Kiolbassa Provision Company	[QAI] Quality Assurance International	1	Certified	San Antonio	Texas	United States of America	HANDLING: Other: Beef Sausage, Beef Smokies, Jalapeno Sausage

14 Certified Operations In San Antonio 764 in Texas | 23 Certifiers Certifying in Texas

Welcome From USDA Leadership

- Secretary Sonny Perdue
- Deputy Secretary Steve Censky
- Under Secretary, Marketing and Regulatory Programs (MRP) Greg Ibach
- Acting AMS Administrator Bruce Summers

Hello from Under Secretary Ibach!

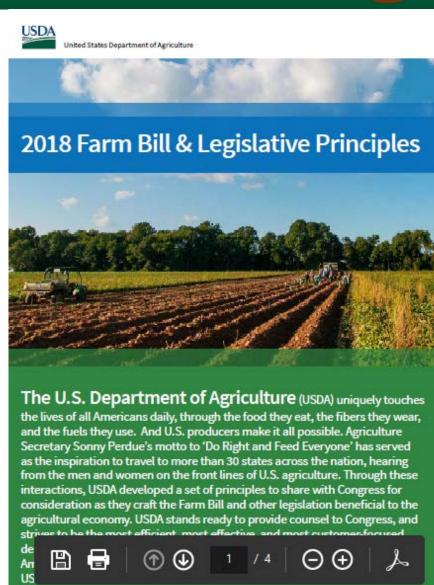

- Sworn in October 30, 2017
- Nebraska's Director of Agriculture since June 2005
- Inducted into the Nebraska Hall of Agricultural Achievement
- Former President of the National Association of State Departments of Agriculture

Secretary's Principles for Organic: Farm Bill

- Protect the integrity of the USDA organic certified seal.
- Deliver efficient and effective oversight of organic production practices, to ensure organic products meet consistent standards.

Core Themes

- Integrity of the Organic Seal
- Enforcement
- Efficiency and Customer Service
- Technology Innovation

Hello from Team NOP!

INTEGRITY - Development Complete!

- Development Complete!
- We are now in "Operations and Maintenance"
- Many thanks to our Certifier User Group!

Now, It's All About the Data

- INTEGRITY is a learning curve!
- Success = Data Quantity and Quality
- Key Examples:
 - Regular data updates
 - Use of taxonomy to classify products
 - Including acreage and livestock counts
 - Complete information (optional fields)

"Investing in INTEGRITY" Awards

- Technology innovation supports oversight, efficiencies, and effective customer service.
- Organic Integrity Database Data Quality Dashboard
 - Launched in Fall 2017
 - Certifiers can see what they are doing well with their data, and what they could improve on.
- "Investing in INTEGRITY" Awards:
 - Awarding to top 6 certifiers based on data quality and quantity at the start of 2018.

"Investing in INTEGRITY" Winners!

- CCOF: California Certified Organic Farmers
- County of Marin Organic Certified Agriculture
- New Jersey Department of Agriculture
- NOFA-NY Northeast Organic Farming Association of New York
- One-Cert, Incorporated
- OTCO: Oregon Tilth Certified Organic

Let's Talk ACREAGE!

- Organic farm acreage is important information to deter fraud, identify market opportunities, and for data analysis and reporting.
- Plan: Acreage working session in late February:
 - If you are providing acreage, how do you do it?
 - If you are considering providing, learn ways to approach it!
- Interested? See Jenny at a break!
 Or write to: Stacy.Swartwood@ams.usda.gov

Instruction on Imports

Interim Instruction: Maintaining the Integrity of Organic Imports (NOP 4013) – 10/25/2017

- Regulatory requirements and best practices for certifiers overseeing organic imports.
- Certification and recordkeeping requirements: system plans, audit trails, onsite inspections.
- Certifier responsibilities for review/verification.

Next Steps

- Continued Investigations
- Increase Field Visits and Unannounced Inspections
- Follow-up on Certifier Directives
- Continue Certifier Audits
- Advance Collaboration with Federal Partners
- Plan New Technology Initiatives
- Support NOSB Work on Imports

Seeking Participants for NOSB Panel!

- We are inviting nominations for certifier and industry representatives to serve on a panel about imports
- We are specifically seeking handlers, brokers, or others with experience and insights about protecting organic integrity in complex supply chains.
- You can nominate yourself or someone else.
- Send nominations by email to <u>Jennifer.Tucker@ams.usda.gov</u>. by February 28.
- Include name, contact information, why you or your nominee would be a good choice.

