, and the possibility of seeking a technical report (TR). The lead reviewer indicated that 1-MCP is a synthetic chemical and does not see a need for a TR, but the CS will seek further information and clarification from the petitioner regarding the fermentation process. The group also discussed the location on the National List for such a listing. One member note support of this material as it would benefit smaller growers.
- **Fatty Alcohols (octanol/decanol mix) (JB)**. Fatty alcohols are being petitioned for use as sucker control on organic crops. The CS found the petition sufficient and the CS Chair suggested a TR request since this

is a new material. The group discussed the idea of reviewing the two materials (1-octanol and 1-decanol) separately since it is a blend, although the EPA considers the blend, and not the individual materials, an active pesticide ingredient. The CS Chair will compile a list of questions for the TR including a request for information about each of the individual materials.

- **Contamination Issues in farm inputs (FT/HB).** Deferred to April 5
- **Squid & Squid byproducts proposal.** The Chair asked for any follow-up questions or conversation, since some members missed the last meeting. One member asked for clarification whether squid can be considered a fish product (since an FDA definition includes molluscs as fish products) NOP clarified that the FDA definition as human food is not relevant for fertilizer use, and advised it will be better to specifically clarify whether stabilized squid products can be allowed as fertilizer.
- **Peracetic acid.** The TR was found sufficient and the Chair will notify the NOP of this determination.
- The meeting was adjourned

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of March 15
- Assign lead for two new petitioned substances: Ammonium citrate and Ammonium glycinate
- Update on 1-MCP new information from petitioner
- Contamination Issues in farm inputs (FT/HB)
- Adjourn

Discussion

- **Crops Subcommittee notes of March 15** were approved with no changes.
- **Two new petitioned substances: Ammonium citrate and Ammonium glycinate** were submitted by the same petitioner. A member noted that the wording in both was nearly identically except for the chemical name. Emily Oakley offered to take the lead for these reviews. The group will determine

petition sufficiency and need for a TR on the May 17 call. The CS Chair clarified for the new members how to determine the need for a TR.

- **1-MCP (ZS/HA).** The CS received the additional information it requested from the petitioner regarding the fermentation process. The CS feels a TR is not necessary. The lead will write the proposal using the new materials' review template form, and the Subcommittee will discuss it on May 17.
- **Contamination Issues in farm inputs (FT/HB).** The Co-leads summarized the draft document they circulated to the CS to review. The group discussed various components of the review such as categories, thresholds, testing and water/flooding. The members agreed that topics related to water and irrigation should be a separate work agenda item. The Crops Chair made some suggestions for next steps and asked that the leads develop some ideas for a workplan to be included in the document for discussion after the spring meeting.
- **Other items** - none
- The meeting was adjourned.

Agenda

- Approve Crops Subcommittee notes of April 5
- Review Public Comment & discuss presentations
- Preliminary discussion of research priorities.
- Adjourn

Discussion

- **Crops Subcommittee notes of April 5** approved with no changes.
- **Public comment**
 - **Peracetic Acid (2018 sunset):** The NOP clarified some information regarding uses of peracetic acid. The TR included information about FDA approved sanitizing solutions, a number of which contain peracetic acid and other chemicals. This does not impact the NOSB review, as they are reviewing peracetic as a single substance, and there is no restriction on manufacture or source.

- **Hypochlorous acid:** Commenters have raised concerns about sources, although the Board focus is on electrolyzed water. The NOP supports the addition of “as petitioned” to the proposal to clarify. The CS discussed adding the phrase “hypochlorous acid from electrolyzed water as petitioned.” The NOSB will discuss this at the meeting prior to voting. A member noted that according to Robert’s Rules the motion should be made, then amended, then voted upon.
- **Petitioned Items:**
 - **Squid and squid byproducts.** A few commenters noted the language about squid byproducts, as opposed to squid and squid byproducts. The lead suggested changing the motion to remove the word squid and leave in only squid byproducts.
 - **Copper sulfate for rice.** The petition was specifically for copper for rice. The NOSB received some comments from rice growers, but not much information regarding alternatives. Some comments discussed copper sulfate for other uses, which is not relevant to this review.
 - **Nutrient Vitamins and Minerals (NVM).** The Lead reached out to stakeholders to let them know that the Board is discussing the implementation timeline, and the CS will clarify the timeline at the NOSB meeting.
 - **Soy wax.** The CS received two comments - both in support of listing soy wax.
- **Research priorities (RPs).** The group had a brief discussion, and the CS Chair suggested that members keep the Research Priorities in mind during the NOSB meeting to potentially identify future work agenda topics. The CS will review the previous lists to determine which ones are completed and/or still relevant. The new priorities will be summarized and shortened so the funding agencies find it more useful.
- **Other items.**
 - **Biodegradable Biobased mulch.** The lead asked for some additional information about next steps for this topic. The CS Chair suggested reviewing the memo that NOP sent to Crops outlining three options for going forward. Members will discuss this further after the spring meeting.
- The meeting was adjourned.

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of April 18
- Ammonium citrate and ammonium glycinate (EO). Petition suff/need for TR
- Anaerobic Digestate (ZS) - Petition sufficiency
- Work agenda scheduling
- Adjourn

Discussion

- **Crops Subcommittee notes of April 18** approved with no changes
- **April 2016 meeting recap.** A member suggested that based on previous discussion and public comment, the NOSB should undertake a comprehensive review of sanitizers. The Crops Chair recommended delaying this project until the new sunset reorganization proposal is approved, so they can determine which materials will be reviewed when. Members also expressed support that the Handling Subcommittee take the lead for this project, since most of the sanitizers are listed under handling.
- **Ammonium citrate and ammonium glycinate (EO).** The lead noted that the two petitions are nearly identical, and both substances are being petitioned for use as chelating agents for fertilizers. The CS Chair asked if the petition included justification for why Ammonium citrate and Ammonium glycinate would be better/preferred over what is already on the list, such as lignin sulfonate. The lead noted that the petition did not include much information about why these are necessary. The group discussed whether or not to return the petition to the petitioner for justification, or whether to request a TR, and chose the former. The CS will include specific questions for the petitioner as to why the current chelating agents are not sufficient and will re-evaluate for sufficiency when it is returned.

