Dear Sir,

Ory to whom it may concern,

It has come to my attention that there has been an increase proposed in the milk allowance program.

My question to you is where is your common sense?!!

How can you continue to rob the dairy producers when we have already been robbed beyond the limit of our endurance?

It does not take a PhD to do the math at $12.00 per hundredweight for milk that costs approx. $0.65 to produce. The vital part of the industry is being shafted out of business. Without the producer, the processor and distributor will be left sitting high and dry, and starving to boot. It would reek there right.
The time has come to smash the pricing system.

My suggestion is to eliminate any pricing from the CME. Eliminate Federal Order pricing. The government should not be involved at all and stop importing Dairy products. Let supply and demand for each region control pricing. Large Corporations like DFA, DMG Dean Foods need to be broken into tiny particulars.

If we are to save the Dairy industry and economy, we need to act fast. Stop the greed and direct revenues where they belong. Where is your common sense? ????

Samuel J. Zook
