Dear Sir:

In response to the article in the Lancaster Farming: The Farmer needs more income, Not LESS for our raw milk, there has to be a way to keep from taking income from the farmer, if the raw milk disappears there will be no need for the processing companies. Class III and class IV products are high priced in the stores, Cheeses/dry milk & milk, so some body's making money, its sure not the farmer.

We feel the processing companies need to share with the farmer, not take money away from the farmer. Without the farmer's who is going to eat? Help us to keep our Farmer in business.

yours truly,
Ken + Donna Bachtel
