Commodity Specification
for Frozen Fruit

March 2019
Non-Discrimination Policy: In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at How to File a Program Discrimination Complaint and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

GENERAL

U.S. Standards

Frozen fruit (product/commodity) produced under this Commodity Specification must meet the requirements specified in the applicable United States Standards for Grades of Frozen Fruit (U.S. Standards) effective on the date of the Solicitation/Invitation for Bid (IFB). The U.S. Standards are published separately and are incorporated herein and made a part of this Commodity Specification.

Exceptions to the U.S. Standards and/or or Commercial Item Description

Exceptions to the U.S. Standards for the Department of Agriculture (USDA) frozen fruit purchases and/or Commercial Item Description are found in Section II, Individual Commodity Specifications, of this document. Additional exceptions may be specified in the applicable Solicitation/IFB. Any exceptions contained in the applicable Solicitation/IFB shall have precedence over the requirements contained herein, for that Solicitation/IFB only.

Order of Precedence

The contract will incorporate the Master Solicitation including: the applicable IFB; the applicable Commodity Specification and/or Supplement; the Contractor’s offer; and the Purchase Order. If the contract documents are inconsistent or contradictory, the following order of precedence will prevail: IFB, Master Solicitation, Amendments to Commodity Specifications, Commodity Specifications and/or Supplement(s).

Product Origin

1. Commodities delivered pursuant to this Commodity Specification shall have originated from crops that have been 100 percent grown, processed, and packed in the United States, its territories or possessions, the Commonwealth of Puerto Rico, or the Trust Territories of the Pacific Islands, (hereinafter referred to as the United States). See Section I., F. of the Master Solicitation.

2. If the contractor handles any commodity originating from sources other than the United States, the contractor must have a written plan to segregate the commodity. This segregation plan will include an identification and record system for all commodities to ensure they are completely segregated and cannot be used to fulfill purchase orders awarded by USDA. Such segregation plan must be made available, within 10 days of purchase order award, to representatives of the Agricultural Marketing Service (AMS).

3. The contractor must maintain positive written documentation records evidencing 100 percent domestic origin to the grower level. Contractors must also ensure that the documentation provided by any subcontractors demonstrates the same level of traceability. The burden of proof of compliance is on the contractor.
4. Documentation may include load or warehouse storage receipts for raw product (i.e., bin tags), product blend (formulation) records, product coding explanations, finished product warehousing records, shipping or payment records, or other documentation or evidence that clearly establishes the product's domestic origin.

5. Contractors must provide the domestic origin certification and supporting documentation records to representatives of the AMS Specialty Crops Program, Specialty Crops Inspection (SCI) Division (USDA Inspector) when requesting inspection service. USDA Inspectors will select and review at least one code for each purchase order or IDIQ contract to determine compliance with the Agency's domestic origin requirements.

6. Such records must be available for review by the Government in accordance with FAR 52.214-26. In the event of an audit, AMS auditors will examine as many codes as is necessary to verify compliance.

7. Self-certifications by contractors and subcontractors will not be accepted. Failure to observe this requirement may lead to suspension or debarment, purchase order termination, and penalties at Title 18, Section 1001 of the U.S. Code concerning falsification of information.

**Kosher Products**

Occasionally, USDA solicits offers to sell KOSHER products. Such products are identified on the solicitation with the letter “K” incorporated into the WBSCM material descriptions (see Exhibit 4 for specific products.) These products shall comply with applicable dietary (kosher) laws as established by the “613 Council of Kashruth.” Manufacturing plants shall be certified for compliance with the aforementioned requirement by contacting the Board of Jewish Education of Greater New York (BJENY) at 646-472-5366. At no cost to the vendor, a rabbinic supervisor will be sent to certify compliance of the manufacturing plant with the dietary (kosher) laws. Vendors must not bid on these purchase units unless they can be properly certified.

For other products, when commercial Kosher certification is requested in the solicitation, products must bear one of the Kosher certification symbols illustrated in Exhibit 8.

