To Whom It May Concern:

We own a dairy farm located in the Shenandoah Valley of Virginia. We are the fourth generation to farm this farm. With the increase in expenses such as feed, fuel, fertilizer, etc., there will not be a fifth generation to farm this farm because we cannot afford to keep subsidising the manufacturers inefficiencies. We have no where to recoup our expenses. Why should we be told to become more efficient while the manufacturers just pass their expenses back on us? Where is our allowance for the increased costs that we have incurred? Why should we go deeper in debt while their CEOs make hundreds of thousands of dollars a year for doing a poor job? (Like at Home Depot!) Just say NO to the manufacturing allowance and tell the manufacturers to do what they tell us, IMPROVE YOUR EFFICIENCY!!!

Thank you,
Nelson and Beverly Sine and family
