Understanding this Report P.2

National Overview Maps P. 3-5

Container Availability by Location:

- Charleston, SC P.6
- Chicago, IL P.7
- Cincinnati, OH P.8
- Columbus, OH P.9
- Dallas, TX P.10
- Denver, CO P.11
- Houston, TX P.12
- Kansas City, MO P.13
- Los Angeles and Long Beach, CA P.14
- Memphis, TN P.15
- Minneapolis, MN P.16
- New Orleans, LA P.17
- New York, NY P.18
- Norfolk, VA P.19
- Oakland, CA P.20
- Savannah, GA P.21
- Seattle, WA P.22
- Tacoma, WA P.23

Weekly Container Overview

- **Ports:** The ports of Los Angeles/Long Beach, New York, Norfolk, and Oakland are expected to have the most available containers among the reported port locations over the next 3 weeks. Container availability estimates have decreased from the previous week for each of these port locations. Over the next 3 weeks, availability is expected to increase for all container types in New York, all but 40ft high-cube containers in Los Angeles/Long Beach, and all dry container types in Norfolk. Availability in Oakland is expected to fall.
- **Inland Locations:** Among the reported inland locations, Dallas, Chicago, Memphis, and Columbus are expected to have the most containers available over the next 3 weeks. Dallas and Columbus saw increases over the previous week and availability in Chicago and Memphis fell. Availability in Dallas surpassed Chicago this week with significant increases for all container types in Dallas and decreases for all container types in Chicago.
- **Equipment:** Overall, availability for all container types combined was down more than 6,300 containers this week over the previous week.
 - Container availability continues to fall each week; only six of the reported locations saw an increase in availability over the previous week. Some of the largest decreases were in Kansas City, Charleston, and Savannah.
 - Availability in Houston and Tacoma increased this week over the previous week, though both locations are expected to be in a deficit status over the next 3 weeks, particularly for 40ft high-cube containers in Tacoma and 40ft dry containers in Houston.

• Overall, availability for 40ft high-cube containers is the highest this week of the five container types reported (see table). Each container type saw a decrease in availability this week this week over the previous week, which is can be expected this time of year.

Week to Week Comparison of Current Week Availability Estimates			
Container type	Week of Jan 30-Feb 5	Week of Feb 6-12	% Change
20ft dry	11,865	10,070	-15%
40ft dry	11,883	9,766	-18%
40ft high cube	18,113	16,667	-8%
40ft refrigerated	4,029	3,171	-21%
20ft refrigerated	314	204	-35%

Understanding this Report

The weekly Ocean Shipping Container Availability Report (OCSAR) provides a snapshot of container availability for westbound transpacific trade lanes at select intermodal locations around the country. The data presented in this report are gathered from the 8 member carriers in the Westbound Transpacific Stabilization Agreement (WTSA). The WTSA carriers include COSCO, Evergreen, Hanjin Shipping, Hapag Lloyd, Yang Ming Transport Corporation, OOCL, K Line, and Hyundai Merchant Marine.

