Local Foods, Local Places

A Community-Driven Action Plan for Passaic, New Jersey

A technical assistance program of the U.S. Environmental Protection Agency, U.S. Department of Agriculture, U.S. Department of Transportation, Centers for Disease Control and Prevention, Appalachian Regional Commission, and Delta Regional Authority
Local Foods, Local Places

Community Story
Passaic is a densely populated city of about 70,000 people living in 3.2 square miles. It is located about 15 miles west-northwest of Manhattan Island. Within Passaic, between New Jersey Highway 21 and the Passaic River, lies the Eastside neighborhood. Passaic is home to a predominantly (71.7%) Hispanic population, many of whom live in Eastside, including many who have immigrated from Mexico (Figure 1).

![Market Street store fronts, Mayor Blanco and Business Administrator Rick Fernandez](image.png)

The Eastside neighborhood of Passaic has some challenges. It is the least affluent of the Passaic neighborhoods and has seen a significant lack of investment in the recent past.
street and sidewalk infrastructure is older and in poor condition in some spots, and access to the Passaic riverfront has not been developed as a community asset.

While the neighborhood has a strong sense of community internally, it can be somewhat isolated from the city at large due to English language barriers faced by many members of the immigrant population. A poor reputation with regards to safety and lack of awareness of the neighborhood’s offerings seem to keep some Passaic residents away from the restaurants and other businesses in Eastside, contributing to its isolation.

While there are many retail food outlets in Eastside (Figure 2), they are disconnected from the local foods system. Procurement of locally produced food is not in evidence at most of the food vendors in the area, and the city has no farmers markets on the Eastside.

¹ SNAP is the federal Supplemental Nutrition Assistance Program. SNAP Retailers are those stores (including farmers markets, corner stores, supermarkets, and more) that accept SNAP benefits.
However, there are many opportunities and assets in Eastside. Unlike many older northeast cities, Passaic has a growing in population and has experienced renewed investment in recent years. Recently, the city adopted new mixed use zoning for the Market Street area that supports increasing housing in this established neighborhood. This is consistent with Smart Growth principles, and will increase demand for food purchases. Nearly all of the commercial areas in the City including Eastside are part of the Passaic Urban Enterprise Zone, a designation that confers eligibility for a range of state tax credits and incentives.

Currently, there are several redevelopments occurring or in planning stages in Eastside, including a new 200,000 square foot commercial adaptive reuse project which is under construction, several residential adaptive reuse and new construction projects, and a 2,500 seat arena. An additional large-scale project site on the corner of Market Street near the Passaic River is controlled by a developer who is a long-time owner in Passaic and is seeking partners and concepts that can advance community goals.

The Eastside includes a range of food industry businesses, most notably food import and distribution companies and restaurants. A vibrant, five block row of 17 restaurants on Market Street offers a range of Latin American cuisines including Cuban, Mexican, Dominican, Peruvian, and Columbian. A few Polish foods shops are also present, linking Eastside to a much earlier wave of immigration.

The Eastside has an abundance of food retail shops, many of which are small-scale. Most residents are in walking distance to a food store, and the area is not considered to lack food access in general. Additional local food assets

**SMART GROWTH PRINCIPLES**

- Mix land uses.
- Take advantage of compact building design.
- Create a range of housing opportunities and choices.
- Create walkable neighborhoods.
- Foster distinctive, attractive communities with a strong sense of place.
- Preserve open space, farmland, natural beauty and critical environmental areas.
- Strengthen and direct development towards existing communities.
- Provide a variety of transportation choices.
- Make development decisions predictable, fair, and cost effective.
- Encourage community and stakeholder collaboration in development decisions.

include a community garden in the Eastside neighborhood run by City Green, a not-for-profit agency and potential project implementation partner. City Green is looking to relocate its Passaic Farm Stand and could potentially move into Eastside.

Another opportunity in Eastside is that the City has been awarded $750,000 in grant funding to update the street and sidewalk infrastructure on Market Street. The City is exploring how streetscape improvements can best be leveraged to advance economic development goals on Market Street, including helping to establish it as a culinary corridor. The City has also recently passed new zoning regulations that make it easier to develop mixed-use buildings with residential units above first floor commercial.

The Eastside also has strong, active community organizations, Mi Casa es Puebla (“My Home is Puebla”), that provides education and health services. The organization’s Health Coordinator and Executive Director participated fully in the Local Foods Local Places workshop and were excited in the potential of several of the identified actions to dovetail with other efforts of the organization. Another participant was the local Boys and Girls Club, which has served the neighborhood for over 100 years, and is working with City Green on a community garden project.

