United States Sediment Standards for Milk and Milk Products

Effective September 1, 1977
(Reprinted - December 2018)
Non-Discrimination Policy: In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA’s TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at How to File a Program Discrimination Complaint and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

§ 58.2726 United States sediment standards for milk and milk products.

(a) The standards contained in this section consist of ten (10) sediment discs, prepared as hereinafter indicated, each of which represents one of the following:

0 mg. of sediment.
0.025 mg. of sediment.
0.050 mg. of sediment.
0.075 mg. of sediment.
0.10 mg. of sediment.
0.20 mg. of sediment.
0.30 mg. of sediment.
0.50 mg. of sediment.
1.00 mg. of sediment.
2.50 mg. of sediment.

(b) Each sediment disc was prepared in accordance with the procedure set forth in paragraph 9.04 of the publication “Standard Methods for the Examination of Dairy Products,” Ninth Edition, 1948, published by the American Public Health Association, 1790 Broadway, New York, New York. To facilitate the use and availability of these standards, a composite photograph of the ten (10) sediment discs is made a part hereof; and a copy of the photograph may be obtained, upon request, from Dairy Program, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250.

§ 58.2728 United States sediment standards for milk and milk products: Six 11/8” diameter filtering area (coarse sediment).

(a) The standards contained in this section consist of six (6) sediment discs prepared as hereinafter indicated, each of which is numbered consecutively 0 to 5 representing one of the following amounts of sediment on a 11/8” diameter filtering area.

0--0.0 mg.
1--0.5 mg.
2--1.5 mgs.
3--2.5 mgs.
4--3.0 mgs.
5--6.0 mgs.

(b) Each sediment disc was prepared from “coarse” sediment in accordance with the procedure set forth in paragraph 15.06 of “Standard Methods for the Examination of Dairy Products,” Eleventh Edition 1960, published by the American Public Health Association, 1790 Broadway, New York, New York. To facilitate the use
and availability of these standards, a composite photograph of the six (6) sediment discs is attached hereto and made a part hereof.

§ 58.2729 United States sediment standards for milk and milk products: Three 11/8” diameter filtering area (coarse sediment).

The standards contained in this section are those most commonly used for the examination of raw milk by the “off the-bottom method,” and are the same three (3) sediment discs numbered as 1, 2 and 3 showing 0.5 mg., 1.5 mgs., and 2.5 mgs. of sediment, respectively, as designated in §58.2728. To facilitate the use and availability of these standards, a composite photograph of these three (3) sediment discs is attached hereto and made a part hereof.

§ 58.2730 United States sediment standards for milk and milk products: Six 0.40” diameter filtering area (fine sediment).

(a) The standards contained in this section consist of six (6) sediment discs prepared as hereinafter indicated, each of which is numbered 0 to 5 representing one of the following amounts of sediment on a 0.40 inch diameter filtering area and is equivalent to the respective amounts of sediment on the 1c inch diameter filtering area as described in §58.2728:

0--0.00 mg. (0.0 mg. equivalent)
1--0.0625 mg. (0.5 mg. equivalent)
2--0.1875 mg. (1.5 mgs. equivalent)
3--0.3125 mg. (2.5 mgs. equivalent)
4--0.3750 mg. (3.0 mgs. equivalent)
5--0.7500 mg. (6.0 mgs. equivalent)

(b) Each sediment disc was prepared from “fine” sediment in accordance with the procedure set forth in paragraph 15.07 of “Standard Methods for the Examination of Dairy Products,” Eleventh Edition 1960. To facilitate the use and availability of these standards, a composite photograph of the six (6) sediment discs is attached hereto and made a part hereof.

§ 58.2731 United States sediment standards for milk and milk products: Three 0.40” diameter filtering area (fine sediment).

The standards contained in this section are those most commonly used for the examination of raw milk by the “stirred sample method” and are the same three (3) sediment discs numbered as 1, 2 and 3 showing 0.0625 mg., 0.1875 mg., and 0.3125 mg. of sediment, respectively, as designated in §58.2730. To facilitate the use and availability of these standards, a composite photograph of these three (3) sediment discs is attached hereto and made a part hereof.
§ 58.2732 United States sediment standards for milk and milk products: For 0.10", 0.14", and 0.20" diameter filtering areas (fine sediment).

(a) The standards contained in this section consist of three series of four (4) sediment discs prepared as hereinafter indicated, each of which is numbered 0 to 3 representing one of the following amounts of sediment on a 0.10 inch, 0.14 inch, and 0.20 inch filtering area and is equivalent to the respective amounts of sediment on the 11/8 inch diameter filtering area as described in §58.2728:

- **0.10 inch diameter filtering area.**
  - 0--0.0 mg. (0.0 mg. equivalent).
  - 1--0.0039 mg. (0.50 mg. equivalent).
  - 2--0.0118 mg. (1.50 mgs. equivalent).
  - 3--0.0196 mg. (2.50 mgs. equivalent).

- **0.14 inch diameter filtering area.**
  - 0--0.0 mg. (0.0 mg. equivalent).
  - 1--0.0078 mg. (0.50 mg. equivalent).
  - 2--0.0235 mg. (1.50 mgs. equivalent).
  - 3--0.0391 mg. (2.50 mgs. equivalent).

- **0.20 inch diameter filtering area.**
  - 0--0.0 mg. (0.0 mg. equivalent).
  - 1--0.0156 mg. (0.50 mg. equivalent).
  - 2--0.0469 mg. (1.50 mgs. equivalent).
  - 3--0.0781 mg. (2.50 mgs. equivalent).

(b) Each sediment disc was prepared from “fine” sediment in accordance with the procedure set forth in paragraph 15.07 of “Standard Methods for the Examination of Dairy Products,” Eleventh Edition, 1960 and paragraph 17.4, thirteenth edition, 1972. To facilitate the use and availability of these standards, a composite visual aid of the three series of four (4) sediment discs is attached hereto and made a part hereof.