- **Anaerobic digestate (ZS).** Anaerobic digestate was previously petitioned (and subsequently withdrawn) but the new petition presents a different process and is asking for removal of the waiting period for manure-based anaerobic digestate (90-120 days). Currently the petition is still under review for eligibility. Members discussed the lack of information in the petition regarding nutrient content and fate and will discuss this further. Additionally, at a future date, they will consider the NOP memo on treated manure that was recently issued. With regard to the current petition on anaerobic digestate, the lead offered to develop questions for the petitioner.
- **Work agenda scheduling.** The Crops Subcommittee scheduled discussion times for work agenda items (see table above) and added a call on August 30 in case more time is needed.
- **Biodegradable biobased mulch (HB).** The group discussed the history of the NOSB recommendation for biodegradable biobased mulch, and the subsequent memo issued by the NOP. The lead noted that the NOSB recommendation took into consideration the biobased content amount, and the NOSB was aware that the product would not be 100% bio-based. A Subcommittee member feels that this component of the recommendation was misinterpreted by the NOP. A new NOSB member will be addressing this work agenda item, and was urged to review the background document that was circulated several months ago that included three options for moving forward.
- **Prohibition of NPEs in inerts annotation change.** The proposed rule implementing the NOSB 2015 recommendation on inerts is likely to be released in 2017, and since her term is ending in January 2017, the lead would like to transition this project to another NOSB member. Additionally, she asked for volunteers for the inerts working group to aid in transition at the end of both current members' term. JB volunteered.
- **Hydroponics Task Force report.** The NOP indicated that the Task Force may complete its report to the Crops Subcommittee by mid-to-late June. Once Crops receives the report, the lead will develop a proposal. Going forth, the group will discuss options and conduct a straw poll to get a sense of the Subcommittee.
- The CS added an extra call on August 30
- The meeting was adjourned.

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of May 17
- Work agenda discussions and scheduling
- Research Priorities for Crops

- Assign sunset 2019 items to leads for determining TR requests
- List 3 inerts (ZS) - discuss and vote
- Adjourn

Discussion

- **Crops Subcommittee notes of May 17** were approved with a minor change under the biodegradable biobased mulch section.
- **Work agenda discussions and scheduling.**
 - **Hydroponics.** The group discussed the timeline and how to structure the subsequent proposal. The hydroponics task force has asked for an extension to submit the report and would like to submit it July 1. Members discussed how to go forth in light of the timeline and feel that if they get the report by July 1, they would have time to develop a proposal for the fall meeting. The group discussed the path forward.
 - **NOP Guidance on Seed and Planting Stock NOP 5029.** The goal of this project is to provide a recommendation to strengthen and clarify the requirements for use of organic seed when commercially available. The Crops Subcommittee will submit a request to Executive team for a guest speaker and would like to invite the Director of Advocacy & Communications at the Organic Seed Alliance to speak at the fall meeting.
- **Research Priorities.** The group discussed the items on the draft research priorities document that was circulated by the lead. Some items are still pertinent and critical, while others were determined to be too broad and in need of modification or clarification. The list will be re-prioritized and discussed further on next call. The CS Chair asked that members bring any new topics to the next Crops call.
- **2019 Sunset Materials.** Members volunteered to lead the 2019 sunset materials requests (see table above) and will determine the need for TRs on June 21.
- **List 3 Inerts (ZS).** The group discussed the draft proposal and proceeded to a vote.

Motion to remove EPA List 3 -Inerts of unknown toxicity - for use only in passive pheromone dispensers, from 205.601(m)

Motion by: ZS

Seconded by: FT

Additional discussion: none

Yes: 0 No: 7 Abstain: 0 Absent: 0 Recuse: 0

- The meeting was adjourned.

Future Call Schedule (1st and 3rd Tuesdays 2:00 ET)

May 17, 2016

Ammonium citrate and Ammonium glycinate (EO). Petition suff/need for TR 1-MCP (ZS/HA). Discuss proposal

June 7, 2016

Research Priorities (All)

EPA List 3 inerts (ZS) - discuss and vote

June 21, 2016

Sunset 2019 TR determinations

Soy Wax (FT) – petitioned material. Discuss and vote

2018 sunset: Ozone Gas (FT) - discuss and vote

2018 sunset: Peracetic acid (HA) - discuss and vote

2018 sunset: Calcium chloride (CBe) - discuss and vote

2018 sunset: Copper sulfate (ZS) - discuss and vote

July 5, 2016

- 1-MCP (ZS/HA) - discuss and vote
- Anaerobic Digestate (ZS) - discuss
- Hydroponics task force report - Preliminary discussion of report

July 19, 2016

- Hydroponics task force report – Discussion report and proposal
- Aluminum sulfate (JR)
- Biodegradable Biobased Mulch (HB)

August 2, 2016

- Marine materials (marine algae and extracts)
- Newspaper annotation change
- Strengthening seed guidance.

Lead salts 205.602(d)	FT	N		Jun 21	
Tobacco dust (nicotine sulfate) 205.602(i)	HB	N		Jun 21	

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of June 7
- Sunset 2019 TR determinations
- Research Priorities - Continue prioritization and be prepared with any additional ones.

- Soy Wax (FT) - petitioned material. Discuss and vote
- 2018 sunset: Ozone Gas (FT) - discuss and vote
- 2018 sunset: Peracetic acid (HA) - discuss and vote
- 2018 sunset: Calcium chloride (CBe) - discuss and vote
- 2018 sunset: Copper sulfate (ZS) - discuss and vote
- Adjourn