Project Assistance

In 2015, the Passaic Enterprise Zone Development Corporation requested assistance through the Local Foods, Local Places program to work with the community to develop a vision and action plan that would increase access to healthy, local food and strengthen the food-related businesses in the Market Street area to promote economic development and improve quality of life for residents. The Local Foods, Local Places program is supported by the U.S. Environmental Protection Agency, U.S. Department of Agriculture, U.S. Department of Transportation, the Centers for Disease Control and Prevention, the Appalachian Regional Commission, and the Delta Regional Authority. Implementing the actions described later in this plan can bring several benefits to the community including:

- More economic opportunities for local farmers and business.
- Better access to healthy, local food, especially among disadvantaged groups.
- A revitalized downtown that is the economic anchor of the community.

Using development of a local food system to support these broad community goals is consistent with smart growth approaches that use investments to create places attractive
to people and businesses. Ten principles of smart growth were developed by the Smart Growth Network, an organization of diverse partners who work to encourage development that benefits the economy, community, public health, and the environment (see sidebar on previous page).

Figure 3. The diagram above lays out all of the steps leading to this action plan.

Engagement
Leading up to the workshop, a local steering committee and federal partners convened three times by conference call and webinar to discuss the community’s goals and plan the event. The local steering committee was comprised of the following participants:

- Chair: Joseph Buga, City of Passaic/Passaic Urban Enterprise Development Corporation
- Kathleen Caren, Open Space Coordinator at City of Passaic
- Nico Caraballo, Grants Managers for Millennium Strategies, LLC
- Sara Elnakib, Family & Community Health Sciences Educators at Rutgers
- Adam Farrah, Vice President of Union County Economic Development Corp.
- Simone Flores, Program Manager of Passaic Community Development
- Miryam González, Health Coordinator at Mi Casa Es Puebla
- Colin Leary, Director of Lynx Redevelopment
- Jennifer Papa, Executive Director of City Green
- Dr. Patricia Ruiz Navarro, Director of Mi Casa Es Puebla
The main sessions of the Passaic workshop were held on June 1st and 2nd, 2016 at Mi Casa Es Puebla in the Eastside neighborhood. Prior to the workshop’s first public session, the technical advisory team, local steering committee, and federal partners participated in an informal lunch and community tour. Mayor Dr. Alex David Blanco led the tour, stopping to talk with several business owners and developers.

Over three dozen people attended the workshop, with many participating both days. See Appendix A: Workshop Attendees for details of workshop participants. A compilation of photos from the workshop and tour can be found in Appendix B: Workshop Photo Album. Presentation slides from both days are found in Appendix C: Presentation Slides. A link and visual representation of results of the asset mapping exercise are found in Appendix D: Community Asset Mapping Results.

Vision
The community’s aspirations include improving access to healthy, local foods in the Eastside neighborhood with a particular focus on the Market Street corridor. There is considerable excitement and optimism that Eastside and Passaic are “in the midst of a food renaissance.” Workshop participants deemed the vision for a culinary corridor as a “brilliant” idea and promising opportunity to increase healthy, local food options. See Appendix E: Workshop Exercises for details.

A vision for the neighborhood emerged where the health benefits of eating local, healthy food are well understood, businesses offer healthy, local options, and the area is
known as a culinary destination. Comparisons were made to nearby neighborhoods in Paterson and elsewhere that are known for the richness of offerings in a particular family of cuisine, such as Middle Eastern food.

In one exercise, participants made visual representations of successful integration of local foods in their community. Some ideas represented in the projects included: a local foods gathering place; gateway entrance signs; expanded/safer sidewalks; planter boxes; places to get kids involved; community gardens; greenery; outdoor seating areas; bike lanes; patrol and enforcement for safety; strings of lights above the street; public art; showcase farm plots; fruit stands; and better parking management. More comments from the City as Play activity can be found in Appendix E: Workshop Exercises.
Opportunities and Challenges
Throughout Day One, workshop participants had engaging conversations about their perceptions of opportunities and challenges in the Passaic Eastside neighborhood, as they relate to local foods goals. These included:

**Opportunities / Assets**
- A rich cultural heritage
- Diversity of the culture and food
- Community garden
- Community-minded (re)developers
- Eager for education, resources; willing to move ideas forward
- Streetscape & healthy corner store funding
- Zoning update, staple foods ordinance

**Challenges**
- Need education about local foods
- Families with limited food budgets
- Need gathering spaces
- Need more green spaces
- Need wider sidewalks, bike lanes
- Need additional funding
- Low car ownership

**Action Plan**
The following five overarching goals and action items were finalized at the workshop with input from all participants. A detailed description of the goals and actions items can be found in Appendix F: Action Plan.

