

Dear Sir,

9-25-06

We need a fair Price for our milk. the stock market is not a honest way to Price milk. we need to figure in the dairy farmers cost of Production for our milk. we have to have \$14.47 Per Hundred to Break Even. At \$14.47 that doesn't allow you to make Improvements or Buy needed new machinery. our Pickup truck is a 1995 model & our Car is a 1997 model. The Price for our milk Per Hundred was in the \$12.00 range, that is very unacceptable. There is no Excuse for milk to be under \$15.00 Per Hundred.

Look at the Price Store are Charging for milk Butter Cheese & other dairy products. Wal mart sells milk as cheap as they can to Bring Customers in to Buy other things. Thank you.

Yours Truly
Edwin Johnson
Dairy Producer