Discussion

- **Crops Subcommittee notes of June 7** were approved with no changes
- **Sunset 2019 TR determinations.** The group discussed the need for TRs for the 2019 sunset materials. See table above and discussion below
 - **Biodegradable mulch (HB).** Members supported the need for a limited scope TR with targeted questions. The lead asked for feedback from the members and will report back on a future call.
 - **Boric acid (HB).** Although the TR is old, the lead feels that a new TR would have limited usefulness.
 - **Sticky traps/barriers.** The TAP review is from 1995, however, the group agreed this is a relatively benign material and a TR is not needed.
 - **Copper sulfate, Coppers, fixed (ZS).** These materials are included in the Research Priorities, and therefore the group feels a TR is not needed.
 - **Humic acids (CBe).** There is a 1996 TAP and a 2006 TR on file, as well as a 2012 TR for oxidized lignite, which addressed other humic acid derivatives. The lead noted, via the CS Chair, that a TR likely would not provide new information, however, it could provide updated information regarding international regulations and potential environmental contamination from manufacture, use, misuse or disposal, if applicable. The CS will not request a new TR. The NOP will cross-reference the oxidized lignite TR on the Petitioned Substance Database.
 - **Lead salts** are currently prohibited and the lead feels no TR is necessary.
 - **Tobacco dust** is currently prohibited and the lead feels no TR is necessary.
- **Research Priorities.** The members discussed the list of research priorities and will continue to prioritize the existing ones and discuss any additional topics. In an effort to make the list more concise, the items will be divided into two groups: higher priority and lower priority. The group also discussed the criteria for determining what belongs on the research priorities list.
- **Soy Wax (FT).** The CS briefly discussed the draft proposal and will discuss it further and potentially vote on the next call.
- **2018 sunset: Ozone Gas (FT).** The lead briefly summarized ozone, which is currently allowed as an irrigation system cleaner; the substance was unanimously relisted twice before.

Motion to remove ozone gas from the National List at §205.601(a)

Motion by: FT

Seconded by: HA

Additional discussion: none

Yes: 0 No: 4 Abstain: 1 Absent: 2 Recuse: 0

- **2018 sunset: Peracetic acid (HA).** The lead summarized the material and its uses, and noted a 2011 recommendation to annotate as well as a recently received TR. The CS proceeded to a vote. The lead author will forward the proposal to the CS Chair for submission to the NOP.

Motion to remove peracetic acid from the National List at §205.604(a) and 205.604(i)

Motion by: HA

Seconded by: EO

Additional discussion: none

Yes: 0 No: 5 Abstain: 0 Absent: 2 Recuse: 0

- The Chair informed the members that the Hydroponics Task Force was granted an extension to submit its report. The final report will be due to the Crops Subcommittee in mid-July, therefore the Subcommittee discussion will be moved to the July 19 call.
- **2018 sunset: Calcium chloride (CBe).** Deferred to next call
- **2018 sunset: Copper sulfate (ZS).** Deferred to next call
- **The meeting was adjourned.**

Agenda

- Approve Crops Subcommittee notes of June 21
- Research Priorities
- Biodegradable Biobased mulch (HB)
- Potassium cellulose glycolate (Potassium CMC) petition - assign lead
- Polyoxin D Zinc salt - assign lead
- Ammonium citrate and ammonium glycinate (EO) - schedule petition supplement sufficiency
- Anaerobic Digestate (ZS).
- Soy Wax (FT) - discuss and vote
- 2018 sunset: Calcium chloride (CBe) - discuss and vote.
- 2018 sunset: Copper sulfate (ZS) - discuss and vote.
- 1-MCP (ZS/HA).
- Adjourn.

Discussion

- **Crops Subcommittee notes** of June 21 were approved with no changes
- **Research Priorities.** The group discussed the research priorities draft document, specifically the biodegradable biobased mulch topic.
- **Biodegradable biobased mulch (HB).** The members briefly discussed the research priority topic on Biodegradable biobased mulch. The CS Chair suggested composing targeted questions for a limited scope TR request, which will be submitted to the NOP after the next Crops call.
- **Potassium cellulose glycolate (Potassium CMC) petition.** EO volunteered to be the lead reviewer for this material. Potassium cellulose glycolate is used in conjunction with fertilizers as a water absorbing agent. There was some question among the Subcommittee members as to its use in crop production. Members will discuss petition sufficiency on the next call.
- **Polyoxin D Zinc salt.** Re-petitioned material. JB volunteered to lead this, with assistance from HA who was the previous lead. The CS will discuss petition sufficiency on the August 2 call.
- **Ammonium citrate and ammonium glycinate (EO).** The lead provided some background information regarding the definition of chelate vs. chelating agents and the group discussed necessity and alternatives. The petitions were found sufficient and the group will move to a discussion and vote on the August 2 call.
- **Anaerobic Digestate (ZS).** The lead summarized the draft document and the members discussed the potential questions to include in the TR request. The TR request will be sent to the NOP
- **Soy Wax (FT).** The members discussed language for the proposal regarding non-GMO soybeans and commercial availability. A member noted that the clause regarding (excluded methods?) does not apply to §205.601, so it would be helpful to be explicit here. FT will add some language and resend it to the group for review.

Motion to classify soy wax as petitioned as synthetic

Motion by: FT

Seconded by: HA

Additional discussion: none

Yes: 7 No: 0 Abstain: 0 Absent: 0 Recuse: 0

Motion to add soy wax at §205.601(o) as production aids. Soy wax (CAS # 8016-70-4) - for use in log

grown mushroom production. Must be made from non-GMO soybeans if soy wax from organic soybeans is not commercially available.

Motion by: FT

Seconded by: EO

Additional discussion: none

Yes: 7 No: 0 Abstain: 0 Absent: 0 Recuse: 0

- **2018 sunset: Calcium chloride (CBe).** Calcium chloride is a non-synthetic substance prohibited for use in organic crop production. There is no new information and while there was not much public comment during the first posting in Spring 2016, commenters were in favor of its continued prohibition.

Motion to remove calcium chloride at §205.602

Motion by: CBe

Seconded by: HA

Additional discussion: A member noted that this material is used extensively on apples and cherries in the Pacific Northwest. Another member noted that she uses it extensively in California on heirloom varieties of apples. .

Yes: 0 No: 7 Abstain: 0 Absent: 0 Recuse: 0

- **2018 sunset: Copper sulfate (ZS).** Copper sulfate is used for two different orders of pests. The lead noted that while it is a common material, it is arcane, and the pests are not common. Copper is on the Crops list of research priorities, and there is new research on alternatives.

Motion to remove copper sulfate from §205.601(i) based on OFPA criteria of essentiality

Motion by: ZS

Seconded by: HA

Additional discussion: none

Yes: 0 No: 7 Abstain: 0 Absent: 0 Recuse: 0

- **1-MCP (ZS/HA).** Used to slow ripening and retard spoilage in post-harvest storage. The lead indicated that 1-MCP does not satisfy criteria 3: compatibility and alternatives. Although there is no direct material that is an alternative, there are broader alternative practices, and therefore feels this material is not necessary. The lead added that it is synthetic, and not exempt from having to be listed for post-harvest use. Another member added that it is used in conventional products, and although it's used post-harvest, there is no detectable residue.