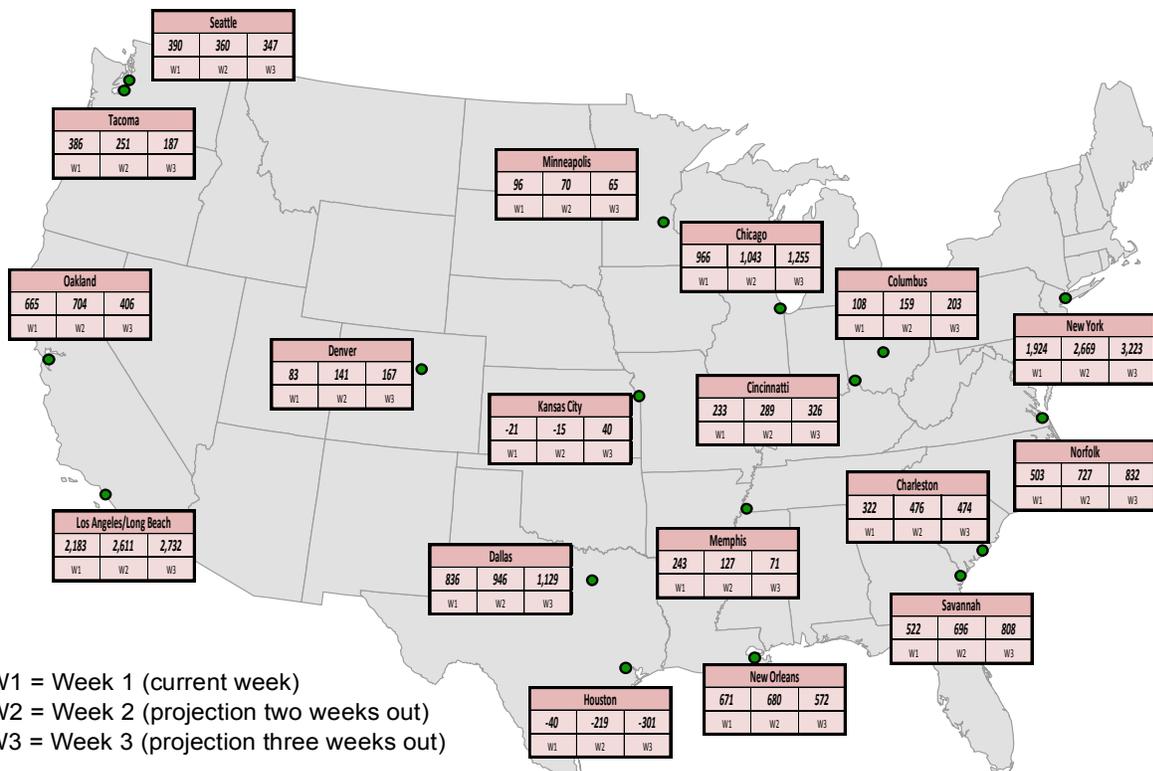

- The data are estimates of container availability per week by the participating carriers. The carriers determine container availability by comparing current supplies at each of the 18 intermodal locations with the demand for these containers based on up-to-date bookings or reservation information in the westbound transpacific trade lane.
- Each week, participating carriers report the estimated number of containers available for the current week (W1) as well as estimates for the subsequent 2 weeks (W2 and W3).
- Maps on pages 3–5 offer a national overview of weekly container availability, as well as an average of availability over the past 6 months. The weekly national data are derived from the sum of the individual carrier responses at each intermodal location.
- Individual carrier responses are presented by location on pages 6–23 and have been sorted from largest to smallest. To maintain carrier confidentiality, specific carrier identification is not provided.
- Carrier responses showing negative numbers, such as -29, should be interpreted as meaning that 29 containers are needed by shippers but the carrier is not able to supply them. A positive number, such as 64, would mean 64 containers are available that are not demanded. An indication of 0 means the carriers have the exact amount of containers needed based on current supply and demand estimates.
- In addition to the weekly container availability data, the participating carriers provide average weekly throughput data for the past 6 months. These data help readers understand the aggregate flow of containers that have moved through the 18 select locations by the 8 participating carriers over the previous 6 months. These data will only be updated every 6 months.
- Availability levels are subject to change, and may be affected by delays in return of equipment to carriers by shippers or consignees, and by free time restrictions imposed by railroads. Due to the dynamic nature of the container industry, carriers cannot be held responsible for the level of availability at the time of inquiry.
- Data presented in the report do not imply availability of chassis.
- Container availability estimates represent availability for all export cargo, not just agricultural products.
- USDA collects these data on a voluntary basis and cannot be held responsible for the status of container availability when a reader makes inquiry with an ocean carrier. USDA relies on the participating ocean carriers to ensure the data is accurate.
- Terminology:
 - 20ft Dry Container (20ft): A standard shipping container that is 20 feet long.
 - 40ft Dry Container (40ft): A standard shipping container that is 40 feet long.
 - 40ft High-Cube (HC): A shipping container which is 40 feet long and 9 feet, 6 inches tall (1 foot taller than a standard 40ft dry container).
 - 40ft reefer: A refrigerated shipping container which is 40 feet long.
 - 20ft reefer: A refrigerated shipping container which is 20 feet long.
 - Chassis: A wheeled frame to which a shipping container can be locked for storage or movement. (Plural chassis)