**Goal 1: Increase sourcing of local, healthy foods to businesses**
- Action 1.1 Assess restaurant and food business owners’ awareness, needs, interest, and concerns related to offering local and healthy food
- Action 1.2 Offer examples and information to local restaurant owners about meeting customer demands for healthy menu options. Share community health data.
● Action 1.3 Provide information to businesses about financing & business support resources available to support healthy changes
● Action 1.4 Identify potential sites and development partners in Eastside to host the Buying Club (cooperative to purchase food directly from farmers) and Food Hub.

**Goal 2: Strengthen place-based identity**

● Action 2.1 Establish a cohesive visual identity to brand the Market Street area (Gateways, signage, public art + murals, graphic standards)
● Action 2.2 Establish a citizen-led commission to explore the potential of a public plaza along Market Street; Establish a community engagement plan.
● Action 2.3 Improve neighborhood cleanliness (new paint jobs, address code violations, set up Clean & Green program to clean regularly, awareness campaign).
● Action 2.4 Lobby the City of Passaic to reinstate the facade improvement program (covering 50% of costs up to $3,500).

**Goal 3: Increase local foods accessibility & affordability**

● Action 3.1 Add a weekly farmers market and add more Veggie Mobile stops in Eastside
● Action 3.2 Get corner stores to offer fresh, healthy options
● Action 3.3 Promote community gardens with input and ownership from residents and local associations. Offer transportation and other accommodations to encourage participation by seniors.
● Action 3.4 Engage transportation planners to improve residents’ public transportation access to food stores

**Goal 4: Develop resources for healthy food access & wellness**

● Action 4.1 Improve walkability in the Market Street area, e.g. by increasing security, beautifying the area, removing obstacles along sidewalks, and providing comfortable places to rest
● Action 4.2 Create space for physical activity in the Market Street area, e.g. by cleaning up brownfields and empty lots for parks, playgrounds & walking paths (after identifying owners and acquiring property, as necessary).
● Action 4.3 Provide nutrition education for residents, e.g., through: increased education at hospital discharge, prenatal nutrition programs, health workshops, local foods classes, identify Association of chefs, incentives for chefs to learn healthy cooking techniques
Goal 5: Enhance & promote the Market Street area as a distinctive cultural corridor

- Action 5.1 Establish a business group for the Market Street area with a branding committee
- Action 5.2 Evolve the business group into a Business Improvement District
- Action 5.3 Create branded events, e.g. restaurant night, food festival, Cinco de Mayo festival, senior week, jazz night, chef cook-off
- Action 5.4 Explore getting outdoor seating: Do ordinances need changing? Who (which restaurants) are interested? Where is there space?

Implementation

The Action Plan identified many short-term action steps including several that did not require new funding sources. The project defines short-term action steps are those that can be completed within six months. Some of these Actions include:

- Action 1.1 Assess restaurant and food business owners’ awareness, needs, interest, and concerns related to offering local and healthy food
- Action 2.3 Improve neighborhood cleanliness - Start talking to business owners
- Action 2.4 Lobby the City of Passaic to reinstate the facade improvement program - Begin conversations
- Action 3.1 Add a weekly farmers market and add more Veggie Mobile stops in Eastside - Farmers Market operating monthly (Note: weekly market has been established as of July 2016. See Appendix H for the Market poster).
- Action 3.2 Get corner stores to offer fresh, healthy options - Work to get 2-3 stores on Market Street/Eastsie included among the 6 pilots being selected for the Healthy Corner Store initiative.
- Action 4.1 Improve walkability in the Market Street area - Compile “before” photos, crime report, and a baseline survey of physical and perceptions
- Action 4.2 Create space for physical activity in the Market Street area - Identify owners and possible sites, and strategies for funding.
- Action 4.3 Provide nutrition education for residents - Use existing Hospital educational materials.
- Action 5.1 Establish a business group for the Market Street area with a branding committee - Call for interest and hold the first meeting
- Action 5.4 Explore getting outdoor seating - Assign project lead at first meeting