**Packing Season**

All frozen fruit must be from the current packing season/crop year, unless otherwise specified in the applicable Solicitation/IFB.

**Shipment**

Shipment of frozen fruit must be at 0 degrees F (plus or minus 10 degrees F).

**Grades of Frozen Fruit**
All frozen fruit must be from the current packing season/crop year, unless otherwise specified in the applicable Solicitation/IFB.

**Fill of Container**

1. Contractor must meet the net weight for the product as specified in the applicable U.S. Standards unless otherwise indicated herein.

2. The average net weight must meet the net weight as printed on the label and Individual Commodity Specification Section II.

**LABELS AND PACKAGING**

**Primary Containers (Packages and Labeling)**

1. Vendors have the option to use commercial labeling and packaging which meets all applicable FDA requirements and contains a code which allows traceability of the product in the event of a recall or they may use non-commercial packaging and labeling as specified in the Master Solicitation.

2. The processors’ own commercially acceptable “brand” labels may be used on all Solicitations/IFBs unless prohibited by the Solicitation/IFB. Distributor’s “brand” labels are not acceptable.

3. All products must be packed in new, commercially acceptable primary containers (packages). Frozen fruit shall be packed only in the container size and type specified in the applicable Solicitation/IFB. The primary package must be suitably code marked so that the product can be identified with related inspection certificates.

4. Product packed in poly bags must be effectively sealed so as not to leak when thawed.

5. For packages 3 pounds or less, labels must also meet the following formatting criteria:
   
   a. Must include, at a minimum, Two (2) color, in addition to black and/or white.

   b. Must incorporate a graphic (photo or illustration) depicting the product/contents on the principal display panel if the packages are not clear or contain an adequate viewing window.

   c. Suitably code marked so that the product can be identified with related inspection certificates.
Secondary Containers (case) for Commercial Labels

1. Primary containers shall be further enclosed within new, corrugated fiberboard cartons (cases) acceptable by common or other carriers for safe storage and transportation to destinations.

2. Case flaps, gaps, and other openings may not exceed 1 inch and must be fully glued or sealed with tape. If tape is used in lieu of glue, it must be clear and of commercially acceptable width and strength. The tape must extend at least two inches down the sides or ends.

3. Mixing and matching of commercial and non-commercial labeling methods will not be acceptable.

4. Two or more different commercial labels will not be acceptable within a shipping unit (truck load).

Secondary Containers (case) for Non-Commercial Labels

Packages with non-commercial labels shall be further enclosed within new, corrugated fiberboard cartons (cases) acceptable by common or other carriers for safe transportation to destinations. Flaps, gaps and other openings may not exceed 1 inch and must be fully glued or sealed with tape. If tape is used in lieu of glue, it must be clear and of commercially acceptable width and strength. The tape must extend at least two inches down the sides or ends.

Cases must be marked in such a manner that they contain all the required symbols, statements and information contained in Exhibits 1, 2 or 3 as applicable.

Cases may be marked by printing or stenciling or by preprinted, self-adhesive stickers. Self-adhesive stickers must be affixed to the case in such a manner that they cannot be removed intact.

Exact arrangement and adherence to font size is not required. The case markings must be clearly marked, easily read, and substantially the same as specified in Exhibit 1, 2 or 3 as applicable.

Exhibit 3 shows an alternative placard that may be applied to a non-commercial, new, corrugated fiberboard case acceptable by common or other carriers for safe transportation to destinations. This placard must be affixed to the case in such a manner that it cannot be removed intact.

Cases must have the recycling statement shown in Exhibit 5, “Please Recycle” Symbol and Statement or Exhibit 6, “Corrugated Recycles” Symbol and Statement.

UNIVERSAL PRODUCT CODES (UPC)
Contractor UPCs are acceptable for primary containers with commercial labels and/or secondary fiberboard cases enclosing commercially labeled product.

UPCs are not required for commercial labeling with tray pack shipping containers.

