

## **Color Standards for Canned Clingstone Peaches January 2011 Edition**

### **Instructions for Use and Care**

This instruction provides for the use and care of the replacement set of Canned Clingstone Peach color standards, dated January 2011. The revised edition contains the three color standards on a single 3 inch by 6 inch laminated card.

These revised color standards replace the previous edition, consisting of three plastic chips produced by Color Communications Inc. The 2011 edition replaces all previous editions of these color standards, which are obsolete.

Please follow instructions in the U. S. Standards for Grades of Clingstone Peaches and Grading Manual for Clingstone Peaches for the application of the color standards and scoring of color. The USDA color standards are marked CLA, CLB, and CLC which correspond to current instructions found in the Grading Manual for Canned Clingstone Peaches.

Care should be exercised when using the color standards. Clean surfaces with a soft non-abrasive cloth using warm water and a mild soap solution and dry with a soft cloth. Avoid prolonged immersion in water. Store the standards in their envelope, away from heat, light, and moisture when not in use.

These color standards are being distributed to the area offices from the PPB Hunt Valley field office. This inspection aid is available for purchase to processors, buyers, and other interested parties upon request and may be obtained from the Hunt Valley field office, Hunt Valley, MD; Telephone (866) 605-6322 or fax (410) 527-0402.