Motion to classify 1-MCP as petitioned as synthetic

Motion by: ZS

Seconded by: EO

Additional discussion: none

Yes: 7 No: 0 Abstain: 0 Absent: 0 Recuse: 0

Motion to add 1-MCP as petitioned at §205.601

Motion by: ZS

Seconded by: HA

Additional discussion: none

Yes: 0 No: 7 Abstain: 0 Absent: 0 Recuse: 0

- **The meeting was adjourned**

Future Call Schedule (1st and 3rd Tuesdays 2:00 ET)

June 21, 2016

Sunset 2019 TR determinations
Soy Wax (FT) - petitioned material. Discuss and vote
2018 sunset: Ozone Gas (FT) - discuss and vote
2018 sunset: Peracetic acid (HA) - discuss and vote
2018 sunset: Calcium chloride (CBe) - discuss and vote
2018 sunset: Copper sulfate (ZS) - discuss and vote

July 5, 2016

Soy Wax (FT) - discuss proposal and vote
2018 sunset: Calcium chloride (CBe) - discuss and vote
2018 sunset: Copper sulfate (ZS) - discuss and vote
1-MCP (ZS/HA) - discuss and vote
Anaerobic Digestate (ZS) - discuss
Hydroponics task force report - preliminary discussion of report – deferred. No report available
Polyoxin D Zinc salt - assign lead

July 19, 2016

Hydroponics task force report - Discuss report and proposal
Aluminum sulfate (FT) - Discuss proposal
Biodegradable Biobased Mulch (HB) - Discuss draft discussion document and TR questions
Potassium cellulose glycolate (EO) - Petition sufficiency.

August 2, 2016

Marine materials (marine algae and extracts) - TR in development
Newspaper annotation change. Waiting for TR
Strengthening seed guidance - Discuss draft discussion document
Polyoxin D Zinc salt. Petition sufficiency
Ammonium citrate and glycinate (EO) - Petition sufficiency.

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of July 5
- Aluminum sulfate (FT) - Discuss proposal
- Biodegradable Biobased Mulch (HB) - Discuss draft discussion document and TR questions
- Potassium cellulose glycolate (EO) - Petition sufficiency
- Hydroponics task force report - Discuss report and proposal
- Allyl Isothiocyanate (AITC) Petition - Assign lead
- Check-in on future call schedule topics
- Adjourn

Discussion

- **Crops Subcommittee notes** of July 5 were approved with minor changes under Biodegradable Biobased Mulch.
- **Aluminum sulfate (FT).** The lead circulated a draft document and noted that the Livestock Subcommittee (LS) also reviewed this material and voted to not add it. In livestock, aluminum sulfate is used as a poultry litter amendment used to reduce ammonia. The LS found there was a non-synthetic alternative. For crops, aluminum sulfate has been petitioned to allow application of manure that has been treated with aluminum sulfate. Members discussed the role of the substance in mitigating soil phosphorous levels, as described by the petition. The CS proceeded to a vote.

Motion to classify aluminum sulfate as petitioned as synthetic

Motion by: FT

Seconded by: HB

Additional discussion:

Yes: 6 No: 0 Abstain: 0 Absent: 1 Recuse: 0

Motion to add aluminum sulfate as petitioned at §205.601.

Motion by: FT

Seconded by: HB

Additional discussion:

Yes: 0 No: 6 Abstain: 0 Absent: 1 Recuse: 0

- **Biodegradable biobased mulch (HB).** The group discussed the difference between the document that was written for the Research Priorities and the limited scope TR request. Members discussed a draft list of questions for the TR and will recirculate these via email before submitting the request to the NOP.
- **Potassium cellulose glycolate (EO).** The lead summarized the material's manufacture and use. The CS found the petition sufficient and determined a TR is unnecessary. The lead will draft a proposal for discussion on the August 16 call. Potassium cellulose glycolate is used for water retention, and the petitioner noted benefits of recovering and conserving dripped water.
- **Hydroponics Task Force report** has not been received by the Crops Subcommittee. The CS noted that time will be limited to develop a proposal by the fall meeting. CS will consider how to proceed once they receive the report.
- **Allyl isothiocyanate (AITC) petition (2016).** JB volunteered to be lead author on this substance. Allyl isothiocyanate (AITC) was originally petitioned as a fumigant in 2013 and was subsequently withdrawn by the petitioner. This substance is a synthetic version of mustard seed meal, and it is being petitioned for use as a nematicide and fungicide. A member asked about the use of a synthetic in light of the fact that a natural nonsynthetic alternative exists. The petitioner has claimed there is an inadequate supply of the nonsynthetic form.
- **Future call schedule.**
 - **Contamination issues in farm inputs.** Postponed to a future meeting.
 - The CS has requested to have a **speaker from the Seed Alliance at the fall NOSB meeting** and is awaiting NOP approval.
 - **Inerts update at fall meeting.** The Chair asked for an update from the Inerts working group ingredients (National List) and whether NOP or a member of the Safer Choice program (SCIL) could deliver an update at the fall meeting. The NOP will discuss this and report back to the CS Chair.
- **The meeting was adjourned**

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of July 19
- Revisit Soy Wax Annotation:
- Polyoxin D Zinc salt (JB) - Petition sufficiency
- Ammonium citrate and glycinate (EO) - discuss issues, please read addition to petition
- New Petition for Sodium citrate (email from Lisa B. on July 27) - assign lead and schedule
- Strengthening Organic Seed Guidance (ZS) - draft will be sent by end of weekend.
- Adjourn

Discussion

- **Crops Subcommittee notes** of July 19 approved with one correction to the vote for aluminum sulfate.
- **Soy Wax Annotation (FT)**. The NOP suggested that the CS find an alternative to the term “non-GMO” in the proposed annotation. The lead suggested new language, and the group proceeded to a vote to amend the language.

Motion to amend the annotation for soy wax as follows: Must be made from soybeans grown without the use of excluded methods if soy wax from organic soybeans is not commercially available.

Motion by: FT

Seconded by: HA

Additional discussion: none

Yes: 7 No: 0 Abstain: 0 Absent: 0 Recuse: 0

- **Polyoxin D Zinc salt (JB)**. Petition sufficiency deferred to next call.

