Commodity Specification: Canned Dried Beans

I. General

A. U.S. Standards

Canned dried beans (product/commodity) produced under this Commodity Specification must meet the requirements specified in the applicable United States Standards for Grades of Canned Dried Beans (U.S. Standards) and Commercial Item Description of Beans, Refried, Canned or Dehydrated effective on the date of the Solicitation/Invitation for Bid (IFB). The U.S. Standards are published separately and are incorporated herein and made a part of this Commodity Specification.

B. Exceptions to U.S. Standards

Exceptions to the U.S. Standards for the Department of Agriculture (USDA) canned dried bean purchases are found in Section II, Individual Commodity Specifications, of this document. Additional exceptions may be specified in the applicable Solicitation/IFB. Any exceptions contained in the applicable Solicitation/IFB shall have precedence over the requirements contained herein, for that Solicitation/IFB only.

C. Product Origin

1. Commodities delivered pursuant to this Commodity Specification shall have originated from crops that have been 100 percent grown, processed, and packed in the United States, its territories or possessions, the Commonwealth of Puerto Rico, or the Trust Territories of the Pacific Islands, (hereinafter referred to as the United States). See Section I.E. of the Master Solicitation.

2. If the contractor handles any commodity originating from sources other than the United States, the contractor must have a written plan to segregate the commodity. This segregation plan will include an identification and record system for all commodities to ensure they are completely segregated and cannot be used to fulfill contracts awarded by USDA. Such segregation plan must be made available, within 10 days of contract award, to representatives of the Agricultural Marketing Service (AMS).

3. The contractor must maintain positive written documentation records evidencing 100 percent domestic origin to the grower level. Contractors must also ensure that the documentation provided by any sub-contractors demonstrates the same level of traceability. The burden of proof of compliance is on the contractor. Documentation may include load or warehouse storage receipts for raw product (i.e., bin tags), product blend (formulation) records, product coding explanations, finished product warehousing records, shipping or payment records, or other documentation or evidence that clearly establishes the product's domestic origin.

4. Contractors must provide the domestic origin certification and supporting documentation records to representatives of the AMS Fruit and Vegetable Program, Processed Products Division (USDA Inspector) when requesting inspection service. USDA Inspector will select and review at least one code for each contract to determine compliance with the Agency's domestic origin requirements.
5. Such records must be available for review by the Government in accordance with FAR 52.214-26. In the event of an audit, AMS auditors will examine as many codes as is necessary to verify compliance.

6. Self-certifications by contractors and sub-contractors will not be accepted.

7. Failure to observe this requirement may lead to suspension or debarment, contract termination, and penalties at Title 18, Section 1001 of the U.S. Code concerning falsification of information.

D. Kosher Products

Occasionally, purchase units will be identified on Solicitations/IFBs as “Kosher Only” and will be so identified in the Solicitation/IFB. Offerors must not bid on these purchase units unless they are properly certified to produce Kosher products. Vendors must comply with the applicable dietary (KOSHER) laws as established by the “613 COUNCIL OF KASHRUTH.”

Vendors receiving contract items identified as “KOSHER” must contact the Board of Jewish Education of Greater New York (BJENY) at telephone 646-472-5365 prior to submitting a bid to certify compliance with the applicable dietary (kosher) laws.

A rabbinic supervisor will be sent by the BJENY to certify compliance with the applicable dietary (KOSHER) laws.

E. Packing Season

All canned dried beans must be from the current packing season/crop year, unless otherwise specified in the applicable Solicitation/IFB.

F. Holding Period

No shipment of canned dried beans may be made earlier than 14 days after packing. No delivery shall be case stamped prior to the completion of the 14-day holding period.

G. Grade of Canned Dried Beans:

All canned dried beans must be U.S. Grade A (as defined in the U. S. Standards), unless otherwise specified in Section II, Individual Product Specifications, herein or the applicable Solicitation/IFB.

Sodium content – 36 mg to 140 mg per serving (defined as 1/2 cup).

H. Fill of Container:

1. Contractor must meet the washed drained weight of not less than 50.0% of the net weight.

2. The average net weight must meet the net weight as printed on the label and the Individual Commodity Specification Section II.
I. Packing, Labels and Packaging

Commercial Labels and Packaging

1. Primary Containers (Cans and Labels)
   
a. Vendors have the option to use commercial labeling and packaging which meets all applicable FDA requirements and contains a code which allows traceability of the product in the event of a recall or they may use USDA packaging and labeling as specified in the Master Solicitation.

b. The processors’ own commercially acceptable “brand” labels may be used on all Solicitations/IFBs unless prohibited by the Solicitation/IFB. Distributor’s “brand” labels are not acceptable.

All products must be packed in new, commercially acceptable primary containers (cans). Canned dried beans shall be packed only in the container size and type specified in the applicable Solicitation/IFB. The cans must be suitably code marked so that the product can be identified with related inspection certificates.