Products with alternative, non-commercial labels must use the UPCs listed in Exhibit 3 on the primary and secondary containers.

**PALLEZIZATION REQUIREMENTS**

**Pallets**

Products must be on 48 X 40 inch, non-reversible, flush stringer, and partial four-way entry. New pallets must be good quality wood. Used pallets must be No.1 hardwood or its equivalent in new softwood. **Broken or damaged pallets are unacceptable.** If pallet exchange is desired, the contractor shall arrange for pallet exchange with consignees. USDA is in no way responsible for arrangement of pallet exchange.

**Unitization**

Each delivery unit of frozen fruit must be unitized. Shipping cases must be stacked and secured from top to bottom, so that each container and layer of containers becomes an integral part of the pallet. Either stretch wrapping with plastic film or “lock ‘n pop” is acceptable. The palletized product must be loaded in the conveyance in such a way that will prevent shifting and damage to the containers of product.

**Shipment and Delivery**

**Quantity Tolerance**

Contractor will be allowed a tolerance on the final delivery of plus or minus 50 cases of each product, from each shipping point named in the purchase order.

**INDIVIDUAL COMMODITY SPECIFICATIONS**

**Apple slices**

1. Grade – U.S. Grade A, in accordance with the U.S. Standard for Grades of Frozen Apples.

2. Style – Sliced.

3. Type of Pack – Individually Quick Frozen (IQF).

4. **The varieties used will be suitable for slicing and freezing. No mixing of varieties is allowed.**
5. **Ascorbic acid and citric acid may be added to inhibit oxidation.**

6. **Sulfites cannot be substituted for ascorbic acid and citric acid.**

7. **No added nutritive or non-nutritive sweeteners or salt.**
   
a. **Once the product is thawed and free of ice crystals:** Will be reasonably bright and show no more than slight oxidization (browning)

b. **The texture will be reasonably uniform and firm but not hard, excessively soft, or flabby.**

8. **Net Weight –**
   
a. 30 pounds per case.

b. 12/2.5-pound bags.

---

**Apricots**

1. **Grade –** U.S. Grade A.

2. **Style –** Sliced.

3. **Pack Formula –** The fruit shall be packed into syrup at a ratio of 5:1 fruit to sugar, resulting in a final average Brix measurement of 60 degrees. Ascorbic acid and citric acid may be added.

4. **Net Weight –**
   
a. 20 pounds per case.

b. 32-pound plastic containers.

c. 40 pounds per case.

d. 30 pounds per case (6/5 lb. bags).

---

**Frozen Apricots in Individual Serving Sizes**

1. **Grade –** U.S. Grade B or better, except for U.S. Grade A for defects.

2. **Style –** Diced (3/8 to ½ inch) or machine-pitted.

3. **Individual Net Weight –** 4.5 ounces per cup, 96 cups per case.

5. Pack Formula – The fruit shall be packed into syrup at a ratio of 5+1 fruit to sugar, resulting in a final average Brix measurement of 60 degrees or composed of apricot puree. Ascorbic acid and citric acid may be added.

6. There shall be NO cooked product of any kind used.

**Blackberries**

1. Grade – U.S. Grade B or better, except U.S. Grade A for defect.

2. Style – Individually Quick Frozen (IQF).

3. Variety –
   
   a. Sweet – Marion, Kotata, Black Diamond.
   
   b. Tart – Silvan, Chester, Evergreen.

**Blueberries**

1. Grade – U.S. Grade B or better in accordance with the U.S. Standards for Grades of Frozen Blueberries.

2. **Types of frozen blueberries.**
   
   a. native or wild (lowbush) type or
   
   b. cultivated (highbush) type.
   
   c. Types a and b cannot be mixed.

   As specified in the solicitation/IFB.

3. Variety – Cultivated or native (as specified in the Solicitation/IFB).

4. Net Weight –
   
   a. 30 pounds per case.
   
   b. 30 pounds per case (12/2.5 lb.).
c. 24 pounds per case (8/3 lb.).
d. (TBD) pound poly lined tote bin.