- **Ammonium citrate and glycinate (EO).** The lead summarized the substances based on the information provided in the petition, and the unsolicited addendum sent by the petitioner. The petitioner feels that the definition on the National List (NL) for chelating agents is incorrect. A member noted that the definition is in the materials guidance and not on the NL. The members discussed the chemistry of chelating agents and the role of acids and bases. The NOP acknowledged that the substances could be incorporated into the existing listing for micronutrients on the NL rather than under their own and separate listings. The lead will continue to work on the proposal, with assistance from other Subcommittee members and the CS will discuss it on the next call.
- **Sodium citrate petition.** Members discussed the uses indicated in the petition. HB volunteered to lead this project, and will discuss petition sufficiency on a future call,
- **Strengthening Organic Seed Guidance discussion document (ZS).** The lead forwarded a link to the latest Organic Seed Alliance seed guidance document to the group, as well as the draft discussion document, and asked for feedback. She noted that the questions for the discussion document are not flushed out yet and asked for suggestions. The Subcommittee will discuss it further on the next call.
- **Additional items.** The current CS Chair noted that after the fall meeting, the Subcommittee Chairs will be rotating off, and suggested that people consider taking on that role.
- **The meeting was adjourned**

Future Call Schedule (1st and 3rd Tuesdays 2:00 ET)

July 19, 2016

Aluminum sulfate (FT) - Discuss proposal

Biodegradable Biobased Mulch (HB) - Discuss draft discussion document and TR questions

Potassium cellulose glycolate (EO) - Petition sufficiency.

Allyl Isothiocyanate (AITC) Petition (2016) - assign lead?

August 2, 2016

Strengthening seed guidance - Discuss draft discussion document

Polyoxin D Zinc salt - Petition sufficiency

Ammonium citrate and glycinate (EO) - Discuss petition & addendum

August 16, 2016

Polyoxin D Zinc salt - Petition sufficiency

Hydroponics task force report - Discuss report and proposal

Potassium cellulose glycolate (EO) - discuss proposal

Ammonium citrate and glycinate (EO) - Discuss proposal

August 30, 2016 additional call

September 6, 2016

Sodium citrate (HB) Petition sufficiency

Marine materials (marine algae and extracts) - TR in development

September 20, 2016

October 4, 2016

October 18, 2016

November 1, 2016

November 15, 2016 - cancelled

December 6, 2016

December 20, 2016

Fall 2016 Milestones	Target dates (tentative)
NOP - Publish FRN, Open public comment	Aug 1, 2016

NOP - Complete fall 2016 NOSB meeting tentative agenda	Sep 8, 2016
NOSB - Fall 2016 proposals due to NOP	Sep 14, 2016
NOP - Post proposals	On or before Sep 27, 2016
Discuss work agendas on ES call	Oct 14, 2016
Public comment closes	Oct 26, 2016
NOP - Send compiled public comments to NOSB	Nov 2, 2016
Public comment webinar	Nov 3, 2016
Work agendas finalized on ES call (last call before fall meeting)	Nov 4, 2016
Fall 2016 NOSB meeting - St Louis, MO	Nov 16-18, 2016

Note: Subcommittee notes may include preliminary discussions regarding substances considered for addition to or removal from the National List. They do not represent official National Organic Program (NOP) policy or regulations. Please see the NOP website for official NOP policy, regulations, and status of substances used in organic production and handling.

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of August 2
- Polyoxin D zinc salt - Petition sufficiency
- Hydroponics task force report - Discuss report and proposal
- Potassium cellulose glycolate (EO) - Discuss proposal
- Ammonium citrate and glycinate (EO) - Discuss proposal
- Strengthening the Organic Seed Guidance
- Adjourn

Discussion

- **Crops Subcommittee notes of August 2** were approved with no changes.
- **Polyoxin D zinc salt.** The lead summarized the petition and uses of Polyoxin D zinc salt. The group discussed the difference between the current petition and the 2012 petition for the same material. The new petition requests a different use pattern than the original, and there is new data in the new petition, including a response to 17 points from the previous review. The petition was found sufficient and the group discussed the potential need for a limited scope TR to answer some lingering questions. A member noted that in addition to the 2012 TR, there were two petition addendums that could answer some of the questions. For the sake of the new NOSB members, the Chair reminded the group that because this is a re-petitioned substance, it is given lower priority, and does not have to be

completed immediately. The lead reviewer will write a list of questions for a limited scope TR for discussion on next call.

- **Hydroponics task force report.** The lead summarized the Task Force report and the subsequent draft documents she prepared. Due to the complexity of the topic and the report, the lead author proposed a multi-part document: One part addressing the core issues of how bioaponics (liquid based culture methods) fits into OFPA and the current USDA Regulations; one part (a discussion document) on container systems and methods; and one part on which bioaponic systems satisfy the rule and which do not. A key issue is whether the current Board agrees with the 2010 NOSB recommendation that found that "... systems of crop production that eliminate soil from the system, such as hydroponics or aeroponics, cannot be considered as examples of acceptable organic farming practices." Members discussed the draft document and made modifications to some of the language, including the motion. The Crops Subcommittee feels that due to the complex nature of the report and the topic, this may not be concluded at the fall meeting. The lead asked for feedback (via email) about the definitions, and noted that the section on "gaps and grey areas" needs to be flushed out. The group discussed the path forward and discussed the merits of bringing forth a proposal(s) versus discussion documents. Several members noted that a discussion document would allow them to glean more comments from stakeholders before the NOSB had to vote on the document. The CS discussed the option of bringing the proposal back to Subcommittee at the fall meeting, if public comment and discussion indicates that it is not ready for a vote.
- **Potassium cellulose glycolate (EO) - deferred to next call.**
- **Ammonium citrate and glycinate (EO) - deferred to next call.**
- **Strengthening the organic seed guidance - deferred to next call**
- **The meeting was adjourned**

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of August 16
- Hydroponics task force report: Discuss proposal/discussion doc
- Potassium cellulose glycolate (EO): Discuss proposal
- Ammonium citrate and glycinate (EO): Discuss proposal
- Strengthening seed guidance: Discuss draft discussion document
- Polyoxin D: Discuss questions for potential limited scope TR request
- Adjourn

Discussion

- **Crops Subcommittee notes of August 16** were approved with a couple minor grammatical changes.
- **Hydroponics task force report.** Since the last meeting, members participated in a poll and voted on whether hydroponics are compatible with the organic regulation. The subcommittee discussed the results of that poll and the lead summarized the incorporated changes since the last call to the draft document she prepared. Due to the complexity of the topic and the report, the lead author proposed a multi-part document: One part addressing the core issues of how bioaponics (liquid based culture methods) fits into OFPA and the current USDA Regulations; one part (a discussion document) on container systems and methods; and one part on which bioponic systems satisfy the rule and which do not. Members discussed the draft document and made modifications to some of the language, including grammatical corrections, the 2010 NOSB recommendation, and the definition of hydroponics.

