| **Low Carbon Beef, LLC** | Verification of reduced greenhouse gas emissions in a group of cattle using a comprehensive life-cycle assessment model that incorporates impacts associated with management practices and cattle performance throughout the life of the animals. A qualified group of cattle must have life-cycle greenhouse emissions at least 10% lower than industry baseline based on the Low Carbon Beef Scoring Tables. The following specific points are verified for each group of cattle:  
  - Identify the candidate cattle by a unique identification number  
  - Identify the cattle owner(s) of candidate cattle  
  - Identify and verify relevant management practices associated with candidate cattle, including verification of all raising locations  
  - Identify and verify relevant cattle performance of candidate cattle, including age verification  
  - Identify the Emissions Score of candidate cattle determined by the Scoring Tables  
  - Assign certification status (Qualify, Disqualify) and provide the certificate | **Livestock:** *Cattle (Beef)*  
**Location(s):** Producers, Backgrounders/Stockers, & Feedyards