2. Secondary Containers (tray and case)

Commercially acceptable tray packs wrapped in plastic shrink wrap may be used on all Solicitations/IFBs for #300, #303, #2 and #2.5 cans. Cases of 24/#300 may be achieved by shrink wrapping together two 12/#300 tray packs.

Case flaps, gaps, and other openings may not exceed 1 inch and must be fully glued or sealed with tape. If tape is used in lieu of glue, it must be clear and of commercially acceptable width and strength. The tape must extend at least two inches down the sides or ends.

**Mixing and matching of USDA and commercial labeling methods will not be acceptable.**

Two or more different commercial labels will not be acceptable within a shipping unit (truck load)

USDA Label and Packaging

1. Primary Containers (cans)

All products must be packed in new, commercially acceptable primary containers (cans). Canned dried beans shall be packed only in the container size and type specified in the applicable Solicitation/IFB.

The cans must be suitably code marked so that the product can be identified with related inspection certificates.
2. Can Labels

USDA can labels are shown in Exhibits 1-1 through 1-14. The wording and design of the labels is restricted to that shown in the exhibit. The labels must be printed in ink of the color specified, on commercially acceptable, white paper stock. All printing must be scuff resistant by the application of a varnish, lacquer, or synthetic coating applied to the label after printing.

3. Secondary Container (case) Markings

Cans shall be further enclosed within new, corrugated fiberboard cartons (cases) acceptable by common or other carriers for safe transportation to destinations. Flaps, gaps and other openings may not exceed 1 inch and must be fully glued or sealed with tape. If tape is used in lieu of glue, it must be clear and of commercially acceptable width and strength. The tape must extend at least two inches down the sides or ends.

Cases must be marked in such a manner that they contain all of the symbols, statements and information contained in Exhibit 2, “Required Markings for Shipping Containers”.

Cases may be marked by printing or stenciling or by preprinted, self-adhesive stickers. Self-adhesive stickers must be affixed to the case in such a manner that they cannot be removed intact.

Exact arrangement and adherence to font size is not required. The case markings must be clearly marked, easily read, and substantially the same as specified in Exhibit 2.

Exhibit 3 shows an alternative placard that may be applied to a new, corrugated fiberboard case acceptable by common or other carriers for safe transportation to destinations. This placard must be affixed to the case in such a manner that it cannot be removed intact.

Cases must have the recycling statement shown in Exhibit 6, “Please Recycle” Symbol and Statement or Exhibit 7, “Corrugated Recycles” Symbol and Statement.

J. Universal Product Codes (UPC)

Contractor UPC’s are acceptable for primary containers of product shipped utilizing commercial labels and/or secondary fiberboard cases enclosing commercially labeled product.

Primary label and shipping container Universal Product Codes for USDA products are listed in Exhibit 5. The Contractor’s UPC is not acceptable. The primary container UPC must be positioned on the can label as shown in Exhibit 1. The shipping container UPC must be marked on the case as shown in Exhibit 2.

UPC’s are not required for commercial labeling with tray pack shipping containers.
K. **Palletization Requirements**
   
   1. **Pallets**
      Products must be on 48 X 40 inch, non-reversible, flush stringer, and partial four-way entry. New pallets must be good quality wood. Used pallets must be No.1 hardwood or its equivalent in new softwood. **Broken or damaged pallets are unacceptable.** If pallet exchange is desired, the contractor shall arrange for pallet exchange with consignees. USDA is in no way responsible for arrangement of pallet exchange.
   
   2. **Unitization**
      Each delivery unit of canned dried beans must be unitized. Shipping cases must be stacked and secured from top to bottom, so that each container and layer of containers becomes an integral part of the pallet. Either stretch wrapping with plastic film or “lock ‘n pop” is acceptable. The palletized product must be loaded in the conveyance in such a way that will prevent shifting and damage to the containers of product.

L. **Shipment and Delivery**

   1. **Quantity Tolerance**
      Contractor will be allowed a tolerance on the final delivery of plus or minus 50 cases of each product, from each shipping point named in the purchase order.

II. **Individual Commodity Specifications**

   A. **Vegetarian**
      
      1. **Grade** - U.S. Grade A.
      
      2. **Color** - Good Color, with no artificial color, starches, or artificial additives.
      
      3. **Style** - (a) In tomato sauce.
      
      4. **Type of Pack** - White beans shall be practically similar in varietal characteristics and packed in meatless tomato sauce. The White beans shall consist of pea beans (also known as Navy beans), or small White beans. Only tomato sauce with natural spices, and sweetener, shall to be used for Vegetarian Beans.
      
      5. **Net Weight (6/10)** - The average net weight of all containers shall be not less than 108.0 ounces and no individual container shall have a net weight of less than 106.0 ounces.
      
      6. **Net Weight (24/300)** - The average net weight of all containers shall be not less than 15.0 ounces and no individual container shall have a net weight of less than 14.7 ounces.
B. Beans in Brine

1. Grade - U.S. Grade A, except pigeon peas which must meet the requirement for U.S. Grade B.

2. Color - Good Color, with no artificial color, starches, or artificial additives.

3. Style - (c) in brine

4. Type of Pack - Pinto beans, Red beans (small red type only), Blackeye (peas) beans, Light Red Kidney, Dark Red Kidney beans, Baby Lima, Pink beans, Great Northern beans, Garbanzo beans, Pigeon Peas, and Black Turtle beans shall be packed in brine and any other safe and suitable ingredient(s).

