

Federal Purchase Program Specification Bulk Pack Chicken and Chicken Legs: December 2022

I. Purpose

This document provides the procedures USDA, AMS graders (graders) will utilize with the certification of bulk pack chicken and chicken legs to the [December 2022 Federal Purchase Program Specification \(FPPS\)](#). The grader must read this procedure carefully and note what items must be observed during sampling, packaging and packing, labeling, loading and shipping, and the preparation of worksheets and certificates. The grader will not proceed until their supervisor has reviewed the [QAD 620: USDA FPPS – Poultry General Requirements](#) and this procedure with them.

Bulk pack chicken and chicken legs must be processed and packed as outlined in the FPPS. The commodity must not be processed and packaged more than 60 calendar days prior to the first day of the delivery period for each sales order. Chilled commodity must be delivered to destination within 7 calendar days after the date of harvest.

Product & FPPS Item #	¹ Trade Description #	Grade Requirements	Wt. Req.
Bulk Pack, Chicken Large (100103)	70102	B or Better	WOGS must weigh 3.75 lbs. or over.
Bulk Pack, Chicken Legs, large (100113)	70901	B or Better	WOGS must weigh 7.00 lbs. or over <i>or</i> large legs must each weigh 13.6 oz. or over.

¹[AMS 71 Trade Descriptions for Poultry - Chicken](#)

II. Procedures

A. Processing and Fabrication

1. Requirements for Meat and Skin

Graders must check 30 whole birds or legs for defects for products marked as U.S. Grade B to determine compliance with the FPPS requirements using the sampling frequency and acceptance criteria found in SPL-1. Results must be recorded on the LP-232L1.

2. Weight Range

Dependent upon the weighing method utilized by the plant, carcass weights must be checked by weighing ten carcasses for weight requirements as outlined in the FPPS and according to procedures established in [QAD 648: Poultry Weight Range Certification](#). Samples found with weights exceeding allowable tolerances (+/- 10% per [QAD 607: Portion Control and Weight Range Certification](#)) will require retention of product representing the sampling interval. Results must be recorded on the LP-232L2

B. Certification and Delivery

1. Shipping Requirements

An LP-210P: *USDA Poultry Products Grading Certificate* must accompany each shipment to the further processing plant. The Purchase Order number, Sales Order number, Item number, and seal number must be included on the certificate. Product must be delivered fresh chilled unless the contractor and further processor agree in writing to deliver frozen product. A copy of this written agreement must be provided to the grader at the processing plant location. Test weighing will be performed at destination, except when product is frozen or when the delivery plant is the same as the origin plant (in-plant delivery). Plant management is responsible for assuring that the weight will meet purchase order requirements at destination. Show only the marked weight on shipping certificates.

2. Destination Examination

An LP-210P: *USDA Poultry Products Grading Certificate* must also be issued for each incoming load of bulk pack chicken. The costs of the destination examination will be charged to the contractor. If the destination examination and test weighing cannot be accomplished at time of delivery, contact your supervisor who will provide additional staffing. The grader must record product temperatures at time of arrival on the test weight certificate issued. Acceptable temperature range for chilled product is 26°F to 40°F (-3.3°C to 4.4°C). Product arriving at destination with non-complying temperatures must be retained and reported to the applicable regional office. The grader must verify that the shipment arrived within the time frame of harvest as outlined in the FPPS. Chilled commodity must be delivered to destination within 7 calendar days after the date of harvest.

Each delivery unit (36,000 pound truckload) must be test weighed upon delivery except for frozen product. The net weight of each delivery unit will be determined by performing an official test weighing according to [QAD 611: Net Weight Examination](#). Also, all test weighing must be performed on a direct net weight basis at destination.

For shortages/overages, graders must record the actual total net weight in the remarks section of the official certificate. If product is short weight, calculate the total shortage, deduct it from

the marked weight, and show the total net weight in the remarks section. All weight calculations must be recorded on the LP-211. For delivery units weighing less than 36,000 pounds, place the product under official retention and contact the regional office for further instructions. No notification by the grader is necessary unless the product is retained. The destination grader must return the original of the destination test-weighing certificate to the origin plant.

3. In-Plant Deliveries

In-plant deliveries may be made on a lot or subplot basis as provided for in the FPPS. Sublotting for in-plant deliveries must be in accordance with the following provisions:

- (a) Each subplot offered will be test weighed as a separate lot.
- (b) All sublots must be listed on the destination certificate that shows the test weight results separately for each subplot.
- (c) Samples for each subplot may not be selected until the subplot is complete.
- (d) Origin and destination certification may be recorded on the same certificate. Record "In-plant Delivery" in the product type and class section of the certificate.

Exhibits:

Exhibit 1 - LP-210P Bulk Pack Origin Certificate

Exhibit 2 - LP-210P Bulk Pack Destination Certificate

Exhibit 3 - LP-210P Bulk Pack In-Plant Delivery Certificate

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at [How to File a Program Discrimination Complaint](#) and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

Test weighing performed on mm/dd/yyyy at hh:mm am/pm.

REMARKS:

This is a bulk load purchased under the Standard Yield Program.

Product received in satisfactory condition with seal intact.

Product temperature range: 34°F- 38°F.

The product was shortweight 11.0 pounds on 2 samples:

11.0 lbs / 2 samples = 5.5 lbs shortweight x 24 combos = 132 lbs shortweight.

Total weight for the load is 36,010 lbs.

*Net weight limited to 36,000 lbs per the specification requirements.
