National Organic Standards Board Crops Committee 2012 Sunset Proposed Recommendation Lignin sulfonate

February 15, 2011

List: §205.601 Synthetic substances allowed for use in organic crop production.

- (j) As plant or soil amendments.
 (4)Lignin sulfonate—chelating agent, dust suppressant, flotation agent.
- (I) As floating agents in postharvest handling.
 - (1) Lignin sulfonate.

Committee Summary

There were concerns during the last round of sunset for this material about its fate in waste water when it is used as a flotation agent. The Crops Committee addressed this concern with an annotation to relist lignin sulfonate on 205.601 (I) with the amended annotation: As floating agents in postharvest handling, subject to wastewater disposal documentation in the Organic Systems Plan to prevent adverse impact to aquatic life. It was also noted that there is a duplicate listing as a flotation agent in (j) As plant or soil amendments, so the Crops Committee is recommending relisting lignin sulfonate as plant or soil amendments with the annotation change: chelating agent, dust suppressant.

Committee Recommendation

- 1. Relist lignin sulfonate on § 205.601 (I) with the amended annotation: As floating agents in postharvest handling, subject to wastewater disposal documentation in the Organic Systems Plan to prevent adverse impact to aquatic life.
- 2. Relist lignin sulfonate on § 205.601(j)(4) with the amended annotation: chelating agent, dust suppressant.

Committee Vote

1. Motion: Tina Ellor Second: John Foster

Yes: 5 No: 0 Absent: 2 Abstain: 0 Recuse: 0

2. Motion: Tina Ellor Second: Nick Maravell

Yes: 5 No: 0 Absent: 2 Abstain: 0 Recuse: 0