Blackberry Puree

1. Grade – Made from frozen blackberries, U.S. Grade B or Better for Manufacturing. The blackberry puree shall be produced from U.S. Grade B or Better for manufacturing blackberries as determined in accordance with the requirements of the United States Standards for Grades of Frozen Berries.

2. Inspection – Inspection/grading of the frozen blackberries shall be performed by representatives of the AMS, Fruit and Vegetable Program, Specialty Crops Inspection (SCI) Division prior to the blackberries being processed into puree. The SCI will inspect/grade the puree to ensure the quality of the puree produced is in accordance with the requirements of the individual Solicitation/IFB and the commodity specifications.

3. Pasteurized – processed puree will be accepted in lieu of inspection prior to processing if the puree is in accordance with all other requirements of the individual Solicitation/IFB and commodity specifications as determined by the SCI Division.

4. Variety – Evergreen or Marion.

5. Color – The blackberry pulp shall be reasonably bright and the typical reddish purple to dark purple color of ripened blackberries.

6. Flavor and Aroma – The flavor and aroma of the pulp will be characteristic of the blackberry types, tart, free from fermentation, and any off flavors or odors.

7. Brix – The minimum single strength berry puree Brix will be stated below for each berry type, with no sugar or water added, measured by a refractometer.
   a. Blackberries, Evergreen – 10.5 degrees.
   b. Blackberries, Marion – 10.0 degrees.

8. pH Range –
   a. Blackberries, Evergreen – 3.2 to 4.0.
   b. Blackberries, Marion – 2.9 to 3.6.
   c. The puree shall be processed and packed in accordance with good manufacturing practices, under strict sanitary conditions. The berries will be finished by passing them through one or more finishing machines with the
final screen opening not to exceed 0.033 inches. The puree will be packaged as specified below, frozen immediately and kept frozen at 0 degrees F to −10 degrees F.

9. Absence of Defects – The finished puree shall be practically free of defect material; not more than 3 pieces of brown, black, green or other discolored tissue including seeds that is readily noticeable in a 16-ounce sample unit. The finished puree shall not include more than 1 piece that is over 3/16 inch in any dimension.

10. Consistency – The consistency of the single strength, seedless puree will be fairly thick and reasonably smooth with a slight amount of free liquid at the edge of the mass. Product may flow fairly quickly on a tray tilted to a 30-degree angle but should exhibit not watery quality.

11. Howard Mold Count – The mold count as determined by the Howard Method will not exceed an average of 30 percent positive fields, with a maximum of 37 percent positive fields for any individual count.

12. Analytical Requirements – Analytical and microbiological requirements for blackberry puree shall comply with the following:
   a. Aerobic (Standard) plate count – Less than 50,000 per gram in any sample.
   b. Yeast – Less than 10,000 Colony Forming Units (CFU) per gram.
   c. Mold – Less than 10,000 CFU per gram.
   d. Coliform – Less than 100 per gram using the MPN (Most Probable Number) technique.
   e. E. coli – Less than 3 per gram using the MPN technique.
   f. Salmonella – Negative per 25 grams.

Red Raspberry Puree

1. Grade – Made from frozen raspberries, U.S. Grade B or Better for Manufacturing. The red raspberry puree shall be produced from U.S. Grade B or Better for Manufacturing raspberries as determined in accordance with the requirements of the United States Standards for Grades of Frozen Raspberries.

2. Inspection – Inspection/grading of the frozen raspberries shall be performed by representatives of the AMS, Fruit and Vegetable Program, Specialty Crops Inspection (SCI) Division prior to the raspberries being processed into puree. SCI will inspect/grade the puree to ensure the quality of the puree produced is in
accordance with the requirements of the individual Solicitation/IFB and the commodity specifications.

3. Pasteurized – Processed puree will be accepted in lieu of inspection prior to processing if the puree is in accordance with all other requirements of the individual Solicitation/IFB and commodity specifications as determined by SCI.