5. Net Weight (6/10) - The average net weight of all containers shall be not less than 108.0 ounces and no individual container shall have a net weight of less than 106.0 ounces.

6. Net Weight (24/300) - The average net weight of all containers shall be not less than 15.0 ounces and no individual container shall have a net weight of less than 14.7 ounces.

Note: Pigeon Peas are botanically known as Cajanus Cajun from the family Fabaceae which are known to be grown in the Puerto Rico region, and the U.S. Virgin Islands.

C. Refried Beans

1. Class I - Canned

2. Type of beans: A - Pinto beans, and C - Pink beans.

3. Consistency 2 - Finished product is a paste with whole and partial bean pieces.

4. Style a - Without oil(s)/lard.

5. Optional ingredient (i) - Onion and /or garlic flavoring.

6. Raw ingredients: The quality of the pinto and pink beans used to make the refried beans shall not be less than U.S. No. 2 Grade and must meet U.S. No. 2 Grade for splits. Must be inspected and certified by Federal Grain Inspection Service.

8. Percent beans: The canned refried beans shall contain not less than 10 percent, or more than 33-1/3 percent of the pink bean type.
9. Salt: Shall have less than 0.5 percent salt added.

10. Net Weight (6/10) - The average net weight per container shall be 112.0 ounces. No individual container shall be less than 110.5 ounces.

11. Net Weight (24/300) – The average net weight per container shall be 15.0 ounces. No individual container shall be less than 14.7 ounces.

III. Inspection and Checkloading

A. Requirements

Representatives of the AMS, Fruit and Vegetable Program, Processed Products Division (USDA Inspector) must perform the inspection and checkloading. See section X. A of the Master Solicitation. The cost of inspection, samples taken for inspection, mailing of review samples submitted for evaluation, and any chemical analysis required for testing shall be for the account of the Contractor.

Inspection of canned products must be performed not more than 90 days prior to shipment. Whether each lot offered meets the product and container requirements of the contract must be determined on the basis of representative sample units. Representative sample units will be graded according to the Regulations Governing Inspection and Certification of Canned Fruits and Vegetables and Related Products (7 C.F.R. Part 52), and United States Standards for Condition of Food Containers (7 C.F.R. Part 42.140), effective on the date of the Solicitation/IFB.

Case stamping in lieu of checkloading is acceptable, at the USDA Inspector’s discretion and may be performed at any time up to 28 calendar days prior to shipment of the product. Contractors must be aware that if this option is exercised, and an AMS Inspector does not perform checkloading, the Contractor assumes all risk for these shipments and deliveries.

B. Certification

Subject to (See section IX.A of the Master Solicitation) the acceptability of the quality, weight, packaging, and checkloading of the product must be evidenced by certificates issued by the USDA Inspector.

No product shall be shipped unless the USDA Inspector informs the Contractor that a designated lot is acceptable. Notice by the USDA Inspector that a designated lot scheduled for shipment does not meet requirements of the contract shall constitute rejection of such lot.

C. Procedures

The Contractor must give the USDA Inspector at least 7 days advance notice when scheduling inspection service. Prior to sampling, the Contractor must furnish the USDA Inspector with a list of codes and the approximate number of cases per code.

Contractors are encouraged to submit requests for inspection in writing with verifiable receipt notice, such as fax log, to alleviate possible miscommunication.
D. Laboratory Tests

The Contractor must allow 14 calendar days after product sampling for laboratory tests (when required) to be completed and returned.

IV. Failure to Meet Specifications

Any lot which fails applicable specifications prescribed herein will be rejected as not acceptable for delivery. If any lot of canned dried beans fails to meet the product or packaging requirement, the Contractor may request in writing that USDA accept delivery of the lot. USDA may, at its option, accept delivery, provided that the purchase price is the contract price less a discount, to be determined by the Contracting Office.

Product name must be printed or stenciled on a separate line in letters at least three-fourths inch high, and all other information must be in letters less than three-fourths inch but at least three-eighths inch high. The USDA Food Symbol must be printed, stamped, or labeled and be of sufficient size to stand out prominently. Case markings must be limited to case codes and those contained in this Exhibit.

1/ Insert any additional product style, pack, packing media, or further definition as applicable; (i.e. Tomato Sauce, etc.).

2/ Insert the size and number of packages per case, i.e. 6 /No. 10 cans, 6/5 pound bags, 12/46 ounce cans, 1/25 pound bag.

3/ Insert the last five digits of the purchase order number.

4/ Insert name of Packer and Packer's Address - City, State, and Zip Code. This information can be placed on the end panels or the side panels.

5/ Insert Universal Product Code (see Exhibit "5"). Recycle symbols and statements can be placed on bottom panels (Exhibit “6” and “7”).
