Other Terms
Basis will be the average of the daily CME closing prices to determine a weekly close of the nearest CME futures contracts for lean hogs and subtract the CME average from weekly cleaned up cost of market hogs for the same time period, at the packer facility. The corresponding weeks for the most recent three-year period will be averaged to produce a monthly basis. A factor of \( \frac{1}{4} \) of one standard deviation will be added to the value used for each week of the month. The simple average of the most recent 36-month basis calculations will be the Basis.