4. Color – The red raspberry pulp shall be reasonably bright, red to reddish purple color typical of ripened red raspberries.

5. Flavor and Aroma – The flavor and aroma of the pulp will be characteristic of red raspberry, tart, free from fermentation and any off flavors or odors.

6. Brix – The minimum single strength berry puree Brix will be as stated below for each berry type, with no sugar or water added, measured by refractometer 8.0 degrees.

7. pH Range – 2.9 to 3.7.

8. The puree shall be processed and packed in accordance with good manufacturing practices, under strict sanitary conditions. The berries will be finished by passing them through one or more finishing machines with the final screen opening not to exceed 0.033 inches. The puree will be packaged as specified below, frozen immediately and kept frozen at 0-degree F to –10 degree F.

9. Absence of Defects – The finished puree shall be practically free of defect material; not more than three pieces of brown, black, green or other discolored tissue including seeds that is readily noticeable in a 16-ounce sample unit. They shall not include more than one piece that is over 3/16 inch in any dimension.

10. Consistency – The consistency of the single strength, seedless puree will be fairly thick and reasonably smooth with a slight amount of free liquid at the edge of the mass. Product may flow fairly quickly on a tray tilted to a 30-degree angle but should exhibit not watery quality.

11. Howard Mold Count – The mold count as determined by the Howard Method will not exceed an average of 30 percent positive fields, with a maximum of 37 percent positive fields for any individual count.

12. Analytical Requirements – Analytical and microbiological requirements for raspberry puree shall comply with the following:

   a. Aerobic (Standard) plate count – Less than 50,000 per gram in any sample.

   b. Yeast – Less than 10,000 Colony Forming Units (CFU) per gram.
c. Mold – Less than 10,000 CFU per gram.

d. Coliform – Less than 100 per gram using the MPN (Most Probable Number) technique.

e. E. coli – Less than 3 per gram using the MPN technique.

f. Salmonella – Negative per 25 grams

**Cherries**

1. Grade – U.S. Grade B or better, except U.S. Grade A for Pit Score.

2. Pit Score – A tolerance of not more than one pit per 160 ounces is permitted.

3. Type of Pack – Regular 5+1 or Individually Quick Frozen (IQF).

4. Variety

   a. Red Tart, Pitted (RTP) - Regular 5+1 or Unsweetened Individually Quick Frozen (IQF) as specified in IFB/Solicitation.

   b. Sweet Cherries, Pitted, Unsweetened - IQF only.

5. Net Weight

   a. Regular - (RTP)

      i. One 30-pound plastic container. 30 pounds per container.

      ii. Twelve-two and a half pound clear bags per box (12/2½-lb). 30 pounds per container.

   b. IQF - (RTP)

      i. One 40-pound plastic container. 40 pounds per container.

      ii. Twelve-two and a half pound clear bags per box (12/2½-lb). 30 pound per container.

   c. IQF - (Sweet Cherries)

      i. Twelve-two and a half pound bags per box (12/2½-lb). 30 pound per container.

      ii. Nutrition – Must be fully ripe for natural antioxidants benefit.
Peaches

20 Pound Frozen Sliced Freestone Peaches

1. Grade – U.S. Grade A. Character shall be category II, Firm ripe – except may include 20 percent soft ripe fruit. Mushy peaches will not be allowed.

2. Style – Sliced.

5. Pack Formula – 11.5+1 (by weight) fruit to sugar ratio. The packing media may consist of: syrup, peach puree, dry sugar, ascorbic acid, or citric acid.

Frozen Freestone Peaches in Individual Serving Sizes

1. Grade U.S. Grade B or better, except for U.S. Grade A for defects.

2. Style – Diced (3/8 to 1/2 inch).

4. Individual Net Weight – 4.4 ounces per cup. 96 cups per case.

5. Size of Primary Container – Individual portion serving cups. Cups must show Julian date.

6. Pack Formula – The pack ration must be 11.5+1 fruit to sugar ratio packing media is sugar, syrup, ascorbic acid and citric acid, or juice. The packing media must be 5.5 + 1 fruit to sugar ratio where the packing media is 45 degrees brix syrup and may also be composed of peach puree, sugar, ascorbic acid and citric acid.

