In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotope, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at [How to File a Program Discrimination Complaint](#) and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

1. PURPOSE

This directive specifies the procedures for obtaining pesticide residue testing services for grain under the U.S. Grain Standards Act (USGSA).

2. REPLACEMENT HIGHLIGHTS

This directive supersedes FGIS Program Directive 9180.40, Pesticide Residue Testing for Grain, dated November 1, 2022. This directive updates responsibilities of the Technology and Science Division (TSD), Official Service Providers (OSP), including Field Offices (FO) for official samples. TSD will issue certificates to applicant for official samples.

Official samples must be accompanied with a 907 Form (submitted on behalf of the applicant) and the Load Orders. Link to 907 Form was included. Finally, reporting results section is clarified and the transmittal form was updated.

3. BACKGROUND

Upon request, the United States Department of Agriculture (USDA), Agricultural Marketing Service (AMS) Federal Grain Inspection Service (FGIS) provides pesticide residue testing service for grains.

The service is performed by FGIS, Technology and Science Division (TSD) in Kansas City, Missouri. The service is provided using gas chromatography/tandem mass spectrometry and/or liquid chromatography/tandem mass spectrometry for routine compounds.

- a. Compounds Tested. FGIS tests for the following residue compounds:
 - (1) Routine Compounds. Compounds are listed in Attachment 1 by commodity. The applicant must select which lists will be tested for in the sample.
 - (2) Special Compounds. Compounds are by request and are subject availability. Contact TSD's Analytical Chemistry Branch (ACB) at 816-702-3800 for expected sample availability, pricing and turnaround time.
- b. Types of Services. There are three types of pesticide residue testing services available:
 - (1) Official Sample-Lot Service. Analysis is based on an official sample obtained and analyzed by official personnel.
 - (2) Submitted Sample Service. Analysis is based on a sample submitted by the applicant for service and analyzed by official personnel.

- (3) Warehouseman's Sample-Lot Inspection Service. Analysis is based on an official sample obtained by a licensed warehouseman sampler and analyzed by official personnel.
- c. Basis of Determination. All grains are tested on the basis of the sample as a whole. Shiplots and combined lots are tested on a composite sample. Upon request, testing can be performed on a subplot basis.

4. RESPONSIBILITIES

- a. Applicant for Service. The applicant may request the service through the Official Service Provider (OSP) (official sample lot inspection) or mail a sample directly to TSD. For official samples load orders a 907 Form is required. The 907 Form can be found at <https://www.ams.usda.gov/sites/default/files/media/FGIS907>. The request must include the applicant's name, address, and telephone number; and the desired test(s).
- b. Technology and Science Division.
 - (1) Official Sample-Lot Service and Warehouse Samples. For official sample lot service and warehouseman's samples sent to TSD, TSD is responsible for performing the requested test, maintaining a file sample, issuing the certificate, and billing the applicant for the services.
 - (2) Submitted Sample Service. For submitted samples, TSD is responsible for performing the requested test, maintaining a file sample, issuing the certificate, and billing the applicant for the services.
- c. Official Service Providers including Field Offices.
 - (1) Official Sample Lot Services and Warehouse Samples. For official sample lot service and warehouse samples, FGIS Field Offices and Official Service Providers must complete a 907 Form on behalf of the applicant, Pesticide Residue Testing Transmittal Form (see Attachment 2), forward the sample load orders, and form to TSD for testing.
 - (2) Submitted Sample Service. FGIS Field Offices and Official Service Providers must direct applicants to forward samples directly to TSD for testing and certification.

5. PREPARING AND FORWARDING SAMPLES

- a. Sample Preparation. From a representative sample, use a Boerner divider to obtain a minimum 500-gram sample and place in an airtight container. Retain a second sample of at least 500-grams as a reserve in an airtight container (e.g., double-sealed plastic bag) in case the first test sample is lost and must be resubmitted. Work samples may be used once they have served their intended purpose.

- b. Sample Forwarding. Place the container inside a canvas bag and include a copy of the certificate, a copy of the request for service, and completed Pesticide Residue Testing Transmittal Form (see Attachment 2).

Provide all necessary information to ensure timely results. Write "PAS" on the shipping label in large bold letters. If the applicant arranges for sample delivery, affix a blank tag to the sealed sample marked accordingly with the desired test service before surrendering it to the applicant.

Mail all samples to:

USDA, AMS, FGIS, PAS
Technology and Science Division
10383 North Ambassador Drive
Kansas City, Missouri 64153-1394

6. REVIEW INSPECTIONS

- a. 7 CFR 800.125 and 800.135 permit a review inspection on either official grade/factors or official criteria. When requested, a review inspection for official grade/factors and official criteria may be handled separately even though both sets of results are reported on the same certificate.
- b. Applicants may request either qualitative or quantitative review analysis unless the original or a review analysis was quantitative. Then, only a quantitative analysis is available. All review inspection results replace previous results.

7. CERTIFICATION

- a. Residue results may be reported on a separate certificate or on the certificate for grade (at the applicant's option). When residues are certified for export certificates, the date of the certificate is the date that loading was completed. The date of domestic certificates is the date that pesticide residue testing results are received. See the Grain Inspection Handbook, Book IV, Chapter 3, Certificates, for further certification instructions.
- b. Certify the test results in the "Results" section of the certificate:
 - (1) Show the results that meet or exceed the detection limit as reported by TSD. Occasionally, detection limits for certain compounds may need to be higher than the limits shown in the compound lists based on quality control results.

For example: Fluridone 10.5 ppb
Oxadixyl 21 ppb
Malathion 610 ppb

For test results that are less than the detection limit, certify as less than the detection limit.

For example: Aldrin < 20 ppb, Malathion < 10 ppb

c. Optional Certification:

If requested by the applicant, use the following statement in the “Remarks” section of the certificate.

“(Name of pesticide) residue less than (record contract specification).”

8. FEES

Fees are shown in FGIS Program Directive 9180.74 found on the AMS FGIS website at <https://www.ams.usda.gov/about-ams/fgis-program-directives>.

Testing fees are applicable to any level of service (original inspection, review inspection, appeal inspection, or Board appeal inspection) and do not include a sampling service fee that, if applicable, is assessed separately in accordance with the applicable fee schedules.
