

INTRODUCING FAME 2.0

Leveraging a new USDA AMS resource to visualize your food system

Are you looking for an effective way to describe your food system or explore opportunities to strengthen important indicators of your food system? Join us **Wednesday, October 21 at 2 p.m. Eastern Time** to explore Food and Agriculture Mapper and Explorer (FAME) 2.0, an updated, interactive resource designed to make food system data more accessible and useful for communities, organizations, and practitioners.

In this webinar we will:

- Introduce FAME 2.0 and the data it includes
- Explore the range of agriculture, economic, health, and community indicators available in the tool
- Demonstrate how to create maps and compare them with other communities
- Share examples of how others have used FAME to explore real-world food system questions
- Highlight ways you can incorporate FAME into your own planning, research, grant writing, and community development efforts

Whether you are new to food system data or looking for a more efficient way to explore and communicate impact and things happening in your community, this webinar will give you the tools and ideas to get started with FAME 2.0.