7. There shall be NO cooked product of any kind used.

8. Average Drained Weight – Shall be a minimum of 55 percent of the net weight.

Two-pound (2-pound) Frozen Sliced Freestone Peaches

1. Grade – U.S. Grade A, except Grade B for Character.

2. Style – Sliced.

3. Pack Formula – The pack ratio must be 11.5+1 fruit to sugar ratio where the packing media is sugar, syrup, ascorbic acid and citric acid, or juice. The packing media must be
5.5 + 1 fruit to sugar ratio where the packing media is 45 degrees brix syrup composed of peach puree, sugar, ascorbic acid and citric acid.

5. Net Weight – 24 pounds per case. 12/2-pound cartons per case.

Red Raspberries

1. Grade – U.S. Grade A.

2. Style – Individually Quick Frozen (IQF).

3. Net Weight – 25 or 30 pounds per case, as specified in the Solicitation/IFB.

Strawberries

Strawberries (Unsweetened)

1. Grade – U.S. Grade A.

2. Style

   a. IQF Frozen Whole

      i. Size - Medium (over 5/8 inch to units that will pass through a 2 inch diameter circle in any direction)

      ii. Net Weight - 12/2.5, 6/5, and 30-pound case

      iii. For 30-pound case, the average net weight of the case shall be no less than 30 pounds and individual case shall weigh less than 29.4 pounds.

   Net Weight specified in the solicitation/IFB

   b. IQF Frozen Sliced

      i. Size - (approximately 3/8 to ½ inch)

      ii. Net Weight – 6/5 and 30 pound

      iii. For 30-pound case, the average net weight of the case shall be no less than 30 pounds and no individual case shall weigh less than 29.4 pounds.

   Net Weight specified in the solicitation/IFB

3. Mold Count – should be in accordance with FDA requirements.
Strawberries (Sweetened)

1. Grade – U.S. Grade A.
2. Style – Sliced.
3. Net Weight – 30 pounds per pail.
4. Fruit/Sugar Ratio – 11.5 + 1.
5. Mold Count – must be in accordance with FDA requirements.

Frozen Strawberries in Individual Serving Sizes

1. Grade – Equivalent to U.S. Grade A based on tolerances established in the U.S. Standards for Grades of Frozen Strawberries, sliced style. **Style used for this pack is diced.**
2. Style – Diced (approximately 3/8 to 1/2 inch).
3. Individual Net Weight – 4.5 ounces per cup, 96 cups per case.
5. Pack Formula – The pack ratio must be 11.5+1 fruit to sugar ratio where the packing media is sugar, syrup, ascorbic acid and citric acid, or juice. or, The packing media must be 5.5 + 1 fruit to sugar ratio where the packing media is 45 degrees Brix syrup and may also be composed of strawberry puree, sugar, ascorbic acid and citric acid. **Use of ascorbic acid and citric acid is optional.**
6. There shall be **NO** cooked product of any kind used.
7. The primary containers or lids will contain the name of product, ingredient statement, the net weight in pounds and kilograms, and a keep frozen statement. Identity coding must be on the cases and primary containers.
8. Product must meet FDA Defect Action Level.
9. USDA Inspection shall be made during on-line production or repacking of the product.
10. Drained Weight – Shall be a minimum of 60 percent.

Whole Cranberries
1. Grade – U.S. Grade B or better.