Discussion was also had on bioponic systems, growing media, and how nutrients are delivered to the plant. The lead indicated that the Canadians are also working on this issue as well. The idea to invite someone from Canada as an expert to discuss at a future meetings was discussed. This document will be finalized on the next call

- **Potassium cellulose glycolate (EO).** The lead discussed the proposal for this substance. Potassium cellulose glycolate, or potassium carboxymethylcellulose (CMC), is a chemically modified polymer derived from natural cellulose. The petition proposes to utilize potassium CMC as a water filtration aid during irrigation and in combination with liquid fertilizers and nutrients. The Subcommittee determined that water usage is not a criteria under OFPA, and there was insufficient information justifying the need for this material in an organic production system. The subcommittee voted on the proposal.

Motion to classify potassium cellulose glycolate as petitioned as synthetic.

Motion by: EO

Seconded by: HB

Additional discussion: none

Yes: 6 No: 0 Abstain: 0 Absent: 1 Recuse: 0

Motion to add potassium cellulose glycolate to the National List, as petitioned, at § 205.601.

Motion by: EO

Seconded by: HB

Additional discussion:

Yes: 0 No: 6 Abstain: 0 Absent: 1 Recuse: 0

- **Polyoxin D.** The lead discussed the petition and posed the question to the subcommittee regarding whether there is the need to obtain more information about the substance or the manufacturing process. One member of the committee noted that all zinc in the market is by-product of manufacturing processes and is synthetic. The subcommittee decided to postpone the discussion until one member of the subcommittee is on the call, in order to get his input. Further discussion was deferred to the next call.
- **Ammonium citrate and glycinate (EO)** - Deferred to next call
- **Strengthening seed guidance** - Deferred to next call
- **The meeting was adjourned**

[Previous CS Notes](#)

Future Call Schedule (1st and 3rd Tuesdays 2:00 ET)

August 16, 2016

Polyoxin D Zinc salt - Petition sufficiency

Hydroponics task force report - Discuss report and proposal

Potassium cellulose glycolate (EO) - Discuss proposal

Ammonium citrate and glycinate (EO) - Discuss proposal

August 30, 2016 additional call

Hydroponics task force report - Discuss proposal/discussion doc

Potassium cellulose glycolate (EO) - Discuss proposal

Ammonium citrate and glycinate (EO) - Discuss proposal

Strengthening seed guidance - Discuss draft discussion document

Polyoxin D. Discuss questions for potential Lmted scope TR request

September 6, 2016

Ammonium citrate and glycinate (EO) - Discuss proposal

Hydroponics task force report - Discuss discussion doc

Strengthening seed guidance - Discuss draft discussion document

Sodium citrate (HB) - Petition sufficiency

Marine materials (marine algae and extracts) - TR in development

September 20, 2016

October 4, 2016

October 18, 2016

November 1, 2016

November 15, 2016 - cancelled (NOSB meeting)

December 6, 2016

December 20, 2016

Fall 2016 Milestones	Target dates (tentative)
NOP - Publish FRN, Open public comment	Aug 1, 2016
NOP - Complete fall 2016 NOSB meeting tentative agenda	Sep 8, 2016
NOSB - Fall 2016 proposals due to NOP	Sep 14, 2016
NOP - Post proposals	On or before Sep 27, 2016
Discuss work agendas on ES call	Oct 14, 2016
Public comment closes	Oct 26, 2016
NOP - Send compiled public comments to NOSB	Nov 2, 2016
Public comment webinar	Nov 3, 2016
Work agendas finalized on ES call (last call before fall meeting)	Nov 4, 2016
Fall 2016 NOSB meeting - St Louis, MO	Nov 16-18, 2016

Note: Subcommittee notes may include preliminary discussions regarding substances considered for addition to or removal from the National List. They do not represent official National Organic Program (NOP) policy or regulations. Please see the NOP website for official NOP policy, regulations, and status of substances used in organic production and handling.

**National Organic Standards Board (NOSB)
Crops Subcommittee (CS) Meeting Notes
Tuesday September 6, 2016 2:00 pm ET**

Present: Zea Sonnabend, Chair (ZS); Francis Thicke, Vice Chair (FT); Emily Oakley (EO); Harold Austin (HA); Jesse Buie (JB); Harriet Behar (HB); Carmela Beck (CBe); Lisa de Lima (LD) - observer; Tracy Favre (TF) - observer; Scott Rice (SR) - observer

Absent: Michelle Arsenault (MA)

Staff: Devon Pattillo (DP); Jessica Walden (JW)

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of August 30
- Ammonium citrate and glycinate (EO) - Discuss proposal
- Hydroponics task force report - Discuss discussion doc
- Potassium cellulose glycolate (EO) - Discuss proposal
- Strengthening seed guidance - Discuss draft discussion document
- Polyoxin D. Discuss questions for potential limited scope TR request
- Sodium citrate (HB) - Petition sufficiency
- Marine materials (marine algae and extracts)
- Adjourn

Discussion

- **Crops Subcommittee notes of August 30** were deferred until the next meeting, as the committee received them shortly before the meeting.
- **Ammonium citrate and glycinate (EO).** The lead discussed these substances and explained that the petition does not supply sufficient reason for why these substances should be added when there are other substances on the National List that fulfill the same purpose. One proposal with separate motions for each substance has been finalized. The Subcommittee found that the addendum did not completely discuss the question of alternatives.

Motion to classify **ammonium citrate** as synthetic.

Motion by: EO

Seconded by: HB

Additional discussion: none

Yes: 7 No: 0 Abstain: 0 Absent: 0 Recuse: 0

Motion to add **ammonium citrate**, as petitioned, at §205.601

Motion by: EO

Seconded by: HB

Additional discussion: none

Yes: 0 No: 7 Abstain: 0 Absent: 0 Recuse: 0

Motion to classify **ammonium glycinate** as synthetic.