Enforcement Depends on All 3

Office of Inspector General (OIG) Report

September 2017

- Published in September 2017
- Includes Audit
 Process, Findings,
 and AMS
 Response

Background

- USDA's Office of Inspector General (OIG) conducts independent audits and investigations of the Department's programs and operations
- Previous NOP Audits:
 - Program-Wide Audits (2005, 2010)
 - National List Audit (2012 No Findings)
 - -Organic Milk Audits (2012, 2013)

Context for OIG Audit

 GOAL: To evaluate AMS' controls over the approval and oversight of NOP's agreements for international trade and the import of organic products

Four OIG Findings

- 1. AMS' process for determining equivalency between the U.S. organic regulations and foreign countries' standards was not fully transparent.
- 2. NOP organic import documents were not verified at U.S. ports of entry.
- 3. Controls over organic products fumigated at U.S. ports of entry were inadequate.
- 4. Onsite audits for existing agreements were not conducted in a timely manner because AMS has no established requirements for frequency.

Finding 1: Transparency

OIG:

Develop and implement a procedure to document and disclose final resolution of all foreign country organic standards identified as having differences from USDA organic standards.

AMS:

AMS will document and disclose final variances from its side-by-side analysis of organic standards.

Finding 2: Import Verification (1 of 3)

OIG:

Execute a Memorandum of **Understanding (MOU)** between AMS and Customs and Border Protection (CBP) to obtain assistance in reviewing import certificates from countries with established equivalence arrangements at U.S. ports.

AMS:

- AMS supports expanding the MOU with CBP.
- CBP officials have limited capacity and no current authority to review organic imports or NOP import certificates.
- AMS will develop a report outlining how AMS and CBP could collaborate.

Finding 2: Import Verification (2 of 3)

OIG:

Request that CBP update the **Automated Commercial** Environment (ACE) system message sets to provide CBP officials with instructions for reviewing NOP import certificates at U.S. ports of entry and the actions to take if they are not found.

AMS:

- NOP import certificates are only required from the European Union, Switzerland, Korea, and Japan.
- AMS will request access to additional areas of ACE.
- AMS has submitted organic message set proposals to CBP.

Finding 2: Import Verification (3 of 3)

OIG:

Develop and implement a plan to verify NOP import certificates at U.S. ports of entry, identify fraudulent import certificates, and capture organic import data.

AMS:

- AMS will prepare a needs assessment for an organic verification system that validates organic import certificates, identifies fraudulent certificates and captures data.
- Would create a baseline for future technology development work.

Background: Fumigation

A fruit shipment arrives in Florida

APHIS conducts risk-based inspection of container

APHIS finds pest that could harm Florida orchards

Shipment must be treated (fumigated) to enter Florida

The importer is notified of the requirement

An organic importer has two options:

- Accept fumigation Sell the fruit, but not as organic
- Re-export shipment to place where pest isn't a risk

Finding 3: Fumigation Controls (1 of 3)

OIG:

Execute an MOU between AMS and APHIS to ensure that APHIS officials notify NOP officials when imported agricultural products are treated with NOP-prohibited substances at U.S. ports.

AMS:

 In January 2017, AMS and APHIS executed an MOU to document collaborative efforts to identify imported organic shipments of agricultural products that are treated for plant pests or are treated as a condition of entry.

Finding 3: Fumigation Controls (2 of 3)

OIG:

Request CBP to update the ACE system message sets to ensure APHIS officials are notified of steps to take when organic agricultural imports are treated with NOP-prohibited substances at U.S. ports.

AMS:

• AMS is working with APHIS to develop mechanisms within the APHIS systems to identify, track, and ensure that treated organic products are not sold, labeled or represented as organic.

Finding 3: Fumigation Controls (3 of 3)

OIG:

Develop and implement a plan for creating and implementing procedures for tracking organic products treated with NOP-prohibited substances at U.S. ports and ensuring those products are not sold, labeled or represented as organic.

AMS:

• AMS and APHIS are establishing procedures to notify importers and certifiers when organic products are treated and can no longer be sold, labeled, or represented as organic.

Finding 4: Timely Audits (1 of 2)

OIG:

Develop and implement performance measurements to collect, analyze, and report to management regarding the timeliness of onsite reviews for foreign countries that maintain a recognition agreement or equivalency arrangement with USDA.

AMS:

 AMS has a system to monitor audit frequency for accredited certifiers. This system will be used to track and report timeliness of onsite reviews AMS conducts with its recognition or equivalence partners.

Finding 4: Timely Audits (2 of 2)

OIG:

Revise NOP Handbook NOP 2100 (Equivalency **Determination Procedure**) to include the requirement that NOP officials conduct onsite audits of foreign countries that maintain equivalency arrangements with USDA every 2 years.

AMS:

• AMS will revise NOP 2100 to require NOP officials to conduct onsite audits of foreign countries that maintain equivalency arrangements every 2 years.

In Closing ...

- AMS accepted all findings and responded to all recommendations.
- AMS actions will be in place by July 2018.
- OIG reports have helped AMS shape NOP into the program that it is today – we thank them for their work and feedback.