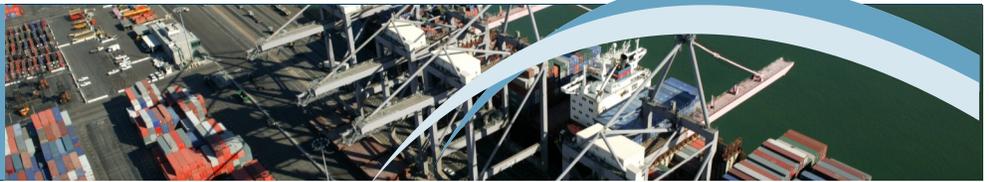

Six-Month Snapshot of Average Weekly Throughput

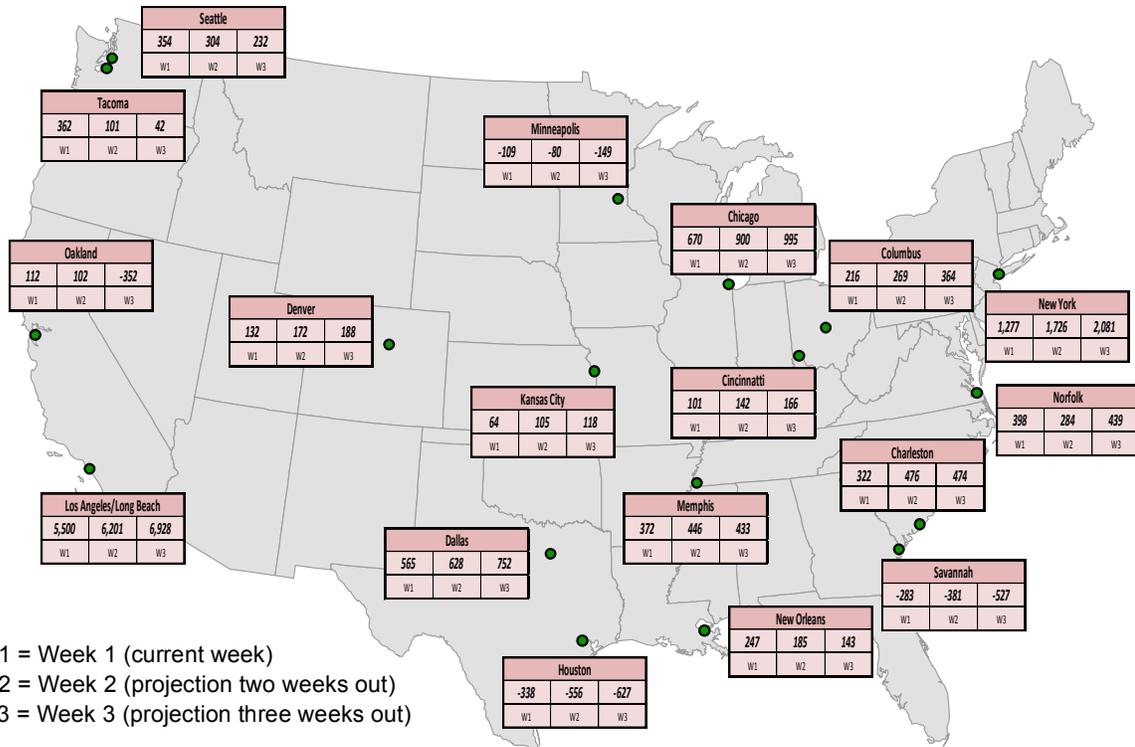

Average Weekly Availability for 20ft Dry Containers

Note: "." denotes no response from carriers.

Six-Month Snapshot of Average Weekly Throughput		
June 2012-November 2012		
Container Types	Average Total Weekly Throughput*	Range of Individual Carrier Responses
20ft	383	1...300
40ft	671	15...500
40ft High Cubes	797	76...600
40ft Refrigerated	493	0...203
20ft Refrigerated	4	0...4

*Data reflect the sum of the individual carriers' average weekly throughput over a 6-month timeframe

The U.S. Department of Agriculture (USDA) prohibits discrimination in all of its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex (including gender identity and expression), marital status, familial status, parental status, religion, sexual orientation, political beliefs, genetic information, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.