Motion by: EO

Seconded by: FT

Additional discussion: none

Yes: 7 No: 0 Abstain: 0 Absent: 0 Recuse: 0

Motion to add **ammonium glycinate**, as petitioned, at §205.601

Motion by: EO

Seconded by: FT

Additional discussion: none

Yes: 0 No: 7 Abstain: 0 Absent: 0 Recuse: 0

- **Polyoxin D.** The previous lead discussed new information provided by the petitioner, including new studies on the efficacy of this material. He recommends they reach out to the TR contractor and ask them to assess the validity of those studies. If the facts provided are valid, this could potentially be a useful material for organic producers. Inclusion of zinc (for retention purposes) makes this material synthetic, and as such does not fit into an OFPA category. Without zinc the material is non-synthetic. However, zinc is an allowed micronutrient. Members discussed whether to move forward with a TR, given that there may not be an OFPA category for this material. A vote was cast regarding the TR (4 in favor, 3 opposed). The lead and former lead will draft questions for the TR and circulate them to the Subcommittee members for approval. One question will be whether the addition of zinc is necessary.
- **Hydroponics task force report.** The lead discussed the amendments provided by the other members of the Subcommittee to the hydroponics/biaponics draft proposal. The lead clarified that the container discussion document will provide guidance on which types of growing practices are allowed. The lead discussed the definitions section and the Subcommittee found the changes acceptable.

Motion to allow biaponics in organics.

Motion by: ZS

Seconded by: EO

Additional discussion: One member was concerned that there was still confusion over biaponics vs. container-based systems that might be considered compliant. A discussion was had about the fact that this proposal might be sent back to Subcommittee after the fall meeting.

Yes: 2 No: 5 Abstain: 0 Absent: 0 Recuse: 0

The subcommittee discussed the discussion document for container growing, referring to Canadian standards as well as a frame of reference. They considered which questions should be asked in the discussion document, with regard to percentages of compost, soil, etc. that are required to address specific needs of the plant.

Motion to accept the discussion document on container-based growing.

Motion by: ZS

Seconded by: HA

Additional discussion: none

Yes: 7 No: 0 Abstain: 0 Absent: 0 Recuse: 0

- **Sodium citrate.** The Subcommittee would like to postpone this topic until an October meeting, but will check with the Advisory Committee Specialist once she is back from leave.
- **Strengthening seed guidance.** The lead discussed the discussion document and how she amended it for clarity. The Subcommittee agreed with the clarifications and a motion was put forth.

Motion to adopt the discussion document on strengthening seed guidance

Motion by: ZS

Seconded by: HB

Additional discussion: further discussion was had on needing to go to three sources for certain varieties that are not available as organic and contamination issues in organic seed and testing

Yes: 7 No: 0 Abstain: 0 Absent: 0 Recuse: 0

- **The meeting was adjourned**

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of August 30
- Approve Crops Subcommittee notes of September 6
- NOP operating plan priorities (from current list)
- Check in on future work agenda for CS
- Allyl Isothiocyanate (AITC) Petition (2016) - petition sufficiency
- Polyoxin D. Discuss questions for potential limited scope TR request
- Sodium citrate (HB) - Petition sufficiency
- Adjourn

Discussion

- **Crops Subcommittee notes** of August 30 were approved with no changes
- **Crops Subcommittee notes** of September 6 were approved with no changes
- **NOP operating plan priorities (from current list).** The NOSB was asked to rank priorities for the NOPs 2017 operating plan. Each Subcommittee will identify priorities, which will be discussed on the next ES call. Crops identified four items for consideration: sodium nitrate, which was the top priority; rotenone; EPA List 4 inerts annotation change, and apiculture (which is a Livestock project). Additionally, the Crops Subcommittee emphasized the need for the inerts working group to meet and continue work.
- **Future work agenda for CS.** The CS Chair requested that members prepare suggestions for additional work agenda items for discussion on the next call. Members will continue work on outstanding items, some of which will be transitioned to other/new members in January. Outstanding items include: contamination issues in farm inputs; anaerobic digestate, for which there is a TR in development; biodegradable biobased mulch; 2019 sunset substances; prohibition of NPEs; marine materials (EO will take the lead on this project, and will collaborate with JR to transition); newspaper, for which there is a TR in development; the container production discussion document will likely become a proposal for the Spring 2017 meeting; and strengthening and clarifying the requirements for use of organic seed.
- **Allyl Isothiocyanate (AITC) petition (2016) (HA).** The petition was found sufficient. AITC was originally petitioned in 2014 and was subsequently withdrawn. The new petition asks for additional uses, such as a fungicide, etc. Members discussed the uses and effects of AITC, which is a synthetic analog of mustard seed. The lead suggested the CS request a limited scope TR with targeted questions.
- **Polyoxin D (JB).** The lead composed several questions for the limited scope TR request, and the group discussed them. The lead will forward the questions to the CS Chair to submit to the NOP.
- **Sodium citrate (HB).** Members discussed the draft summary, including the uses of sodium citrate. It is being petitioned for use as anticoagulant for blood meal fertilizer. Currently it is an allowed synthetic in Handling. The 2015 TR, contracted for the handling review, focused on sodium citrate as a food ingredient. The group discussed the substance in relation to the OFPA criteria: human health/environmental concerns, and alternatives. Although the petition mentioned alternatives, the lead felt it was not entirely clear, so the HS will seek a technical report to address questions about alternatives.
- **Natamycin (EO).** Natamycin was originally petitioned for use in handling, and the Handling Subcommittee classified it as synthetic and voted to not allow it. New information indicates that it may be non-synthetic, but it is now being petitioned for use in Crops. EO will take the lead on this material review. The CS Chair noted that the classification of materials guidance, if published, could help shed light on this material. Members discussed whether natamycin is considered an antibiotic, since it may affect fungi and mold but not bacteria. The CS may request a TR.
- **The meeting was adjourned**

Agenda

- Approve Crops Subcommittee notes of October 4
- Natamycin - Designate lead
- Fall meeting - Discuss presentations and updates
- Discussion of any public comments received so far
- Adjourn

