<sup>1</sup> Net pay price received by dairy farmers for milk. Includes all payments received for milk sold and all costs associated with marketing the milk. Price is a weighted average for the reporting area and is reported at the average butterfat test. Mailbox price does not include any Milk Income Loss Contract (MILC) payments. Mailbox price does include, for the most part, the assessment under the Cooperatives Working Together (CWT) program.

<sup>2</sup> Information is shown for those areas for which prices are reported for at least 75% of the milk marketed under Federal milk orders. The price shown is the weighted average of the prices reported for all orders that received milk from that area.

<sup>3</sup> Figures are annual averages - the weighted average of the monthly figures; except California, which is the simple average.

<sup>4</sup> Includes Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont.

<sup>5</sup> All counties to the east of those listed in <sup>9</sup>.
