April 25, 2012

Understanding this Report P.2

National Overview Maps P.3-5

Container Availability by Location:

Weekly Container Overview Report Highlights

- On average, the Ports of New York and Long Beach have the most containers available among the 18 locations reported. Availability at these locations is expected to increase over the next 2 weeks, until May 16.
- Availability of 20-ft containers at most locations is expected to rise the most over the next 2 weeks ending May 16. The exceptions include availability at Denver, Houston, New Orleans, Oakland, and Tacoma.
- Refrigerated containers are in greatest supply in New York, Norfolk, Seattle, and to a lesser extent Long Beach.
- Dry 40-ft containers are in greatest supply in New York, Long Beach, Norfolk, Dallas, Chicago, Memphis, and New Orleans this week. Carriers are reporting availability in Oakland and Savannah is particularly low for 40ft standard containers.
- At many of the reported locations, availability of 40-ft high-cube containers is greater than the availability of 40-ft standard container this week.

Charleston, SC	P.6
Chicago, IL	P.7
Cincinnati, OH	P.8
Columbus, OH	P.9
Dallas, TX	P.10
Denver, CO	P.11
Houston, TX	P.12
Kansas City, MO	P.13
Los Angeles/Long Beach, CA	P.14

Minneapolis, MN	P.16
New Orleans, LA	P.17
New York, NY	P.18
Norfolk, VA	P.19
Oakland, CA	P.20
Savannah, GA	P.21
Seattle, WA	P.22
Tacoma, WA	P.23

Understanding this Report

The weekly Ocean Shipping Container Availability Report provides a snapshot of container availability at select intermodal locations around the country. The data presented in this report are gathered from the 10 member carriers in the Westbound Transpacific Stabilization Agreement (WTSA). The WTSA carriers include, APL, COSCO, Evergreen, Hanjin Shipping, Hapag Lloyd, Yang Ming Transport Corporation, OOCL, NYK Line, K Line, and Hyundai Merchant Marine. The following items provide guidance to better understand the information presented within:

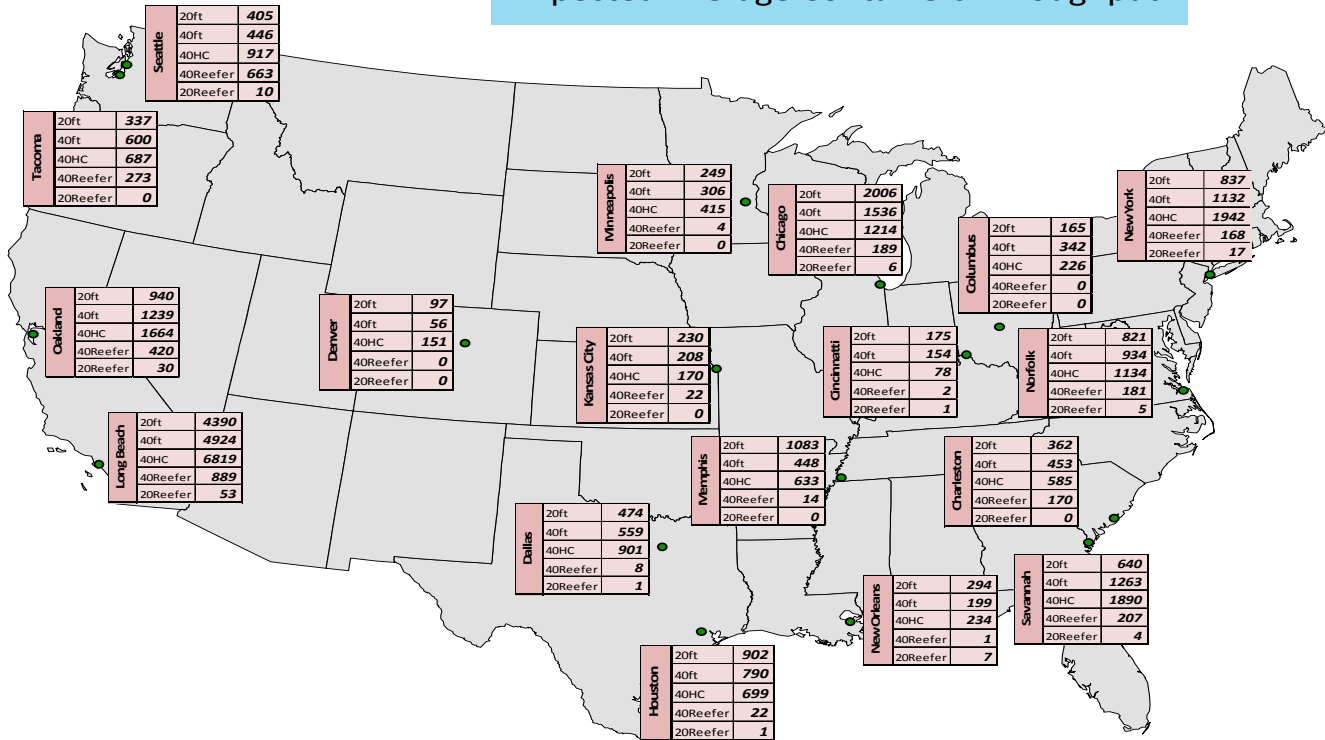

- Each week, participating carriers provide the estimated number of containers available for the current week (W1) as well as estimates for the subsequent 2 weeks (W2 and W3). The data are presented for 18 intermodal locations.
- These data offer an estimate of container availability per week by the participating carriers. The carriers determine container availability by comparing current supplies at each location with the demand for these containers based on up-to-date bookings or reservation information. The availability levels are subject to change, and may be affected by any delays in return of equipment to carriers by shippers or consignees, and by free time restrictions imposed by railroads. Due to the dynamic nature of the container industry, carriers cannot be held responsible for the level of availability at the time of inquiry.
- For purposes of presentation of the data, the carriers have been randomly distributed. Specific carriers have not been identified.
- In addition to the weekly container availability data, the participating carriers provide average weekly throughput data for the past 6 months. These data help readers understand the aggregate flow of containerized cargo that moves through the 18 locations by these 10 ocean carriers.
- Container availability estimates represent availability for all export cargo, not just agricultural products.
- USDA collects these data on a voluntary basis and cannot be held responsible for the status of container availability when a reader makes inquiry with an ocean carrier. USDA relies on the participating ocean carriers to ensure the data is the most accurate.