Discussion

- **Crops Subcommittee notes of October 4** were approved with no changes.
- **Natamycin.** HB will be the lead author for this substance. The CS will determine petition sufficiency and the need for a TR on the November 1 call.
- **Fall meeting - discuss presentations and updates.**
 - The members discussed the comments regarding hydroponics, noting that there are comments supporting both sides of the issue.
 - A member described the format for presenting proposals and discussion documents at the fall meeting. Presentations should be submitted to the NOP no later than Tuesday, November 15 at the NOSB administrative meeting.
 - Two NOP staff members sat in on a webinar on hydroponics last week that was hosted by the Controlled Environment Agriculture Center (CEAC) of the University of Arizona. Two of the Hydroponics Task Force members were part of the panel. The email with the call-in information for the next webinar was forwarded to the Crops Subcommittee members.
- **Public comments.** The group discussed the open docket and the receipt of comments prior to the posting of the proposals. The comment period closes on October 26, and the CS will discuss the comments during the next conference call.
- **The meeting was adjourned**

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of October 18
- Natamycin - Petition sufficiency and TR request
- Discuss work agenda
- Review public comments
- Adjourn

Discussion

- **Crops Subcommittee notes of October 18** approved with no changes.
- **Natamycin (HB).** The lead summarized the material, including its petitioned use. Natamycin was petitioned in 2007 and the Board voted to not allow it on the National List at that time. Currently it is approved for use in Canada, and is listed by OMRI as non-synthetic. The petition was found sufficient, and the CS will seek a TR.
- **Work agenda.** The Chair recommended that the members, and especially the new members, keep in mind items for future work agenda. The new members should be announced at the fall meeting, and will be invited to sit in on December calls.
- **Public comments.** Members discussed public comments about various materials, including ammonium glycinate, ammonium citrate, hydroponics and containers. The chair reviewed the process for discussing and voting on proposals for the benefit of the new members.
- **The meeting was adjourned**

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of November 1
- De-brief from Fall meeting
- New (old) petition for ammonium nonanoate - assign lead
- Review work agenda (see charts in notes) to make sure leads are assigned, transition happens smoothly and everything is being worked on.
- Adjourn

Discussion

- **Crops Subcommittee notes** of November 1 were accepted with a minor change to the roll call.
- **Fall meeting debrief.**
 - The CS Chair praised the members for speaking up and stating their viewpoints at the meeting regarding hydroponics. She stressed the importance of having these conversations so stakeholders are aware of the differing views. This allows the public to witness the decision making process and how difficult it can be for Board members.
 - The Hydroponics proposal was sent back to Subcommittee and will now be led by JB, HB, FT, and EO. The current lead offered suggestions about how to proceed. Members discussed various considerations for future iterations of the documents on both containers and hydroponics, including convening a panel. Some felt that an expert panel would not be helpful since the scientific information they are seeking does not exist, and instead, discussed inviting various experts to join the Subcommittee calls.
 - Strengthen and clarify the requirements for use of organic seed (NOP 5029). The lead will discuss next steps with the NOP and the Crops Subcommittee will discuss this again on Jan 3.
- **Ammonium nonanoate.** The group discussed the petition and the inclusion of new information, which is a requirement for re-petitioned materials. FT volunteered to lead this material, and the CS will schedule the discussion for the December 20 call.
- **Work agenda**
 - **Petitioned Substances:** There are several petitioned substances waiting for TRs: Fatty alcohols; Anaerobic digestate (EO will eventually take the lead on this); Polyoxin D Zinc salt; AITC; Sodium

Citrate, and Natamycin. Several of these items were moved from the spring 2017 meeting to fall 2017 as the TRs likely won't be back in time to finish the proposals by the February due date.

- **Contamination Issues in Farm Inputs.** FT and HB will begin work on this project, although it is pending until the compost ruling.
- **The meeting was adjourned**

* **Yellow highlight** indicates Subcommittee action needed ***Highlight** indicates review completion

Agenda

- Approve Crops Subcommittee notes of December 6
- Ammonium nonanoate (FT). Petition sufficiency/TR request
- Marine materials (EO). Keep on agenda or not
- Feedback from first planning session of the Crops Hydroponics Sub-Subcommittee (Jesse, Harriet, Emily and Francis)
- Other business
- Adjourn

Discussion

- **Crops Subcommittee notes of December 6** were approved with the addition of two co-leads to the Hydroponics project. JB and FT will join HB and EO.
- **Ammonium nonanoate (FT)**. Originally petitioned in 2009 as an herbicide. This re-petition indicates use as an herbicide and desiccant. The lead reviewed the previous NOSB determination, which found that it was non-essential and incompatible with organic principles. While the new petition contains information about human health, this was not a criterion that was used to reject the 2009 petition. Additionally, the new petition did not address concerns the previous Board had identified. Therefore the CS is rejecting the petition for ammonium nonanoate. The NOP will notify the petitioner.
- **Marine materials (EO)**. The Handling Subcommittee completed an in-depth discussion just prior to the Crops call. The CS discussed various aspects of the draft proposal, including sustainability and over-harvesting. After a lengthy discussion the members determined that there is nothing for the Crops Subcommittee to work on at this time, but will follow the review in Handling, and decide later if there is something they could build on.

- **Crops Hydroponics Sub-Subcommittee.** Four members of the Crops Subcommittee are working on the hydroponics project as co-leads. The group has had preliminary conversations and is moving forward with a draft document based on the strong foundation that was already developed by previous members. The group will also look at the regulations to determine if a path forward will involve regulatory change and/or rulemaking. The CS hopes to have a document ready for the Spring 2017 NOSB meeting.
- **2019 Sunset Materials.** Several materials will need to be reassigned for presentation at the Spring 2017 meeting, as current leads are completing their NOSB terms in January. The leads will pass along any previous notes and work for the transition.
- **Other business** - none
- **The meeting was adjourned**

Future Call Schedule (1st and 3rd Tuesdays 2:00 ET)

December 6, 2016

December 20, 2016

Ammonium nonanoate (FT). Petition sufficiency/TR request?

Marine materials (EO). Keep on agenda or not?

January 3, 2017

Strengthen and clarify the requirements for use of organic seed (NOP 5029) (ZS/HB)

Newspaper - annotation change (ZS). Discuss TR if available

Hydroponics discussion document (JB, HB, FT, EO)

Reassign 2019 Sunset Materials/schedule discussion dates

January 17, 2017

January 31, 2017 (rescheduled from Feb 7)

February 21, 2017

March 7, 2017

March 21, 2017

April 4, 2017
