USDA Organic Action Plan
Betsy Rakola, Organic Policy Advisor

October 27, 2014
Overview

- Organic Policy Advisor Role
- Organic Literacy Initiative update
- Organic Working Group update
- Stakeholder engagement
Organic Policy Advisor role

• Permanent staff position advising the Office of the Secretary
• Coordinates USDA Organic Working Group, develops fiscal-year specific action plans
• Implements USDA’s 2013 Departmental Guidance on Organic Agriculture
• Participates on other inter-agency USDA initiatives
Organic Literacy Initiative

Farm Bill program implementation update

- Organic Research and Extension Initiative - $19 million
- Cost share increased - $11 million available through states
- Organic data initiative restored - $5 million for data collection
- Organic crop insurance expanding
- Research and promotion “checkoff” exemption
- Option for proposal of organic checkoff program
Secretary Vilsack’s May 2013 departmental guidance on organic agriculture outlined 5 priorities, which form the basis of the Organic Working Group’s project action teams:

- Training and outreach
- Supporting transition to organic
- Regulatory reciprocity (reducing paperwork)
- Research
- Data
OWG Themes: Reciprocity

Reciprocity team goals

1. **Conservation** - ongoing: Natural Resources Conservation Service and National Organic Program (NOP) are coordinating conservation program requirements and organic system plans.

2. **Non-GE label claims** – complete: Food Safety and Inspection Service streamlined procedures for certified organic meat and poultry processors

3. **Crop insurance** - new: Risk Management Agency and NOP will conduct a needs assessment for crop insurance documentation.
Research team goals

1. Review and respond to NOSB research priorities.
2. Conduct a stakeholder needs assessment of organic research priorities and develop a white paper on critical research needs.
Research highlights

Organic Research & Extension Initiative research highlights

• Public corn breeding to increase cultivar access
• Natural strategies to alleviate enteric pathogens in poultry
• Cover cropping and no till in organic systems
• Assessing organic agriculture's impact on climate change mitigation

Rodale Institute visit to USDA
Data team goals

1. Publish an inventory of data regarding organic and non-genetically engineered agriculture at USDA
2. Improve trade codes for better tracking of exports and imports
Other data highlights

• Organic special tabulation, 2012 census
  
  [link](http://www.agcensus.usda.gov/Publications/2012/Online_Resources/Special_Organics_Tabulation/organictab.txt)

• Organic producer survey – publishing in 2015
  – Data is key to developing new tools for organic producers. Please help us spread the word!
Training and outreach team goals

1. Update and republish the Organic Literacy Initiative
2. Work with external partners to distribute organic resources beyond the USDA
Supporting the transition to organic team goals

1. Assess technical and financial resources for organic transition at USDA
2. Create websites and fact sheets explaining resources for farmers and processors to transition to organic
Stakeholder engagement

Focus on stakeholder engagement through outreach and education

• We want to hear from you!
• Organic policy advisor will host a webinar series on OWG topics during the winter and early spring to solicit stakeholder comments and ideas.
• USDA & NOP will participate in several conferences and annual meetings this fall/winter.
Thank you