2. Net Weight – 40 pounds per container.

Mixed Berry Cup

Individual Serving (11.5 + 1)

1. Grade
   a. Blueberries – U.S. Grade B or better – Variety – Cultivated or native (as specified in the Solicitation/IFB).
   b. Strawberries - Equivalent to U.S. Grade A based on tolerances established in the U.S. Standards for Grades of Frozen Strawberries, sliced style. **Style used for this pack is diced.**

2. Types of frozen blueberries.
   a. **native or wild (lowbush) type or**
   b. **cultivated (highbush) type.**
   c. **types a and b cannot be mixed.**

   **As specified in the solicitation/IFB.**

3. Style
   b. Strawberries – **Fresh or frozen** diced (approximately 3/8 to 1/2 inch).
      i. **Berries used and processed for this formulation must result in the end item that meets the requirements of this specification.** Specifically, in the formulated and frozen product:
         1. **The color and character of the whole blueberries will be U.S. Grade B or better**
         2. **The color and character of the diced strawberries will be U.S. Grade A based on tolerances established in the U.S. Standards for Grades of Frozen Strawberries for sliced style with the following exception: A reasonable amount of discoloration of**
the strawberries is allowed due to the blueberry color migrating into the strawberry dices as long as the strawberry dices retain a fairly good pink to red color.

4. Proportion of ingredients: 50% Whole Blueberries and 50% Diced Strawberries (by weight) - Tolerance of proportions: (+ or –) 10%.

5. Individual Net Weight - 4.0 ounces per cup, 96 cups per case.

6. Size of Primary Container - Individual portion serving cups. Cups must be suitably code marked so that the product can be identified with related inspection.

7. Pack Formula
   a. The pack ratio must be 11.5+1 fruit to sugar ratio where the packing media is sugar, syrup, ascorbic acid and citric acid.
   or,
   The packing media must be 5.5 + 1 fruit to sugar ratio where the packing media is 45 degrees Brix syrup and may also be composed of strawberry puree, sugar, ascorbic acid and citric acid. Use of ascorbic or citric acid is optional.

8. There shall be NO cooked product of any kind used.

9. Identity coding must be on the cases and primary containers.

11. USDA Inspection shall be made during on-line production or repacking of the product.

12. Drained Weight – Shall be a minimum of 60 percent of net weight.

**INSPECTION AND CHECKLOADING**

Requirements

Representatives of the AMS, Specialty Crops Program, Specialty Crops Inspection (SCI) Division (USDA Inspector) must perform the inspection and checkloading. See section X of the Master Solicitation. **The cost of inspection, samples taken for inspection, mailing of review samples submitted for evaluation, and any chemical analysis required for testing shall be for the account of the Contractor.**

Inspection of frozen products must be performed not more than 60 days prior to shipment. Whether each lot offered meets the product and container requirements of the purchase order must be determined on the basis of representative sample units. Representative sample units will be graded according to the Regulations Governing Inspection and Certification of Frozen...
Fruits and Vegetables and Related Products (7 C.F.R. Part 52), and United States Standards for Condition of Food Containers (7 C.F.R. Part 42.140), effective on the date of the Solicitation/IFB.

**Certification**

Subject to (See section X of the Master Solicitation) the acceptability of the quality, weight, packaging, and checkloading of the product must be evidenced by certificates issued by the USDA Inspector.

No product shall be shipped unless the USDA Inspector informs the Contractor that a designated lot is acceptable. Notice by the USDA Inspector that a designated lot scheduled for shipment does not meet requirements of the purchase order shall constitute rejection of such lot.

**Procedures**

The Contractor must give the USDA Inspector at least 7 days advance notice when scheduling inspection service. Prior to sampling, the Contractor must furnish the USDA Inspector with a list of codes and the approximate number of cases per code.

Contractors are encouraged to submit requests for inspection in writing with verifiable receipt notice, such as fax log, to alleviate possible miscommunication.

**Laboratory Tests**

The Contractor must allow 14 days after product sampling for laboratory tests (when required) to be completed and returned.

**Failure to Meet Specifications**

Any lot which fails applicable specifications prescribed herein will be rejected as not acceptable for delivery. If any lot of frozen fruit fails to meet the product or packaging requirement, the Contractor may request in writing that USDA accept delivery of the lot. USDA may, at its option, accept delivery, provided that the purchase price is the purchase order price less a discount, to be determined by the Contracting Officer.
